This proposed rule addresses covered subject items in section I above and would preempt state, local, and Tribal requirements not meeting the “substantively the same” standard. While the proposed rule may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this proposed rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct an Initial Regulatory Flexibility Analysis (IRFA) for a proposed rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the proposed rule in the rulemaking would not have a significant economic impact on a substantial number of small entities. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”)⁹ obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page.¹⁰ This proposed rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The proposed rule is expected to reduce burdens. Therefore, PHMSA certifies the proposed rule does not have a

significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This proposed rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this proposed rule in accordance with NEPA and has preliminarily determined that the rulemaking would not adversely affect safety and therefore would not significantly affect the quality of the human and natural environment. The public is invited to comment on the impact of the proposed action.

I. Executive Order 13175

PHMSA analyzed this proposed rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”)¹¹ and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the proposed rule and determined that it would not significantly or uniquely

affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this proposed rule would not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests.

PHMSA has analyzed this NPRM in accordance with the Paperwork Reduction Act. PHMSA proposes to revise the approved information collections under the following OMB Control Numbers: OMB Control No. 2137–0559, “Rail Carrier and Tank Car Tanks—Transportation of Hazardous Materials by Rail.”

This NPRM proposes to remove § 174.20(b), which requires reporting to the AAR BOE regarding any restrictions over any portion of its lines. PHMSA currently accounts for 34 offerors submitting 1.5 reports a year. Each report takes 20 minutes resulting in a reduction of 17 hours of annual burden.

PHMSA specifically requests comments on the information collection and recordkeeping burdens associated with developing, implementing, and maintaining these requirements for approval under this NPRM. Address written comments to the Dockets Unit as identified in the **ADDRESSES** section of this NPRM. PHMSA must receive comments regarding information collection burdens prior to the close of the comment period identified in the **DATES** section of this NPRM. Notwithstanding any other provision of law, no person is required to respond to a collection of information unless such collection displays a valid OMB control number.

Please direct your requests for a copy of this information collection to Steven Andrews, Office of Hazardous Materials Standards (PHH–12), Pipeline and Hazardous Materials Safety Administration, 1200 New Jersey Avenue SE, 2nd Floor, Washington, DC 20590–0001.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”)¹² requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of

international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the proposed rule and has determined that its regulatory amendments would not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”)¹³ directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the proposed rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

List of Subjects

49 CFR Part 171

Exports, Hazardous materials transportation, Hazardous waste, Imports, Incorporation by reference, Reporting and recordkeeping requirements.

49 CFR Part 174

Hazardous materials transportation, Incorporation by reference, Radioactive materials, Railroad safety.

In consideration of the foregoing, PHMSA proposes to amend 49 CFR chapter I as follows:

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

■ 1. The authority citation for part 171 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; Pub. L. 101–410 section 4; Pub. L. 104–134, section 31001; Pub. L. 114–74 section 701 (28 U.S.C. 2461 note); 49 CFR 1.81 and 1.97.

■ 2. In § 171.7, revise “Table 1 to 49 CFR 171.7—Materials Not Incorporated by Reference” by revising the “Bureau of Explosives” entry in the table to read as follows:

§ 171.7 Reference material.

* * * * *

TABLE 1 TO 49 CFR 171.7—MATERIALS NOT INCORPORATED BY REFERENCE

Source and name of material	49 CFR reference
* * * * *	*
Bureau of Explosives, Hazardous Materials Systems (BOE), Association of American Railroads, American Railroads Building, 50 F Street NW, Washington, DC 20001:	
Fetterley’s Formula (The Determination of the Relief Dimensions for Safety Valves on Containers in which Liquefied gas is charged and when the exterior surface of the container is exposed to a temperature of 1,200 °F.)	173.315
* * * * *	*

* * * * *

PART 174—CARRIAGE BY RAIL

■ 3. The authority citation for part 174 continues to read as follows:

Authority: 49 U.S.C. 5101–5128; 33 U.S.C. 1321; 49 CFR 1.81 and 1.97.

§ 174.20 [AMENDED].

■ 4. Remove and reserve § 174.20:

* * * * *

■ 5. In § 174.55, revise paragraph (a) to read as follows:

§ 174.55 General requirements.

(a) Each package containing a hazardous material being transported by rail in a freight container or transport

vehicle must be loaded so that it cannot fall or slide and must be safeguarded in such a manner that other freight cannot fall onto or slide into it under conditions normally incident to transportation. When this protection cannot be provided by using other freight, it must be provided by blocking and bracing.

* * * * *

■ 6. In § 174.67:

- a. Revise paragraph (b)(3);
- b. Revise paragraph (d); and
- c. Remove and reserve paragraph (n).

To read as follows:

§ 174.67 Tank car unloading.

* * * * *

(b) * * *

(3) *Interior type.* All debris must be carefully removed from around the cover before the yoke is unscrewed.

* * * * *

(d) When unloading through the bottom outlet of a car equipped with an interior manhole type cover, and in each case where unloading is done through the manhole (unless a special cover with a safety vent opening and a tight connection for the discharge outlet is used), the manhole must be protected against the entrance of sparks or other sources of ignition of vapor.

* * * * *

(n) [Reserved].

* * * * *

¹² 77 FR 26413 (May 4, 2012).

¹³ 86 FR 26633 (May 17, 2021).

■ 7. In § 174.101, revise paragraphs (o)(2) and (3) as follows:

§ 174.101 Loading Class 1 (explosive) materials.

* * * * *

(o) * * *

(2) Each truck body or trailer must be secured on the rail car so that it will not permanently change position or show evidence of failure or impending failure of the method of securing the truck body or trailer under impact from each end of at least 13 km (8.1 miles) per hour. Its efficiency must be determined by actual test, using dummy loads equal in weight and general character to the material to be shipped.

(3) Lading must be loaded, blocked, and braced within or on the truck body or trailer so that the lading will not change position under impact from each end of at least 13 km (8.1 miles) per hour.

* * * * *

■ 8. In § 174.112, revise paragraphs (b) and (c)(3) as follows:

§ 174.112 Loading Division 1.3 materials and Division 1.2 (explosive) materials (Also see § 174.101).

* * * * *

(b) Except as provided in § 174.101(b), (n), or (o), Division 1.3 materials and Division 1.2 (explosive) materials must be transported in a closed car or container car which is in good condition, and into which sparks cannot enter. The car does not require the car certificates prescribed in § 174.104(c) through (f). If the doors are not tight, they must be stripped to prevent the entrance of sparks. Wood floored cars must be equipped with spark shields (see § 174.104). Packages of Division 1.3 materials and Division 1.2 (explosive) materials must be blocked and braced to prevent their shifting and possible damage due to shifting of other freight during transportation.

(c) * * *

(3) Packages of Division 1.2 materials and Division 1.3 (explosive) materials are blocked and braced within the truck body, trailer, or container to prevent their shifting and possible damage due to shifting of other freight during transportation (ends, sidewalls, or doors of the truck body, trailer, or container may not be relied on to prevent the shifting of heavy loads).

■ 9. In § 174.115, revise paragraphs (a) and (b)(3) as follows:

§ 174.115 Loading Division 1.4 (explosive) materials.

(a) Division 1.4 (explosive) materials may be loaded into any closed car in good condition, or into any container

car in good condition. Car certificates are not required. Packages of Division 1.4 (explosive) materials must be blocked and braced to prevent their shifting and possible damage due to shifting of other freight during transportation.

(b) * * *

(3) Packages of Division 1.4 (explosive) materials are blocked and braced within the truck body, trailer, or container to prevent their shifting and possible damage due to shifting of other freight during transportation. Ends, side walls, or doors of the truck body, trailer, or container may not be relied on to prevent shifting of heavy loads.

■ 10. In § 174.290, revise paragraph (e) to read as follows:

§ 174.290 Materials extremely poisonous by inhalation shipped by, for, or to the Department of Defense.

* * * * *

(e) Bombs, projectiles, and cannon ammunition being transported by rail must be loaded, blocked, and braced as shown in Department of Defense specifications. When a shipment is loaded in a gondola car it must be securely blocked and braced and not loaded higher than the sides of the car.

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 172

[Docket No. PHMSA–2025–0098 (HM–268J)]

RIN 2137–AG12

Hazardous Materials: Reduce Training Burdens for America's Farmers

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This NPRM proposes to streamline the exceptions for in-depth security training requirements for farmers by raising the dollar amount of the exception threshold to account for inflation.

DATES: Comments must be received on or before September 2, 2025.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0098 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

Instructions: Please include the docket number PHMSA–2025–0098 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. You may ask PHMSA to provide confidential

treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Steven Andrews, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at steven.andrews@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

FOR FURTHER INFORMATION CONTACT: Arthur Pollack, Transportation Regulations Specialist, 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, arthur.pollack@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

PHMSA proposes to revise the exception in § 172.800(c) to the in-depth security training requirements for farmers with less than \$500,000 annually in gross receipts from the sale of agricultural commodities or products. PHMSA has preliminarily determined this provision needs to be updated to eliminate undue burdens on small farmers. The current income threshold, established under the HM–240¹ final rule in 2005, has not been adjusted in the intervening years to account for inflation. To better reflect current economic realities, PHMSA is proposing to raise this limit to \$825,000 annually.²

This adjustment will help reduce unwarranted compliance burdens on small farmers whose hazardous materials operations pose minimal security risks. The proposed revision will give affected entities, in this case farmers, regulatory relief by providing an exception from in-depth hazardous materials training requirements. PHMSA expects the proposed amendment to improve the ability of

farmers to provide abundant, reliable, affordable domestically produced foods in response to residential, commercial, and industrial demand. PHMSA does not expect the proposed revision to have any adverse impact on safety.

II. Regulatory Analysis and Notices

A. Legal Authority

This proposed rule is published under the authority of the Secretary of Transportation set forth in the Federal Hazardous Materials Transportation Laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Orders 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This proposed rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B

and preliminarily determined that this proposed rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for small farmers whose income threshold exceeds \$500,000 by increasing the exception limit to \$825,000. PHMSA expects those cost savings will also result in reduced costs for the public to whom those entities generally transfer a portion of their compliance costs.

C. Executive Orders 14192 and 14219

This proposed rule, if finalized as proposed, is expected to be an E.O. 14192 deregulatory action.³ PHMSA seeks data that would be helpful to generate an estimate of the cost savings from this rule. PHMSA’s initial estimates are that the total costs of the rule on the regulated community will be less than zero. Nor does this proposed rule does implicate any of the factors identified in section 2(a) of E.O. 14219 indicative of a regulation that is “unlawful . . . [or] that undermine[s] the national interest.”⁴

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”) a national emergency to address the United States’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources. PHMSA preliminarily finds this proposed rule is consistent with each of E.O. 14156 and E.O. 14154 because it will not hinder or unduly burden the transportation or production of energy or energy-related products.

However, this proposed rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this proposed rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use, as further discussed in the RIA; OIRA has therefore not designated this proposed rule as a significant energy action.

³ 90 FR 9065 (Jan. 31, 2025).

⁴ 90 FR 10583 (Feb. 19, 2025).

¹ 70 FR 73156 (Dec. 9, 2005).

² \$500,000*1.65. PHMSA used cumulative inflation of 65% from 2005 to 2025, applying the Bureau of Labor Statistics Consumer Price Index for All Urban Consumers, to adjust the gross receipts.

E. Executive Order 13132: Federalism

PHMSA analyzed this proposed rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009. E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.” The Federal Hazardous Materials Transportation Laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts state, local, and tribal requirements on certain covered subjects, unless the non-federal requirements are “substantively the same” as the federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This proposed rule addresses covered subject items in paragraph I above and would preempt state, local, and Tribal requirements not meeting the “substantively the same” standard. While the proposed rule may (when finalized) operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this proposed rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation Laws. Therefore, the consultation and funding

requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct an Initial Regulatory Flexibility Analysis (IRFA) for a proposed rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the proposed rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This proposed rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The proposed rule is expected to reduce burdens. Therefore, PHMSA certifies the proposed rule does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This proposed rule does not impose unfunded mandates under UMRA. PHMSA does not expect the proposed rule will result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this proposed rule in accordance with NEPA and has preliminarily determined that the rulemaking will not adversely affect

safety and therefore will not significantly affect the quality of the human and natural environment. The public is invited to comment on the impact of the proposed action.

I. Executive Order 13175

PHMSA analyzed this proposed rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”)⁵ and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the proposed rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this proposed rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”)⁶ requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared

⁵ 65 FR 67249 (Nov. 9, 2000).

⁶ 77 FR 26413 (May 4, 2012).

challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the proposed rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”)⁷ directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the proposed rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

List of Subjects in 49 CFR Part 172

Hazardous materials transportation, Hazardous waste, Labeling, Markings, Packaging and containers, Reporting and recordkeeping requirements.

In consideration of the foregoing, PHMSA proposes to amend 49 CFR chapter I as follows:

PART 172—HAZARDOUS MATERIALS TABLE, SPECIAL PROVISIONS, HAZARDOUS MATERIALS COMMUNICATIONS, EMERGENCY RESPONSE INFORMATION, AND TRAINING REQUIREMENTS

■ 1. The authority citation for part 172 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96 and 1.97.

■ 2. In § 172.800, paragraph (c) is revised to read as follows:

§ 172.800 Purpose and applicability.

* * * * *

(c) *Exceptions.* Transportation activities of a farmer, who generates less than \$825,000 annually in gross receipts from the sale of agricultural commodities or products, are not subject to this subpart if such activities are:

- (1) Conducted by highway or rail;
- (2) In direct support of their farming operations; and
- (3) Conducted within a 150-mile radius of those operations.

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 172

[Docket No. PHMSA–2025–0092 (HM–268D)]

RIN 2137–AG06

Hazardous Materials: Reducing Undue Paperwork Burdens to Domestic Carriers

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This NPRM proposes to revise the Hazardous Materials Regulations (HMR) to provide domestic carriers the option to maintain electronic copies of emergency response information rather than requiring a hard copy printed on paper.

DATES: Comments must be received on or before September 2, 2025.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0092 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

Instructions: Please include the docket number PHMSA–2025–0092 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. You may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1)

⁷ 86 FR 26633 (May 17, 2021).

mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Steven Andrews, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at steven.andrews@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

FOR FURTHER INFORMATION CONTACT: Steven Andrews, Transportation Regulations Specialist, 1200 New Jersey Avenue SE Washington, DC 20590, 202–366–8553, steven.andrews@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

PHMSA is proposing to revise Part 172 of Chapter I of Title 49 of the Code of Federal Regulations (CFR). Specifically, PHMSA is proposing to revise § 172.602 “Emergency response information.” PHMSA has preliminarily determined this provision is unduly burdensome as written.

The requirements for emergency response information that must accompany hazardous materials during transportation are outlined in § 172.602. This section mandates that the emergency response information include details such as the basic description of the hazardous material, immediate health risks, and emergency procedures. This information is also required to be accessible in the event of a hazardous materials incident.

PHMSA received a petition for rulemaking¹ from the Council on the Safe Transportation of Hazardous Articles (COSTHA) on February 10, 2022, requesting that PHMSA revise § 172.602 to permit the use of electronic emergency response information. In its petition, COSTHA notes that the availability of electronic tablets, cell phones, and tracking devices provides access to emergency response

information in an electronic format. The request to allow the use of electronic emergency response information would give drivers immediate access to this information on an electronic device which they could display to an inspector. COSTHA also notes that the Emergency Response Guidebook (ERG) app is free to download on any device, is easy to use and contains the same information as the printed document. The petition for rulemaking was accepted by PHMSA on November 2, 2022.

PHMSA expects that allowing industry the option to use electronic emergency response information would reduce the regulatory burden on hazardous materials carriers by allowing for the emergency response information to be stored electronically. In this NPRM, PHMSA is proposing to revise § 172.602 to allow for emergency response information to be saved and presented in an electronic format rather than relying solely on printed copies. PHMSA does not expect the proposed revisions will have any adverse impact on safety.

II. Regulatory Analysis and Notices

A. Legal Authority

This proposed rule is published under the authority of the Secretary of Transportation set forth in the Federal Hazardous Materials Transportation Laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”),² as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and

benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This proposed rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with E.O. 12866 as implemented by DOT Order 2100.6B and made a preliminarily determination that this proposed rule may result in cost savings by providing greater flexibility to shippers and carriers of hazardous materials to meet emergency response requirements.

C. Executive Orders 14192 and 14219

This proposed rule, if finalized as proposed, is expected to be an E.O. 14192 deregulatory action.³ PHMSA seeks data that would be helpful to generate an estimate of the cost savings from this rule. PHMSA’s initial estimates are that the total costs of the rule on the regulated community will be less than zero. Nor does this proposed rule does implicate any of the factors identified in section 2(a) of E.O. 14219 indicative of a regulation that is “unlawful . . . [or] that undermine[s] the national interest.”⁴

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”) a national emergency to address the United States’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional

¹ P–1764—Council on the Safe Transportation of Hazardous Articles (COSTHA)—PHMSA–2022–0028.

² 58 FR 51735 (Oct. 4, 1993).

³ 90 FR 9065 (Jan. 31, 2025).

⁴ 90 FR 10583 (Feb. 19, 2025).

⁵ 90 FR 8353 (Jan. 29, 2025).

⁶ 90 FR 8353 (Jan. 29, 2025).

affected entities. PHMSA preliminarily finds this proposed rule is consistent with each of E.O. 14156 and E.O. 14154. The proposed rule will reduce regulatory burdens, to include for entities that ship energy-related products and products that are generally used in supply chains related to energy production. PHMSA therefore expects the regulatory amendments in this proposed rule will contribute to the ability of shippers and carriers of hazardous materials to provide abundant, reliable, affordable energy-related products in response to residential, commercial, and industrial demand.

However, this proposed rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”),⁷ which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this proposed rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; and OIRA has therefore not designated this proposed rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this proposed rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”)⁸ and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009.⁹ E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.” The Federal Hazardous Materials Transportation laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts state, local, and Tribal requirements on certain covered subjects, unless the non-federal requirements are “substantively the same” as the federal requirements, including the following:

- (1) The designation, description, and classification of hazardous material;
- (2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

- (3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

- (4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

- (5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This proposed rule addresses covered subject items outlined in paragraph I above and would preempt state, local, and Tribal requirements not meeting the “substantively the same” standard. While the proposed rule may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this proposed rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct an Initial Regulatory Flexibility Analysis (IRFA) for a proposed rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the proposed rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”)¹⁰ obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page.¹¹ This proposed rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The proposed rule is expected to reduce burdens. Therefore, PHMSA certifies the

proposed rule does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This proposed rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this proposed rule in accordance with NEPA and has preliminarily determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment. The public is invited to comment on the impact of the proposed action.

I. Executive Order 13175

PHMSA analyzed this proposed rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”)¹² and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the proposed rule and determined that it

¹⁰ 67 FR 53461 (Aug. 16, 2002).

¹¹ DOT, “Rulemaking Requirements Related to Small Entities,” <https://www.transportation.gov/regulations/rulemaking-requirements-concerning-small-entities> (last accessed Sept 3, 2024).

¹² 65 FR 67249 (Nov. 9, 2000).

⁷ 66 FR 28355 (May 22, 2001).

⁸ 64 FR 43255 (Aug. 10, 1999).

⁹ 74 FR 24693 (May 22, 2009).

will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's regulatory amendments have a broad, national scope; therefore, this proposed rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 ("Promoting International Regulatory Cooperation")¹³ requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international

standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the proposed rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 ("Improving the Nation's Cybersecurity")¹⁴ directed the Federal government to improve its efforts to identify, deter, and respond to "persistent and increasingly sophisticated malicious cyber campaigns." PHMSA has considered the effects of the proposed rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

List of Subjects in 49 CFR Part 172

Education, Hazardous materials transportation, Hazardous waste, Incorporation by reference, Labeling, Markings, Packaging and containers, Reporting and recordkeeping requirements.

For the reasons set forth above, PHMSA proposes to amend 49 CFR part 172 as follows:

PART 172—HAZARDOUS MATERIALS TABLE, SPECIAL PROVISIONS, HAZARDOUS MATERIALS COMMUNICATIONS, EMERGENCY RESPONSE INFORMATION, TRAINING REQUIREMENTS, AND SECURITY PLANS

■ 1 The authority citation for part 172 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96, and 1.97.

■ 2. In § 172.602, revise paragraph (b)(1) to read as follows:

§ 172.602 Emergency response information.

[Docket No. PHMSA–2025–0104 (HM–268P)]

RIN 2137–AG18

Hazardous Materials: Adoption of Department of Transportation Special Permit 21478

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: PHMSA proposes to adopt the provisions of DOT special permit (SP) 21478 into the Hazardous Materials Regulations (HMR). Adoption of this special permit would authorize intermediate bulk containers (IBCs) containing a residue of a certain hazardous materials to be transported without shipping papers, placards, and motor vehicle marking of the UN identification (ID) number subject to additional operational controls. The proposed revisions provide relief from undue burdens of hazard communication requirements for low-risk transportation of empty packaging and eliminate the need for special permit renewal requests.

DATES: Comments must be received on or before September 2, 2025.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0104 using any of the following methods:

Regulations Specialist, 1200 New Jersey Avenue SE, Washington, DC 20590, 202-366-8553, ryan.larson@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

PHMSA proposes to revise certain provisions in Title 49 Chapter I, Parts 172 and 173 of the Code of Federal Regulations (CFR). Currently, the HMR (49 CFR parts 171-180) at § 173.29 generally requires "empty" packagings, including IBCs, containing only residue of a hazardous material to be offered for transportation and transported in the same manner as when they contained a greater quantity of that hazardous material. There are some exceptions to this general requirement, such as for non-bulk (smaller) sized packaging, subject to certain conditions. However, the exceptions do not apply to IBCs. This means that offering or transporting an IBC containing only a residue of a hazardous material would generally still necessitate all hazardous communication for transport—such as shipping papers, labeling, or placarding—and transport vehicle UN ID number marking.

Specifically, the relief provided for an "empty" non-bulk packaging in § 173.29(c) states that non-bulk packaging containing only the residue of hazardous materials covered by Table 2 of § 172.504—a table of comparatively lower hazard Classes and Divisions of materials—are excepted from certain hazard communication requirements of the HMR. These packages do not need to be included in determining the need for placarding and are not subject to the shipping paper requirements when collected and transported by a for-hire or private carrier for reconditioning, remanufacture, or reuse.

PHMSA issued DOT-SP 21478 to grant relief from the requirement to offer for transportation and transport IBCs containing only residue of hazardous materials in a similar manner to that offered to non-bulk packagings. This special permit is currently held by 42 entities. DOT-SP 21478 offers relief for transport of "empty" IBCs subject to conditions and limitations. Specifically, eligible IBCs are those constructed of steel, rigid plastic, and composite IBCs. In addition, hazardous materials contained in the IBCs are limited to those of Class or Division 3, 4.1, 5.1, 6.1, 8, and 9 hazardous materials in packing groups II and III. Further, the IBCs are still required to be marked and labelled, maintaining important methods of hazard communication for handling and compatibility purposes and in the event of an accident requiring an emergency response. Lastly, by limiting the

capacity of the IBCs, the safety concerns surrounding the actual quantities of residue are further mitigated.

In granting this special permit, PHMSA evaluated the safety hazards associated with the hazard communication exceptions and determined that there is an equivalent level of safety between transportation of "empty" IBCs and "empty" non-bulk packages. PHMSA also notes that, comparatively, the typical quantities of residue in these IBCs are less than the quantities that the Environmental Protection Agency (EPA) considers for a container to be empty under its Resource Conservation and Recovery Act regulations for residues of hazardous waste. EPA defines this amount as 0.3% or less of material by weight of the total capacity for a container greater than 119 gallons—the cutoff for a packaging to be considered non-bulk. Anything greater is bulk and IBCs are considered bulk packagings (see 40 CFR 261.7). As part of the evaluation, PHMSA determined there were no compliance violations or incidents associated with transportation conducted under this special permit.

PHMSA proposes to adopt the provisions of DOT-SP 21478 into a new paragraph (d) in § 173.29 (and redesignate the current paragraphs in the section) to authorize the transportation of "empty" IBCs, in a similar manner to non-bulk packagings allowed in § 173.29(c). PHMSA is also proposing a conforming amendment to § 172.514 to make clear that IBCs shipped in accordance with the conditions of the empty packaging exception are not subject to placarding. PHMSA is proposing to make conforming amendments in § 172.331 "Bulk packagings other than portable tanks, cargo tanks, tank cars and multi-unit tank car tanks," § 172.504, "General placarding requirements," and § 172.514, "Bulk packagings." These proposed revisions accommodate the changes proposed in § 173.29 discussed above. PHMSA does not expect the proposed HMR revisions to have any adverse impact on safety.

II. Regulatory Analysis and Notices

A. Legal Authority

This proposed rule is published under the authority of the Secretary of Transportation set forth in the Federal Hazardous Materials Transportation laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Orders 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”),¹ as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This proposed rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and made a preliminary determination that this proposed rule would result in cost savings by reducing regulatory burdens and regulatory uncertainty for affected entities by providing relief from regulatory requirements to those offering and transporting empty IBCs containing only hazardous materials residue. PHMSA expects those cost savings would also result in reduced costs for the public to whom those entities generally transfer a portion of their compliance costs.

C. Executive Orders 14192 and 14219

This proposed rule, if finalized as proposed, is expected to be an E.O. 14192 deregulatory action.² PHMSA seeks data that would be helpful to generate an estimate of the cost savings from this rule. PHMSA’s initial estimates are that the total costs of the rule on the regulated community will be less than zero. Nor does this proposed rule does implicate any of the factors identified in section 2(a) of E.O. 14219 indicative of a regulation that is “unlawful . . . [or] that undermine[s] the national interest.”³

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”) ⁴ a national emergency to address the United States’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”) ⁵ asserts a Federal policy to unleash American energy by ensuing access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional offerors and carriers. PHMSA preliminarily finds this proposed rule is consistent with each of E.O. 14156 and E.O. 14154. The proposed rule would give affected entities relief from the HMR when offering or transporting empty IBCs containing only residue, many of which are used for the transportation of petroleum products, lubricants, and other chemicals in the construction and energy industries. PHMSA therefore expects the regulatory amendments in this proposed rule would in turn facilitate affected entities’ ability to provide abundant, reliable, and affordable products in response to residential, commercial, and industrial demand.

However, this proposed rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”),⁶ which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this proposed rule is not a significant action under E.O. 12866, it would not have a significant adverse effect on supply, distribution, or energy use;

OIRA has therefore not designated this proposed rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this proposed rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”) ⁷ and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009.⁸ E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.” The Federal Hazardous Materials Transportation laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts state, local, and tribal requirements on certain covered subjects, unless the non-federal requirements are “substantively the same” as the federal requirements, including the following:

- (1) The designation, description, and classification of hazardous material;
- (2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;
- (3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;
- (4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and
- (5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This proposed rule addresses covered subject items (1), (2), and (3) above and would preempt state, local, and Tribal requirements not meeting the “substantively the same” standard. While the proposed rule may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive

² 90 FR 9065 (Jan. 31, 2025).

³ 90 FR 10583 (Feb. 19, 2025).

⁴ 90 FR 8353 (Jan. 29, 2025).

⁵ 90 FR 8353 (Jan. 29, 2025).

⁶ 66 FR 28355 (May 22, 2001).

⁷ 64 FR 43255 (Aug. 10, 1999).

⁸ 74 FR 24693 (May 22, 2009).

¹ 58 FR 51735 (Oct. 4, 1993).

effect of the regulatory amendments in this proposed rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct an Initial Regulatory Flexibility Analysis (IRFA) for a proposed rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the proposed rule in the rulemaking would not have a significant economic impact on a substantial number of small entities. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) ⁹ obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page.¹⁰ This proposed rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The proposed rule is expected to reduce burdens. Therefore, PHMSA certifies the proposed rule does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This proposed rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this proposed rule in accordance with NEPA and has preliminarily determined that the rulemaking would not adversely affect safety and therefore would not significantly affect the quality of the human and natural environment. The public is invited to comment on the impact of the proposed action.

I. Executive Order 13175

PHMSA analyzed this proposed rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”) ¹¹ and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the proposed rule and determined that it would not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this proposed rule would not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking eliminates the need for persons to renew a special permit, resulting in a decrease in paperwork burden for special permit holders.

PHMSA estimates the reduction in information collection burden as follows:

OMB Control No. 2137–0051:
Rulemaking, Special Permits, and Preemption Requirements.

Decrease in Annual Number of Respondents: 11.

Decrease in Annual Responses: 11.

Decrease in Annual Burden Hours: 16.

Decrease in Annual Burden Cost: \$0.

This proposed rule also creates a requirement for shippers using the new provisions in § 173.29 to have a document (in paper or electronic form), in lieu of a shipping paper, accompanying the IBCs that denotes the phrase “Residue IBC(s)” and indicates the number of IBCs containing hazardous materials for each Class or Division of material transported on transport vehicle. PHMSA estimates that 44 respondents will ship 50 shipments per year under this provision resulting in 2,200 shipments per year. PHMSA estimate it will take 30 seconds each for offerors to create this certification resulting in 19 burden hours (2,200 responses × 30 seconds per response). PHMSA will place this information collection under OMB Control Number 2134–0034 “Shipping Papers and Emergency Response Information.” PHMSA estimates there are no additional burden cost associated with this information collection.

PHMSA specifically requests comments on the information collection and recordkeeping burdens associated with developing, implementing, and maintaining these requirements for approval under this NPRM. Address written comments to the Dockets Unit as identified in the **ADDRESSES** section of this NPRM. PHMSA must receive comments regarding information collection burdens prior to the close of the comment period identified in the **DATES** section of this NPRM. Notwithstanding any other provision of law, no person is required to respond to a collection of information unless such collection displays a valid Office of Management and Budget (OMB) control number.

Please direct your requests for a copy of this information collection to Steven Andrews, Office of Hazardous Materials Standards (PHH–12), Pipeline and Hazardous Materials Safety Administration, 1200 New Jersey Avenue SE, 2nd Floor, Washington, DC 20590–0001.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”)¹² requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the proposed rule and has determined that its regulatory amendments would not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”)¹³ directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the proposed rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

List of Subjects

49 CFR Part 172

Education, Hazardous materials transportation, Hazardous waste, Incorporation by reference, Labeling, Markings, Packaging and containers, Reporting and recordkeeping requirements.

49 CFR Part 173

Hazardous materials transportation, packaging and containers, radioactive materials, uranium, reporting, and recordkeeping requirements.

In consideration of the foregoing, PHMSA proposes to amend 49 CFR chapter I as follows:

PART 172—HAZARDOUS MATERIALS TABLE, SPECIAL PROVISIONS, HAZARDOUS MATERIALS COMMUNICATIONS, EMERGENCY RESPONSE INFORMATION, TRAINING REQUIREMENTS, AND SECURITY PLANS

■ 1. The authority citation for part 172 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96, and 1.97.

■ 2. In § 172.331, add new paragraph (d) to read as follows:

§ 172.331 Bulk packagings other than portable tanks, cargo tanks, tank cars and multi-unit tank car tanks.

(d) *Exceptions.* Transport vehicles or freight containers used to transport empty IBCs in accordance with § 173.29(d) of this subchapter are not subject to identification number marking requirements.

■ 3. In § 172.504, revise paragraph (d) to read as follows:

§ 172.504 General placarding requirements.

(d) *Exceptions for empty packages.*

(1) *Non-bulk.* Except for hazardous materials subject to § 172.505, a non-bulk packaging that contains only the residue of a hazardous material covered by Table 2 of paragraph (e) of this section need not be included in determining placarding requirements.

(2) *IBCs.* Transport vehicles or freight containers used to transport empty IBCs in accordance with § 173.29(d) of this subchapter are not subject to placarding requirements of this part.

■ 4. In § 172.514, revise paragraph (b) to read as follows:

§ 172.514 Bulk packagings.

(b) Each bulk packaging that is required to be placarded when it contains a hazardous material, must remain placarded when it is emptied, unless it—

(1) Is sufficiently cleaned of residue and purged of vapors to remove any potential hazard;

(2) Is refilled, with a material requiring different placards or no placards, to such an extent that any residue remaining in the packaging is no longer hazardous;

(3) Contains the residue of a hazardous substance in Class 9 in a quantity less than the reportable quantity, and conforms to § 173.29(b)(1) of this subchapter; or

(4) Is an empty IBC transported in accordance with § 173.29(d).

* * * * *

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

■ 5. The authority citation for part 173 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96 and 1.97.

■ 6. In § 173.29, redesignate current paragraphs (d) through (h) as paragraphs (e) through (i) and add new paragraph (d) to read as follows:

§ 173.29 Empty packagings.

* * * * *

(d) A steel, rigid plastic, or composite IBC not exceeding 2,100 L (550 gallons) containing only the residue of hazardous materials in packing group II or III of hazard Class or Division 3, 4.1, 5.1, 6.1, 8, and 9, are excepted from subpart C (shipping papers). Furthermore, transport vehicles and freight containers are not subject to the subpart F (placarding) of Part 172 of this subchapter and the marking requirements in § 172.331 (UN ID Number), provided the following conditions are met:

(1) Prior to shipment, the offeror must ensure that no more than 0.3 percent by weight of the total capacity of the IBC remains in the packaging;

(2) IBCs must be transported in a fully enclosed transport vehicle or freight container;

(3) Transportation is only authorized to a reconditioning, remanufacturing, requalification, disposal, or repair facility;

(4) A document (in paper or electronic form) must accompany the IBCs that denotes the phrase “Residue IBC(s)” and indicates the number of IBCs containing hazardous materials for each Class or Division of material transported on transport vehicle;

¹² 77 FR 26413 (May 4, 2012).

¹³ 86 FR 26633 (May 17, 2021).

(5) IBCs shall be marked and labeled in accordance with subpart D (marking) and subpart E (labeling) of Part 172 of this subchapter; and

(6) Transportation is authorized for only motor vehicle or rail.

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

49 CFR Parts 172 and 173

[Docket No. PHMSA–2025–0090 (HM–268B)]

RIN 2137–AG04

Hazardous Materials: Reducing Costs to Domestic Shippers and Carriers of Limited Quantities

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This NPRM proposes to remove undue regulatory burdens by allowing for a reduced sized marking for limited quantity shipments of hazardous materials.

DATES: Comments must be received on or before September 2, 2025.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0090 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

Instructions: Please include the docket number PHMSA–2025–0090 at

the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. You may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to T. Glenn Foster, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at glenn.foster@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the

documents in person at the street address listed above.

FOR FURTHER INFORMATION CONTACT: T. Glenn Foster, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at glenn.foster@dot.gov.

I. General Discussion

PHMSA is proposing to revise 49 CFR 172.315(a)(2) to allow for a reduced sized limited quantity marking (*i.e.*, a shipping label) for certain shipments of hazardous materials. PHMSA is also proposing to revise § 173.25(a)(6) to specifically state that this marking is not authorized on overpacks. PHMSA has made a preliminary determination that the current requirements in these regulations impose an undue burden on limited quantity shipments of hazardous materials. This NPRM, if finalized, would give affected entities regulatory flexibility by allowing a limited quantity marking to be used on certain packages. PHMSA expects that the proposed amendments would provide shippers and carriers of hazardous materials the ability to transport abundant, reliable, and affordable consumer products in response to residential, commercial, and industrial demand.

A “limited quantity” of a hazardous material is defined in § 171.8 as the maximum amount of a hazardous material for which there is a specific labeling or packaging exception. Currently, § 172.315 specifies the marking requirements for limited quantities of hazardous materials, with paragraph (a)(2) of this section detailing the minimum size requirements. On January 17, 2024, PHMSA received a petition for rulemaking (P–1778¹) from the Council of Safe Transportation of Hazardous Articles (COSTHA) requesting the incorporation of Department of Transportation (DOT) special permit (SP) 21015 into the Hazardous Materials Regulations (HMR). COSTHA requested the modification of § 172.315(a)(2) to allow for the transportation in commerce of packages containing limited quantities of hazardous materials with a reduced size limited quantity marking placed on the package shipping label. COSTHA noted in its petition that it was unaware of any incidents that occurred involving DOT–SP 21015, and that its incorporation into the HMR would

¹ P–1778, Council on the Safe Transportation of Hazardous Articles (COSTHA)—<https://www.regulations.gov/docket/PHMSA-2024-0002/document>.

reduce industry burdens and facilitate compliant processes and preparation of lower risk hazardous materials. PHMSA responded to this petition on July 18, 2024, and determined that the proposed amendment of § 172.315(a)(2) warranted further consideration.

PHMSA is not aware of any safety concerns related to the incorporation of DOT–SP 21015 into the HMR and agrees with the petitioner that doing so would reduce unnecessary compliance burdens; specifically, by eliminating the need to apply for a special permit in accordance with § 107.105, to seek party status in accordance with § 107.107, and to request a renewal in accordance with § 107.109. Incorporating DOT–SP 21015 into the HMR would also allow offerors of limited quantities shipments to use a consolidated marking on the shipping label, eliminating the need for a separate limited quantity label.

For these reasons, PHMSA is proposing to revise § 172.315 to allow for a reduced size limited quantity marking that is also capable of electronically communicating to carriers that the package contains hazardous materials shipped under a limited quantity exception and the authorized modes of transportation. PHMSA is also proposing to revise § 173.25(a)(6) to specifically state that the reduced sized limited quantity mark is not authorized on overpacks. PHMSA does not expect these revisions to have any adverse impact on safety.

II. Regulatory Analysis and Notices

A. Legal Authority

This proposed rule is published under the authority of the Secretary of Transportation set forth in the Federal Hazardous Materials Transportation Laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Orders 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”),² as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those

conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This proposed rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and made a preliminary determination that this proposed rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for hazardous materials shippers and carriers. The proposed rule would eliminate the need for a separate limited quantity label, as the hazard communication information would be embedded in the shipping label, producing cost savings for the transportation industry and the public to whom those entities generally transfer a portion of their compliance costs.

C. Executive Orders 14192 and 14219

This proposed rule, if finalized as proposed, is expected to be an E.O. 14192 deregulatory action.³ PHMSA seeks data that would be helpful to generate an estimate of the cost savings from this rule. PHMSA’s initial estimates are that the total costs of the rule on the regulated community will be less than zero. Nor does this proposed rule does implicate any of the factors identified in section 2(a) of E.O. 14219 indicative of a regulation that is “unlawful . . . [or] that undermine[s] the national interest.”⁴

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”)⁵ a national emergency to address the United States’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”)⁶ asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional shippers and carriers of hazardous materials. PHMSA preliminarily finds this proposed rule is consistent with each of E.O. 14156 and E.O. 14154 because it will not impose any burden on the transportation of energy or energy-related products.

This proposed rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”),⁷ which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this proposed rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; and OIRA has therefore not designated this proposed rule as a significant energy action. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

E. Executive Order 13132: Federalism

PHMSA analyzed this proposed rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”)⁸ and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009.⁹ E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.” The Federal Hazardous Materials Transportation laws contain an express preemption provision at 49 U.S.C. 5125(b) that

⁶ 90 FR 8353 (Jan. 29, 2025).

⁷ 66 FR 28355 (May 22, 2001).

⁸ 64 FR 43255 (Aug. 10, 1999).

⁹ 74 FR 24693 (May 22, 2009).

² 58 FR 51735 (Oct. 4, 1993).

³ 90 FR 9065 (Jan. 31, 2025).

⁴ 90 FR 10583 (Feb. 19, 2025).

preempts state, local, and tribal requirements on certain covered subjects, unless the non-federal requirements are “substantively the same” as the federal requirements, including the following:

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This proposed rule addresses covered subject items paragraph I above and would preempt state, local, and Tribal requirements not meeting the “substantively the same” standard. While the proposed rule may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this proposed rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct an Initial Regulatory Flexibility Analysis (IRFA) for a proposed rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the proposed rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) ¹⁰ obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its

implementing guidance on a dedicated web page.¹¹ This proposed rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The proposed rule is expected to reduce burdens. Therefore, PHMSA certifies the proposed rule does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This proposed rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this proposed rule in accordance with NEPA and has preliminarily determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this proposed rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”) ¹² and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of

rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the proposed rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this proposed rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections. However, this rulemaking eliminates the need for persons to renew a special permit, resulting in a decrease in paperwork burden for special permit holders. PHMSA estimates the reduction in information collection burden as follows:

OMB Control No. 2137–0051:
Rulemaking, Special Permits, and Preemption Requirements.

Decrease in Annual Number of Respondents: 8.

Decrease in Annual Responses: 8.
Decrease in Annual Burden Hours: 12.

Decrease in Annual Burden Cost: \$0.

PHMSA specifically requests comments on the information collection and recordkeeping burdens associated with developing, implementing, and maintaining these requirements for approval under this NPRM. Address written comments to the Dockets Unit as identified in the **ADDRESSES** section of this NPRM. PHMSA must receive comments regarding information collection burdens prior to the close of the comment period identified in the **DATES** section of this NPRM.

Notwithstanding any other provision of law, no person is required to respond to a collection of information unless such collection displays a valid Office of

¹¹ DOT, “Rulemaking Requirements Related to Small Entities,” <https://www.transportation.gov/regulations/rulemaking-requirements-concerning-small-entities> (last accessed Sept 3, 2024).

¹² 65 FR 67249 (Nov. 9, 2000).

¹⁰ 67 FR 53461 (Aug. 16, 2002).

Management and Budget (OMB) control number.

Please direct your requests for a copy of this information collection to Steven Andrews, Office of Hazardous Materials Standards (PHH-12), Pipeline and Hazardous Materials Safety Administration, 1200 New Jersey Avenue SE, 2nd Floor, Washington, DC 20590-0001.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”)¹³ requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96-39), as amended by the Uruguay Round Agreements Act (Pub. L. 103-465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the proposed rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”)¹⁴ directed the Federal government to improve its efforts to identify, deter, and respond to

“persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the proposed rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

List of Subjects

49 CFR Part 172

Hazardous materials transportation, Hazardous waste, Labeling, Markings, Packaging and containers, Reporting and recordkeeping requirements.

49 CFR Part 173

Hazardous materials transportation, Training, Packaging and containers, Reporting and recordkeeping requirements.

For the reasons set forth above, PHMSA proposes to amend 49 CFR parts 172 and 173 as follows:

PART 172—HAZARDOUS MATERIALS TABLE, SPECIAL PROVISIONS, HAZARDOUS MATERIALS COMMUNICATIONS, EMERGENCY RESPONSE INFORMATION, TRAINING REQUIREMENTS, AND SECURITY PLANS

■ 1. The authority citation for part 172 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96 and 1.97.

■ 2. In § 172.315, add paragraph (a)(2)(iii) to read as follows:

§ 172.315 Limited quantities.

* * * * *

(a) * * *

(2) * * *

(iii) *Reduced Size Marking on Shipping Labels.* Except for the shipment of radioactive materials and hazardous materials transported by air or international vessels, the shipper may place a reduced size limited quantity marking on the package shipping label regardless of the size of packaging. Each marking must be a minimum of 25 mm on each side and the width of the border forming the square on point must be readily visible. The square-on-point must be durable, legible, readily visible and displayed on a background of sharply contrasting color. Each shipping label must be capable of electronically communicating to carriers that the package contains hazardous materials shipped under a limited quantity exception and the authorized modes of transportation.

* * * * *

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

■ 3. The authority citation for part 173 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96 and 1.97.

■ 4. In § 173.25, revise paragraph (a)(6) to read as follows:

§ 173.25 Authorized packagings and overpacks.

(a) * * *

(6) For limited quantities, the overpack is marked with a limited quantity marking prescribed in § 172.315 of this subchapter, unless a limited quantity marking representative of the hazardous material in the overpack is visible. The reduced size marking (25 mm × 25 mm) is not authorized for use on the outside of an overpack.

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,

Acting Administrator.

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 173

[Docket No. PHMSA–2025–0094 (HM–268F)]

RIN 2137–AG08

Hazardous Materials: Reducing Burdens by Allowing Continued Use of Department of Transportation Special Permit Packagings

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This NPRM proposes to revise the Hazardous Materials Regulations (HMR) to allow for the continued use of packagings authorized under a manufacturing special permit for duration of the useful life of the package. The current HMR provisions require an otherwise safe and usable package to be discontinued solely because the original special permit has expired or was not renewed.

DATES: Comments must be received on or before September 2, 2025.

¹³ 77 FR 26413 (May 4, 2012).

¹⁴ 86 FR 26633 (May 17, 2021).

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0094 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

Instructions: Please include the docket number PHMSA–2025–0094 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. You may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1)

mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Steven Andrews, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at steven.andrews@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

FOR FURTHER INFORMATION CONTACT:

Steven Andrews, Transportation Regulations Specialist, 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–6199, steven.andrews@dot.gov.

I. General Discussion

PHMSA is proposing to revise 49 CFR 173.23, “Previously authorized packaging,” to allow for the continued use of a Department of Transportation (DOT) special permit (SP) packaging for which the special permit has expired. The current requirements impose an unnecessary burden on the regulated community, wherein a packaging manufactured, marked, and sold under the terms of a DOT–SP may no longer be authorized solely based on the original manufacturer going out of business, ceasing manufacture of a product under the condition of the original DOT–SP, or choosing to not renew a DOT–SP. Authorizing the continued use of such packagings for the life of the package, provided the package continues to be in conformance with the terms of the DOT–SP, eliminates that burden without compromising public safety. For these reasons, PHMSA is proposing to add a new exception to § 173.23 in paragraph (j) to allow approved packagings to be used for the duration of the usable life of the DOT–SP packaging, regardless of the status of the grantee (*i.e.*, such as when the original grantee has gone out of business but some of their packagings remain in commerce because they have not yet completed shipment to their end consumer, or when the original grantee has gone out of business and their assets

have been purchased by another company) and whether the special permit was renewed.¹

II. Regulatory Analysis and Notices

A. Legal Authority

This proposed rule is published under the authority of the Secretary of Transportation set forth in the Federal Hazardous Materials Transportation Laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”),² as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This proposed rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

¹ However, PHMSA notes that even with this revision, a carrier may still choose to not accept a package where the manufacturing DOT–SP is not renewed by the grantee.

² 58 FR 51735 (Oct. 4, 1993).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and preliminarily determined that this proposed rule may result in cost savings by reducing regulatory burdens and regulatory uncertainty for affected entities by allowing for the use of packages manufactured under a special permit for the useful life of the package beyond the original permit's expiration date. PHMSA expects those cost savings will also result in reduced costs for the public to whom those entities generally transfer a portion of their compliance costs.

C. Executive Orders 14192 and 14219

This proposed rule, if finalized as proposed, is expected to be an E.O. 14192 deregulatory action.³ PHMSA seeks data that would be helpful to generate an estimate of the cost savings from this rule. PHMSA's initial estimates are that the total costs of the rule on the regulated community will be less than zero. Nor does this proposed rule does implicate any of the factors identified in section 2(a) of E.O. 14219 indicative of a regulation that is "unlawful . . . [or] that undermine[s] the national interest."⁴

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 ("Declaring a National Energy Emergency")⁵ a national emergency to address the United States's inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 ("Unleashing American Energy")⁶ asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of "undue burden[s]" on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional shippers and carriers of hazardous materials. PHMSA preliminarily finds this proposed rule is consistent with each of E.O. 14156 and E.O. 14154. The proposed rule will give affected entities regulatory flexibility by allowing for the continued use of expired DOT-SP packages, some of which may be used to transport energy related products, or products that are otherwise used in supply chains related to energy production. PHMSA therefore expects the regulatory amendments in this proposed rule will in turn assist shipper

and carriers of hazardous materials ability to provide abundant, reliable, affordable energy products in response to residential, commercial, and industrial demand.

However, this proposed rule is not a "significant energy action" under E.O. 13211 ("Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use"),⁷ which requires Federal agencies to prepare a Statement of Energy Effects for any "significant energy action." Because this proposed rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this proposed rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this proposed rule in accordance with the principles and criteria contained in E.O. 13132 ("Federalism")⁸ and the Presidential Memorandum ("Preemption") published in the **Federal Register** on May 22, 2009.⁹ E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have "substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government." The Federal Hazardous Materials Transportation Laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts state, local, and tribal requirements on certain covered subjects, unless the non-federal requirements are "substantively the same" as the federal requirements, including the following:

- (1) The designation, description, and classification of hazardous material;
- (2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;
- (3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;
- (4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and
- (5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container

represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This proposed rule addresses covered subject items paragraph I above and would preempt state, local, and Tribal requirements not meeting the "substantively the same" standard. While the proposed rule may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this proposed rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct an Initial Regulatory Flexibility Analysis (IRFA) for a proposed rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the proposed rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 ("Proper Consideration of Small Entities in Agency Rulemaking")¹⁰ obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page.¹¹ This proposed rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The proposed rule is expected to reduce burdens. Therefore, PHMSA certifies the proposed rule does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate

³ 90 FR 9065 (Jan. 31, 2025).

⁴ 90 FR 10583 (Feb. 19, 2025).

⁵ 90 FR 8353 (Jan. 29, 2025).

⁶ 90 FR 8353 (Jan. 29, 2025).

⁷ 66 FR 28355 (May 22, 2001).

⁸ 64 FR 43255 (Aug. 10, 1999).

⁹ 74 FR 24693 (May 22, 2009).

¹⁰ 67 FR 53461 (Aug. 16, 2002).

¹¹ DOT, "Rulemaking Requirements Related to Small Entities," <https://www.transportation.gov/regulations/rulemaking-requirements-concerning-small-entities> (last accessed Sept 3, 2024).

that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

PHMSA anticipates this proposed rule will not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this proposed rule in accordance with NEPA and has preliminarily determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment. The public is invited to comment on the impact of the proposed action.

I. Executive Order 13175

PHMSA analyzed this proposed rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”) ¹² and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the proposed rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this proposed rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on

Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”) ¹³ requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the

safety of the American public. PHMSA has assessed the effects of the proposed rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”) ¹⁴ directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the proposed rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

List of Subjects in 49 CFR Part 173

Hazardous materials transportation, Training, Packaging and containers, Reporting and recordkeeping requirements.

For the reasons set forth above, PHMSA proposes to amend 49 CFR part 173 as follows:

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

■ 1. The authority citation for part 173 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96 and 1.97.

■ 2. In § 173.23, add paragraph (j) to read as follows:

§ 173.23 Previously authorized packaging.

* * * * *

(j) If a manufacturing special permit is not renewed by the grantee, then a packaging manufactured, marked, and sold under its conditions may continue to be used (*i.e.*, offered for transportation in commerce, retested, and maintained) after the expiration date of the special permit and for the life of the packaging according to the terms of the final revision of the special permit.

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

[Docket No. PHMSA–2025–0091 (HM–268C)]

RIN 2137–AG05

Hazardous Materials: Reducing
Burdens on Domestic Companies
Using Battery-Powered Equipment in
Trades

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This NPRM proposes to amend the Materials of Trade (MOTs) exceptions to allow for the transportation of increased quantities of lithium batteries. The current MOT exceptions unnecessarily limit the number and size of lithium batteries that can be safely transported by domestic construction, landscaping, mowing, tree service, food service, and entertainment companies in support of performing a trade.

DATES: Comments must be received on or before September 2, 2025.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0091 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

Instructions: Please include the docket number PHMSA–2025–0091 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. You may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Steven Andrews, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at steven.andrews@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

FOR FURTHER INFORMATION CONTACT: Arthur Pollack, Transportation Regulations Specialist, 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–8553, arthur.pollack@dot.gov.

SUPPLEMENTARY INFORMATION:**I. General Discussion**

This NPRM proposes to revise the Material of Trade (MOTs) exceptions in § 173.6 to address limitations faced by domestic companies using lithium battery-powered equipment. PHMSA proposes to increase the allowable quantities of lithium batteries, including those contained in equipment transported in support of a business as MOTs.

This proposal addresses a petition for rulemaking submitted by the Portable Rechargeable Battery Association (PRBA). In the petition (P–1758),¹ PRBA asked PHMSA to amend the MOTs exceptions in § 173.6 to distinguish the weight limits for lithium batteries from other Class 9 hazardous materials. PRBA explained that the current MOT quantity limits impose outdated and overly restrictive requirements on lithium batteries, making their transportation by companies difficult and expensive. PRBA further explained that the impact is especially burdensome for small, family-owned businesses that do not have the expertise to understand the implications of transporting lithium batteries outside the provisions of MOTs.

PHMSA has made a preliminary determination to adopt PRBA’s proposed changes to the MOT exceptions for lithium battery transportation. PRBA’s proposed safeguards—such as preventing short circuits, protecting against damage from inadvertent shifting, and avoiding accidental activation—should effectively reduce or eliminate the risk of hazardous incidents. PHMSA also agrees with PRBA that packages of batteries weighing more than 30 kg and transported in accordance with the MOTs exception should have labels and marks similar to those used for non-MOTs shipments of lithium batteries. Requiring Class 9 labels and United Nations (UN) identification numbers on packages containing lithium batteries being transported as MOTs will ensure first responders and others are aware lithium batteries are present, providing a level of hazard communication comparable to batteries transported in non-MOTs shipments. PHMSA is including language to clarify that lithium batteries used under the MOTs exceptions must have passed the applicable required tests under § 173.185.

PHMSA has conducted a preliminary economic and determined that the proposed revisions will not impose any costs to industry. Rather, the proposed

¹ P–1758—PRBA (PHMSA–2021–0051), <https://www.regulations.gov/docket/PHMSA-2021-0051>.

changes are expected to reduce costs by providing appropriate flexibility to regulated parties (*e.g.*, avoided costs associated with an unnecessary approval application process or use of an outdated securement method).

For these reasons, PHMSA is proposing to revise paragraph § 173.6 to specifically authorize lithium metal and lithium ion batteries under the MOTs exception and allow a net weight (*i.e.*, the weight of the batteries themselves) of 30 kg (66 lbs.) for each lithium ion and metal battery, a gross weight of 500 kg of lithium batteries on the vehicle, and no limit for lithium ion and lithium metal batteries when contained in equipment. PHMSA is also proposing a set of safety standards for lithium batteries transported under the MOTs exception to include the prevention of short circuits, damage from shifting, the accidental activation of the equipment, and ensuring that all lithium batteries are of a type tested in conformance with the HMR. PHMSA does not expect that these proposed revisions will any adverse impact on safety.

II. Regulatory Analysis and Notices

A. Legal Authority

This proposed rule is published under the authority of the Secretary of Transportation set forth in the Federal Hazardous Materials Transportation Laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Orders 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”),² as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory

alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This proposed rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and made a preliminary determination that this proposed rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for the construction, landscaping, food, and entertainment industries by distinguishing the weight limits for lithium batteries from other Class 9 hazardous materials. PHMSA expects those cost savings will also result in reduced costs for the public to whom those entities generally transfer a portion of their compliance costs.

C. Executive Orders 14192 and 14219

This proposed rule, if finalized as proposed, is expected to be an E.O. 14192 deregulatory action.³ PHMSA seeks data that would be helpful to generate an estimate of the cost savings from this rule. PHMSA’s initial estimates are that the total costs of the rule on the regulated community will be less than zero. Nor does this proposed rule does implicate any of the factors identified in section 2(a) of E.O. 14219 indicative of a regulation that is “unlawful . . . [or] that undermine[s] the national interest.”⁴

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”) ⁵ a national emergency to address the United States’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”) ⁶

asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources. PHMSA preliminarily finds this proposed rule is consistent with each of E.O. 14156 and E.O. 14154. The proposed rule will give affected entities, in this case construction, landscaping, mowing, tree service, food, and entertainment companies, regulatory relief by providing an exception for lithium battery powered equipment and spare batteries under MOTs. PHMSA therefore expects the regulatory amendments in this proposed rule will in turn affect companies’ ability to provide services to their customers at reduced costs in response to residential, commercial, and industrial demand.

However, this proposed rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”),⁷ which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this proposed rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this proposed rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this proposed rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”) ⁸ and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009.⁹ E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.” The Federal Hazardous Materials Transportation laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts state, local, and tribal requirements on certain covered subjects, unless the non-federal requirements are “substantively the same” as the federal requirements, including the following:

³ 90 FR 9065 (Jan. 31, 2025).

⁴ 90 FR 10583 (Feb. 19, 2025).

⁵ 90 FR 8353 (Jan. 29, 2025).

⁶ 90 FR 8353 (Jan. 29, 2025).

⁷ 66 FR 28355 (May 22, 2001).

⁸ 64 FR 43255 (Aug. 10, 1999).

⁹ 74 FR 24693 (May 22, 2009).

² 58 FR 51735 (Oct. 4, 1993).

(1) The designation, description, and classification of hazardous material;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and

(5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This proposed rule addresses covered subject items in paragraph I above and would preempt state, local, and Tribal requirements not meeting the “substantively the same” standard. While the proposed rule may (when finalized) operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this proposed rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct an Initial Regulatory Flexibility Analysis (IRFA) for a proposed rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the proposed rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”)¹⁰ obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page.¹¹ This proposed rule was developed in accordance with E.O.

13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The proposed rule is expected to reduce burdens. Therefore, PHMSA certifies the proposed rule does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This proposed rule does not impose unfunded mandates under UMRA. PHMSA does not expect the proposed rule will result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this proposed rule in accordance with NEPA and has preliminarily determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment. The public is invited to comment on the impact of the proposed action.

I. Executive Order 13175

PHMSA analyzed this proposed rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”)¹² and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or

“substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the proposed rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this proposed rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”)¹³ requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of

¹⁰ 67 FR 53461 (Aug. 16, 2002).

¹¹ DOT, “Rulemaking Requirements Related to Small Entities,” <https://www.transportation.gov/regulations/rulemaking-requirements-concerning-small-entities> (last accessed Sept 3, 2024).

¹² 65 FR 67249 (Nov. 9, 2000).

¹³ 77 FR 26413 (May 4, 2012).

international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the proposed rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”) ¹⁴ directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the proposed rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

List of Subjects in 49 CFR Part 173

Hazardous materials transportation, Packaging and containers, Reporting and recordkeeping requirements.

In consideration of the foregoing, PHMSA proposes to amend 49 CFR chapter I as follows:

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

- 1. The authority citation for part 173 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.81, 1.96 and 1.97.

- 2. In § 173.6:

- a. Add paragraph (a)(7)(iii);
- b. Add paragraphs (b)(6) and (b)(6)(i), (ii), (iii);
- c. Revise paragraph (c)(4);
- d. Add paragraph (c)(5); and
- e. Revise paragraph (d).

All revisions to read as follows:

§ 173.6 Materials of trade exceptions.

- (a) * * *
- (7) * * *

(iii) Except when the cell or battery is contained in equipment, lithium cells and batteries may not exceed 30 kg (66 pounds) net weight for each lithium cell or battery and 500 kg (1102 pounds) aggregate net weight on a motor vehicle. Lithium cells and batteries, including when contained in or packed with

equipment, must be of the type proven to meet the criteria in part III, sub-section 38.3 of the UN Manual of Tests and Criteria (IBR; see § 171.7 of this subchapter).

* * * * *

- (b) * * *

(6) Cells and batteries, including cells and batteries contained in equipment, must be packaged or secured in a manner to prevent:

- (i) Short circuits;
- (ii) Damage caused by shifting or placement within the package, if applicable; and
- (iii) Accidental activation of the equipment.

* * * * *

- (c) * * *

(4) Lithium cells or batteries, including when contained in or packed with equipment, in packages exceeding 30 kg (66 pounds) net weight of batteries must be labeled with the lithium battery Class 9 label as specified in § 172.477 and marked with the four-digit UN identification number, as applicable.

(5) The operator of a motor vehicle that contains a material of trade must be informed of the presence of the hazardous material (including whether the package contains a reportable quantity) and must be informed of the requirements of this section.

(d) *Aggregate gross weight.* Except for a material of trade authorized by paragraphs (a)(1)(iii) and (a)(7)(iii) of this section, the aggregate gross weight of all materials of trade on a motor vehicle may not exceed 200 kg (440 pounds).

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

[FR Doc. 2025–12065 Filed 6–27–25; 4:15 pm]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 177

[Docket No. PHMSA–2025–0100 (HM–268L)]

RIN 2137–AG14

Hazardous Materials: Adoption of Department of Transportation Special Permits 12412 and 11646 Into the Hazardous Materials Regulations

AGENCY: Pipeline and Hazardous Materials Safety Administration

(PHMSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This NPRM proposes adopting the provisions of Department of Transportation (DOT) Special Permit (SP) 12412 and DOT–SP 11646 into the hazardous materials regulations. These revisions would provide greater regulatory flexibility and eliminate the need for special permit renewal requests, reducing paperwork burdens and facilitating commerce while maintaining an equivalent level of safety.

DATES: Comments must be received on or before September 2, 2025.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0100 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

Instructions: Please include the docket number PHMSA–2025–0100 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

¹⁴ 86 FR 26633 (May 17, 2021).

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. You may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as "Confidential"; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Ryan Larson, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590-0001, or by email at ryan.larson@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

SUPPLEMENTARY INFORMATION:

I. General Discussion

PHMSA is proposing to revise certain provisions in 49 CFR part 177 of Chapter I of Title 49 of the Code of Federal Regulations (CFR). Section 177.834 establishes general operational requirements for transportation by highway. Currently, § 177.834(h) generally prohibits unloading hazardous material packaging while it remains on a motor vehicle. However, DOT-SP 11646 authorizes the discharge of certain Class 3, 8, 9, and Division 6.1 liquids from a DOT specification drum without removing the drum from the vehicle on which it is transported.

PHMSA proposes to adopt the provisions of DOT-SP 11646 into a new § 177.834(h)(1) that would allow only certain lower hazard liquids in packing groups II and III to be unloaded from United Nations (UN) standard drums without first removing the drums from the vehicle provided certain conditions are met to ensure safety. Some of these safety controls include requiring attendance by a qualified person during unloading, not allowing the manifolding of multiple drums, and requiring that hoses are not attached to outlets during transportation. Party status to DOT-SP 11646 is currently held by 43 entities. PHMSA conducted a review of DOT-SP 11646 and found no compliance violations.

Similarly, DOT-SP 12412 authorizes the discharge of liquid hazardous materials authorized to be shipped in UN 31A, 31B, 31N, 31H1, 31H2 or 31HZ1 Intermediate Bulk Containers (IBCs) and DOT 57 portable tanks without removing the packagings from the vehicle on which they are transported.¹ PHMSA proposes to adopt the provisions of DOT-SP 12412 into a new § 177.834(h)(2) that would permit the discharge of liquids from specified UN standard IBCs or DOT 57 portable tanks without removing the packagings from a motor vehicle, provided certain conditions are met. Some of these safety controls include limiting which types of IBCs or DOT 57 portable tanks are authorized for the exception, requiring attendance by a qualified person during unloading operations, requiring hoses to be detached from discharge outlets during transportation, and not allowing unsafe combinations of materials on the same vehicle to take advantage of the exception.² Party status to DOT-SP 12412 is currently held by 263 entities. PHMSA conducted a review of the DOT-SP 12412 and history of compliance violations or incidents.

Overall, PHMSA expects the regulatory amendments in this NPRM would improve the affected entities' abilities to provide abundant, reliable, and affordable products in response to residential, commercial, and industrial demand. PHMSA does not expect that

¹ PHMSA notes that the HMR do not apply to the end-use commercial application of a product, such as spraying pesticides, herbicides, or cleaning solutions from a packaging while the packaging remains on a motor vehicle if during these times the motor vehicle is not in transportation as defined by the HMR.

² PHMSA notes that for IBCs and DOT 57 portable tanks, proposed paragraph (h)(2) states that residue remaining in devices (e.g., pumps, piping, and discharge hoses) after product draining is not subject to this requirement, provided the devices are capped and secured during transportation.

these proposed revisions would have any adverse impact on safety.

II. Regulatory Analysis and Notices

A. Legal Authority

This proposed rule is published under the authority of the Secretary of Transportation set forth in the Federal Hazardous Materials Transportation laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Orders 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 ("Regulatory Planning and Review"),³ as implemented by DOT Order 2100.6B ("Policies and Procedures for Rulemaking"), requires agencies to regulate in the "most cost-effective manner," to make a "reasoned determination that the benefits of the intended regulation justify its costs," and to develop regulations that "impose the least burden on society." DOT Order 2100.6B specifies that regulations should generally "not be issued unless their benefits are expected to exceed their costs." In arriving at those conclusions, E.O. 12866 requires that agencies should consider "both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify" and "maximize net benefits . . . unless a statute requires another regulatory approach." E.O. 12866 also requires that "agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating." DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the "least costly regulatory alternative that achieves the relevant objectives" unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit "significant regulatory actions" to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President's Office of Management and Budget (OMB) for review. This proposed rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a "major rule" as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with E.O. 12866 as implemented by DOT Order 2100.6B and made a preliminary determination that this proposed rule would result in cost savings by reducing

³ 58 FR 51735 (Oct. 4, 1993).

regulatory burdens and regulatory uncertainty for affected entities by reducing the time and manpower necessary for entities needing to unload these materials efficiently and safely without the need for special permits. PHMSA expects those cost savings would also result in reduced costs for the public to whom those entities generally transfer a portion of their compliance costs.

C. Executive Orders 14192 and 14219

This proposed rule, if finalized as proposed, is expected to be an E.O. 14192 deregulatory action.⁴ PHMSA seeks data that would be helpful to generate an estimate of the cost savings from this rule. PHMSA's initial estimates are that the total costs of the rule on the regulated community would be less than zero. Nor does this proposed rule does implicate any of the factors identified in section 2(a) of E.O. 14219 indicative of a regulation that is "unlawful . . . [or] that undermine[s] the national interest."⁵

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 ("Declaring a National Energy Emergency")⁶ a national emergency to address the United States's inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 ("Unleashing American Energy")⁷ asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of "undue burden[s]" on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional affected entities. PHMSA preliminarily finds this proposed rule is consistent with each of E.O. 14156 and E.O. 14154. The proposed rule will give affected entities, many of whom are in the construction and energy industries, the ability to conduct their operations without having to remove certain hazardous materials packaging from vehicles, when in some cases, they do not have the equipment necessary to safely remove fully loaded packages.

However, this proposed rule is not a "significant energy action" under E.O. 13211 ("Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use"),⁸ which requires Federal agencies to

prepare a Statement of Energy Effects for any "significant energy action." Because this proposed rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; and OIRA has therefore not designated this proposed rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this proposed rule in accordance with the principles and criteria contained in E.O. 13132 ("Federalism")⁹ and the Presidential Memorandum ("Preemption") published in the **Federal Register** on May 22, 2009.¹⁰ E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have "substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government." The Federal Hazardous Materials Transportation laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts state, local, and tribal requirements on certain covered subjects, unless the non-federal requirements are "substantively the same" as the federal requirements, including the following:

- (1) The designation, description, and classification of hazardous material;
- (2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;
- (3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;
- (4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and
- (5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This proposed rule addresses covered subject items (2) above and would preempt state, local, and Tribal requirements not meeting the "substantively the same" standard. While the proposed rule may operate to preempt some State requirements, it would not impose any regulation that

has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this proposed rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct an Initial Regulatory Flexibility Analysis (IRFA) for a proposed rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the proposed rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 ("Proper Consideration of Small Entities in Agency Rulemaking")¹¹ obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page.¹² This proposed rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The proposed rule is expected to reduce burdens. Therefore, PHMSA certifies the proposed rule does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This proposed rule does not impose unfunded mandates under UMRA

⁴ 90 FR 9065 (Jan. 31, 2025).

⁵ 90 FR 10583 (Feb. 19, 2025).

⁶ 90 FR 8353 (Jan. 29, 2025).

⁷ 90 FR 8353 (Jan. 29, 2025).

⁸ 66 FR 28355 (May 22, 2001).

⁹ 64 FR 43255 (Aug. 10, 1999).

¹⁰ 74 FR 24693 (May 22, 2009).

¹¹ 67 FR 53461 (Aug. 16, 2002).

¹² DOT, "Rulemaking Requirements Related to Small Entities," <https://www.transportation.gov/regulations/rulemaking-requirements-concerning-small-entities> (last accessed Sept 3, 2024).

because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this proposed rule in accordance with NEPA and has preliminarily determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment. The public is invited to comment on the impact of the proposed action.

I. Executive Order 13175

PHMSA analyzed this proposed rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”) ¹³ and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the proposed rule and determined that it would not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this proposed rule would not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This

rulemaking would not create, amend, or rescind any existing information collections. However, this rulemaking eliminates the need for persons to renew a special permit, resulting in a decrease in paperwork burden for special permit holders. PHMSA estimates the reduction in information collection burden as follows:

OMB Control No. 2137-0051:

Rulemaking, Special Permits, and Preemption Requirements.

Decrease in Annual Number of Respondents: 77.

Decrease in Annual Responses: 77.

Decrease in Annual Burden Hours: 115.

Decrease in Annual Burden Cost: \$0.

PHMSA specifically requests comments on the information collection and recordkeeping burdens associated with developing, implementing, and maintaining these requirements for approval under this NPRM. Address written comments to the Dockets Unit as identified in the **ADDRESSES** section of this NPRM. PHMSA must receive comments regarding information collection burdens prior to the close of the comment period identified in the **DATES** section of this NPRM.

Notwithstanding any other provision of law, no person is required to respond to a collection of information unless such collection displays a valid Office of Management and Budget (OMB) control number.

Please direct your requests for a copy of this information collection to Steven Andrews, Office of Hazardous Materials Standards (PHH-12), Pipeline and Hazardous Materials Safety Administration, 1200 New Jersey Avenue SE, 2nd Floor, Washington, DC, 20590-0001.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”) ¹⁴ requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent

unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the proposed rule and has determined that its regulatory amendments would not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”) ¹⁵ directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the proposed rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

List of Subjects in 49 CFR Part 177

Hazardous materials transportation, Motor carriers, Radioactive materials, Reporting, and recordkeeping requirements.

In consideration of the foregoing, PHMSA proposes to amend 49 CFR chapter I as follows:

PART 177—CARRIAGE BY PUBLIC HIGHWAY

■ 1. The authority citation for part 177 continues to read as follows:

Authority: 49 U.S.C. 5101–5128; sec. 112 of Pub. L. 103–311, 108 Stat. 1673, 1676 (1994); sec. 32509 of Pub. L. 112–141, 126 Stat. 405, 805 (2012); 49 CFR 1.81 and 1.97.

■ 2. In § 177.834, revise paragraph (h) to read as follows:

§ 177.834 General Requirements.

* * * * *

¹³ 65 FR 67249 (Nov. 9, 2000).

¹⁴ 77 FR 26413 (May 4, 2012).

¹⁵ 86 FR 26633 (May 17, 2021).

(h) *Precautions concerning containers in transit; fueling road units.* Reasonable care should be taken to prevent undue rise in temperature of containers and their contents during transit. There must be no tampering with such container or the contents thereof nor any discharge of the contents of any container between point of origin and point of billed destination. Discharge of contents of any container, other than a cargo tank, IM portable tank, or packaging authorized in paragraphs (h)(1) and (h)(2) of this section, must not be made prior to removal from the motor vehicle. Nothing contained in this paragraph shall be so construed as to prohibit the fueling of machinery or vehicles used in road construction or maintenance.

(1) *Drums.* For the purpose of this section only, Class 3 (PG II and III), Division 6.1 (PG II and III), Class 8 (PG II and PG III), and Class 9 materials are authorized. For liquids authorized under this section, the following conditions apply—

(i) Product transfer must be through pumps mounted on the motor vehicle or with an injection system indirectly mounted on a motor vehicle;

(ii) The drums must be attended at all times during unloading operations by a qualified person. For the purposes of this requirement, “attended” and “qualified” have the meanings described in paragraphs (i)(3) and (i)(4) of this section, respectively;

(iii) Hoses shall not be attached to container outlets during transportation;

(iv) Drums shall not be manifolded together during transportation; and

(v) Each reused drum must meet the requirements prescribed in § 173.28 or an active special permit, as applicable.

(2) *IBCs and DOT specification 57 portable tanks transporting materials other than Class 3 (PG II); Class 3 (PG III with a flash point of less than 100 °F (38 °C)); Division 5.1 (PG II); or Division 6.1 (PG II).* For liquids authorized to be transported in metal, rigid plastic, and composite UN standard IBCs or DOT Specification 57 portable tanks, the following conditions apply—

(i) Transportation is limited to private or contract motor vehicle;

(ii) IBC design types authorized are UN 31A, 31B, 31N, 31H1, 31H2, and 31HZ1;

(iii) If the IBC or portable tank is pressurized, it must be equipped with a pressure relief device set to open at not higher than two-thirds of the test pressure or 9 psig for a metal IBC;

(iv) Except for hypochlorite solutions and fluosilicic acid, two or more materials may not be loaded on the same vehicle if any mixture of the materials would cause an unsafe

condition. Hypochlorite solutions and fluosilicic acid may be loaded on the same vehicle and transported in separate IBCs provided—

(A) No more than two IBCs are transported on a motor vehicle;

(B) Each IBC has a capacity not exceeding 1703 L (450 gallons);

(C) The materials shall not be discharged at the same time; and

(D) The hazardous materials are used for water treatment purposes only.

(v) Packagings shall not be manifolded together or have discharge outlets permanently connected to any part of the vehicle, including its discharge system. Hoses shall not remain attached to IBCs or portable tanks (e.g., discharge outlets) during transportation (movement) of the motor vehicle;

(vi) The packagings must be attended at all times during unloading operations by a qualified person. For the purposes of this requirement, “attended” and “qualified” have the meanings described in paragraphs (i)(3) and (i)(4) of this section, respectively;

(vii) Each IBC or DOT specification 57 portable tank must be discharged by—

(A) Using a mechanical pump with a positive means of stopping the flow of liquid from the pump;

(B) Gravity; or

(C) Pressurizing the IBC or portable tank.

(viii) Before starting each transfer of product to a receiving system, the person performing that function must determine that each component of the discharge system (including the hose) is of sound quality, free of leaks, and that connections are secure. A hose or associated equipment that shows signs of leakage, significant bulging, or other defects may not be used;

(ix) Packages shall not be filled or refilled while on a motor vehicle unless filled or refilled on the private property of the shipper, filler, or refiller. Prior to refilling, each IBC and its service equipment must be visually inspected in accordance with the provisions of §§ 173.35(b) and 180.352 and each DOT specification 57 portable tank and its service equipment must be visually inspected in accordance with the provisions of § 180.605;

(x) Prior to reentering transportation, all hazardous materials must be purged from the pump, if equipped, the piping, and the discharge hose, as far as practicable; or all free-flowing hazardous material must be removed from the pump, if equipped, piping and the discharge hose in accordance with § 173.33(e). Residue remaining in these devices after product draining is not subject to this requirement provided

these devices are capped and secured during transportation.

(xi) If the IBC or portable tank is unloaded using a pump, or if it is pressurized for unloading, prior to using a new or repaired transfer hose assembly (hose and associated fittings), the hose assembly must be subjected to a pressure test. The pressure test must be performed at no less than the pressure the hose is expected to be subjected to during product transfer. This test must be performed with all hose and hose fittings arranged in the configuration to be employed during transfer operations. Burst pressure must be at least four times the service pressure of the pump.

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 180

[Docket No. PHMSA–2025–0103 (HM–2680)]

RIN 2137–AG17

Hazardous Materials: Adoption of Department of Transportation Special Permit 14175

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: PHMSA proposes adopting the provisions of Department of Transportation (DOT) special permit (SP) 14175 into the hazardous materials regulations to authorize a 10-year requalification period when using the ultrasonic examination (UE) testing method for DOT specification 3A and 3AA used for flammable and non-flammable, nonpoisonous gas service. The proposed adoption reflects advances in testing technology and would relieve the burden of performing more frequent cylinder requalification.

DATES: Comments must be received on or before September 2, 2025.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0103 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12-140, Washington, DC 20590-0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1-202-493-2251.

Instructions: Please include the docket number PHMSA-2025-0103 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. You may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as "Confidential"; (2) send PHMSA, along with the original document, a second

copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Ryan Larson, Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590-0001, or by email at ryan.larson@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

FOR FURTHER INFORMATION CONTACT: Ryan Larson, Transportation Regulations Specialist, 1200 New Jersey Avenue SE, Washington, DC 20590, 202-366-8553, ryan.larson@dot.gov.

I. General Discussion

PHMSA proposes to adopt the provisions of DOT-SP 14175 into the Hazardous Materials Regulations (HMR: 49 CFR parts 171-180) to authorize a 10-year requalification for DOT specification 3A and 3AA cylinder bundles used in flammable and non-flammable, nonpoisonous gas service. Currently, the HMR generally requires requalification of DOT Specification 3A and 3AA cylinders every five years for continued service in accordance with § 180.209. There are exceptions to the 5-year requalification period depending on the use and material contained in the cylinder. When DOT specification cylinders are required to be requalified, they generally must be subjected to a pressure test, which measures the expansion of the cylinder under pressure, and to internal and external visual inspections to check for defects in the cylinder and ensure the cylinder is still safe for continued service in transportation.

Section 180.209(b)(1) provides an exception to the 5-year requalification period for DOT 3A and 3AA cylinders provided that certain conditions are met. This exception allows these cylinders to be retested every 10 years rather than every five years if each cylinder has a water capacity less than 125 lb. (56.7 kg); the cylinder is removed from any cluster, bank, group, rack, or vehicle each time it is filled; the cylinder was manufactured after December 31, 1945; the cylinder is used exclusively for a listed gas; the cylinder is dried immediately after the

hydrostatic (pressure) testing to remove all traces of water; the cylinder is not used for underwater breathing; and the cylinder is stamped with a five-pointed star to indicate the 10-year test interval.

DOT-SP 14175 was issued to provide a similar waiver from 5-year requalification period, except that the cylinders do not have to be removed from any cluster, bank, group, rack, or vehicle prior to filling. Specifically, DOT-SP 14175 allows a 10-year requalification period using the ultrasonic examination (UE) testing method. This special permit similarly limits the types of gases that are used in these cylinders as well as the capacities of the cylinders as in § 180.209(b)(1).

By adopting the provisions of DOT-SP 14175 to generally allow UE as an alternative requalification method, PHMSA is providing the cylinder industry with greater efficiencies due to faster testing (UE does not require draining the contents of the cylinder prior to testing), less down time (cylinders can be back in service immediately after testing and do not require additional time for an internal inspection), reducing the risk of contamination (no need for valve removal with UE testing), and increased accuracy (UE testing is able to detect much smaller flaws and wall thickness). In addition, the adoption of DOT-SP 14175 into the HMR for general use removes the paperwork burden for periodic renewal by permit holders as well as government time spent processing renewal requests.

In granting the special permit that allowed UE, PHMSA determined that this cylinder requalification method is likely a superior method of examination compared to traditional methods currently required by the HMR. As such, PHMSA is confident an equivalent level of safety to the HMR would be maintained if not exceeded. PHMSA conducted a review of use of DOT-SP 14175 and determined that there were no compliance violations or incidents associated with the use of this special permit. Therefore, PHMSA proposes to adopt the provisions of DOT-SP 14175 into a new § 180.209(b)(2) that would authorize a 10-year requalification period for certain DOT 3A and 3AA cylinders used for the transportation in commerce of specified flammable and nonflammable, non-poisonous gases. PHMSA does not expect that these proposed revisions would have any adverse impact on safety, but rather are more likely to be safety enhancing.

II. Regulatory Analysis and Notices

A. Legal Authority

This proposed rule is published under the authority of the Secretary of Transportation set forth in the Federal Hazardous Materials Transportation laws (49 U.S.C. 5101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Orders 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”),¹ as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This proposed rule is a not significant regulatory action pursuant to E.O. 12866; it also has not been designated as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with E.O. 12866 as implemented by DOT Order 2100.6B and made a preliminary determination that this proposed rule would result in cost savings by reducing regulatory burdens and regulatory uncertainty for affected entities by providing for longer cylinder

requelification intervals with an alternative test method that has proven to be more accurate and more efficient. PHMSA expects those cost savings would also result in reduced costs for the public to whom those entities generally transfer a portion of their compliance costs.

C. Executive Orders 14192 and 14219

This proposed rule, if finalized as proposed, is expected to be an E.O. 14192 deregulatory action.² PHMSA seeks data that would be helpful to generate an estimate of the cost savings from this rule. PHMSA’s initial estimates are that the total costs of the rule on the regulated community would be less than zero. Nor does this proposed rule does implicate any of the factors identified in section 2(a) of E.O. 14219 indicative of a regulation that is “unlawful . . . [or] that undermine[s] the national interest.”³

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”) ⁴ a national emergency to address the United States’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy”) ⁵ asserts a Federal policy to unleash American energy by ensuing access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional cylinder owners and cylinder requelifiers. PHMSA preliminarily finds this proposed rule is consistent with each of E.O. 14156 and E.O. 14154. The proposed rule would give affected entities, many of whom are in the construction and energy industry, relief from more frequent test intervals for certain DOT cylinders as well as flexibility to use more efficient testing methods. PHMSA, therefore, expects the regulatory amendments in this proposed rule would in turn facilitate affected entities’ ability to provide abundant, reliable, affordable compressed gases in response to residential, commercial, and industrial demand.

This proposed rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect

Energy Supply, Distribution, or Use”),⁶ which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this proposed rule is not a significant action under E.O. 12866, it would not have a significant adverse effect on supply, distribution, or energy use; and OIRA has therefore not designated this proposed rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this proposed rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”) ⁷ and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009.⁸ E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.” The Federal Hazardous Materials Transportation Laws contain an express preemption provision at 49 U.S.C. 5125(b) that preempts state, local, and tribal requirements on certain covered subjects, unless the non-federal requirements are “substantively the same” as the federal requirements, including the following:

- (1) The designation, description, and classification of hazardous material;
- (2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;
- (3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;
- (4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; and
- (5) The design, manufacture, fabrication, inspection, marking, maintenance, recondition, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This proposed rule addresses covered subject item (5) above and would preempt state, local, and Tribal requirements not meeting the “substantively the same” standard.

² 90 FR 9065 (Jan. 31, 2025).

³ 90 FR 10583 (Feb. 19, 2025).

⁴ 90 FR 8353 (Jan. 29, 2025).

⁵ 90 FR 8353 (Jan. 29, 2025).

⁶ 66 FR 28355 (May 22, 2001).

⁷ 64 FR 43255 (Aug. 10, 1999).

⁸ 74 FR 24693 (May 22, 2009).

¹ 58 FR 51735 (Oct. 4, 1993).

While the proposed rule may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. The preemptive effect of the regulatory amendments in this proposed rule is limited to the minimum level necessary to achieve the objectives of the Federal Hazardous Materials Transportation Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct an Initial Regulatory Flexibility Analysis (IRFA) for a proposed rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the proposed rule in the rulemaking would not have a significant economic impact on a substantial number of small entities. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”)⁹ obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page.¹⁰ This proposed rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The proposed rule is expected to reduce burdens. Therefore, PHMSA certifies the proposed rule does not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses

the costs and benefits of the Federal mandate.

This proposed rule does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this proposed rule in accordance with NEPA and has preliminarily determined that the rulemaking would not adversely affect safety and therefore would not significantly affect the quality of the human and natural environment. The public is invited to comment on the impact of the proposed action.

I. Executive Order 13175

PHMSA analyzed this proposed rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”)¹¹ and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the proposed rule and determined that it would not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this proposed rule would not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide

interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking would not create, amend, or rescind any existing information collections.

However, this rulemaking eliminates the need for persons to renew a special permit, resulting in a decrease in paperwork burden for special permit holders. PHMSA estimates the reduction in information collection burden as follows:

OMB Control No. 2137–0051:
Rulemaking, Special Permits, and Preemption Requirements.

Decrease in Annual Number of Respondents: 30.

Decrease in Annual Responses: 30.

Decrease in Annual Burden Hours:

45.

Decrease in Annual Burden Cost: \$0.

PHMSA specifically requests comments on the information collection and recordkeeping burdens associated with developing, implementing, and maintaining these requirements for approval under this NPRM. Address written comments to the Dockets Unit as identified in the **ADDRESSES** section of this NPRM. PHMSA must receive comments regarding information collection burdens prior to the close of the comment period identified in the **DATES** section of this NPRM. Notwithstanding any other provision of law, no person is required to respond to a collection of information unless such collection displays a valid Office of Management and Budget (OMB) control number.

Please direct your requests for a copy of this information collection to Steven Andrews, Office of Hazardous Materials Standards (PHH–12), Pipeline and Hazardous Materials Safety Administration, 1200 New Jersey Avenue SE, 2nd Floor, Washington, DC 20590–0001.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”)¹² requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those

⁹ 67 FR 53461 (Aug. 16, 2002).

¹⁰ DOT, “Rulemaking Requirements Related to Small Entities,” <https://www.transportation.gov/regulations/x/rulemaking-requirements-concerning-small-entities> (last accessed Sept 3, 2024).

¹¹ 65 FR 67249 (Nov. 9, 2000).

¹² 77 FR 26413 (May 4, 2012).

that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA

has assessed the effects of the proposed rule and has determined that its regulatory amendments would not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”) ¹³ directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the proposed rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for affected entities.

List of Subjects in 49 CFR Part 180

Hazardous materials transportation, Motor carriers, Motor vehicle safety, Packaging and containers, Railroad safety, Reporting and recordkeeping requirements.

In consideration of the foregoing, PHMSA proposes to amend 49 CFR chapter I as follows:

PART 180—CONTINUING QUALIFICATION AND MAINTENANCE OF PACKAGINGS

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 49 U.S.C. 5101–5128; 49 CFR 1.81 and 1.97.

■ 2. In § 180.209:

- a. Revise paragraph (a);
- b. Redesignate paragraphs (b)(2) and (b)(3) as paragraphs (b)(3) and (b)(4);
- c. Add new paragraph (b)(2).

The revisions read as follows:

§ 180.209 Requirements for requalification of specification cylinders.

(a) *Periodic qualification of cylinders.* Each specification cylinder that becomes due for periodic requalification, as specified in the following table, must be requalified and marked in conformance with the requirements of this subpart. Requalification records must be maintained in accordance with § 180.215. Table 1 follows:

TABLE 1 TO PARAGRAPH (a)—REQUALIFICATION OF CYLINDERS ¹

Specification under which cylinder was made	Minimum test pressure (psig) ²	Requalification period (years)
3	3000 psig	5.
3A, 3AA	5/3 times service pressure, except non-corrosive service (see § 180.209(g)), or UE ^{3,5} .	5, 10, or 12 (see § 180.209(b), (f), (h), and (j)).
3AL	5/3 times service pressure	5 or 12 (see § 180.209(j) and (m) ⁴).
3AX, 3AAX	5/3 times service pressure	5.
3B, 3BN	2 times service pressure (see § 180.209(g))	5 or 10 (see § 180.209(f)).
3E	Test not required.	
3HT	5/3 times service pressure	3 (see §§ 180.209(k) and 180.213(c)).
3T	5/3 times service pressure or UE ³	5.
4AA480	2 times service pressure (see § 180.209(g))	5 or 10 (see § 180.209(h)).
4B, 4BA, 4BW, 4B–240ET	2 times service pressure, except non-corrosive service (see § 180.209(g)).	5, 7, 10, or 12 (see § 180.209(e), (f), and (j)).
4D, 4DA, 4DS	2 times service pressure	5.
4E	2 times service pressure, except non-corrosive service (see § 180.209(g)).	5, 10, or 12 (see § 180.209(e)).
4L	Test not required.	
8, 8AL		10 or 20 (see § 180.209(i)).
Exemption or special permit cylinder	See current exemption or special permit, or UE ³ as allowed by CGA C–20 (2014).	See current exemption or special permit.
Foreign cylinder (see § 173.301(j) of this subchapter for restrictions on use).	As marked on cylinder, but not less than 5/8 of any service or working pressure marking.	5 (see §§ 180.209(l) and 180.213(d)(2)).

¹ Any cylinder not exceeding two inches outside diameter and less than two feet in length is excepted from volumetric expansion test.

² For cylinders not marked with a service pressure, see § 173.301a(b) of this subchapter.

³ Minimum test pressure is not applicable to those cylinders and tubes requalified using ultrasonic examination (UE).

⁴ This provision does not apply to cylinders used for carbon dioxide, fire extinguisher, or other industrial gas service.

⁵ UE must be performed by a valid RIN holder applicable to DOT 3A and 3AA cylinders.

* * * * *

(b) * * *

(2) A cylinder conforming to specification DOT 3A or 3AA with a water capacity of 56.7 kg (125 lb.) or less that is not removed from any cluster, bank, group, rack, or vehicle each time

it is filled, may be requalified by either hydrostatic testing and visual inspection described in § 180.205 or by ultrasonic examination (UE) testing by a valid RIN holder for DOT 3A or 3AA cylinders every ten years instead of every five

years, provided the cylinder conforms to all of the following conditions:

- (i) The cylinder was manufactured after December 31, 1945.
- (ii) The cylinder is used exclusively for air; argon; helium; oxygen; nitrogen; neon; tetrafluoromethane (CF₄);

hydrogen; deuterium; mixtures of hydrogen, argon, helium, oxygen, and/or nitrogen; mixtures of argon, xenon, and/or neon; mixtures of krypton and neon; mixtures of hydrogen, argon, helium, and/or nitrogen; and mixtures containing deuterium, provided all gas mixtures have a dew point at or below minus (52 °F) at 1 atmosphere.

(iii) Carbon dioxide in any concentration cannot be added to cylinders in the bundle.

(iv) Gases that are toxic and/or corrosive cannot be added to cylinders in the bundle.

(v) If requalified by hydrostatic pressure testing, the cylinder is dried immediately after testing to remove all traces of water.

(vi) The cylinder is not used for underwater breathing.

(vii) Each cylinder is stamped with a five-pointed star at least one-fourth of an inch high immediately following the test date.

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 190

[Docket No. PHMSA–2025–0135; Amdt. No. 190–22]

RIN 2137–AF81

Pipeline Safety: Rationalize Special Permit Conditions

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking.

SUMMARY: PHMSA is proposing to clarify that the conditions in a special permit must relate directly and substantially to the requirement in the Federal Pipeline Safety Regulations that an applicant is seeking to waive.

DATES: Comments must be received on or before September 2, 2025.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0135 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows

the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

I. General Discussion

Congress has authorized PHMSA to issue an order to the owner or operator of a pipeline facility waiving compliance with any standard prescribed in the Federal Pipeline Safety Regulations “on terms [PHMSA] considers appropriate if [PHMSA] determines that the waiver is not inconsistent with pipeline safety.” 49 U.S.C. 60118(c)(1)(A), (c)(2)(A). PHMSA can issue these waivers either on an emergency basis, provided certain conditions are met, or a non-emergency basis. 49 U.S.C. 60118(c)(1) and (2). If a waiver is granted, PHMSA must state the reasons in the order for providing that relief. 49 U.S.C. 60118(c)(3).

Congress has also authorized state authorities with a certification or agreement with PHMSA to issue orders to owners or operators of intrastate pipeline facilities “waiv[ing] compliance with a safety standard to which the certification or agreement applies in the same way and to the same extent” as PHMSA. 49 U.S.C. 60118(d). To issue such a waiver, the state authority “must give [PHMSA] written notice . . . at least 60 days before its effective date.” 49 U.S.C. 60118(d). “If [PHMSA] makes a written objection before the effective date of the waiver, the waiver is stayed” until PHMSA makes a final decision. 49 U.S.C. 60118(d).

PHMSA refers to these congressionally authorized waivers as “special permits” and has codified procedures for the issuance of the same in 49 CFR 190.341. The procedures

address, among other things, the information that must be contained in a special permit application; the process that PHMSA follows in deciding whether to grant, deny, or renew a special permit; and the circumstances where PHMSA may seek to revoke, suspend, or modify a special permit. 49 CFR 190.341. In addition, the procedures generally state that if a special permit is granted, “[c]onditions may be imposed . . . if [PHMSA] concludes they are necessary to assure safety, environmental protection, or are otherwise in the public interest.” 49 CFR 190.341(d)(2).

Experience has shown that the current language in the special permit procedures provides too much discretion to PHMSA in determining the conditions that should be included in granting a waiver. PHMSA has in the past often imposed conditions that are not directly, or even substantially, related to the requirement in the Federal Pipeline Safety Regulations that the applicant asked to be waived. As a result of that historical practice, owners and operators of pipeline facilities are unable to predict what types of conditions will be accepted by or imposed by PHMSA in granting a special permit. These uncertain and inconsistent outcomes also discourage owners and operators from applying for special permits or from proposing conditions to address directly potential risks in their applications.

PHMSA’s historical practice has impeded the agency’s ability to modernize the Federal Pipeline Safety Regulations to accommodate innovative technologies and practices as well. Special permits can serve as a proving ground for evaluating such technologies and practices for potential adoption by regulation under PHMSA’s continuing oversight.

Multiple external stakeholders have called on PHMSA to improve alignment between the regulatory provisions being waived and special permit conditions. In response to a request for information on deregulation (90 FR 14593 (Apr. 3, 2025)), the Interstate Natural Gas Association of America (INGAA) criticized PHMSA’s practice of adopting special permits containing “numerous” conditions (Docket No. DOT–OST–2025–0026–0872 (May 5, 2025)). Other pipeline industry trade associations have echoed that criticism, calling on Congress to act to limit PHMSA’s imposition of special permit conditions “unrelated” to the regulatory provision being waived. Members of Congress have responded to those concerns, echoing interest in streamlining special permit conditions in their public

statements and draft legislation introduced, for example, through the Promoting Innovation in Pipeline Efficiency and Safety Act of 2023.

To address these concerns, PHMSA is proposing to amend § 190.341 to impose a limitation on the types of conditions that can be included special permits. The proposal would require that such conditions be directly and substantially related to the provision in the Federal Pipeline Safety Regulations being waived. PHMSA does not expect that the proposed revisions would have any adverse effect on pipeline safety.

Commenting

Instructions: Please include the docket number PHMSA–2025–0135 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 United States Code (U.S.C.) 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second

copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Saylor Palabrica, Office of Pipeline Safety, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at saylor.palabrica@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This proposed rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This NPRM is not a significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and made a preliminary determination that this proposed rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators by reducing barriers to the acceptance of special permits. PHMSA expects those cost savings will also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and 14219

This NPRM is expected to be a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; (90 FR 9065 (Feb. 6, 2025))). PHMSA estimates that the total costs of the NPRM on the regulated community will be less than zero. Nor does this rulemaking implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; (90 FR 8353 (Jan. 29, 2025))) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy,” (90 FR 8353 (Jan. 29, 2025))) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA preliminarily finds this NPRM is

consistent with each of E.O. 14156 and E.O. 14154. The proposed rule (if finalized) will give affected pipeline operators a more efficient process for requesting waivers for pipeline safety requirements. PHMSA therefore expects the proposed regulatory amendments herein would in turn increase national pipeline transportation capacity and improve pipeline operators' ability to provide abundant, reliable, affordable natural gas and hazardous liquid products in response to residential, commercial, and industrial demand.

However, this proposed rule is not a "significant energy action" under E.O. 13211 ("Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use"; (66 FR 28355 (May 22, 2001))), which requires Federal agencies to prepare a Statement of Energy Effects for any "significant energy action." Because this proposed rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this NPRM as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this NPRM in accordance with the principles and criteria contained in E.O. 13132 ("Federalism"; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum ("Preemption") published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to ensure meaningful and timely input by State and local officials in the development of regulatory policies that may have "substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government."

While the amendments proposed in this NPRM may operate to preempt some State requirements, they would not have substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may

also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the proposed regulatory amendments in this NPRM is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Regulatory Flexibility Analysis (RFA) for a rule subject to notice-and-comment rulemaking under the Administrative Procedure Act (5 U.S.C. 551 *et seq.*) unless the agency head certifies that the proposed rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 ("Proper Consideration of Small Entities in Agency Rulemaking"; 67 FR 53461 (Aug. 16, 2002)) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This NPRM was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The proposed rule is expected to reduce regulatory burdens. Therefore, PHMSA certifies the proposed rulemaking will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or direct final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This NPRM does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*)

requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this proposed rule in accordance with NEPA and has preliminarily determined that the rulemaking should not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment. The public is invited to comment on the impact of the proposed action.

I. Executive Order 13175

PHMSA analyzed this NPRM according to the principles and criteria in Consultation and DOT Order 5301.1A ("Department of Transportation Tribal Consultation Policies and Procedures"). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing "substantial direct compliance costs" or "substantial direct effects" on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the NPRM and preliminarily determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking's proposed regulatory amendments have a broad, national scope; therefore, it would not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has preliminarily concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 ("Promoting International Regulatory Cooperation"; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory

approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the NPRM and has preliminarily determined that its proposed regulatory amendments would not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the NPRM rule and has determined that its proposed regulatory amendments would not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 190

Pipeline Safety.

For the reasons set forth above, PHMSA proposes to amend 49 CFR part 190 as follows:

PART 190—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 1. The authority citation for 49 CFR part 190 continues to read as follows:

Authority: 33 U.S.C. 1321(b); 49 U.S.C. 60101 *et seq.*

■ 2. Amend § 190.341 by revising the second sentence of paragraph (d)(2) to read as follows,

§ 190.341 Special Permit

* * * * *

(d) * * *

(2) * * * The Associate

Administrator may only impose conditions that are directly and substantially related to the relevant standard or regulation being waived in the order granting the application.

* * *

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

49 CFR Part 192

[Docket No. PHMSA–2025–0114]

RIN 2137–AF84

Pipeline Safety: Eliminating Burdensome and Duplicative Deadlines for Gas Pipeline Coating Damage Assessments and Remedial Actions

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: PHMSA is proposing to revise the regulations related to coating damage assessments and remedial actions for gas transmission pipeline operators by adjusting the timeframe in which operators must perform external anti-corrosion coating assessments and any repairs following an unsatisfactory assessment result. This proposed change will provide significant cost savings to gas transmission pipeline operators, eliminate ineffective regulations, and simplify current requirements.

DATES: Persons interested in submitting written comments on this NPRM must do so by September 2, 2025.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0114 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>.

This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Robert Jagger, Senior Transportation Specialist, by telephone at 202–366–4361 or by email at robert.jagger@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

PHMSA is proposing to revise the current requirements governing the timelines for operators to perform assessments of external anti-corrosion coating following installation of pipe in a ditch (*see* §§ 192.319(d) and 192.461(f)) and to complete remedial actions following an unsatisfactory assessment (*see* §§ 192.319(f) and 192.461(h)). The existing requirements state that, for certain projects, operators must perform coating damage assessments on the pipeline using direct current voltage gradient (DCVG) surveys, alternating current voltage gradient (ACVG) surveys, or other technology that provides comparable information about the integrity of the pipeline’s coating “promptly” following the completion of any backfilling of the trench (and in any event no later than 6 months following in-service date of the pipeline). The existing requirements also direct operators to develop remedial action plans, and apply for any necessary permits, within 6 months of completing an assessment that identifies coating deficiencies.

PHMSA has preliminarily determined that these provisions are impractical, unduly burdensome, and unnecessary.

The approach in §§ 192.319(d) and 192.461(f) of linking assessment performance deadlines to the date of backfill completion is often difficult to implement, as operators and regulators cannot always determine when backfilling has officially started or completed; in fact, there might be numerous backfilling dates throughout a project's duration. That uncertainty is compounded by the use of vague durational language ("promptly [after the backfill]") in each regulatory provision.

Similarly, the approach in §§ 192.319(f) and 192.419(h) of linking timelines based on the date of application for required permits has also proven challenging in practice. Pipeline projects can involve multiple permits—none of which would be issued by PHMSA—applied for and obtained at different times; operators must incur administrative costs associated with tracking the status of these permits to ensure compliance with PHMSA regulations.

Industry trade associations have noted that these implementation challenges arising from the current text of §§ 192.319 and 192.461 have real-world financial consequences for operators who often choose to respond to this regulatory uncertainty by erring on the side of caution and performing more (expensive) coating assessments than may be necessary for evaluating the coating protection of their pipelines. Operators may also find themselves creating parallel permit tracking systems within those parts of their organizations responsible for each of compliance with PHMSA regulatory requirements and obtaining necessary construction permits (Docket No. DOT-OST-2025-0026-0897 (May 5, 2025)).

PHMSA proposes to streamline each of the above provisions to address these implementation challenges. With respect to §§ 192.319(d) and 192.461(f), PHMSA proposes to eliminate vague language ("promptly") in the opening sentence of those provisions as well as eliminate the references to "backfill" as a milestone from which the timeline for conducting coating assessments begins. By way of substitute, PHMSA instead proposes to link assessment timelines in each provision to a milestone—the pipeline segment's in-service date—that is understood throughout the industry as a discrete moment of time memorialized in operator work management systems, and which is already referenced in provisions throughout the pipeline safety regulations (PSRs, 49 CFR parts 190–199). PHMSA proposes to eliminate references in §§ 192.319(f) and

192.419(h) to permit application dates and instead emphasize the date of the failed coating assessment for calculation of timelines for performing remedial actions.

PHMSA understands these amendments align with industry stakeholder recommendations. PHMSA does not expect these proposed regulatory amendments would adversely affect safety, as they will likely facilitate operator implementation of external corrosion protection assessment requirements by substituting discrete milestones for vague language and prolonged processes referenced in current regulatory text.

Commenting

Instructions: Please include the docket number PHMSA–2025–0114 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 United States Code (U.S.C.) 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as

"Confidential"; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Robert Jagger, PHP–30, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at robert.jagger@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This proposed rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 ("Regulatory Planning and Review"; 58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B ("Policies and Procedures for Rulemaking"), requires agencies to regulate in the "most cost-effective manner," to make a "reasoned determination that the benefits of the intended regulation justify its costs," and to develop regulations that "impose the least burden on society." DOT Order 2100.6B specifies that regulations should generally "not be issued unless their benefits are expected to exceed their costs." In arriving at those conclusions, E.O. 12866 requires that agencies should consider "both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify" and "maximize net benefits . . . unless a statute requires another regulatory approach." E.O. 12866 also requires that "agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating." DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the "least costly regulatory alternative that achieves the relevant objectives"

unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This NPRM is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and expects that this NPRM may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators that perform coating surveys and coating remediation activities following the installation, repair, or replacement of pipe. Those cost savings may also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and 14219

This NPRM is expected to be a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; (90 FR 9065 (Feb. 6, 2025))). PHMSA estimates that the total costs of the NPRM on the regulated community will be less than zero. Nor does this rulemaking implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; (90 FR 8353 (Jan. 29, 2025))) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy,” (90 FR 8353 (Jan. 29, 2025))) asserts a Federal policy to unleash American energy by ensuing access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and

hazardous liquids. PHMSA finds this NPRM is consistent with each of E.O. 14156 and E.O. 14154. This NPRM will give affected pipeline operators regulatory certainty and cost savings from removing the requirements related to operators documenting specific dates for construction backfill activities and permit applications. PHMSA therefore expects the regulatory amendments in this NPRM will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas in response to residential, commercial, and industrial demand.

However, this NPRM is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; (66 FR 28355 (May 22, 2001))), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this NPRM is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use, and OIRA has therefore not designated this NPRM as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this NPRM in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to ensure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While this NPRM may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety

requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this NPRM is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct an Initial Regulatory Flexibility Analysis (IRFA) for an NPRM subject to notice-and-comment rulemaking under the Administrative Procedure Act unless the agency head certifies that the proposed rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”; 67 FR 53461 (Aug. 16, 2002)) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This NPRM was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The proposed rule is expected to reduce regulatory burdens. Therefore, PHMSA certifies this NPRM will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This NPRM does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*)

requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this proposed rule in accordance with NEPA and has preliminarily determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment. The public is invited to comment on the impact of the proposed action.

I. Executive Order 13175

PHMSA analyzed this NPRM according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the NPRM and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this NPRM will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This NPRM will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated

with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the direct final rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal Government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the NPRM and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 192

Natural gas, Pipeline safety, Pipelines.

In consideration of the foregoing, PHMSA proposes to revise 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 1. The authority citation for part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5121, 60101 *et seq.*, and 49 CFR 1.97.

■ 2. Amend § 192.319 by revising paragraphs (d) and (f) to read as follows:

§ 192.319 Installation of pipe in a ditch.

* * * * *

(d) If the construction project involves 1,000 feet or more of continuous backfill length along the pipeline, then no later than 6 months after placing the pipeline in service, an operator must perform an assessment to assess any coating damage and ensure the integrity of the coating using direct current voltage gradient (DCVG) surveys, alternative current voltage gradient (ACVG) surveys, or other technology that provides comparable information about the integrity of the coating. Such coating surveys must be conducted except in locations where effective coating surveys are precluded by geographical, technical, or safety reasons.

* * * * *

(f) An operator of an onshore steel transmission pipeline must develop a remedial action plan within 6 months of completing the assessment that identified the deficiency. An operator must repair any coating damage classified as severe (voltage drop greater than 60 percent for DCVG or 70 dBμV for ACVG) in accordance with section 4 of NACE SP0502 (incorporated by reference, see § 192.7) within 6 months of the assessment, or as soon as practicable after obtaining necessary permits, not to exceed 6 months after the receipt of such permits.

* * * * *

■ 3. Amend § 192.461 by revising paragraphs (f) and (h) to read as follows:

§ 192.461 External corrosion control: Protective coating

* * * * *

(f) No later than 6 months after placing a pipeline back into service following a repair or replacement that results in 1,000 feet or more of continuous backfill length along the pipeline, an operator must perform an assessment to assess any coating damage and ensure the integrity of the coating using direct current voltage gradient (DCVG) surveys, alternating current voltage gradient (ACVG) surveys, or other technology that provides comparable information about the integrity of the coating. Such coating

surveys must be conducted except in locations where effective coating surveys are precluded by geographical, technical, or safety reasons.

* * * * *

(h) An operator of an onshore steel transmission pipeline must develop a remedial action plan within 6 months of completing the assessment that identified the deficiency. The operator must repair any coating damage classified as severe (voltage drop greater than 60 percent for DCVG or 70 dBµV for ACVG) in accordance with section 4 of NACE SP0502 (incorporated by reference, see § 192.7) within 6 months of the assessment, or as soon as practicable after obtaining necessary permits, not to exceed 6 months after the receipt of such permits.

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

SUPPLEMENTARY INFORMATION:

I. General Discussion

On November 15, 2021, PHMSA published a final rule titled “Pipeline Safety: Safety of Gas Gathering Pipelines: Extension of Reporting Requirements, Regulation of Large, High-Pressure Lines, and Other Related Amendments” in the **Federal Register** (86 FR 63266 (Nov. 15, 2021)) establishing new reporting and safety requirements for gas gathering pipelines in Class 1 locations. One of the regulatory amendments adopted in that final rule (at § 192.8) imposed a 10-mile limitation on the historical exception from certain part 192 requirements applicable to gas transmission lines for “incidental gathering” pipeline segments. Operators are required to identify gas gathering pipelines and regulated onshore gathering lines based on the function of that pipeline in accordance with §§ 192.3 and 192.8, and the first edition of American Petroleum Institute (API) Recommended Practice (RP) 80, “Guidelines for the Definitions of Onshore Gas Gathering Lines.” Under these provisions, the endpoint of an onshore gathering line and the beginning of a transmission or distribution line is the furthestmost downstream endpoint of gathering described in section 2.2(a)(1) of API RP 80, subject to the limitations in § 192.8(a). The possible endpoints defined in API RP 80(a)(1)(A)–(D) and § 192.8(a) include a natural gas processing plant, gas gathering treatment facility, point of comingling from separate fields, or a gathering-related compressor station. API RP

80(a)(1)(E) also includes an “incidental gathering” designation for piping downstream of the furthestmost downstream functional endpoint of gathering that is used to connect to “another pipeline.” The 2021 Gas Gathering Final Rule imposed a new, 10-mile limitation on the use of the incidental gathering line designation in API RP 80. That limitation applies to gathering lines that are “new, replaced, relocated, or otherwise changed” after May 16, 2022, and, if exceeded, requires that the entire length of the pipeline be classified as a gas transmission line under part 192.

On December 15, 2021, the American Petroleum Institute (API) and the GPA Midstream Association submitted a petition for reconsideration (Petition) of the 2021 Gathering Gas Final Rule (Docket No. PHMSA–2011–0023–0493). In their Petition, API and GPA Midstream noted that applying the 10-mile limitation to existing gas gathering lines could require an operator to redesignate the entire length of the line as a gas transmission line in certain scenarios. On April 1, 2022, PHMSA issued a response (Petition Response, Docket No. PHMSA–2011–0023–0504) acknowledging that concern and noting that some incidental gathering line operators would respond by deferring safety-enhancing repairs to avoid the change of regulatory status. To provide PHMSA with the opportunity to consider the issue more closely, PHMSA issued a limited exercise of enforcement discretion providing relief from the 10-mile limitation for existing incidental gathering lines (87 FR 26926 (May 4, 2022)).

PHMSA is now proposing to codify the relief provided in the enforcement discretion at § 192.8(a)(5). As a result of this proposed regulatory amendment, the 10-mile restriction on use of the “incidental gathering” designation would no longer apply to portions of an existing pipeline that had been designated as “incidental gathering” on or before May 16, 2022, which are subsequently relocated, replaced, or otherwise changed. Pipelines newly installed after May 16, 2022, would remain subject to the 10-mile limitation on the “incidental gathering” designation at § 192.8(a)(5).

PHMSA is not aware of any incidents or safety related conditions on gathering lines currently subject to the enforcement discretion. As explained in the Regulatory Impact Analysis for the 2021 Gas Gathering Final Rule, PHMSA also believes that the aggregate length of pipe affected by the 10-mile limitation on the use of the incidental gathering

designation is small.¹ However, the compliance costs for existing incidental gathering lines affected by the 10-mile limitation could be significant for some operators. As noted in the Petition Response, the incidental gathering limitation as written could trigger substantially more burdensome regulatory requirements when an operator replaces, relocates, or otherwise changes an existing incidental gathering line. This could incentivize the delay of safety-enhancing maintenance activity. Eliminating regulatory uncertainty regarding existing incidental gas gathering lines could therefore enhance safety to the extent that it encourages operators to perform such maintenance.

Commenting

Instructions: Please include the docket number PHMSA–2025–0113 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 United States Code (U.S.C.) 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR)

190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Saylor Palabrica, Office of Pipeline Safety, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at saylor.palabrica@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This proposed rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of

not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This proposed rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the procedural and analytical requirements in E.O. 12866 as implemented by DOT Order 2100.6B. In so doing, PHMSA expects that this proposed rule would result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators by codifying PHMSA’s existing exercise of its enforcement discretion to provide that an operator is not required to redesignate existing incidental gathering lines as transmission lines as a result of replacement, relocation, or other changes. While PHMSA exercised enforcement discretion for such lines, this change results in cost savings to the extent that operators would otherwise reclassify incidental gathering lines due to regulatory uncertainty or action by State regulators. Those cost savings may also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and 14219

This NPRM is expected to be a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; (90 FR 9065 (Feb. 6, 2025))). PHMSA estimates that the total costs of the NPRM on the regulated community will be less than zero. Nor does this rulemaking implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

¹ PHMSA, Doc. No. PHMSA–2011–0023–0488, “Regulatory Impact Analysis for the Gas Gathering Final Rule” at 23 (Nov. 2021).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy,” 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA preliminarily finds this proposed rule is consistent with each of E.O. 14156 and E.O. 14154. The proposed rule will give affected pipeline operators regulatory certainty and cost savings by clarifying that operators of lines designated as “incidental gathering” lines as of May 16, 2022, would not need to redesignate those existing lines as transmission lines following replacement, relocation, or other changes on those lines. PHMSA therefore expects the regulatory amendments in this proposed rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas in response to residential, commercial, and industrial demand.

However, this proposed rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; 66 FR 28355 (May 22, 2001)), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this proposed rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this proposed rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this proposed rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to ensure meaningful and timely input by State and local officials in the development of regulatory policies that may have

“substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the proposed rule may (when finalized) operate to preempt some State requirements, it will not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this proposed rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct an Initial Regulatory Flexibility Analysis (IRFA) for a proposed rule subject to notice-and-comment rulemaking under the Administrative Procedure Act unless the agency head certifies that the proposed rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”; 67 FR 53461 (Aug. 16, 2002)) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This proposed rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The proposed rule is expected to reduce regulatory burdens. Therefore, PHMSA certifies the proposed rule (if finalized) will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This proposed rule does not impose unfunded mandates under UMRA. PHMSA does not expect the proposed rule will result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this proposed rule in accordance with NEPA and has preliminarily determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment. The public is invited to comment on the impact of the proposed action.

I. Executive Order 13175

PHMSA analyzed this proposed rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of the proposed rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s

regulatory amendments have a broad, national scope; therefore, this proposed rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA

has assessed the effects of the proposed rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal Government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the proposed rule and has determined that its regulatory amendments will not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 191

Pipeline Safety.

For the reasons set forth above, PHMSA proposes to amend 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 1. The authority citation for 49 CFR part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

§ 192.8 [Amended]

■ 2. In § 192.8(a)(5), remove the phrase, “new, replaced, relocated, or otherwise changed gas gathering pipelines installed” and add in its place the phrase “new gas gathering pipelines installed entirely”.

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

[FR Doc. 2025–12131 Filed 6–27–25; 4:15 pm]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 192

[Docket No. PHMSA–2025–0116]

RIN 2137–AF86

Pipeline Safety: Harmonize Class Location Change Pressure Test Requirements With Subpart J Pressure Test Requirements

AGENCY: Pipeline and Hazardous Materials Safety Administration

(PHMSA), Department of Transportation (DOT).

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: PHMSA is proposing to revise the regulation for confirming or revising the maximum allowable operating pressure following a class location change to clarify that owners and operators of gas pipeline facilities can use to satisfy that requirement certain pressure tests authorized by subpart J of part 192 for small segments of pipe.

DATES: Persons interested in submitting written comments on this proposed rule must do so by September 2, 2025.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0116 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>

This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Robert Jagger, Senior Transportation Specialist, by telephone at 202–366–4361 or by email at robert.jagger@dot.gov.

I. General Discussion

PHMSA proposes amending the requirement at § 192.611(a)(1) for confirming or revising the maximum allowable operating pressure (MAOP) of gas pipelines where the hoop stress corresponding to the established MAOP of a segment of pipeline is not commensurate with the present class location. Currently, § 192.611(a)(1) states that any pipeline segment involved in a class location change that has been previously tested in place for a period of not less than 8 hours must follow certain requirements to confirm or revise the MAOP of that segment. PHMSA adopted the 8-hour pressure test duration requirement in § 192.611(a)(1) in the early 1970s based

on the provisions in a then-current edition of a consensus industry standard, the American Society of Mechanical Engineers Standard B31.8 “Gas Transmission and Distribution Piping Systems” (35 FR 13248 (Aug. 19, 1970)). PHMSA’s regulations elsewhere at § 192.505 authorize the use of a 4-hour pressure test for short or prefabricated pipeline segments if an 8-hour, post-installation test is impractical. These short or prefabricated pipeline segments generally present a lower risk to public safety, which justifies the shorter pressure testing interval at the time of installation.

The current language governing the 8-hour pressure testing requirement in § 192.611(a)(1) prevents operators from using an otherwise valid 4-hour test to confirm or revise the MAOP of a segment following a change in class location. To the extent that such a conflict exists, prohibiting operators from using a valid pressure test to confirm or revise the MAOP of a segment is not consistent with the intent of the pressure testing requirement in § 192.611(a)(1).

For more than five decades, § 192.505(d) has allowed operators to conduct pre-installation strength tests of fabricated units and short sections of pipe for which a post-installation test is impractical by maintaining the pressure at or above the test pressure for at least 4 hours. That requirement has proven its safety value since its adoption. Indeed, PHMSA recently expanded the use of 4-hour pressure testing duration requirements to additional provisions in the Pipeline Safety Regulations (86 FR 2210, 2233 (Jan. 21, 2021)). Operational experience with subpart J-compliant pipe demonstrates an 8-hour test duration is not essential to evaluating the mechanical strength of a pipeline undergoing a class change pursuant to § 192.611(a)(1).

Moreover the language at § 192.611(a)(1) confronts operators with a dilemma: incur additional compliance costs (and safety risks) associated with an 8-hour pressure test or assume the risk that PHMSA will enforce the apparent violation of § 192.611(a)(1) by relying on shorter, subpart J-compliant pressure testing. There is no reason that operators should be faced with that dilemma. PHMSA therefore has preliminarily concluded that the regulatory amendment proposed in this NPRM will reduce burdens on operators without adversely affecting safety.

Commenting

Instructions: Please include the docket number PHMSA–2025–0116 at the beginning of your comments. If you

submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 United States Code (U.S.C.) 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Robert Jagger, PHP–30, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at robert.jagger@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the

documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This proposed rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)) as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This proposed rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and expects the proposed rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility

operators by clarifying the regulations for confirming or revising the MAOP of gas pipeline facilities following a change in class location. PHMSA expects these cost savings would be realized by the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and 14219

This proposed rule would be a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; 90 FR 9065 (Feb. 6, 2025)). PHMSA estimates that the total costs of the rulemaking on the regulated community would be less than zero. Nor does this rulemaking implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; 90 FR 8353 (Jan. 29, 2025)) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy,” 90 FR 8353 (Jan. 29, 2025)) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA preliminarily finds this rulemaking is consistent with each of E.O. 14156 and E.O. 14154. This proposal herein would give affected pipeline operators greater flexibility in pressure testing methods associated with reconfirming or revising MAOP following a class location change. PHMSA therefore expects the proposed regulatory amendments will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas in response to residential, commercial, and industrial demand.

However, this proposed rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”;

66 FR 28355 (May 22, 2001)), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this proposed rule is not a significant action under E.O. 12866, it would not have a significant adverse effect on supply, distribution, or energy use, as further discussed in the Regulatory Impact Analysis; OIRA has therefore not designated this NPRM as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this NPRM in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to ensure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While this NPRM’s proposal may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the proposed regulatory amendments would be limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a rulemaking subject to notice-and-comment rulemaking under the

Administrative Procedure Act (5 U.S.C. 500 *et seq.*) unless the agency head certifies that the proposed rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”; 67 FR 53461 (Aug. 16, 2002)) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This NPRM was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. PHMSA expects the NPRM’s proposals will relieve regulatory burdens and therefore certifies it will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This NPRM would not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this proposed rule in accordance with NEPA and issues this draft Finding of No Significant Impact (FONSI), as it has preliminarily determined that the rulemaking would not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this proposed rule according to the principles and criteria in E.O. 13175 (“Consultation and

Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of this proposed rule and preliminarily determined that it would not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, the NPRM would not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of this proposed rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal Government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of this rulemaking and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 192

Pipelines, pipeline safety, Natural gas.

In consideration of the foregoing, PHMSA proposes to amend 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 1. The authority citation for part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5121, 60101 *et seq.*, and 49 CFR 1.97.

■ 2. Amend § 192.611 by revising paragraph (a)(1) to read as follows:

§ 192.611 Change in class location: Confirmation or revision of maximum allowable operating pressure.

(a) * * *

(1) If the segment involved has been previously tested in place for a period of not less than 8 hours or received a pre-installation strength test for a period

of at least 4 hours pursuant to § 192.505(d):

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,

Acting Administrator.

[FR Doc. 2025–12128 Filed 6–27–25; 4:15 pm]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 192

[Docket No. PHMSA–2025–0115]

RIN 2137–AF85

Pipeline Safety: Atmospheric Corrosion Reassessment for Pipeline Replacements

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: PHMSA is proposing to revise the corrosion requirements in 49 CFR part 192 for gas distribution systems by replacing the 3-year reassessment interval with a 5-year reassessment interval following the replacement of pipeline segments or components in service lines. This change would provide cost savings to gas distribution operators.

DATES: Persons interested in submitting written comments on this proposed rule must do so by September 2, 2025.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0115 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

For commenting instructions and additional information about commenting, see **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Robert Jagger, Senior Transportation Specialist, by telephone at 202–366–4361 or by email at robert.jagger@dot.gov.

SUPPLEMENTARY INFORMATION:

I. General Discussion

In this NPRM, PHMSA is proposing to revise the atmospheric corrosion control requirements in § 192.481 for gas distribution service lines. Section 192.481(a)(2) generally requires operators to inspect service lines for evidence of atmospheric corrosion on a 5-year interval. If evidence of atmospheric corrosion is found during the most recent inspection, however, § 192.481(d) requires operators to conduct the next inspection of a service line on a 3-year interval. Section 192.481(d) requires operators to conduct that 3-year reinspection even if the atmospheric corrosion found during the most recent inspection is remediated by replacing the affected portion of the service line.

PHMSA has made a preliminary determination that requiring a 3-year reinspection for evidence of atmospheric corrosion is unnecessary and imposes an undue burden if an operator replaces the affected portion of a service line. Atmospheric corrosion presents minimal risk to new service lines, and operators can effectively manage that risk by conducting inspections on the standard 5-year interval. In addition, requiring operators to reinspect replaced service lines on a shorter interval imposes additional costs that are not justified by a corresponding benefit. Accordingly, PHMSA is proposing to amend § 192.481(d) by providing an exception to the 3-year reinspection interval for replaced service lines.

Commenting

Instructions: Please include the docket number PHMSA–2025–0115 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy

statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 United States Code (U.S.C.) 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Robert Jagger, PHP–30, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at robert.jagger@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This NPRM is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This NPRM is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and expects that this NPRM may result in cost savings by reducing regulatory burdens and regulatory uncertainty for pipeline facility operators related to the performance of atmospheric corrosion inspections and the reassessment intervals of such inspections. Those cost savings may also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and 14219

This NPRM is expected to be a deregulatory action pursuant to Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)). PHMSA estimates that the total costs of the NPRM on the regulated community would be less than zero. Nor does this rulemaking implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; (90 FR 8353 (Jan. 29, 2025))) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy,” (90 FR 8353 (Jan. 29, 2025))) asserts a Federal policy to unleash American energy by ensuing access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]” on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA finds this NPRM is consistent with each of E.O. 14156 and E.O. 14154. The NPRM would give affected pipeline operators reduced compliance obligations regarding atmospheric corrosion inspection intervals in response to pipe replacements. PHMSA therefore expects the regulatory amendments in this NPRM will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas in response to residential, commercial, and industrial demand.

However, this NPRM is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; (66 FR 28355 (May 22, 2001))), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” This NPRM is not a significant action under E.O. 12866 and also, it would not have a significant adverse effect on supply, distribution, or energy use; OIRA has therefore not designated this NPRM as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this NPRM in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the **Federal Register** on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to ensure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While this NPRM may operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this NPRM is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct an Initial Regulatory Flexibility Analysis (IRFA) for an NPRM subject to notice-and-comment rulemaking under the Administrative Procedure Act unless the agency head certifies that the proposed rule will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”; 67 FR 53461 (Aug. 16, 2002)) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated

web page.¹ This NPRM was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The proposed rule is expected to reduce regulatory burdens. Therefore, PHMSA certifies the proposed rulemaking will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This NPRM does not impose unfunded mandates under UMRA because it does not result in costs of \$100 million or more (in 1996 dollars) per year for either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this NPRM in accordance with NEPA and issues this draft Finding of No Significant Impact (FONSI), as it has preliminarily determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment.

I. Executive Order 13175

PHMSA analyzed this NPRM according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities

¹ DOT, “Rulemaking Requirements Related to Small Entities,” <https://www.transportation.gov/regulations/rulemaking-requirements-concerning-small-entities> (last accessed Sept 3, 2024).

by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal Government and Tribes.

PHMSA assessed the impact of this NPRM and determined that it would not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this NPRM would not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This NPRM would not create, amend, or rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the

standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of this NPRM and has determined that its proposed regulatory amendments would not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal Government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of this NPRM and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 192

Natural gas, Pipeline safety, Pipelines.

In consideration of the foregoing, PHMSA proposes to revise 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 1. The authority citation for part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5121, 60101 *et seq.*, and 49 CFR 1.97.

■ 2. Amend § 192.481 by revising paragraph (d) to read as follows:

§ 192.481 Atmospheric corrosion control: Monitoring.

* * * * *

(d) If atmospheric corrosion is found on a service line during the most recent inspection, then the next inspection of that pipeline or portion of pipeline must be within 3 calendar years, but with intervals not exceeding 39 months, unless the service line is replaced.

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,
Acting Administrator.

[Docket No. PHMSA–2025–0112]

RIN 2137–AF82

Pipeline Safety: Exception for In-Plant Piping Systems

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This NPRM proposes to codify an exception for in-plant piping systems into the gas pipeline safety regulations. The proposed exception is consistent with prior guidance and a similar provision in the hazardous liquid pipeline safety regulations.

DATES: Comments must be received on or before September 2, 2025.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2025–0112 using any of the following methods:

E-Gov Web: <https://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Mail: Docket Management System: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: U.S. DOT Docket Management System: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

I. General Discussion

PHMSA’s regulations at 49 CFR part 195 for hazardous liquid and carbon dioxide pipelines provide an explicit exception for “in-plant piping systems” at certain facilities. 49 CFR 195.1(b)(8);

49 U.S.C. 60101(a)(22)(B)(ii)–(iii). PHMSA’s regulations at 49 CFR part 192 for gas pipelines do not explicitly recognize a similar exception, although PHMSA has often applied the same principles in evaluating the regulatory status of in-plant piping systems at gas processing, manufacturing, and industrial facilities (PI–09–0020 (Aug. 11, 2010); PI–15–0002 (Apr. 2, 2015); PI–18–0012 (Apr. 29, 2019); PI–22–0007 (Jul. 7, 2022)).

PHMSA has also acknowledged that in-plant piping systems are subject to regulation under other Federal or State programs, such as the Occupational Safety and Health Administration’s Process Safety Management regulations in 29 CFR 1910.119, and that these regulatory programs can provide a comparable or equivalent level of safety to the requirements in parts 192 and 195. PHMSA has further recognized that applying overlapping regulatory programs to in-plant piping systems often results in uncertainty and duplicative or contradictory compliance obligations (85 FR 70124 (Nov. 4, 2020); Docket No. PHMSA–2019–0199).

In addition, stakeholders have recently submitted comments emphasizing that the absence of explicit exception for in-plant piping systems in part 192 imposes undue burdens on owners and operators of gas pipeline facilities (90 FR 14593 (Apr. 3, 2025); Docket No. DOT–OST–2025–0026). They have asked PHMSA to address that issue by codifying such an exception consistent with its prior interpretations and the comparable provisions in part 195 (DOT–OST–2025–0026–0830 (May 5, 2025)).

PHMSA agrees with the commenters and is proposing to add an exception to § 192.1(b) for in-plant piping systems. PHMSA’s proposal includes a definition for in-plant piping system that aligns with the provisions in part 195, but which establishes a clear point of demarcation between in-plant piping systems and transportation-related pipelines based on prior interpretations. Specifically, PHMSA is proposing to clarify that the point of demarcation for in-plant piping is the inlet of the pressure control device if the pipeline is moving product away from plant grounds, the outlet of the pressure control device if the pipeline is supplying the plant, or, if there is no such device on plant grounds, the plant boundary.¹ By including this clarification, PHMSA intends to minimize the need to reclassify existing

facilities among operators that were applying that historical understanding on the boundary between in-plant piping and regulated pipeline facilities.

PHMSA intends to apply its prior interpretations, whether issued in the context of gas or hazardous liquid pipelines, to the proposed definition of “in-plant piping systems” in § 192.3, including in determining the status of in-plant pipeline systems that cross a single public throughfare (e.g., a public road or rail line) (59 FR 33388, 33389 (Jun. 28, 1994); PI–19–0017 (Jun. 8, 2021)). However, PHMSA seeks comments on whether those interpretations should be codified in the text of part 192.

Commenting

Instructions: Please include the docket number PHMSA–2025–0112 at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <https://www.regulations.gov>.

Note: Comments are posted without changes or edits to <https://www.regulations.gov>, including any personal information provided. There is a privacy statement published on <https://www.regulations.gov>.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.dot.gov/privacy>.

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA, 5 U.S.C. 552), CBI is exempt from public disclosure. It is important that you clearly designate the comments submitted as CBI if: your comments responsive to this document contain commercial or financial information that is customarily treated as private; you actually treat such information as private; and your comment is relevant or responsive to this notice. Pursuant to 49 Code of Federal Regulations (CFR) 190.343, you may ask PHMSA to provide confidential treatment to information you give to the agency by taking the following steps: (1) mark each page of the original document

submission containing CBI as “Confidential”; (2) send PHMSA, along with the original document, a second copy of the original document with the CBI deleted; and (3) explain why the information that you are submitting is CBI. Submissions containing CBI should be sent to Sayler Palabrica, Office of Pipeline Safety Standards and Rulemaking Division, Pipeline and Hazardous Materials Safety Administration (PHMSA), 2nd Floor, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, or by email at sayler.palabrica@dot.gov. Any materials PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Follow the online instructions for accessing the docket. Alternatively, you may review the documents in person at the street address listed above.

II. Regulatory Analysis and Notices

A. Legal Authority

This proposed rule is published under the authority of the Secretary of Transportation set forth in the Federal Pipeline Safety Laws (49 U.S.C. 60101 *et seq.*) and delegated to the PHMSA Administrator pursuant to 49 CFR 1.97.

B. Executive Order 12866; Regulatory Planning and Review

Executive Order (E.O.) 12866 (“Regulatory Planning and Review”; 58 FR 51735 (Oct. 4, 1993)), as implemented by DOT Order 2100.6B (“Policies and Procedures for Rulemaking”), requires agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” DOT Order 2100.6B specifies that regulations should generally “not be issued unless their benefits are expected to exceed their costs.” In arriving at those conclusions, E.O. 12866 requires that agencies should consider “both quantifiable measures . . . and qualitative measures of costs and benefits that are difficult to quantify” and “maximize net benefits . . . unless a statute requires another regulatory approach.” E.O. 12866 also requires that “agencies should assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating.” DOT Order 2100.6B directs that PHMSA and other Operating Administrations must generally choose

¹ PHMSA Letter of Interpretation to Ms. Kim Garold, Flint Hills Resources, No. PI–19–0017 (June 8, 2021).

the “least costly regulatory alternative that achieves the relevant objectives” unless required by law or compelling safety need.

E.O. 12866 and DOT Order 2100.6B also require that PHMSA submit “significant regulatory actions” to the Office of Information and Regulatory Affairs (OIRA) within the Executive Office of the President’s Office of Management and Budget (OMB) for review. This proposed rule is a not significant regulatory action pursuant to E.O. 12866; it also has not designated this rule as a “major rule” as defined by the Congressional Review Act (5 U.S.C. 801 *et seq.*).

PHMSA has complied with the requirements in E.O. 12866 as implemented by DOT Order 2100.6B and preliminarily determined that this proposed rule will result in cost savings by reducing regulatory burdens and regulatory uncertainty for gas pipeline facility operators by clarifying jurisdictional boundaries within certain types of facilities, avoiding duplicative or contradictory Federal requirements. PHMSA expects those cost savings will also result in reduced costs for the public to whom pipeline operators generally transfer a portion of their compliance costs. The cost savings of this rulemaking could not be quantified.

C. Executive Orders 14192 and 14219

This NPRM is expected to be a deregulatory action pursuant to E.O. 14192 (“Unleashing Prosperity Through Deregulation”; (90 FR 9065 (Feb. 6, 2025)). PHMSA estimates that the total costs of the NPRM on the regulated community will be less than zero. Nor does this rulemaking implicate any of the factors identified in section 2(a) of E.O. 14219 (“Ensuring Lawful Governance and Implementing the President’s ‘Department of Government Efficiency’ Deregulatory Initiative”) indicative that a regulation is “unlawful . . . [or] that undermine[s] the national interest.” (90 FR 10583 (Feb. 25, 2025)).

D. Energy-Related Executive Orders 13211, 14154, and 14156

The President has declared in E.O. 14156 (“Declaring a National Energy Emergency”; (90 FR 8353 (Jan. 29, 2025))) a national emergency to address America’s inadequate energy development production, transportation, refining, and generation capacity. Similarly, E.O. 14154 (“Unleashing American Energy,” (90 FR 8353 (Jan. 29, 2025))) asserts a Federal policy to unleash American energy by ensuring access to abundant supplies of reliable, affordable energy from (inter alia) the removal of “undue burden[s]”

on the identification, development, or use of domestic energy resources such as PHMSA-jurisdictional gasses and hazardous liquids. PHMSA preliminarily finds this proposed rule is consistent with each of E.O. 14156 and E.O. 14154. The proposed rule will give affected pipeline operators relief from complying with the pipeline safety requirements for in-plant piping. PHMSA therefore expects the regulatory amendments in this proposed rule will in turn increase national pipeline transportation capacity and improve pipeline operators’ ability to provide abundant, reliable, affordable natural gas in response to residential, commercial, and industrial demand.

However, this proposed rule is not a “significant energy action” under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”; (66 FR 28355 (May 22, 2001))), which requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Because this proposed rule is not a significant action under E.O. 12866, it will not have a significant adverse effect on supply, distribution, or energy use, as further discussed in the RIA; OIRA has therefore not designated this proposed rule as a significant energy action.

E. Executive Order 13132: Federalism

PHMSA analyzed this proposed rule in accordance with the principles and criteria contained in E.O. 13132 (“Federalism”; 64 FR 43255 (Aug. 10, 1999)) and the Presidential Memorandum (“Preemption”) published in the *Federal Register* on May 22, 2009 (74 FR 24693). E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.”

While the proposed rule may (when finalized) operate to preempt some State requirements, it would not impose any regulation that has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. Section 60104(c) of Federal Pipeline Safety Laws prohibits certain State safety regulation of interstate pipelines. Under Federal Pipeline Safety Laws, States that have submitted a current certification under section 60105(a) can augment Federal

pipeline safety requirements for intrastate pipelines regulated by PHMSA but may not approve safety requirements less stringent than those required by Federal law. A State may also regulate an intrastate pipeline facility that PHMSA does not regulate. The preemptive effect of the regulatory amendments in this proposed rule is limited to the minimum level necessary to achieve the objectives of the Federal Pipeline Safety Laws. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires Federal agencies to conduct a Final Regulatory Flexibility Analysis (FRFA) for a proposed rule subject to notice-and-comment rulemaking under the APA unless the agency head certifies that the proposed rule in the rulemaking will not have a significant economic impact on a substantial number of small entities. E.O. 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”; 67 FR 53461 (Aug. 16, 2002)) obliges agencies to establish procedures promoting compliance with the Regulatory Flexibility Act. DOT posts its implementing guidance on a dedicated web page. This proposed rule was developed in accordance with E.O. 13272 and DOT implementing guidance to ensure compliance with the Regulatory Flexibility Act. The proposed rule is expected to reduce regulatory burdens. Therefore, PHMSA certifies the proposed rule (if finalized) will not have a significant impact on a substantial number of small entities.

G. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act (UMRA, 2 U.S.C. 1501 *et seq.*) requires agencies to assess the effects of Federal regulatory actions on State, local, and Tribal governments, and the private sector. For any proposed or final rule that includes a Federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate of \$100 million or more (in 1996 dollars) in any given year, the agency must prepare, amongst other things, a written statement that qualitatively and quantitatively assesses the costs and benefits of the Federal mandate.

This proposed rule does not impose unfunded mandates under UMRA. PHMSA does not expect the proposed rule will result in costs of \$100 million or more (in 1996 dollars) per year for

either State, local, or Tribal governments, or to the private sector.

H. National Environmental Policy Act

The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) requires that Federal agencies assess and consider the impact of major Federal actions on the human and natural environment.

PHMSA analyzed this proposed rule in accordance with NEPA and issues this draft Finding of No Significant Impact (FONSI), because it has preliminarily determined that the rulemaking will not adversely affect safety and therefore will not significantly affect the quality of the human and natural environment. The public is invited to comment on the impact of the proposed action.

I. Executive Order 13175

PHMSA analyzed this proposed rule according to the principles and criteria in E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”; 65 FR 67249 (Nov. 9, 2000)) and DOT Order 5301.1A (“Department of Transportation Tribal Consultation Policies and Procedures”). E.O. 13175 requires agencies to assure meaningful and timely input from Tribal government representatives in the development of rules that significantly or uniquely affect Tribal communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship or distribution of power between the Federal government and Tribes.

PHMSA assessed the impact of the proposed rule and determined that it will not significantly or uniquely affect Tribal communities or Indian Tribal governments. The rulemaking’s regulatory amendments have a broad, national scope; therefore, this proposed rule will not significantly or uniquely affect Tribal communities, much less impose substantial compliance costs on Native American Tribal governments or mandate Tribal action. For these reasons, PHMSA has concluded that the funding and consultation requirements of E.O. 13175 and DOT Order 5301.1A do not apply.

J. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies with an opportunity to comment on information collection and recordkeeping requests. This rulemaking will not create, amend, or

rescind any existing information collections.

K. Executive Order 13609 and International Trade Analysis

E.O. 13609 (“Promoting International Regulatory Cooperation”; 77 FR 26413 (May 4, 2012)) requires agencies consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American business to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, international regulatory cooperation can identify approaches that are at least as protective as those that are or would be adopted in the absence of such cooperation. International regulatory cooperation can also reduce, eliminate, or prevent unnecessary differences in regulatory requirements.

Similarly, the Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA engages with international standards setting bodies to protect the safety of the American public. PHMSA has assessed the effects of the proposed rule and has determined that its regulatory amendments will not cause unnecessary obstacles to foreign trade.

L. Cybersecurity and Executive Order 14028

E.O. 14028 (“Improving the Nation’s Cybersecurity”; 86 FR 26633 (May 17, 2021)) directed the Federal government to improve its efforts to identify, deter, and respond to “persistent and increasingly sophisticated malicious cyber campaigns.” PHMSA has considered the effects of the proposed rule and has determined that its regulatory amendments would not materially affect the cybersecurity risk profile for pipeline facilities.

List of Subjects in 49 CFR Part 191

Pipeline Safety.

For the reasons set forth above, PHMSA proposes to amend 49 CFR part 192 as follows:

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE: MINIMUM FEDERAL SAFETY STANDARDS

■ 1. The authority citation for 49 CFR part 192 continues to read as follows:

Authority: 30 U.S.C. 185(w)(3), 49 U.S.C. 5103, 60101 *et seq.*, and 49 CFR 1.97.

■ 2. In § 192.1, add paragraph (b)(6) to read as follows:

§ 192.1 What is the scope of this part?

* * * * *

(b) * * *

(6) Any in-plant piping system.

■ 3. In § 192.3, add a definition for “in-plant piping system” in alphabetical order to read as follows:

§ 192.3 Definitions

* * * * *

In-plant piping system means piping that is located on the grounds of a plant and used to move gas between plant facilities or between plant facilities and a pipeline or other mode of transportation, not including any device and associated piping that are necessary to control pressure in a pipeline. The point of demarcation between a pipeline and an in-plant piping system is the inlet of the pressure control device if the pipeline is moving gas out of the plant or the outlet of the pressure control device if the pipeline is moving gas into the plant. If there is no such pressure control device located on the grounds of the plant, an in-plant piping system extends to the plant boundary.

* * * * *

Issued in Washington, DC, on June 26, 2025, under the authority delegated in 49 CFR 1.97.

Benjamin D. Kochman,

Acting Administrator.

[FR Doc. 2025–12130 Filed 6–27–25; 4:15 pm]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 209

[Docket No. FRA–2025–0077]

RIN 2130–AD11

Prosecutorial Discretion of Enforcement Attorneys

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This proposed rule would clarify that FRA's Office of the Chief Counsel has discretion to decline or dismiss a violation, such as a technical violation where challenged conduct does not raise a practical safety issue.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES:

Comments: Comments related to Docket No. FRA–2025–0077 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA–2025–0077), and Regulatory Identification Number (RIN) for this rulemaking (2130–AD11). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT: Amanda Maizel, Attorney Adviser, FRA, telephone: (202) 308–3753, email: Amanda.Maizel@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR). As part of this effort, on Apr. 3, 2025, DOT issued a request for information in which it asked the public to assist in identifying existing regulations, guidance, paperwork requirements, and other regulatory obligations that can be modified or repealed, consistent with law, to ensure that DOT administrative actions do not undermine the national interest and that DOT achieves meaningful burden

reduction while continuing to meet statutory obligations and ensure the safety of the U.S. transportation system.¹ DOT received 955 comments, including some that were rail-related and specifically a comment from the Association of American Railroads (AAR). In addition to other proposals, AAR requested that FRA clarify in 49 CFR part 209 that FRA's Office of the Chief Counsel has discretion to dismiss a technical violation where the challenged conduct does not raise a practical safety issue.

FRA intends to adopt this request and to clarify that attorneys in the Office of the Chief Counsel have enforcement discretion in all phases of a potential enforcement action. FRA has broad discretion to enforce the Federal railroad safety laws and regulations, including determining the appropriate method of addressing any violation it finds.² Accordingly, similar to the discretion that FRA has in determining whether to transmit or decline an enforcement action, FRA also has discretion to dismiss a violation, such as a technical violation where the challenged conduct does not raise a practical safety issue. Even where FRA has transmitted a violation and decides not to dismiss it, FRA continues to have the discretion to reduce the civil penalty, but not below the respective statutory minimum amount, adjusted annually for inflation.³ This clarification would streamline the enforcement process, relieve enforcement burdens on regulated entities, and promote due process and fairness. In addition, this proposal is consistent with the Mar. 11, 2025, DOT Memorandum, *Procedural Requirements for Enforcement Actions*.⁴

¹ 90 FR 14593 (Apr. 3, 2025).

² *Railway Labor Executives Ass'n v. Dole*, 760 F.2d 1021, 1025 (9th Cir. 1985) (finding “nothing in the railroad safety legislation to indicate Congress intended to make prosecutorial discretion subject to judicial review,” and upholding the dismissal of a challenge to the Secretary of Transportation's safety plan that stressed cooperation with railroads in finding and remedying safety problems).

³ See Federal Civil Penalties Inflation Adjustment Act of 1990, Public Law 101–410, as amended by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (2015 Act), Public Law 114–74, 129 Stat. 599, codified at 28 U.S.C. 2461 note.

⁴ See *Procedural Requirements for Enforcement Actions*, Mar. 11, 2025, available at <https://www.transportation.gov/sites/dot.gov/files/2025-03/Procedural%20Requirements%20for%20DOT%20Enforcement%20Actions.Cote%20Memo.Signed.03-11-2025.pdf>.

II. Section-by-Section Analysis

Appendix A to Part 209—Statement of Agency Policy Concerning Enforcement of Federal Railroad Safety Laws

As discussed above, FRA proposes to clarify that the Office of the Chief Counsel has discretion to decline to enforce a violation, such as a technical violation where the challenged conduct does not raise a practical safety issue. FRA proposes to add this statement to the discussion of FRA's Civil Penalty Process in appendix A to part 209.

III. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this NPRM under E.O. 12866 (58 FR 51735, Oct. 4, 1993), Regulatory Planning and Review and DOT Regulatory Policies and Procedures. The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866.

FRA analyzed the potential costs and benefits of this proposed rule. This proposed rule would clarify that FRA's Office of the Chief Counsel has discretion to decline or dismiss a violation, such as when the challenged conduct does not raise a practical safety issue. By providing this clarification, regulated entities would benefit from a streamlined enforcement process, relief from enforcement burdens, and the promotion of due process and fairness. This clarification would also help to eliminate any confusion on the Office of the Chief Counsel's discretionary authority to decline to enforce or to dismiss a technical violation where the challenged conduct does not raise a practical safety issue. FRA does not anticipate any costs from this proposed rule, but welcomes comments from the public on the impacts of this proposal.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192 (90 FR 9065, Jan. 31, 2025), *Unleashing Prosperity Through Deregulation*, requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”⁵ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O.

⁵ Executive Office of the President, *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067 (Feb. 6, 2025).

14192 deregulatory action, and an E.O. 14192 regulatory action.⁶

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA affirms that each amendment proposed in this NPRM has a cost that is negligible or “less than zero” consistent with E.O. 14192, FRA still requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,⁷ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule would not preclude small entities from continuing practices that comply with part 209; it merely offers clarity that could result in some benefits. By extending this regulatory relief, many regulated entities, including small entities, would experience benefits. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub.

L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

This proposed rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Pursuant to section 106 of the National Historic Preservation Act and its implementing regulations, FRA has determined this undertaking has no potential to affect historic properties. FRA has also determined that this rulemaking does not approve a project resulting in a use of a resource protected by section 4(f).

F. Federalism Implications

This proposed rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with

section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”⁸ FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁹ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL–14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely

optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at [regulations.gov](https://www.regulations.gov), Docket No. FRA–2025–0077, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 209

Administrative practice and procedure, Enforcement, Hazardous materials transportation, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend part 209 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 209—RAILROAD SAFETY ENFORCEMENT PROCEDURES

■ 1. The authority citation for part 209 continues to read as follows:

Authority: 49 U.S.C. 5123, 5124, 20103, 20107, 20111, 20112, 20114; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise appendix A to part 209 in the section under the heading “The Civil Penalty Process” to read as follows:

Appendix A to Part 209—Statement of Agency Policy Concerning Enforcement of the Federal Railroad Safety Laws.

* * * * *

The Civil Penalty Process

* * * Once penalties have been assessed, the railroad is given a reasonable amount of time to investigate the charges. Larger railroads usually make their case before FRA in an informal conference covering a number of case files that have been issued and investigated since the previous conference. Thus, in terms of the negotiating time of both sides, economies of scale are achieved that would be impossible if each case were negotiated separately. The settlement conferences include technical experts from both FRA and the railroad as well as lawyers for both parties. Similar to the discretion that the Office of the Chief Counsel has in determining whether to transmit an enforcement action or to decline to prosecute a recommended violation, the Office also has discretion to dismiss a violation, such as a technical violation where the challenged conduct does not raise a practical safety issue. Even if FRA determines not to dismiss the violation, FRA continues to have the discretion to reduce the penalty, but not below the relevant statutory minimum

amount. In addition to allowing the two sides to make their cases for the relative merits of the various claims, these conferences also provide a forum for addressing current compliance problems. Smaller railroads usually prefer to handle negotiations through email or over the phone, often on a single case at a time. Once the two sides have agreed to an amount on each case, that agreement is put in writing and a payment is submitted to FRA’s accounting division covering the full amount agreed on.

* * * * *

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

Federal Railroad Administration

49 CFR Part 209

[Docket No. FRA–2022–0085]

RIN 2130–AC93

Amendments to the Federal Railroad Administration’s Procedures for Service of Documents in Railroad Safety Enforcement Proceedings

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This proposed rule would update FRA’s railroad safety enforcement procedures and rules of practice to require electronic service of documents. This proposed rule would also establish procedures to implement new authority regarding civil penalties for alleged Federal railroad safety violations. Finally, this proposal would make other necessary administrative updates, such as correcting addresses.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES:

Comments: Comments related to Docket No. FRA–2022–0085 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA–2022–0085), and Regulatory Identification Number (RIN) for this rulemaking (2130–AC93). All comments received will be posted

without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT:

Veronica Chittim, Senior Attorney, Office of Safety Law, Office of the Chief Counsel, FRA, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone 202–480–3410), veronica.chittim@dot.gov; or Lucinda Henriksen, Senior Advisor, Office of Railroad Safety, FRA (telephone 202–657–2842), lucinda.henriksen@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s economic prosperity without compromising transportation safety, and as described in more detail below, this proposed rule would update FRA’s railroad safety enforcement procedures and rules of practice to require electronic service of documents; establish procedures to implement new authority regarding civil penalties for alleged Federal railroad safety violations; and make other necessary administrative updates, such as correcting addresses.

In 1977, FRA established 49 CFR part 209, which set out certain procedures for carrying out FRA’s safety enforcement mission. 42 FR 56742 (Oct. 28, 1977). Part 209 currently provides procedures for the assessment of civil penalties pursuant to the Federal hazardous materials (hazmat) transportation safety laws, 49 U.S.C. chapter 51, in subpart B; compliance orders pursuant to 49 U.S.C. 5121(a) and/or 20111(b) in subpart C; and administrative proceedings relating to the determination of an individual’s fitness for performing safety-sensitive functions under 49 U.S.C. 20111(c) (individual liability) in subpart D. Subpart A includes general provisions that apply to each of these subparts.¹

¹ Part 209 also includes subpart E, which sets forth provisions regarding the submission of remedial action reports by railroads, and subpart F, which deals with the review of rail routing decisions.

Part 209 divides procedures for the service of documents into two sections, with § 209.7 concerning the service of subpoenas, and § 209.5 concerning the service of all other documents in proceedings governed by part 209. *Id.* at 56743. Among other things, § 209.5 regulates the service of documents in hazmat civil penalty assessments, compliance orders, and individual liability proceedings. While appendix A to part 209 details the procedures for non-hazmat civil penalty assessments, those procedures do not include any specific requirements for how documents may be transmitted to respondents.

FRA has updated part 209's service provisions only once, in 1989, to prescribe procedures for disqualifying railroad employees from performing safety-sensitive functions and permit service by first-class mail of motions and requests for admissions. 54 FR 42894 (Oct. 18, 1989). To account for technological changes that have occurred since then, conform FRA's procedures for hazmat and non-hazmat assessments, align FRA's service provisions with those at other agencies,² and help agency operations to continue, without interruption, during emergencies, this proposed rule would modernize part 209's provisions and other FRA procedures regarding service to require service through electronic methods of transmission. By serving documents electronically, parties to proceedings under part 209 can expedite document delivery and reduce printing and mailing costs.

This proposal would also establish procedures in part 209 to implement new authority regarding civil penalties provided in section 22418 of the Infrastructure Investment and Jobs Act, Public Law 117–58 (Nov. 15, 2021), codified at 49 U.S.C. 21301(a). This statutory authority allows FRA to administratively resolve civil penalty assessments alleging violations under FRA's railroad safety authority.

Congress provided FRA with the authority to resolve these civil penalty matters with an administrative hearing, which: (1) aligns FRA's authority and procedures with those of other DOT modal administrations, such as the

Federal Aviation Administration and the Pipeline and Hazardous Materials Safety Administration (*see, e.g.*, 49 U.S.C. 5123(b) and 46301(c)(1)); (2) creates procedural and economic efficiencies in civil penalty enforcement matters under the railroad safety laws that are not otherwise paid or compromised; (3) ensures due process; (4) encourages compliance and responsiveness from regulated entities; (5) allows for the composition of an administrative record in the event of litigation; and (6) promotes safety. To implement this authority, this proposed rule would establish administrative procedures similar to those for hazmat cases (49 CFR part 209, subpart B), in a new subpart G of part 209.

This NPRM would also make miscellaneous updates to web and email addresses to ensure they are accurate. Finally, the proposed rule would adjust language in FRA regulations to ensure information gets to the agency subject matter expert in the relevant technical discipline.

II. Section-by-Section Analysis

Part 209

§ 209.1 Purpose

In § 209.1, FRA proposes to update the relevant citations regarding FRA's rail safety and hazardous materials authority. The provisions previously found in 49 CFR 1.49 are now found in 49 CFR 1.88 and 1.89. FRA proposes to revise § 209.1(a) and (b) and remove (c) entirely, as the citations in § 209.1 are obsolete.

§ 209.5 Service

This proposal would restructure 49 CFR 209.5, to update paragraph (a) to require the service of documents through electronic methods of delivery, such as email, whenever possible. FRA would expect all documents to be served by electronic means, unless such means are impossible or otherwise unavailable. FRA proposes that only in circumstances where electronic methods of delivery are impossible, would service be permitted by U.S. mail or in person. FRA proposes that service will not be effective if the party making service receives indication that the attempted service did not reach the person to be served (*e.g.*, an electronic transmission auto-reply message states the electronic communication was undeliverable to the recipient). This proposed rule would also reformat paragraph (a) for clarity and to align with the proposed updated paragraph (c), which details when service is effective.

FRA proposes to update paragraph (c) to make clear when service will be deemed completed. This paragraph expands on existing paragraph (c) to clearly delineate when service as listed in paragraph (a) becomes effective. FRA proposes to require that the date of service by an electronic method of transmission is the date of transmission. In the event service is not made by an electronic method of transmission and service is made by physical mail, FRA proposes that the date of service would be the postmark date.

FRA proposes to move the language in existing paragraph (e) to paragraph (d). FRA would add language in a revised paragraph (e) to address how dates for service would be determined. This proposed language is consistent with the language used in parts 240 and 242, providing that when service must be effected within a particular timeframe, the date certain when service must be completed will be determined in accordance with the computation of time provisions in Rule 6 of the Federal Rules of Civil Procedure (FRCP), as amended. The “as amended” after the reference to the FRCP would allow for the most current version of the FRCP to be applied.

§ 209.6 Requests for Admission

In § 209.6(a), FRA proposes to add subpart G to the list of subparts to which this section applies.

§ 209.7 Subpoenas; Witness Fees

This NPRM would amend 49 CFR 209.7, which governs subpoenas issued under part 209. In § 209.7(a) and (j), FRA proposes to add subpart G to the list of subparts to which this section applies. FRA would modify paragraphs (c) and (d), which discuss methods of service of subpoenas, to require service via the same method of electronic transmission as the proposed amended § 209.5 provides. FRA also proposes to remove the methods of in-person service or service by mail for subpoenas, except where electronic service is impossible.

§ 209.8 Depositions in Formal Proceedings

In § 209.8(a), FRA proposes to add subpart G to the list of subparts to which this section applies.

§ 209.9 Filing

This proposed rule would amend § 209.9 to replace the physical mailing address for the Assistant Chief Counsel for Safety with an email address (FRALegal@dot.gov) to accommodate electronic submissions. FRA would also add subpart G to the list of subparts to which this section applies. Finally, to

² *See, e.g.*, 49 CFR 535.9(b)(6)(ii) (providing that the National Highway Transportation Safety Administration can serve Notice of Violations with respect to its Medium- and Heavy-Duty Vehicle Fuel Efficiency Program by electronic mail); 14 CFR 302.7 (allowing for service in aviation economic proceedings before DOT to be performed by electronic mail); 18 CFR 385.2010(g) (requiring the Federal Energy Regulatory Commission to serve all documents “by electronic means, unless such means are impractical, in which case service shall be made by United States mail”).

reduce burdens, FRA would remove the requirement that any materials be submitted “in duplicate.”

§ 209.13 Consolidation

In § 209.13, FRA proposes to add subpart G to the list of subparts to which this section applies.

§ 209.15 Rules of Evidence

In § 209.15, FRA would add subpart G to the list of subparts to which this section applies.

§ 209.105 Notice of Probable Violation

FRA proposes to update the web address in § 209.105(a) from www.fra.dot.gov to <https://railroads.dot.gov/>. FRA also proposes to update the references from “Chief Counsel” to “Office of the Chief Counsel.”

§ 209.109 Payment of Penalty; Compromise

FRA proposes to amend § 209.109(a) to update the mailing and overnight delivery addresses for payments. FRA would also correct a typographical error in § 209.109(b), updating the word “contracting” to “contacting,” and update the reference to the “Office of the Chief Counsel” rather than the “Chief Counsel.”

§ 209.303 Coverage

FRA proposes to amend § 209.303(c)(3) to account for regulations issued since the provision was last revised in 2009, and a comparable change was made.³ FRA proposes to change the language from “parts 213 through 241 of this title” to “parts 213 through 299 of this title.” This change would now expressly include regulations found in additional parts, such as parts 242, 243, 245, 246, 270, 271, and 272.

§ 209.335 Penalties

To avoid the need to update this section every time the civil penalty amounts are adjusted for inflation, FRA proposes to change § 209.335(a) and (b) by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty and ordinary maximum civil monetary penalty. FRA would add language to this section referring readers to 49 CFR part 209, appendix A, where FRA will continue to specify statutorily provided

civil penalty amounts updated for inflation.

§ 209.405 Reporting of Remedial Actions

This proposed rule would amend § 209.405(a)(3) to require railroads to submit a required remedial action report electronically via email to the FRA inspector, instead of by first-class mail.

§ 209.407 Delayed Reports

This proposed rule would amend § 209.407(a)(2) to require railroads to submit an explanation of a delayed remedial action report electronically to the FRA inspector, instead of by first-class mail.

Part 209, Subpart G—Enforcement, Hearing, and Appeal Procedures for Rail Safety Violations

FRA proposes to amend 49 CFR part 209 to add a new subpart G, *Enforcement, Hearing, and Appeal Procedures for Rail Safety Violations*. The proposed language mirrors the procedures in part 209, subpart B, *Hazardous Materials*, but would apply the procedures to railroad safety violations, rather than hazardous materials violations. As described in the background section above, these proposed procedures would implement new statutory authority in 49 U.S.C. 21301(a) regarding railroad safety civil penalty assessments.

§ 209.601 Civil Penalties Generally

The proposed language in section 209.601 would describe the purpose of subpart G generally, as prescribing rules of procedure for the assessment of civil penalties per the Federal railroad safety laws, 49 U.S.C. chapters 201 through 213.

§ 209.603 Minimum and Maximum Penalties

Section 209.603 would refer to the minimum and maximum civil penalties for railroad safety violations. These penalties are set by statute (49 U.S.C. ch. 213) and are subject to annual inflation adjustments.

§ 209.605 Demand Letter

Section 209.605 would outline the required content for each demand letter.

§ 209.607 Reply

Section 209.607 is proposed to contain procedures for a respondent’s reply to a demand letter, to include payment, informal response, and hearing options.

§ 209.609 Payment of Penalty; Compromise

This section would contain instructions for making a payment and allowing for compromise of a civil penalty assessment.

§ 209.611 Informal Response and Assessment

Section 209.611 proposes to explain the process for how a respondent may respond informally to a demand letter.

§ 209.613 Request for Hearing

Section 209.613 proposes to explain the process for how a respondent may request a hearing in response to a demand letter.

§ 209.615 Hearing

Section 209.615 would contain the hearing procedures should a respondent request a hearing in response to a demand letter.

§ 209.617 Presiding Officer’s Decision

Section 209.617 would contain the procedures for the presiding officer’s decision following a hearing.

§ 209.619 Assessment Considerations

FRA proposes section 209.619 to provide the list of considerations when assessing a civil penalty, as provided in 49 U.S.C. 21301(a)(3).

§ 209.621 Appeal

Section 209.621 would describe the procedures for appealing the presiding officer’s decision or order issued under proposed § 209.617.

Part 209, Appendix A Statement of Agency Policy Concerning Enforcement of the Federal Railroad Safety Laws

This proposed rule would amend 49 CFR part 209, appendix A, to incorporate a variety of minor administrative changes. For example, FRA would update previous references in the appendix from “regions” to “districts” to ensure information gets to the agency subject matter expert in the relevant technical discipline. FRA would also update this appendix for outdated web addresses and citations, and make other miscellaneous revisions, including updating citations for DOT’s delegations to FRA. FRA also proposes to add language discussing the new proposed procedures in subpart G of part 209 for resolving railroad safety civil penalty assessments.

Part 209, Appendix B Federal Railroad Administration Guidelines for Initial Hazardous Materials Assessments

FRA proposes to amend 49 CFR part 209, appendix B, to update the web

³ See 74 FR 23329, 23331 (“The existing provision only refers to parts 213 through 236. Because parts 238 through 241 have been added to the Code of Federal Regulations since the last amendment of this provision, it is necessary to make this technical amendment for accuracy and clarity”).

address from www.fra.dot.gov to <https://railroads.dot.gov/>.

Part 209, Appendix C FRA's Policy Statement Concerning Small Entities

FRA proposes to amend 49 CFR part 209, appendix C, to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>. FRA proposes to adjust language under the heading "Small Entity Communication Policy" to ensure information gets to the agency subject matter expert in the relevant technical discipline. Finally, FRA proposes to amend language under the heading "Small Entity Enforcement Policy" to remove the reference to the Safety Assurance and Compliance Program and to clarify how FRA assists small entities.

III. Regulatory Impact and Notices

A. Executive Orders (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this proposed rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866.

This proposed rule would allow electronic methods of serving documents, such as email, whenever possible. This would expedite the speed at which documents are delivered while also reducing costs that would otherwise exist from having to physically print and mail documents. Additionally, this proposed rule would make miscellaneous changes such as reflecting updated web and email addresses. FRA expects this proposed rule would reduce burdens on regulated entities. Moreover, this proposed rule would provide some qualitative benefits to regulated entities and the U.S. government, by clarifying, simplifying, and updating the language of part 209.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for "each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination."⁴ Implementation guidance for E.O. 14192 issued by OMB

(Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O.

14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.⁵

An E.O. 14192 deregulatory action is defined as "an action that has been finalized and has total costs less than zero." This proposed rule is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA affirms that each amendment proposed in this NPRM has a cost that is negligible or "less than zero" consistent with E.O. 14192, FRA still requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,⁶ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule would offer clarity, and would expedite the speed at which documents are delivered while also reducing costs that would otherwise exist from having to physically print and mail documents, that could result in some benefits. By extending this regulatory relief, many regulated entities, including small entities, would experience benefits. Consequently, FRA certifies that the proposed action would not have a significant economic impact

on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

There is no new collection of information requirements contained in this proposed rule, and in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, therefore, an information collection submission to OMB is not required. The recordkeeping and reporting requirements already contained in part 209 became effective when they were approved by OMB in 2022. The OMB approval numbers are OMB No. 2130–0529, which expires on July 31, 2025, and OMB No. 2130–0509, which expires on November 30, 2025.

E. Environmental Assessment

FRA has analyzed this proposed rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this proposed rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), "[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives." This proposed rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This proposed rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, Federalism (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

⁴ Executive Office of the President, *Executive Order 14192 of January 31, 2025, Unleashing Prosperity Through Deregulation*, 90 FR 9065–9067, Feb. 6, 2025.

⁵ Executive Office of the President, Office of Management and Budget, *Guidance Implementing Section 3 of Executive Order 14192, Titled "Unleashing Prosperity Through Deregulation"*, Memorandum M–25–20, Mar. 26, 2025.

⁶ Public Law 104–121, 110 Stat. 857 (Mar. 29, 1996).

G. *Unfunded Mandates Reform Act of 1995*

This proposed rule will not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. *Energy Impact*

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use, 66 FR 28355 (May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. *E.O. 13175 (Tribal Consultation)*

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments (Nov. 6, 2000). The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. *International Trade Impact Assessment*

The Trade Agreement Act of 1979 prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the U.S. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the U.S.

K. *Privacy Act Statement*

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without

edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL–14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. *Rulemaking Summary, 5 U.S.C. 553(b)(4)*

As required by 5 U.S.C. 553(b)(4), a summary of this rulemaking can be found in the Abstract section of the Department’s Unified Agenda entry for this rulemaking at <https://www.reginfo.gov/public/do/eAgendaViewRule?pubId=202404&RIN=2130-AC93>.

List of Subjects

49 CFR Part 209

Administrative practice and procedure, Hazardous materials transportation, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Proposed Rule

In consideration of the foregoing, FRA proposes to amend part 209 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 209—RAILROAD SAFETY ENFORCEMENT PROCEDURES

■ 1. The authority citation for part 209 continues to read as follows:

Authority: 49 U.S.C. 5123, 5124, 20103, 20107, 20111, 20112, 20114; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise § 209.1 to read as follows:

§ 209.1 Purpose.

Appendix A to this part contains a statement of agency policy concerning enforcement of those laws. This part describes certain procedures employed by the Federal Railroad Administration in its enforcement of statutes and regulations related to railroad safety. By delegation from the Secretary of Transportation, the Administrator has responsibility for:

(a) Enforcement of subchapters B and C of chapter I, subtitle B, title 49, CFR, and 49 U.S.C. ch. 51 and uncodified provisions, with respect to the transportation or shipment of hazardous materials by railroad (49 CFR 1.89(j)); and

(b) Exercise of the authority vested in the Secretary by 49 U.S.C. Subtitle V, Part A (Safety, chapter 201 *et seq.*) and uncodified provisions of the Rail Safety Improvement Act of 2008 (Pub. L. 110–432, Div. A, 122 Stat. 4848) (49 CFR 1.89(a), (b)).

■ 3. Revise § 209.5 to read as follows:

§ 209.5 Service.

(a) Each order, notice, or other document required to be served under ch. II of subtitle B of title 49 of the Code of Federal Regulations must be served by the following method:

(1) Any electronic method of delivery so long as there was no indication received that any transmission had failed; or

(2) In the event an electronic method of delivery is impossible, service may be made by U.S. mail.

(b) Service upon a person’s duly authorized representative constitutes service upon that person.

(c) The date of service will be:

(1) If sent by an electronic method of delivery, the date of electronic transmission to the party to be served.

(2) In the event an electronic method of delivery is impossible, and mailing is used, the postmark date. An official U.S. Postal Service receipt from a registered or certified mailing constitutes *prima facie* evidence of service.

(d) Each pleading must be accompanied by a certificate of service specifying how and when service was made.

(e) When service must occur within a particular timeframe, the date certain when service must be completed will be determined in accordance with the computation of time provisions in Rule 6 of the Federal Rules of Civil Procedure, as amended.

■ 4. Revise § 209.6(a) to read as follows:

§ 209.6 Requests for admission.

(a) A party to any proceeding under subpart B, C, D, or G of this part may serve upon any other party written requests for the admission of the genuineness of any relevant documents identified within the request, the truth of any relevant matters of fact, and the application of law to the facts as set forth in the request.

* * * * *

■ 5. Amend § 209.7 by revising paragraphs (a), (c), (d)(1), (d)(2), and (j) to read as follows:

§ 209.7 Subpoenas; witness fees.

(a) The Chief Counsel may issue a subpoena on the Chief Counsel’s own initiative in any matter related to enforcement of the railroad safety laws. However, where a proceeding under

subpart B, C, D, or G of this part has been initiated, only the presiding officer may issue subpoenas, and only upon the written request of any party to the proceeding who makes an adequate showing that the information sought will materially advance the proceeding.

* * * * *

(c) A subpoena may be served by any electronic method of delivery so long as there was no indication received that any transmission had failed. In the event an electronic method of delivery is impossible, service may be made by U.S. mail or in person.

(d) * * *

(1) To a natural person by:

(i) Any electronic method of delivery so long as there was no indication received that the transmission failed; or

(ii) Any method whereby actual notice of the issuance and content is given (and the fees are made available) prior to the return date.

(2) To an entity other than a natural person by:

(i) Any electronic method of delivery so long as there was no indication received that the transmission failed; or

(ii) Any method whereby actual notice of the issuance and content is given (and the fees are made available) to a registered agent for service or to any officer, director, or agent in charge of any office of the person, prior to the return date.

* * * * *

(j) Attendance of any FRA employee engaged in an investigation which gave rise to a proceeding under subpart B, C, or G of this part for the purpose of eliciting factual testimony may be assured by filing a request with the Chief Counsel at least fifteen (15) days before the date of the hearing. The request must indicate the present intent of the requesting person to call the employee as a witness and state generally why the witness will be required.

■ 6. Revise § 209.8(a) to read as follows:

§ 209.8 Depositions in formal proceedings.

(a) Any party to a proceeding under subpart B, C, D, or G of this part may take the testimony of any person, including a party, by deposition upon oral examination on order of the presiding officer following the granting of a motion under paragraph (b) of this section. Depositions may be taken before any disinterested person who is authorized by law to administer oaths. The attendance of witnesses may be compelled by subpoena as provided in § 209.7 and, for proceedings under subpart D of this part, § 209.315.

* * * * *

■ 7. Revise § 209.9 to read as follows:

§ 209.9 Filing.

All materials filed with FRA or any FRA officer in connection with a proceeding under subpart B, C, D, or G of this part shall be submitted to the Assistant Chief Counsel for Safety, Office of the Chief Counsel, Federal Railroad Administration, to *FRALegal@dot.gov*, except that documents produced in accordance with a subpoena shall be presented at the place and time specified by the subpoena.

■ 8. Revise § 209.13 to read as follows:

§ 209.13 Consolidation.

At the time a matter is set for hearing under subpart B, C, D, or G of this part, the Chief Counsel may consolidate the matter with any similar matter(s) pending against the same respondent or with any related matter(s) pending against other respondent(s) under the same subpart. However, on certification by the presiding officer that a consolidated proceeding is unmanageable or otherwise undesirable, the Chief Counsel will rescind or modify the consolidation.

■ 9. Revise § 209.15 to read as follows:

§ 209.15 Rules of evidence.

The Federal Rules of Evidence for United States Courts and Magistrates shall be employed as general guidelines for proceedings under subparts B, C, D, and G of this part. However, all relevant and material evidence shall be received into the record.

■ 10. Revise § 209.105(a) to read as follows:

§ 209.105 Notice of probable violation.

(a) FRA, through the Office of the Chief Counsel, begins a civil penalty proceeding by serving a notice of probable violation on a person charging him or her with having violated one or more provisions of subchapter A or C of chapter I, subtitle B of this title. FRA's website at <https://railroads.dot.gov/> contains guidelines used by the Office of the Chief Counsel in making initial penalty assessments.

* * * * *

■ 11. Revise § 209.109 to read as follows:

§ 209.109 Payment of penalty; compromise.

(a) Payment of a civil penalty may be made by credit card, certified check, money order, or wire transfer. Payment by credit card must be made via the internet at <https://www.pay.gov/paygov/>. Instructions for online payment are found on the website. Payments made by certified check or money order should be made payable to

the Federal Railroad Administration and sent to DOT/FRA, M.M.A.C., AMK-324, HQ-RM 181, P.O. Box 25082, Oklahoma City, OK 73125. Overnight express payments may be sent to DOT/FRA, M.M.A.C., AMK-324, HQ-RM 181, 6500 South MacArthur Blvd., Oklahoma City, OK 73169.

(b) At any time before an order assessing a penalty is referred to the Attorney General for collection, the respondent may offer to compromise for a specific amount by contacting the Office of the Chief Counsel.

■ 12. Amend § 209.303 by revising paragraph (c)(3) to read as follows:

§ 209.303 Coverage.

* * * * *

(c) * * *

(3) Are in a position to direct the commission of violations of any of the requirements of parts 213 through 299 of this title, or any of the requirements of 49 U.S.C. ch. 51, or any regulation or order prescribed thereunder.

■ 13. Revise § 209.335 to read as follows:

§ 209.335 Penalties.

(a) Any individual who violates § 209.331(c) or § 209.333(a) may be permanently disqualified from performing the safety-sensitive functions described in § 209.303. Any individual who willfully violates § 209.331(c) or § 209.333(a) may also be assessed a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. See 49 CFR part 209, appendix A.

(b) Any railroad that violates § 209.331(a) or (b) or § 209.333(b) may be assessed a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. See 49 CFR part 209, appendix A.

(c) Each day a violation continues shall constitute a separate offense.

■ 14. Revise § 209.405(a)(3) to read as follows:

§ 209.405 Reporting of remedial actions.

(a) * * *

(3) *Submission of Form FRA F 6180.96.* The railroad must return the form via email to the FRA Safety Inspector whose name and email address appear on the form.

* * * * *

■ 15. Revise § 209.407(a)(2) to read as follows:

§ 209.407 Delayed reports.

(a) * * *

(2) Sign, date, and submit such written explanation and estimate via

email, to the FRA Safety Inspector whose name and email address appear on the notification, within 30 days after the end of the calendar month in which the notification is received.

* * * * *

■ 16. Amend part 209 to add a new subpart G, consisting of §§ 209.601 through 209.621, to read as follows:

Subpart G—Enforcement, Hearing, and Appeal Procedures for Rail Safety Violations

Sec.

209.601 Civil penalties generally.
209.603 Minimum and maximum penalties.
209.605 Demand letter.
209.607 Reply.
209.609 Payment of penalty; compromise.
209.611 Informal response and assessment.
209.613 Request for hearing.
209.615 Hearing.
209.617 Presiding officer's decision.
209.619 Assessment considerations.
209.621 Appeal.

§ 209.601 Civil penalties generally.

(a) Sections 209.601 through 209.621 prescribe rules of procedure for the assessment of civil penalties pursuant to the Federal railroad safety laws, 49 U.S.C. Chapters 201 through 213.

(b) When FRA has reason to believe that a person has committed an act which is a violation of any provision of chapter II, subtitle B of this title, or title 49, subtitle V, part A, of the United States Code, for which FRA exercises enforcement responsibility or any waiver or order issued thereunder, it may conduct a proceeding to assess a civil penalty.

§ 209.603 Minimum and maximum penalties.

A person who violates a requirement of the Federal railroad safety laws, an order issued thereunder, chapter II, subtitle B, of this title, or title 49, subtitle V, part A, of the United States Code, is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where: (1) a grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons; or (2) a death or injury has occurred. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. See FRA's website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

§ 209.605 Demand letter.

(a) FRA, through the Office of the Chief Counsel, begins a civil penalty proceeding by serving a demand letter on a person charging the person with having violated one or more provisions of chapter II, subtitle B of this title, or title 49, subtitle V, part A, of the United States Code. FRA's website at <https://railroads.dot.gov/> contains guidelines used by the Office of the Chief Counsel in making initial penalty assessments.

(b) A demand letter issued under this section includes:

(1) A statement of the provision(s) which the respondent is believed to have violated;
(2) A statement of the factual allegations upon which the proposed civil penalty is being sought;
(3) Notice of the maximum amount of civil penalty for which the respondent may be liable;

(4) Notice of the amount of the civil penalty proposed to be assessed;

(5) A description of the manner in which the respondent should make payment of any money to the United States;

(6) A statement of the respondent's right to present written explanations, information or any materials in answer to the charges or in mitigation of the penalty; and

(7) A statement of the respondent's right to request a hearing and the procedures for requesting a hearing.

(c) FRA may amend the demand letter at any time prior to completion of a fully executed settlement agreement or the entry of an order assessing a civil penalty. If the amendment contains any new material allegation of fact, the respondent is given an opportunity to respond. In an amended demand letter, FRA may change the civil penalty amount proposed to be assessed, up to the maximum penalty amount for each violation. However, if the violation is: (1) a grossly negligent violation, or a pattern of repeated violations, that has caused an imminent hazard of death or injury to individuals; or (2) has caused death or injury, FRA may change the penalty amount proposed to be assessed up to the aggravated maximum penalty amount.

§ 209.607 Reply.

(a) Within sixty (60) days of the service of a demand letter issued under § 209.605, the respondent may—

(1) Pay as provided in § 209.609(a) and thereby close the case;

(2) Make an informal response as provided in § 209.611; or

(3) Request a hearing as provided in § 209.613.

(b) The Office of the Chief Counsel may extend the sixty (60) days period for good cause shown.

(c) Failure of the respondent to reply by taking one of the three actions described in paragraph (a) of this section, within the period provided, constitutes a waiver of the right to appear and contest the allegations, and authorizes the Office of the Chief Counsel, without further notice to the respondent, to find the facts to be as alleged in the demand letter and to assess an appropriate civil penalty.

§ 209.609 Payment of penalty; compromise.

(a) Payment of a civil penalty may be made by credit card, certified check, money order, or wire transfer. Payment by credit card must be made via the internet at <https://www.pay.gov/paygov/>. Instructions for online payment are found on the website. Payments made by certified check or money order should be made payable to the Federal Railroad Administration and sent to DOT/FRA, M.M.A.C., AMK-324, HQ-RM 181, P.O. Box 25082, Oklahoma City, OK 73125. Overnight express payments may be sent to DOT/FRA, M.M.A.C., AMK-324, HQ-RM 181, 6500 South MacArthur Blvd., Oklahoma City, OK 73169.

(b) At any time before an order assessing a penalty is referred to the Attorney General for collection, the respondent may offer to compromise for a specific amount by contacting the Office of the Chief Counsel.

§ 209.611 Informal response and assessment.

(a) If a respondent elects to make an informal response to a demand letter, respondent must submit to the Office of the Chief Counsel such written explanations, information, or other materials as respondent may desire in answer to the charges or in mitigation of the proposed penalty.

(b) The respondent may include in the informal written response a request for a conference. Upon receipt of such a request, the Office of the Chief Counsel arranges for a conference as soon as practicable.

(c) Written explanations, information, or materials submitted by the respondent, and relevant information presented during any conference held under this section, are considered by the Office of the Chief Counsel in reviewing the demand letter and determining the fact of violation and the amount of any penalty to be assessed.

(d) After consideration of an informal response, including any relevant information presented at a conference,

the Office of the Chief Counsel may dismiss the demand letter in whole or in part. If the Office of the Chief Counsel does not dismiss it in whole, the Office of the Chief Counsel may enter into a settlement agreement or enter an order assessing a civil penalty.

§ 209.613 Request for hearing.

(a) If a respondent elects to request a hearing, the respondent must submit a written request to the Office of the Chief Counsel referring to the case number which appeared on the demand letter. The request must—

(1) State the name and email address of the respondent and of the person signing the request, if different from the respondent;

(2) State with respect to each allegation whether it is admitted or denied; and

(3) State with particularity the issues to be raised by the respondent at the hearing.

(b) After a request for hearing that complies with the requirements of paragraph (a) of this section, the Office of the Chief Counsel schedules a hearing for the earliest practicable date.

(c) The Office of the Chief Counsel, or the hearing officer appointed under § 209.615, may grant extensions of the time of the commencement of the hearing for good cause shown.

§ 209.615 Hearing.

(a) When a hearing is requested and scheduled under § 209.613, a hearing officer designated by the Office of the Chief Counsel convenes and presides over the hearing. If requested by respondent, and if practicable, the hearing is held in the general vicinity of the place where the alleged violation occurred, at a place convenient to the respondent, or virtually. Testimony by witnesses shall be given under oath and the hearing shall be recorded verbatim.

(b) The presiding official may:

(1) Administer oaths and affirmations;

(2) Issue subpoenas as provided by § 209.7;

(3) Adopt procedures for the submission of evidence in written form;

(4) Take or cause depositions to be taken;

(5) Rule on offers of proof and receive relevant evidence;

(6) Examine witnesses at the hearing;

(7) Convene, recess, reconvene, and adjourn and otherwise regulate the course of the hearing;

(8) Hold conferences for settlement, simplification of the issues or any other proper purpose; and

(9) Take any other action authorized by, or consistent with, the provisions of this subpart pertaining to civil penalties

and permitted by law that may expedite the hearing or aid in the disposition of an issue raised, therein.

(c) The Office of the Chief Counsel has the burden of providing the facts alleged in the demand letter and may offer such relevant information as may be necessary fully to inform the presiding officer as to the matter concerned.

(d) The respondent may appear and be heard on the respondent's own behalf or through counsel of the respondent's choice. The respondent or respondent's counsel may offer relevant information, including testimony, which they believe should be considered in defense of the allegations, or that may bear on the penalty proposed to be assessed, and conduct such cross-examination as may be required for a full disclosure of the material facts.

(e) At the conclusion of the hearing, or as soon thereafter as the hearing officer shall provide, the parties may file proposed findings and conclusions, together with supporting reasons.

§ 209.617 Presiding officer's decision.

(a) After consideration of the evidence of record, the presiding officer may dismiss the demand letter in whole or in part. If the presiding officer does not dismiss it in whole, the presiding officer will issue and serve on the respondent an order assessing a civil penalty. The decision of the presiding officer will include a statement of findings and conclusions as well as the reasons therefor on all material issues of fact, law, and discretion.

(b) If, within twenty (20) days after service of an order assessing a civil penalty, the respondent does not pay the civil penalty or file an appeal as provided in § 209.621, the case may be referred to the Attorney General with a request that an action to collect the penalty be brought in the appropriate United States District Court. In the civil action, the amount and appropriateness of the civil penalty shall not be subject to review.

§ 209.619 Assessment considerations.

The assessment of a civil penalty under § 209.617 is made only after considering:

(a) the nature, circumstances, extent, and gravity of the violation;

(b) with respect to the violator, the degree of culpability, any history of violations, the ability to pay, and any effect on the ability to continue to do business; and

(c) other matters that justice requires.

§ 209.621 Appeal.

(a) Any party aggrieved by a presiding officer's decision or order issued under

§ 209.617 assessing a civil penalty may file an appeal with the Administrator. The appeal must be filed within twenty (20) days of service of the presiding officer's order.

(b) Prior to rendering a final determination on an appeal, the Administrator may remand the case for further proceedings before the hearing officer.

(c) In the case of an appeal by a respondent, if the Administrator affirms the assessment and the respondent does not pay the civil penalty within twenty (20) days after service of the Administrator's decision on appeal, the matter may be referred to the Attorney General with a request that an action to collect the penalty be brought in the appropriate United States District Court. In the civil action, the amount and appropriateness of the civil penalty shall not be subject to review.

■ 17. Amend appendix A to part 209 by:

■ a. Revising the first paragraph;

■ b. Revising the section under the heading “**THE CIVIL PENALTY PROCESS;**”

■ c. Revising the section under the heading “**CIVIL PENALTIES AGAINST INDIVIDUALS;**”

■ d. Revising the seventh paragraph under the heading “**PENALTY SCHEDULES; ASSESSMENT OF MAXIMUM PENALTIES;**” and

■ e. Revising the section under the heading “**EXTRAORDINARY REMEDIES.**”

The revisions read as follows:

Appendix A to Part 209—Statement of Agency Policy Concerning Enforcement of the Federal Railroad Safety Laws.

The Federal Railroad Administration (“FRA”) enforces the Federal railroad safety statutes under delegation from the Secretary of Transportation. See 49 CFR 1.88 and 1.89. Those statutes include 49 U.S.C. ch. 201–213 and uncodified provisions of the Rail Safety Improvement Act of 2008 (Pub. L. 110–432, Div. A, 122 Stat. 4848), the Fixing America's Surface Transportation Act (Pub. L. 114–94, Dec. 4, 2015), and the Infrastructure Investment and Jobs Act (Pub. L. 117–58, Nov. 15, 2021). On July 4, 1994, the day before the enactment of Public Law 103–272, 108 Stat. 745, the Federal railroad safety statutes included the Federal Railroad Safety Act of 1970 (“Safety Act”), and a group of statutes enacted prior to 1970 referred to collectively herein as the “older safety statutes”: the Safety Appliance Acts; the Locomotive Inspection Act; the Accident Reports Act; the Hours of Service Act; and the Signal Inspection Act. Effective July 5, 1994, Public Law 103–272 repealed certain general and permanent laws related to transportation, including these rail safety laws (the Safety Act and the older safety statutes), and reenacted them as revised by that law but without substantive change in title 49 of the U.S. Code, ch. 201–213. Regulations implementing the Federal rail safety laws are found at 49 CFR parts 209–

299. The Rail Safety Improvement Act of 1988 (Pub. L. 100–342, enacted June 22, 1988) (“RSIA”) raised the maximum civil penalties available under the railroad safety laws and made individuals liable for willful violations of those laws.

FRA also enforces the hazardous materials transportation laws (49 U.S.C. ch. 51 and uncodified provisions) (formerly the Hazardous Materials Transportation Act, which was also repealed by Pub. L. 103–272, July 5, 1994, and reenacted as revised but without substantive change) as it pertains to the shipment or transportation of hazardous materials by rail.

The Civil Penalty Process

The front lines in the civil penalty process are the FRA safety inspectors: FRA employs over 300 inspectors, and their work is supplemented by approximately 200 inspectors from States participating in enforcement of the federal rail safety laws. These inspectors routinely inspect the equipment, track, and signal systems and observe the operations of the nation’s railroads. They also investigate hundreds of complaints filed annually by those alleging noncompliance with the laws. When an inspection or complaint investigation reveals noncompliance with the laws, each noncomplying condition or action is listed on an inspection report. Where the inspector determines that the best method of promoting compliance is to assess a civil penalty, the inspector prepares a violation report, which is essentially a recommendation to the FRA Office of the Chief Counsel to assess a penalty based on the evidence provided in or with the report.

In determining which instances of noncompliance merit penalty recommendations, the inspector considers:

- (1) The inherent seriousness of the condition or action;
- (2) The kind and degree of potential safety hazard the condition or action poses in light of the immediate factual situation;
- (3) Any actual harm to persons or property already caused by the condition or action;
- (4) The offending person’s (*i.e.*, railroad’s or individual’s) general level of current compliance as revealed by the inspection as a whole;
- (5) The person’s recent history of compliance with the relevant set of regulations, especially at the specific location or division of the railroad involved;
- (6) Whether a remedy other than a civil penalty (ranging from a warning on up to an emergency order) is more appropriate under all of the facts; and
- (7) Such other factors as the immediate circumstances make relevant.

The civil penalty recommendation is reviewed at the district level by a specialist in the subject matter involved, who requires correction of any technical flaws and determines whether the recommendation is consistent with national enforcement policy in similar circumstances. Guidance on that policy in close cases is sometimes sought from Office of Railroad Safety headquarters. Violation reports that are technically and legally sufficient and in accord with FRA policy are sent from the district office to the Office of the Chief Counsel.

The exercise of this discretion at the field and headquarters levels is a vital part of the enforcement process, ensuring that the exacting and time-consuming civil penalty process is used to address those situations most in need of the deterrent effect of penalties. FRA exercises that discretion with regard to individual violators in the same manner it does with respect to railroads.

The Office of the Chief Counsel’s Office of Safety Law reviews each violation report it receives from the district offices for legal sufficiency and assesses penalties based on those allegations that survive that review.

Where the violation was committed by a railroad, penalties are assessed by issuance of a penalty demand letter that summarizes the claims, encloses the violation report with a copy of all evidence on which FRA is relying in making its initial charge, and explains that the railroad may pay in full or submit, orally or in writing, information concerning any defenses or mitigating factors. The railroad safety statutes, in conjunction with the Federal Claims Collection Act, authorize FRA to adjust or compromise the initial penalty claims based on a wide variety of mitigating factors. This system permits the efficient collection of civil penalties in amounts that fit the actual offense without resort to time-consuming and expensive litigation.

Once penalties have been assessed, the railroad is given a reasonable amount of time to investigate the charges. Larger railroads usually make their case before FRA in an informal conference covering a number of case files that have been issued and investigated since the previous conference. Thus, in terms of the negotiating time of both sides, economies of scale are achieved that would be impossible if each case were negotiated separately. The settlement conferences include technical experts from both FRA and the railroad as well as lawyers for both parties. In addition to allowing the two sides to make their cases for the relative merits of the various claims, these conferences also provide a forum for addressing current compliance problems. Smaller railroads usually prefer to handle negotiations through email or over the phone, often on a single case at a time. Once the two sides have agreed to an amount on each case, that agreement is put in writing and a payment is submitted to FRA’s accounting division covering the full amount agreed on.

Civil Penalties Against Individuals

The RSIA amended the penalty provisions of the railroad safety statutes to make them applicable to any “person (including a railroad and any manager, supervisor, official, or other employee or agent of a railroad)” who fails to comply with the regulations or statutes. *E.g.*, section 3 of the RSIA, amending section 209 of the Safety Act. However, the RSIA also provided that civil penalties may be assessed against individuals “only for willful violations.”

Thus, any individual meeting the statutory description of “person” is liable for a civil penalty for a willful violation of, or for willfully causing the violation of, the safety statutes or regulations. Of course, as has traditionally been the case with respect to acts of noncompliance by railroads, the FRA

field inspector exercises discretion in deciding which situations call for a civil penalty assessment as the best method of ensuring compliance. The inspector has a range of options, including an informal warning, a more formal warning letter issued by the Office of the Chief Counsel, recommendation of a civil penalty assessment, recommendation of disqualification or suspension from safety-sensitive service, or, under the most extreme circumstances, recommendation of emergency action.

The threshold question in any alleged violation by an individual will be whether that violation was “willful.” (Note that section 3(a) of the RSIA, which authorizes suspension or disqualification of a person whose violation of the safety laws has shown the person to be unfit for safety-sensitive service, does not require a showing of willfulness. Regulations implementing that provision are found at 49 CFR part 209, subpart D.) FRA proposed this standard of liability when, in 1987, it originally proposed a statutory revision authorizing civil penalties against individuals. FRA believed then that it would be too harsh a system to collect fines from individuals on a strict liability basis, as the safety statutes permit FRA to do with respect to railroads. FRA also believed that even a reasonable care standard (*e.g.*, the Hazardous Materials Transportation Act’s standard for civil penalty liability, 49 U.S.C. 5123) would subject individuals to civil penalties in more situations than the record warranted. Instead, FRA wanted the authority to penalize those who violate the safety laws through a purposeful act of free will.

Thus, FRA considers a “willful” violation to be one that is an intentional, voluntary act committed either with knowledge of the relevant law or reckless disregard for whether the act violated the requirements of the law. Accordingly, neither a showing of evil purpose (as is sometimes required in certain criminal cases) nor actual knowledge of the law is necessary to prove a willful violation, but a level of culpability higher than negligence must be demonstrated. *See Trans World Airlines, Inc. v. Thurston*, 469 U.S. 111 (1985); *Brock v. Morello Bros. Constr., Inc.*, 809 F.2d 161 (1st Cir. 1987); and *Donovan v. Williams Enterprises, Inc.*, 744 F.2d 170 (D.C. Cir. 1984).

Reckless disregard for the requirements of the law can be demonstrated in many ways. Evidence that a person was trained on or made aware of the specific rule involved—or, as is more likely, its corresponding industry equivalent—would suffice. Moreover, certain requirements are so obviously fundamental to safe railroading (*e.g.*, the prohibition against disabling an automatic train control device) that any violation of them, regardless of whether the person was actually aware of the prohibition, should be seen as reckless disregard of the law. *See Brock, supra*, 809 F.2d 164. Thus, a lack of subjective knowledge of the law is no impediment to a finding of willfulness. If it were, a mere denial of knowledge of the content of the particular regulation would provide a defense. Having proposed use of the word “willful,” FRA believes it was not intended

to insulate from liability those who simply claim—contrary to the established facts of the case—they had no reason to believe their conduct was wrongful.

A willful violation entails knowledge of the facts constituting the violation, but actual, subjective knowledge need not be demonstrated. It will suffice to show objectively what the alleged violator must have known of the facts based on reasonable inferences drawn from the circumstances. For example, a person shown to have been responsible for performing an initial terminal air brake test that was not in fact performed would not be able to defend against a charge of a willful violation simply by claiming subjective ignorance of the fact that the test was not performed. If the facts, taken as a whole, demonstrated that the person was responsible for doing the test and had no reason to believe it was performed by others, and if that person was shown to have acted with actual knowledge of or reckless disregard for the law requiring such a test, the person would be subject to a civil penalty.

This definition of “willful” fits squarely within the parameters for willful acts laid out by Congress in the RSIA and its legislative history. Section 3(a) of the RSIA amends the Safety Act to provide:

For purposes of this section, an individual shall be deemed not to have committed a willful violation where such individual has acted pursuant to the direct order of a railroad official or supervisor, under protest communicated to the supervisor. Such individual shall have the right to document such protest.

As FRA made clear when it recommended legislation granting individual penalty authority, a railroad employee should not have to choose between liability for a civil penalty or insubordination charges by the railroad. Where an employee (or even a supervisor) violates the law under a direct order from a supervisor, the employee does not do so of the employee’s free will. Thus, the act is not a voluntary one and, therefore, not willful under FRA’s definition of the word. Instead, the action of the person who has directly ordered the commission of the violation is itself a willful violation subjecting that person to a civil penalty. As one of the primary sponsors of the RSIA said on the Senate floor:

This amendment also seeks to clarify that the purpose of imposing civil penalties against individuals is to deter those who, of their free will, decide to violate the safety laws. The purpose is not to penalize those who are ordered to commit violations by those above them in the railroad chain of command. Rather, in such cases, the railroad official or supervisor who orders the others to violate the law would be liable for any violations his order caused to occur. One example is the movement of railroad cars or locomotives that are actually known to contain certain defective conditions. A train crew member who was ordered to move such equipment would not be liable for a civil penalty, and that his participation in such movements could not be used against him in any disqualification proceeding brought by FRA.

133 Cong. Rec. S.15899 (daily ed. Nov. 5, 1987) (remarks of Senator Exon).

It should be noted that FRA will apply the same definition of “willful” to corporate acts as is set out here with regard to individual violations. Although railroads are strictly liable for violations of the railroad safety laws and deemed to have knowledge of those laws, FRA’s penalty schedules contain, for each regulation, a separate amount earmarked as the initial assessment for willful violations. Where FRA seeks such an extraordinary penalty from a railroad, it will apply the definition of “willful” set forth above. In such cases—as in all civil penalty cases brought by FRA—the aggregate knowledge and actions of the railroad’s managers, supervisors, employees, and other agents will be imputed to the railroad. Thus, in situations that FRA decides warrant a civil penalty based on a willful violation, FRA will have the option of citing the railroad and/or one or more of the individuals involved. In cases against railroads other than those in which FRA alleges willfulness or in which a particular regulation imposes a special standard, the principles of strict liability and presumed knowledge of the law will continue to apply.

The RSIA gives individuals the right to protest a direct order to violate the law and to document the protest. FRA will consider such protests and supporting documentation in deciding whether and against whom to cite civil penalties in a particular situation. Where such a direct order has been shown to have been given as alleged, and where such a protest is shown to have been communicated to the supervisor, the person or persons communicating it will have demonstrated their lack of willfulness. Any documentation of the protest will be considered along with all other evidence in determining whether the alleged order to violate was in fact given.

However, the absence of such a protest will not be viewed as warranting a presumption of willfulness on the part of the employee who might have communicated it. The statute says that a person who communicates such a protest shall be deemed not to have acted willfully; it does not say that a person who does not communicate such a protest will be deemed to have acted willfully. FRA would have to prove from all the pertinent facts that the employee willfully violated the law. Moreover, the absence of a protest would not be dispositive with regard to the willfulness of a supervisor who issued a direct order to violate the law. That is, the supervisor who allegedly issued an order to violate will not be able to rely on the employee’s failure to protest the order as a complete defense. Rather, the issue will be whether, in view of all pertinent facts, the supervisor intentionally and voluntarily ordered the employee to commit an act that the supervisor knew would violate the law or acted with reckless disregard for whether it violated the law.

FRA exercises the civil penalty authority over individuals through procedures very similar to those used with respect to railroad violations. However, FRA varies those procedures somewhat to account for differences that may exist between the

railroad’s ability to defend itself against a civil penalty charge and an individual’s ability to do so. First, when the field inspector decides that an individual’s actions warrant a civil penalty recommendation and drafts a violation report, the Office of Railroad Safety informs the individual in writing of its intention to seek assessment of a civil penalty and the fact that a violation report has been transmitted to the Office of the Chief Counsel. This ensures that the individual has the opportunity to seek counsel, preserve documents, or take any other necessary steps to aid the individual’s defense at the earliest possible time.

Second, if the Office of the Chief Counsel concludes that the case is meritorious and issues a penalty demand letter, that letter makes clear that FRA encourages discussion of any defenses or mitigating factors the individual may wish to raise. That letter also advises the individual that the individual may wish to obtain representation by an attorney and/or labor representative. During the negotiation stage, FRA considers each case individually on its merits and gives due weight to whatever information the alleged violator provides.

Finally, in the unlikely event that a settlement cannot be reached, the individual may request an administrative hearing, or FRA may issue an order assessing civil penalty, per the enforcement, hearing, and appeal procedures for rail safety violations in part 209, subpart G.

FRA believes that the intent of Congress would be violated if individuals who agree to pay a civil penalty or are ordered to do so by a court are indemnified for that penalty by the railroad or another institution (such as a labor organization). Congress intended that the penalties have a deterrent effect on individual behavior that would be lessened, if not eliminated, by such indemnification.

Penalty Schedules; Assessment of Maximum Penalties

* * * * *

FRA’s traditional practice has been to issue penalty schedules assigning to each particular regulation or order specific dollar amounts for initial penalty assessments. The schedule (except where issued after notice and an opportunity for comment) constitutes a statement of agency policy and was historically issued as an appendix to the relevant part of the Code of Federal Regulations. Schedules are now published on FRA’s website at <https://railroads.dot.gov/>, and they are adjusted yearly for inflation. As of December 30, 2024, for each regulation in this part or order, the schedule shows two amounts within the \$1,114 to \$36,439 range in separate columns, the first for ordinary violations, the second for willful violations (whether committed by railroads or individuals). In one instance—49 CFR part 231—the schedule refers to sections of the relevant FRA defect code rather than to sections of the CFR text. Of course, the defect code, which is simply a reorganized version of the CFR text used by FRA to facilitate computerization of inspection data, is substantively identical to the CFR text.

* * * * *

Extraordinary Remedies

While civil penalties are the primary enforcement tool under the federal railroad safety laws, more extreme measures are available under certain circumstances. FRA has authority to issue orders directing compliance with the Federal Railroad Safety Act, the Hazardous Materials Transportation Act, the older safety statutes, or regulations issued under any of those statutes. Such an order may issue only after notice and opportunity for a hearing in accordance with the procedures set forth in 49 CFR part 209, subpart C. FRA inspectors also have the authority to issue a special notice requiring repairs where a locomotive or freight car is unsafe for further service or where a segment of track does not meet the standards for the class at which the track is being operated. Such a special notice may be appealed in accordance with 49 CFR part 216, subpart B.

FRA may, through the Attorney General, also seek injunctive relief in federal district court to restrain violations or enforce rules issued under the railroad safety laws. See 49 U.S.C. 20112.

FRA also has the authority to issue, after notice and an opportunity for a hearing, an order prohibiting an individual from performing safety-sensitive functions in the rail industry for a specified period. This disqualification authority is exercised under procedures found at 49 CFR part 209, subpart D.

Criminal penalties are available for knowing violations of 49 U.S.C. 5104(b), or for willful or reckless violations of the Federal hazardous materials transportation law or a regulation issued under that law. See 49 U.S.C. ch. 51, and 49 CFR 209.131, 209.133. Criminal penalties may also be available for certain record and report violations. 49 U.S.C. 21311.

Perhaps FRA's most sweeping enforcement tool is its authority to issue emergency safety orders where "an unsafe condition or practice, or a combination of unsafe conditions or practices, causes an emergency situation involving a hazard of death, personal injury, or significant harm to the environment" See 49 U.S.C. 20104. After its issuance, such an order may be reviewed in a trial-type hearing. See 49 CFR 211.47 and 216.21 through 216.27. The emergency order authority is unique because it can be used to address unsafe conditions and practices whether or not they contravene an existing regulatory or statutory requirement. Given its extraordinary nature, FRA has used the emergency order authority sparingly.

■ 18. Amend appendix B to part 209 by revising the sixth sentence of the third paragraph. The revisions read as follows:

Appendix B to Part 209—Federal Railroad Administration Guidelines for Initial Hazardous Materials Assessments

* * * * *

* * * FRA periodically makes minor updates and revisions to these guidelines, and the most current version may be found

on FRA's website at <https://railroads.dot.gov/>.

■ 19. Amend appendix C to part 209, by:

■ a. Under the heading "Small Entity Communication Policy,"

■ i. Revising the third paragraph; and

■ ii. Revising the last sentence of the fourth paragraph.

■ b. Under the heading "Small Entity Enforcement Policy," revising the third paragraph.

The revisions read as follows:

Appendix C to Part 209—FRA's Policy Statement Concerning Small Entities

* * * * *

Small Entity Communication Policy

* * * * *

It is FRA's policy to maintain frequent and open communications with the national representatives of the primary small entity associations and to consult with these organizations before embarking on new policies that may impact the interests of small businesses. Additionally, FRA's Office of Railroad Safety has two Safety Management Teams dedicated to short line railroads and staff from those Safety Management Teams regularly meet with short line railroads that meet FRA's definition of "small entities" to discuss new regulations, persistent safety concerns, emerging technology, compliance issues, and any other relevant issues related to railroad safety. Contact information for each of FRA's Safety Management Teams is available online at <https://railroads.dot.gov>.

* * * Finally, FRA's website (<https://railroads.dot.gov/>) makes pertinent agency information available to the public.

* * * * *

Small Entity Enforcement Policy

* * * * *

Finally, FRA works to identify systemic safety hazards that continue to occur in carrier or shipper operations, including small business operations. Often FRA personnel will work to assist the subject operations to develop a plan to address those hazards and often, the plan provides small entities with a reasonable timeframe in which to make improvements without the threat of civil penalty. If FRA determines that the entity has failed to comply with the improvement plan, however, enforcement action is initiated.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Parts 209, 213, 217, 219, 227, 229, 230, 232, 238, 239, 240, 241, and 242

[Docket No. FRA-2025-0109]

RIN 2130-AD22

Removal of Unnecessary and Outdated Paperwork Reduction Act References

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: FRA intends to remove thirteen sections throughout its regulations that unnecessarily recite the approval of information collection requirements by the Office of Management and Budget (OMB), state the assigned OMB control number associated with the entire CFR part, and list the sections in that part with information collection requirements.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES: *Comments:* Comments related to Docket No. FRA-2025-0109 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA-2025-0109), and Regulatory Identification Number (RIN) for this rulemaking (2130-AD22). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT: Arlette Mussington, Information Collection Clearance Officer, at email: arlette.mussington@dot.gov or telephone: (571) 609-1285, Joanne Swafford, Information Collection Clearance Officer, at email:

joanne.swafford@dot.gov or telephone: (757) 897-9908, or Elliott Gillooly, Attorney Adviser, at elliott.gillooly@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR). FRA has identified thirteen sections throughout its regulations that unnecessarily recite the approval of information collection requirements by OMB, state the assigned OMB control number associated with the entire CFR part, and list the sections in that part with information collection requirements. These thirteen sections are unnecessary because the final rules promulgating each regulation generally contained the OMB control number applicable to that part¹ and, every three years on a rolling basis, FRA publishes two notices in the **Federal Register** stating its intent to renew each OMB control number. Removing each of the thirteen sections that state OMB control numbers, detailed below in the Section-by-Section Analysis, will prevent potential confusion by persons seeking to understand the scope of a particular OMB-approved control number. The potential confusion arises because most of the sections to be removed also contain lists of all the sections in that part which are covered by the OMB control number. Those lists are updated much less frequently, if at all, than FRA's submissions requesting renewed OMB approval of each control number every three years. In addition, removing these thirteen sections will collectively reduce the amount of CFR text that regulated entities must read and FRA also anticipates that the cost of publishing the CFR will be reduced because the removed sections collectively add pages to the CFR. The most up-to-date catalog of all information collection requirements approved by OMB under a particular control number can easily be reviewed in the notices seeking renewed approval that FRA publishes in the **Federal Register** at approximately three-year

intervals. Information about approved OMB control numbers is also publicly available at <https://www.reginfo.gov/public/do/PRASearch>. Overall, the removal of these sections will reduce burdens while making technical changes without any adverse effect on railroad safety.

II. Section-by-Section Analysis

Section 209.337

Section 209.337 states that information collection requirements in part 209 have been assigned OMB control number 2130-0529. This OMB control number is currently approved and need not be printed in the CFR because it has been previously published in the **Federal Register**, is displayed on any FRA forms if required, and is publicly viewable at <https://www.reginfo.gov/public/do/PRASearch>.

Section 213.19

Section 213.19 states that information collection requirements in part 213 have been assigned OMB control number 2130-0010. This OMB control number is currently approved and need not be printed in the CFR because it has been previously published in the **Federal Register**, is displayed on any FRA forms if required, and is publicly viewable at <https://www.reginfo.gov/public/do/PRASearch>.

Section 217.13

Section 217.13 states that information collection requirements in part 217 have been assigned OMB control number 2130-0035. This OMB control number is currently approved and need not be printed in the CFR because it has been previously published in the **Federal Register**, is displayed on any FRA forms if required, and is publicly viewable at <https://www.reginfo.gov/public/do/PRASearch>.

Section 219.21

Section 219.21 states that information collection requirements in part 219 have been assigned OMB control number 2130-0526. This OMB control number is currently approved and need not be printed in the CFR because it has been previously published in the **Federal Register**, is displayed on any FRA forms if required, and is publicly viewable at <https://www.reginfo.gov/public/do/PRASearch>.

Section 227.15

In part 227, "2130-NEW" was provided as an OMB control number placeholder at § 227.15. The current OMB control number for part 227 is 2130-0571, as published in the **Federal Register** most recently at 89 FR 46296

(May 28, 2024). This OMB control number is currently approved and need not be printed in the CFR because it has been previously published in the **Federal Register**, is displayed on any FRA forms if required, and is publicly viewable at <https://www.reginfo.gov/public/do/PRASearch>.

Section 229.4

Section 229.4 states that information collection requirements in part 229 have been assigned OMB control number 2130-0004. This OMB control number is currently approved and need not be printed in the CFR because it has been previously published in the **Federal Register**, is displayed on any FRA forms if required, and is publicly viewable at <https://www.reginfo.gov/public/do/PRASearch>.

Section 230.9

In part 230, § 230.9(a) was reserved for an OMB control number. The current OMB control number for part 230 is 2130-0505, as published in the **Federal Register** most recently at 89 FR 63469 (Aug. 5, 2024). This OMB control number is currently approved and need not be printed in the CFR because it has been previously published in the **Federal Register**, is displayed on any FRA forms if required, and is publicly viewable at <https://www.reginfo.gov/public/do/PRASearch>.

Section 232.21

Section 232.21 states that information collection requirements in part 232 have been assigned OMB control number 2130-0008. This OMB control number is currently approved and need not be printed in the CFR because it has been previously published in the **Federal Register**, is displayed on any FRA forms if required, and is publicly viewable at <https://www.reginfo.gov/public/do/PRASearch>.

Section 238.23

Section 238.23 states that information collection requirements in part 238 have been assigned OMB control number 2130-0544. This OMB control number is currently approved and need not be printed in the CFR because it has been previously published in the **Federal Register**, is displayed on any FRA forms if required, and is publicly viewable at <https://www.reginfo.gov/public/do/PRASearch>.

Section 239.15

Section 239.15 states that information collection requirements in part 239 have been assigned OMB control number 2130-0545. This OMB control number is currently approved and need not be

¹ The exceptions are parts 227, 230, 241 and 242. While an approved OMB control was not included in final rules creating those parts, the control numbers that were approved for each part were later published in the **Federal Register**, as detailed in the Section-by-Section Analysis.

printed in the CFR because it has been previously published in the **Federal Register**, is displayed on any FRA forms if required, and is publicly viewable at <https://www.reginfo.gov/public/do/PRASearch>.

Section 240.13

Section 240.13 states that information collection requirements in part 240 have been assigned OMB control number 2130–0533. This OMB control number is currently approved and need not be printed in the CFR because it has been previously published in the **Federal Register**, is displayed on any FRA forms if required, and is publicly viewable at <https://www.reginfo.gov/public/do/PRASearch>.

Section 241.19

Section 241.19(a) states that the information collection requirements of part 241 are being reviewed by OMB, but no control number was provided by FRA in a final rule. The current OMB control number for part 241 is 2130–0556, as published in the **Federal Register** most recently at 88 FR 67866 (Oct. 2, 2023). This OMB control number is currently approved and need not be printed in the CFR because it has been previously published in the **Federal Register**, is displayed on any FRA forms if required, and is publicly viewable at <https://www.reginfo.gov/public/do/PRASearch>.

Section 242.13

Section 242.13(a) states that the information collection requirements of part 242 are being reviewed by OMB, but no control number was provided by FRA in a final rule. The current OMB control number for part 242 is 2130–0596, as published in the **Federal Register** most recently at 89 FR 61231 (July 30, 2024). This OMB control number is currently approved and need not be printed in the CFR because it has been previously published in the **Federal Register**, is displayed on any FRA forms if required, and is publicly viewable at <https://www.reginfo.gov/public/do/PRASearch>.

III. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final

rule is not a significant regulatory action under section 3(f) of E.O. 12866.

FRA analyzed the potential costs and benefits of this final rule. The regulated entities will benefit because removing each of the thirteen sections that state OMB control numbers will eliminate potential confusion by persons seeking to understand the scope of a particular OMB-approved control number. Additionally, removing these thirteen sections will collectively reduce the amount of CFR text that regulated entities must read. The Government will also benefit from a reduced cost of publishing the CFR since the removed sections collectively add pages to the CFR.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192 (90 FR 9065, Jan. 31, 2025), Unleashing Prosperity Through Deregulation, requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”² Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.³

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA affirms that each amendment proposed in this NPRM has a cost that is “less than zero” consistent with E.O. 14192, FRA still requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,⁴ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact.

² Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

³ Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

⁴ Public Law 104–121, 110 Stat. 857 (Mar. 29, 1996).

Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule removes outdated and unnecessary regulatory sections without adding any regulatory burden or costs for any entity. Consequently, the undersigned certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

This proposed rule contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This proposed rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”⁵ FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁶ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where

appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL–14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at [regulations.gov](http://www.regulations.gov), Docket No. FRA–2025–0109, in the **SUMMARY** section of this proposed rule.

List of Subjects

49 CFR Part 209

Administrative practice and procedure, Hazardous materials transportation, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 213

Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 217

Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 219

Alcohol abuse, Drug abuse, Drug testing, Penalties, Railroad safety, Reporting and recordkeeping requirements, Safety, Transportation.

49 CFR Part 227

Hazardous materials transportation, Incorporation by reference, Locomotive noise control, Occupational safety and health, Penalties, Railroad employees, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 229

Locomotives, Railroad safety, Remote control locomotives.

49 CFR Part 230

Penalties, Railroad safety, Reporting and recordkeeping requirements, Steam locomotives.

49 CFR Part 232

Power brakes, Railroad safety, Securement, Two-way end-of-train devices.

49 CFR Part 238

Fire prevention, Passenger equipment, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 239

Passenger train emergency preparedness, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 240

Administrative practice and procedure, Locomotive engineer, Penalties, Railroad employees, Railroad operating procedures, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 241

Communications, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 242

Administrative practice and procedure, Conductor, Penalties, Railroad employees, Railroad operating procedures, Railroad safety, Reporting and recordkeeping requirements.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend parts 209, 213, 217, 219, 227, 229, 230, 232, 238, 239, 240, 241, 242 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 209—RAILROAD SAFETY ENFORCEMENT PROCEDURES

- 1. The authority citation for part 209 continues to read as follows:

Authority: 49 U.S.C. 5123, 5124, 20103, 20107, 20111, 20112, 20114; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 209.337 [Removed]

- 2. Remove § 209.337.

PART 213—TRACK SAFETY STANDARDS

- 3. The authority citation for part 213 continues to read as follows:

⁵ 66 FR 28355 (May 22, 2001).

⁶ 19 U.S.C. ch. 13.

Authority: 49 U.S.C. 20102–20114 and 20142; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 213.19 [Removed]

- 4. Remove § 213.19.

PART 217—RAILROAD OPERATING RULES

- 5. The authority citation for part 217 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20168, 28 U.S.C. 2461, note; and 49 CFR 1.89.

§ 217.13 [Removed]

- 6. Remove § 217.13.

PART 219—CONTROL OF ALCOHOL AND DRUG USE

- 7. The authority citation for part 219 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20140, 21301, 21304, 21311; 28 U.S.C. 2461 note; Div. A, Sec. 412, Pub. L. 110–432, 122 Stat. 4889 (49 U.S.C. 20140 note); Sec. 8102, Pub. L. 115–271, 132 Stat. 3894; and 49 CFR 1.89.

§ 219.21 [Removed]

- 8. Remove § 219.21.

PART 227—OCCUPATIONAL SAFETY AND HEALTH IN THE LOCOMOTIVE CAB

- 9. The authority citation for part 227 continues to read as follows:

Authority: 49 U.S.C. 20103, 20103 note, 20166, 20701–20703, 21301, 21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 227.15 [Removed]

- 10. Remove § 227.15.

PART 229—RAILROAD LOCOMOTIVE SAFETY STANDARDS

- 11. The authority citation for part 229 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20133, 20137–38, 20143, 20168, 20701–03, 21301–02, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 229.4 [Removed]

- 12. Remove § 229.4.

PART 230—STEAM LOCOMOTIVE INSPECTION AND MAINTENANCE STANDARDS

- 13. The authority citation for part 230 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20702; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 230.9 [Removed]

- 14. Remove § 230.9.

PART 232—BRAKE SYSTEM SAFETY STANDARDS FOR FREIGHT AND OTHER NON-PASSENGER TRAINS AND EQUIPMENT; END-OF-TRAIN DEVICES

- 15. The authority citation for part 232 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20107, 20133, 20141, 20301–20303, 20306, 21301–20302, 21304; 28 U.S.C. 2461, note; and 49 CFR 1.89.

§ 232.21 [Removed]

- 16. Remove § 232.21.

PART 238—PASSENGER EQUIPMENT SAFETY STANDARDS

- 17. The authority citation for part 238 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20133, 20141, 20302–20303, 20306, 20701–20702, 21301–21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 238.23 [Removed]

- 18. Remove § 238.23.

PART 239—PASSENGER TRAIN EMERGENCY PREPAREDNESS

- 19. The authority citation for part 239 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20105–20114, 20133, 21301, 21304, and 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 239.15 [Removed]

- 20. Remove § 239.15.

PART 240—QUALIFICATION AND CERTIFICATION OF LOCOMOTIVE ENGINEERS

- 21. The authority citation for part 240 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20135, 21301, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 240.13 [Removed]

- 22. Remove § 240.13.

PART 241—UNITED STATES LOCATIONAL REQUIREMENT FOR DISPATCHING OF UNITED STATES RAIL OPERATIONS

- 23. The authority citation for part 241 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 21301, 21304, 21311; 28 U.S.C. 2461 note; 49 CFR 1.89.

§ 241.19 [Removed]

- 24. Remove § 241.19.

PART 242—QUALIFICATION AND CERTIFICATION OF CONDUCTORS

- 25. The authority citation for part 242 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20135, 20138, 20162, 20163, 21301, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 242.13 [Removed]

- 26. Remove § 242.13.

Issued in Washington, DC.

Kyle D. Fields,

Chief Counsel.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 213

[Docket No. FRA–2025–0116]

RIN 2130–AD49

Repealing a Track Surface Requirement

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: FRA proposes to repeal the runoff parameter from its track surface requirements for track Classes 1 through 5. FRA has found that other geometry requirements in FRA's regulations already capture the same safety concerns.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES:

Comments: Comments related to Docket No. FRA–2025–0116 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA–2025–0116), and Regulatory Identification Number (RIN) for this rulemaking (2130–AD49). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the

online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT: Yu-Jiang Zhang, Staff Director, Track and Structures Division, Federal Railroad Administration, telephone: (202) 493-6460, email: yujiang.zhang@dot.gov; or Aaron Moore, Senior Attorney, Federal Railroad Administration, telephone: (202) 853-4784, email: aaron.moore@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR). Under 49 CFR part 213, *Track Safety Standards*, FRA prescribes minimum safety requirements for railroad track that is part of the general railroad system of transportation. Some of the requirements contained in part 213 could be updated to reduce burdens, make technical or conforming changes, or otherwise adjust to advancing technology without any adverse effect on railroad safety. Please review the section-by-section analysis below for the relevant information related to FRA's proposed change.

II. Section-by-Section Analysis

Section 213.63 Track Surface

Paragraph (a) of this section requires each track owner to maintain the surface of its track within certain parameters set forth in a table. FRA proposes to repeal the runoff parameter from these track surface requirements. A working group of FRA's Railroad Safety Advisory Committee previously considered removing this parameter from FRA's regulations in 2019 and 2022.¹ The other parameters in FRA's regulations, including the thresholds outlined in existing paragraph (a), already capture the same track surface safety concerns. FRA proposes removing the runoff parameter from the existing table in paragraph (a).

¹ See Track Standards Working Group Update, June 27, 2022, available at <https://rsac.fra.dot.gov/meetings?id=61>; Track Standards Working Group Update, Dec. 12, 2022, available at <https://rsac.fra.dot.gov/meetings?id=62>; Approved Minutes from Dec. 12, 2022, RSAC Meeting, available at <https://rsac.fra.dot.gov/meetings?id=63>.

III. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this proposed rule under E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866. FRA proposes to remove the runoff parameter from the track surface requirements in 49 CFR 213.63(a), as it is unnecessary and the other geometry requirements in that paragraph capture the same safety concerns.

FRA analyzed the potential costs and benefits of this proposed rule. Because this proposed rule would reduce the regulatory burden on track owners by eliminating the costs to measure and meet the runoff parameters currently set forth in 49 CFR 213.63(a), this proposed rule would provide cost savings to regulated entities. In addition, this proposed rule would provide some qualitative benefits to regulated entities and the U.S. government by eliminating an unnecessary requirement from part 213.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for "each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination."² Implementation guidance for E.O. 14192 issued by OMB (Memorandum M-25-20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.³

An E.O. 14192 deregulatory action is defined as "an action that has been finalized and has total costs less than zero." This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA affirms that each

² Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065-9067 (Feb. 6, 2025).

³ Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled "Unleashing Prosperity Through Deregulation."* Memorandum M-25-20. Mar. 26, 2025.

amendment proposed in this NPRM has a cost that is negligible or "less than zero" consistent with E.O. 14192, FRA still requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,⁴ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This rule proposes to remove an unnecessary requirement from part 213 that would otherwise require entities to measure and meet the runoff parameters in existing 49 CFR 213.63(a). While this rule may impact many regulated entities, including small entities, the proposed rule would reduce the regulatory burden on track owners and provide benefits by eliminating the costs associated with measuring and meeting runoff parameters. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104-121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult

⁴ Public Law 104-121, 110 Stat. 857 (Mar. 29, 1996).

the person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

This proposed rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). Therefore, an information collection submission to OMB is not required.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations, FRA has determined this undertaking has no potential to affect historic properties. FRA has also determined that this rulemaking does not approve a project resulting in a use of a resource protected by Section 4(f).

F. Federalism Implications

This proposed rule would not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of

\$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use, 66 FR 28355 (May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments (Nov. 6, 2000). The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁵ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities

for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <https://www.regulations.gov>, as described in the system of records notice, DOT/ALL–14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at www.regulations.gov, Docket No. FRA–2025–0116, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 213

Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend part 213 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

■ 1. The authority citation for part 213 continues to read as follows:

Authority: 49 U.S.C. 20102–20114 and 20142; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise § 213.63(a) to read as follows:

§ 213.63 Track surface.

(a) Except as provided in paragraph (b) of this section, each track owner shall maintain the surface of its track within the limits prescribed in the following table:

Track surface (inches)	Class of track				
	1	2	3	4	5
The deviation from uniform profile on either rail at the mid-ordinate of a 62-foot chord may not be more than	3	2¾	2¼	2	1¼
The deviation from zero crosslevel at any point on tangent or reverse crosslevel elevation on curves may not be more than	3	2	1¾	1¼	1
The difference in crosslevel between any two points less than 62 feet apart may not be more than *1 2	3	2¼	2	1¾	1½

⁵ 19 U.S.C. ch. 13.

Track surface (inches)	Class of track				
	1	2	3	4	5
* Where determined by engineering decision prior to June 22, 1998, due to physical restrictions on spiral length and operating practices and experience, the variation in crosslevel on spirals per 31 feet may not be more than	2	1¾	1¼	1	¾

¹ Except as limited by § 213.57(a), where the elevation at any point in a curve equal or exceeds 6 inches, the difference in crosslevel within 62 feet between that point and a point with greater elevation may not be more than 1½ inches.

² However, to control harmonics on Class 2 through 5 jointed track with staggered joints, the crosslevel differences shall not exceed 1¼ inches in all of six consecutive pairs of joints, as created by seven low joints. Track with joints staggered less than 10 feet apart shall not be considered as having staggered joints. Joints within the seven low joints outside of the regular joint spacing shall not be considered as joints for purposes of this footnote.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 214

[Docket No. FRA–2025–0083]

RIN 2130–AD44

Repealing Outdated Railroad Workplace Safety Requirements and Making Other Improvements

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: FRA proposes to repeal several roadway workplace safety requirements that have become obsolete. In addition, FRA proposes to establish a new special approval procedure to enable regulated entities, after public notice and FRA approval, to utilize an alternative approach to bridge worker safety that provides for an equivalent or better level of safety. Also, this rule proposes to clarify that the required training for operators of roadway maintenance machines equipped with a crane includes specific aspects such as maintaining vertical clearance.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES:

Comments: Comments related to Docket No. FRA–2025–0083 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA–2025–0083), and Regulatory Identification Number (RIN) for this rulemaking (2130–AD44). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT: Timothy Presser, Track Specialist, Office of Railroad Safety, Federal Railroad Administration, telephone: (208) 241–9458, email: timothy.presser@dot.gov; or Aaron Moore, Senior Attorney, Federal Railroad Administration, telephone: (202) 853–4784, email: aaron.moore@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR). The minimum safety standards for railroad workplace safety, to prevent accidents and casualties to employees involved in certain railroad inspection, maintenance, and construction activities, are established in 49 CFR part 214, *Railroad Workplace Safety*. Some of the requirements contained in part 214 could be updated to reduce burdens, make technical or conforming changes, repeal aged-out regulations, or otherwise adjust to advancing technology or recent incidents without

any adverse effect on railroad safety. Please review the Section-by-Section Analysis below for the relevant information related to each proposed change.

II. Section-by-Section Analysis

Section 214.119 Special Approval Procedure

Because 49 CFR part 214, subpart B is highly prescriptive and therefore discourages innovation or the deployment of advancing technology in bridge worker safety systems, FRA proposes to add a new § 214.119 that would provide for a special approval procedure similar to the process provided in 49 CFR 238.21; the proposed special approval procedure would enable a regulated entity, after public notice and FRA approval, to utilize an alternative approach to bridge worker safety that provides for an equivalent or better level of safety.

Section 214.331 Definite Train Location

FRA proposes to repeal § 214.331 entirely because definite train location, as a method of roadway worker protection, has been prohibited since June 2017.

Section 214.333 Informational Line-Ups of Trains

FRA proposes to repeal § 214.333 entirely because informational line-ups of trains, as a method of roadway worker protection, has been prohibited since June 2017.

Section 214.335 On-Track Safety Procedures for Roadway Work Groups, General

FRA proposes to revise paragraph (a) of this section to remove reference to definite train location and § 214.331 since that is no longer an allowed method of protection.

Section 214.347 Training and Qualification for Lone Workers

FRA proposes to revise paragraph (a)(3) of this section to remove reference

to definite train location since that is no longer an allowed method of protection.

Section 214.357 Training and Qualification for Operators of Roadway Maintenance Machines Equipped With a Crane

FRA proposes to amend paragraph (b) of this section to clarify that the required training for operators of roadway maintenance machines equipped with a crane includes specific aspects such as maintaining vertical clearance. FRA expects that issues such as vertical clearance should be addressed in the employer's training and qualification program. Under current § 214.357(b), employers are required to include procedures for determining that the operator has the skills and knowledge to safely operate such crane machines. However, FRA expects that highlighting issues such as vertical clearance in the regulatory text may help in contributing to avoiding future incidents of crane machines striking structures, such as bridges. FRA does not expect this clarification to result in any additional burdens.

Section 214.513 Retrofitting of Existing On-Track Roadway Maintenance Machines; General

FRA proposes to amend § 214.513 by revising the title by removing reference to retrofitting. Likewise, FRA proposes to remove the retrofitting due dates in paragraphs (b) and (c) since those dates have long passed. The requirements of this section apply to existing on-track maintenance machines.

Section 214.515 Overhead Covers for Existing On-Track Roadway Maintenance Machines

FRA proposes to amend paragraph (a) of this section to remove reference to the date (March 28, 2005) that overhead covers must be repaired or reinstalled on existing on-track roadway maintenance machines currently or previously equipped with such covers. That date has long passed. Additionally, FRA proposes to delete paragraph (b) and redesignate existing paragraph (c) as new paragraph (b). Existing paragraph (b) allows for an operator of an existing on-track roadway maintenance machine that is not equipped with an overhead cover to request such a cover be provided and requires the employer to evaluate the feasibility of providing such a cover. FRA believes that since this provision was added over 20 years ago, these requests have already been made and that it is unlikely this paragraph is still utilized.

Section 214.517 Retrofitting of Existing On-Track Roadway Maintenance Machines Manufactured on or After January 1, 1991

FRA proposes to amend the title and introductory paragraph of § 214.517 to remove reference to retrofitting and the date it must be completed. That date has long passed.

Section 214.533 Schedule of Repairs Subject to Availability of Parts

FRA proposes to amend paragraph (d) of this section to clarify that this section permits electronic maintenance of required records. Existing paragraph (d) allows for electronic maintenance of required records, but the last sentence of this paragraph imposes a requirement to keep records on the on-track roadway maintenance machine or hi-rail vehicle or at a location designated by the employer. FRA proposes to add a clause to the end of that sentence to clarify that the location designated by the employer may be an electronic system, consistent with the existing option in paragraph (d) to use electronic means to maintain the required records.

III. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this proposed rule under E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866.

This proposed rule would simplify the regulation by creating a special approval procedure in new § 214.119 consistent with a similar procedure in existing § 238.21; remove certain regulations rendered irrelevant by the passage of time in §§ 214.331, 214.333, 214.335, 214.347, 214.513, 214.515, and 214.517; clarify training requirements in § 214.357; and simplify record retention rules in § 214.533. These proposed changes would have no adverse impact on railroad safety. The proposed rule would provide additional clarity to regulated entities and eliminate unnecessary, outdated requirements while continuing to ensure workplace safety, substantive compliance, and availability of information related to railroad maintenance activities. While FRA has not quantified these changes, FRA estimates a cost savings would incur from the proposed amendments.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA affirms that each amendment proposed in this NPRM has a cost that is negligible or “less than zero” consistent with E.O. 14192, FRA requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,³ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

³ Public Law 104–121, 110 Stat. 857 (Mar. 29, 1996).

substantial number of small entities. This proposed rule would not impose new requirements under part 214 beyond limited, cost-beneficial changes to training; it merely offers flexibilities or repeal aged-out regulations that could result in cost savings, if a small entity or other regulated entity chooses to utilize those flexibilities. By extending this regulatory relief, many regulated entities, including small entities, would experience a cost savings. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

This proposed rule offers regulatory flexibilities, and it contains no new information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). Therefore, an information collection submission to OMB is not required. With this NPRM, FRA will be using the existing OMB No. 2130–0539, *Railroad Workplace Safety*.

E. Environmental Assessment

FRA has analyzed this proposed rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations, FRA has determined this undertaking has no potential to affect historic properties. FRA has also determined that this rulemaking does not approve a project

resulting in a use of a resource protected by Section 4(f).

F. Federalism Implications

This proposed rule would not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. To the contrary, if finalized, this proposed rule would result in cost savings. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use, 66 FR 28355 (May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211. Nevertheless, if finalized, FRA reiterates that this would be a deregulatory action that would, to the extent it has an effect, tend to positively facilitate the movement of energy.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments (Nov. 6, 2000). The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws (except to any extent already preempted by the preexisting part 214). Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁴ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <https://www.regulations.gov>, as described in the system of records notice, DOT/ALL–14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this proposed rule can be found at <https://www.regulations.gov>, Docket No. FRA–2025–0083, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 214

Bridges, Occupational safety and health, Penalties, Railroad safety, Reporting and recordkeeping requirements.

For the reasons discussed in the preamble, FRA proposes to amend part 214 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

■ 1. The authority citation for part 214 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20107, 21301–21302, 21304, 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Add § 214.119 to subpart B to read as follows:

⁴ 19 U.S.C. ch. 13.

§ 214.119 Special approval procedure

(a) *General.* The following procedures govern consideration and action upon requests for special approval of alternative standards or for alternative compliance under § 214.103, § 214.105, § 214.107, § 214.109, § 214.111, § 214.113, § 214.115, and § 214.117.

(b) *Petitions for special approval of alternative standard or of alternative compliance.* Each petition for special approval of an alternative standard or for alternative compliance shall contain—

(1) The name, title, address, email address, and telephone number of the primary person to be contacted with regard to review of the petition;

(2) The alternative proposed, in detail, to be substituted for the particular requirements of this part;

(3) Appropriate data or analysis, or both, establishing that the alternative will provide at least an equivalent level of safety; and

(4) A statement affirming that the railroad or railroad contractor has served a copy of the petition on designated representatives of its employees, together with a list of the names and addresses of the persons served; or alternatively, a statement affirming that the railroad or railroad contractor has provided an alternative means of notice, together with a description of the notice provided.

(c) *Federal Register notice.* FRA will publish a notice in the **Federal Register** concerning each petition under this section.

(d) Not later than 30 days from the date of publication of the notice in the **Federal Register** concerning a petition under this section, any person may comment on the petition.

(1) Each comment shall set forth specifically the basis upon which it is made, and contain a concise statement of the interest of the commenter in the proceeding.

(2) Each comment shall be submitted to the U.S. Department of Transportation, Docket Operations (M-30), West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590, and shall contain the assigned docket number for that proceeding. The form of such submission may be in written or electronic form consistent with the standards and requirements established by the Federal Docket Management System and posted on its website at <http://www.regulations.gov>.

(e) *Disposition of petitions.*

(1) FRA will conduct a hearing on a petition in accordance with the procedures provided in § 211.25 of this chapter.

(2) If FRA finds that the petition complies with the requirements of this section or that the proposed plan is acceptable or changes are justified, or both, the petition will be granted, normally within 90 days of its receipt. If the petition is neither granted nor denied within 90 days, the petition remains pending for decision. FRA may attach special conditions to the approval of the petition. FRA may approve an alternative standard or alternative compliance in lieu of the relief requested by the petition. Following the approval of a petition, FRA may reopen consideration of the petition for cause stated.

(3) If FRA finds that the petition does not comply with the requirements of this section, or that the proposed plan is not acceptable or that the proposed changes are not justified, or both, the petition will be denied, normally within 90 days of its receipt.

(4) When FRA grants or denies a petition, or reopens consideration of the petition, written notice is sent to the petitioner and other interested parties.

■ 3. Remove and reserve § 214.331.

§ 214.331 [Removed and Reserved]

■ 4. Remove and reserve § 214.333.

§ 214.333 [Removed and Reserved]

■ 5. Amend § 214.335 by revising paragraph (a) to read as follows:

§ 214.335 On-track safety procedures for roadway work groups, general.

(a) No employer subject to the provisions of this part shall require or permit a roadway worker who is a member of a roadway work group to foul a track unless on-track safety is provided by either working limits or train approach warning in accordance with the applicable provisions of § 214.319, § 214.321, § 214.323, § 214.325, § 214.327, § 214.329, or § 214.336.

* * * * *

■ 6. Amend § 214.347 by revising paragraph (a)(3) to read as follows:

§ 214.347 Training and qualification for lone workers.

* * * * *

(a) * * *

(3) Rules and procedures prescribed by the railroad for individual train detection and establishment of working limits.

* * * * *

■ 7. Amend § 214.357 by revising paragraph (b)(1) to read as follows:

§ 214.357 Training and qualification for operators of roadway maintenance machines equipped with a crane.

* * * * *

(b) * * *

(1) Procedures for determining that the operator has the skills to safely operate each machine the person is authorized to operate, including but not limited to maintaining vertical clearance; and

* * * * *

■ 8. Amend § 214.513 by revising the section heading and paragraphs (b) and (c) to read as follows:

§ 214.513 Existing on-track roadway maintenance machines; general.

* * * * *

(b) Each existing on-track roadway maintenance machine shall be equipped with a permanent or portable horn or other audible warning device that produces a sound loud enough to be heard by roadway workers and other machine operators within the immediate work area. The triggering mechanism for the device shall be clearly identifiable and within easy reach of the machine operator.

(c) Each existing on-track roadway maintenance machine shall be equipped with a permanent illumination device or a portable light that is securely placed and not hand-held. The illumination device or portable light shall be capable of illuminating obstructions on the track ahead for a distance of 300 feet under normal weather and atmospheric conditions when the machine is operated during the period between one-half hour after sunset and one-half hour before sunrise or in dark areas such as tunnels.

■ 9. Amend § 214.515 by revising paragraph (a), removing paragraph (b), and redesignating existing paragraph (c) as new paragraph (b), to read as follows:

§ 214.515 Overhead covers for existing on-track roadway maintenance machines.

(a) For existing on-track roadway maintenance machines either currently or previously equipped with overhead covers for the operator's position, defective covers shall be repaired and maintained in accordance with the provisions of § 214.531.

(b) For purposes of this section, overhead covers shall provide the operator's position with cover from normal rainfall and midday sun.

■ 10. Amend § 214.517 by revising the section heading and the introductory text, to read as follows:

§ 214.517 Existing on-track roadway maintenance machines manufactured on or after January 1, 1991.

In addition to meeting the requirements of § 214.513, each existing on-track roadway maintenance machine

manufactured on or after January 1, 1991, shall have the following:

* * * * *

■ 11. Revise § 214.533(d) to read as follows:

§ 214.533 Schedule of repairs subject to availability of parts.

* * * * *

(d) Each employer shall maintain records pertaining to compliance with this section. Records may be kept on forms provided by the employer or by electronic means. The employer shall retain each record for at least one year, and the records shall be made available for inspection and copying during normal business hours by representatives of FRA and States participating under part 212 of this chapter. The records may be kept on the on-track roadway maintenance machine or hi-rail vehicle or at a location designated by the employer, including an electronic system.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 215

[Docket No. FRA–2025–0117]

RIN 2130–AD46

Repealing Special Approval Requirement for Freight Cars More Than 50 Years Old

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: FRA proposes to amend its freight car safety regulations to repeal the requirement for special approval to place or continue a freight car in service if it is more than 50 years old or equipped with any design or type component listed in appendix A to this part. Instead, railroads would be able to continue or place such “overage” cars in service after complying with uniform safety requirements. Those requirements would include comprehensive shop inspections by a designated inspector, single-car air brake testing, recordkeeping, and, as appropriate, stenciling. The proposed requirements are consistent with the most important conditions that FRA now requires

through the existing special approval process. Repealing the special approval process and replacing it with the proposed, uniform requirements would provide equivalent safety outcomes while reducing burdens on railroads and eliminating the added delay involved in petitioning FRA for a special approval.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES:

Comments: Comments related to Docket No. FRA–2025–0117 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA–2025–0117), and Regulatory Identification Number (RIN) for this rulemaking (2130–AD46). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT:

Steven Zuiderveen, Railroad Safety Specialist, Office of Railroad Safety, at email: steven.zuiderveen@dot.gov or telephone: (202) 493–6337 or Elliott Gillooly, Attorney Adviser, at email: elliott.gillooly@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR).

Title 49 CFR part 215 establishes railroad freight car safety requirements. Some of the requirements contained in part 215 can be updated to reduce burdens, make technical or conforming changes, or otherwise adjust to advancing technology without any

adverse effect on railroad safety. FRA proposes in this NPRM to reduce the burden on railroads required to maintain older freight cars in service, while maintaining important inspection and testing requirements for those cars. Please see the details of the proposed changes in the below section-by-section analysis.

II. Section-by-Section Analysis

Section 215.203—Restricted Cars

Section 215.203 currently restricts the operation of any railroad freight car that is more than 50 years old, and any car of a design or equipped with a component listed in appendix A to part 215, by prohibiting its placement or continuance in service, except under conditions approved by FRA. A railroad is required to petition FRA to obtain the required special approval. The petition currently must be submitted at least 90 days before the car is used and state the following information: (i) The name and principal business address of the petitioning railroad; (ii) the name and address of the entity that controls the operation and maintenance of the car involved; (iii) the number, type, capacity, reporting marks, and car numbers of the cars, their condition, status, and age measured from the date of original construction; (iv) the design, type component, or other item that causes the car to be restricted; (v) the maximum load the cars would carry; (vi) the maximum speed at which the cars would be operated; (vii) that each car has been examined and found to be safe to operate under the conditions set forth in the petition; and (viii) the territorial limits within which the cars are to be operated and the name of each railroad that will receive the cars in interchange.

Before FRA makes a decision on a petition, an FRA inspector examines all the cars, or a number of cars representative of all the cars, that are the subject of the railroad’s petition for compliance with all Federal safety requirements, including 49 CFR parts 215 (Railroad Freight Car Safety Standards), 231 (Railroad Safety Appliance Standards) and 232 (Brake System Safety Standards). The FRA inspector makes a recommendation following this inspection, and FRA’s Safety Board renders a decision based on the petition and the inspector’s findings. When approving a railroad’s petition, the Safety Board routinely imposes conditions on the placement or continuation of the subject cars in service, such as the completion of a comprehensive shop inspection by qualified personnel, and conditional

requirements periodically thereafter. Approvals may also include conditions such as speed limitations, or limitations on the service in which a car or cars may be used. A single-car air brake test (SCABT) may also be required at intervals shorter than generally required by FRA's Brake System Safety Standards in part 232.

FRA's proposed amendments preserve the essential requirements of the existing regulation, including a comprehensive mechanical inspection and SCABT before the car is placed or continued in service as a restricted car and every two years thereafter. FRA has preliminarily determined that some information required in a petition under the current regulation is not necessary for a railroad to make the determination that freight cars more than 50 years old are safe to continue in service. Specifically, the proposed amendments would not require railroads to state any speed restrictions placed on the cars or the maximum loads they will carry as a condition of compliance with § 215.203. Generally, speed limitations and loads will be determined in accordance with the type of car, type of commodity, class of track, terrain, intended routes, and railroad operating rules. Regulated entities would be required to maintain records of all required inspections and tests, including a certification that the subject cars are safe for the service in which they will be placed.

FRA also proposes to delete one category of restricted car currently included in § 215.203—§ 215.203(a)(3), a railroad freight car that is “[e]quipped with a Duryea underframe constructed before April 1, 1950, except for a caboose which is operated as the last car in a train”—as this category is redundant. Any car meeting the condition that it was built before April 1, 1950 is a car more than 50 years old and is included as a restricted car for that reason, regardless of whether it is equipped with a Duryea underframe. FRA has not identified any reason to exclude Duryea underframe cabooses from the requirements placed on restricted cars, as they now are.

FRA proposes to add at § 215.203(b) that “[r]ailroad freight cars approved under a standard such as the Office Manual of the Association of American Railroads' Interchange Rule 88 Increased Life Status process are exempt from the requirements of this section for up to 65 years of service life.” This proposed addition would allow a railroad to place or continue a freight car in service without complying with the requirements of § 215.203(a) only if the car has been approved under an industry standard designed for the

safety assessment and maintenance of older cars, which FRA believes will ensure such cars are safe to operate for an additional 15 years beyond the 50-year mark. The industry standards under the Office Manual of the Association of American Railroads' Interchange Rule 88 are more stringent than current FRA requirements for restricted cars and more stringent than any restrictions that FRA proposes in this NPRM.

III. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this final rule in accordance with E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

FRA proposes to amend its freight car regulations to repeal and replace the requirement for special approval to place or continue a freight car more than 50 years old in service, as it would eliminate the added delay and any uncertainty involved in petitioning FRA for a special approval. FRA analyzed the potential costs and benefits of this proposed rule. Railroads would benefit from this regulatory relief because they would be able to keep certain older cars in service, provided that the cars are inspected and tested as required and found safe for service. Railroads would also avoid the additional costs associated with filing petitions for special approvals with FRA, including the time and expense required to complete the petitions and have employees present for FRA inspections prior to a Safety Board decision. Some of this regulatory relief may be offset by the additional costs from the proposed record retention requirement to maintain all required inspections and tests. However, these additional costs may be negligible and outweighed by the benefits of keeping certain older cars in service without the existing special approval process. FRA welcomes any comments from the public on the impacts of this proposed rule.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at

least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA affirms that each amendment proposed in this NPRM has a cost that is “less than zero” consistent with E.O. 14192, FRA still requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,³ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule merely offers flexibilities that could result in cost savings, if a small entity or other regulated entity chooses to utilize those flexibilities. By extending this regulatory relief, many regulated

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

³ Public Law 104–121, 110 Stat. 857 (Mar. 29, 1996).

entities, including small entities, would experience a cost savings. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

The recordkeeping and reporting requirements already contained in part 215 became effective when the information collection request was approved by OMB on April 24, 2023. The OMB control number is 2130–0519, and OMB approval expires on April 30, 2026. However, the petition requirement for restricted cars has not previously been reported as a burden under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). This NPRM proposes a deregulatory action, and FRA anticipates that the overall burden on owners and operators of restricted cars will be reduced relative to the existing regulatory requirements. FRA requests public comment on any PRA burdens associated with the proposed amendments to § 215.203.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Pursuant to section 106 of the National Historic Preservation Act and its implementing regulations, FRA has determined this undertaking has no potential to affect historic properties. FRA has also determined that this rulemaking does not approve a project

resulting in a use of a resource protected by section 4(f).

F. Federalism Implications

This proposed rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, Federalism (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use, 66 FR 28355 (May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this rule in accordance with E.O. 13211 and determined that this rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, (Nov. 6, 2000). The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁴ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the

United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL–14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at www.regulations.gov, Docket No. FRA–2025–0117, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 215

Freight, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend part 215 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 215—RAILROAD FREIGHT CAR SAFETY STANDARDS

- 1. The authority citation for part 215 continues to read as follows:

Authority: 49 U.S.C. 20102–03, 20107, 20171; 28 U.S.C. 2461; and 49 CFR 1.89.

§ 215.203 [Amended]

- 2. Revise § 215.203 to read as follows:

§ 215.203 Restricted cars.

(a) A railroad may operate a railroad freight car that is more than 50 years old, measured from the date of original construction, or a freight car that is equipped with any design or type

⁴ 19 U.S.C. ch. 13.

component listed in appendix A to this part, only under the following conditions:

(1) The railroad maintains a record of each car and makes such record available to FRA upon request, including the following information:

(i) The number, type, capacity, reporting marks, and car number of the car, and its condition, status, and age measured from the date of original construction; and

(ii) The design, type component, or other item that causes the car to be restricted; and

(2) The car must undergo a comprehensive shop inspection by a designated inspector, as defined in § 215.11, at least once every 2 years. At a minimum, each inspection must include the following and be documented in a record to be maintained with the record specified in paragraph (a)(1) of this section:

(i) A determination that the car complies with subpart B of this part;

(ii) A single-car air brake test in accordance with § 232.305(b); and

(iii) A certification that the car is safe for the service in which it will be placed; and

(3) Except for railroad freight cars used exclusively for tourist, historic, excursion, educational, recreational, or private purposes and that are not interchanged, a freight car subject to this section must be stenciled on each side of the car in accordance with § 215.303. Further, the date of the car's most recent inspection under paragraph (a)(2) of this section must be stenciled on the car in letters at least 1 inch high, immediately following "R-AGE."

(b) Railroad freight cars approved under a standard such as the Office Manual of the Association of American Railroads' Interchange Rule 88 Increased Life Status process are exempt from the requirements of this section for up to 65 years of service life.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 215

[Docket No. FRA-2025-0119]

RIN 2130-AD55

Regulatory Relief for End of Car Cushioning Units

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: FRA proposes to amend regulations concerning freight car draft arrangement and end-of-car cushioning units (EOCCs) to make regulatory relief now provided by waiver permanent. The amendments would allow a freight car to remain in service if the EOCC is operative and equipped with a unit condition indicator (UCI) that indicates a non-discharged EOCC. This change would permit those EOCCs to remain in service despite the presence of clearly formed oil droplets on the unit. The amendments, if finalized, preserve the requirement to repair or replace an EOCC with clearly formed oil droplets if the unit does not have a UCI.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES:

Comments: Comments related to Docket No. FRA-2025-0119 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA-2025-0119), and Regulatory Identification Number (RIN) for this rulemaking (2130-AD55). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT:
Caleb Rogers, Mechanical Engineer,

Office of Railroad Safety, at email: caleb.rogers@dot.gov or telephone: 202-579-5198 or Elliott Gillooly, Attorney Adviser, at email: elliott.gillooly@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR). Title 49 CFR part 215 establishes railroad freight car safety requirements. Some of the requirements contained in part 215 can be updated to reduce burdens, make technical or conforming changes, or otherwise adjust to advancing technology without any adverse effect on railroad safety. FRA proposes in this NPRM to address a request from the Association of American Railroads (AAR) to incorporate regulatory relief now granted through an FRA waiver into part 215 by allowing freight cars with an EOCC that has leaked clearly formed droplets to remain in service if the cushioning unit is otherwise operational and equipped with a UCI that shows the unit has adequate pressure despite the presence of leaked oil on the exterior of the unit.

An EOCC is a device installed on the ends of railroad freight cars designed to absorb shocks and forces during rail operations (similar to shock absorbers on motor vehicles). These units are designed to absorb energy from buff and draft forces and impacts, preventing cargo from shifting and damage to the freight car draft system that could lead to a derailment. An EOCC must contain sufficient oil for the unit to function as designed (*i.e.*, for the unit adequately to absorb energy from in-train forces and potential impacts). Accordingly, FRA's Railroad Freight Car Safety Standards, 49 CFR part 215, prohibit a rail car from continuing in service if its EOCC is broken or inoperative (§ 215.129), which is a requirement that FRA does not intend to remove. Instead, FRA is proposing to remove § 215.127(c), which contains the prohibition that a freight car cannot continue in service if the EOCC is leaking "clearly formed droplets," even though the EOCC may still be operational. FRA will also make conforming changes to § 215.129 as detailed in the Section-by-Section Analysis, below, to address the

difference between EOCCs that have a UCI and those that do not.

UCIs are devices that railroad employees can use to monitor the condition of EOCCs. Insufficient internal pressure can be detected when a button on the UCI is pressed. If there is insufficient pressure in the EOCC, the button will remain depressed. Accordingly, in 2013, FRA granted AAR member railroads relief from § 215.127(c)(1) if a railroad freight car's cushioning unit is equipped with a UCI that indicates the unit is not defective.¹ This relief prevents railroad employees from having to unnecessarily remove functioning cushioning units that may be leaking clearly formed droplets of oil but are still functioning properly. Cushioning units are heavy and require freight cars to be jacked to be removed, and as such, the process presents inherent safety risks to railroad employees. The use of UCIs has allowed railroads to avoid unnecessary repairs of functioning cushioning units.

Since issuance of this waiver, AAR member railroads have seen a significant decrease in the number of cars that must be removed from service because the cushioning unit was identified as leaking. At the same time, the number of cars removed from service because the UCI indicates the cushioning unit is defective has increased. An industry standard (AAR Field Manual Rule 59) governs the use of UCIs to determine whether cushioning units are safe and acceptable for continued service. Using this standard (and as older cushioning units without UCIs age out of service), the number of cars removed from service because of leakage will continue to decline. FRA is proposing to incorporate the terms of the waiver into the Freight Car Safety Standards as follows.

II. Section-by-Section Analysis

Section 215.127 Defective Draft Arrangement

Section 215.127 addresses various components making up the draft arrangement of a freight car. If any of those components are missing or inoperative, the freight car cannot be safely used in service. As stated above, the prohibition on continuing a freight car in service with an inoperative EOCC is being preserved, but it would be moved to § 215.129. Concurrently, FRA proposes to clarify in § 215.129 that an EOCC leaking clearly formed droplets is a condition requiring a car to be held out of service only when the EOCC is not equipped with a UCI.

If the car is equipped with a UCI, railroads should rely on it instead of the formation of oil droplets to determine the condition of the EOCC. Under excessive loading conditions and pressures, some fluid may seep past the unit's seal, with the seepage accumulating and forming "clearly formed droplets." That seepage serves to relieve pressure within the EOCC but does not necessarily mean that the EOCC is not functioning properly.

Section 215.129 Defective Cushioning Device

Section 215.129 currently states that a railroad may not place or continue in service a car if it has an EOCC that is broken, inoperative, or missing a part. To incorporate the relief described above, FRA is proposing to add that a car also cannot be placed or continued in service if the EOCC is leaking clearly formed droplets and not equipped with a UCI, or if it is equipped with a UCI that indicates a discharged cushioning unit.

III. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this NPRM under E.O. 12866 (58 FR 51735, Oct. 4, 1993), Regulatory Planning and Review, and DOT Regulatory Policies and Procedures. The Office of Management and Budget's Office of Information and Regulatory Affairs determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866.

FRA analyzed the potential costs and benefits of this proposed rule. Railroads would benefit from this regulatory relief because they would not be obligated to withhold cars from service based solely on the presence of oil on the exterior of an EOCC. This would reduce costs associated with those freight cars equipped with a UCI that have safe and operational EOCCs by eliminating unnecessary downtime and unnecessary replacement of EOCCs that still have a useful service life. In addition, railroads or their industry association would no longer be required to submit periodic, repetitive waiver requests related to the current regulatory requirement.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192 (90 FR 9065, Jan. 31, 2025), Unleashing Prosperity Through Deregulation, requires that for "each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be

identified for elimination."²

Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.³

An E.O. 14192 deregulatory action is defined as "an action that has been finalized and has total costs less than zero." This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA affirms that each amendment proposed in this NPRM has a cost that is "less than zero" consistent with E.O. 14192, FRA requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,⁴ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule would not preclude small entities from continuing existing practices that comply with part 215; it merely offers flexibilities that could result in cost savings, if a small entity or other regulated entity chooses to utilize those flexibilities. By extending this regulatory relief, many regulated

² Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

³ Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled "Unleashing Prosperity Through Deregulation."* Memorandum M–25–20. Mar. 26, 2025.

⁴ Public Law 104–121, 110 Stat. 857 (Mar. 29, 1996).

¹ See Docket No. FRA–2013–0077, available at <https://www.regulations.gov>.

entities, including small entities, would experience a cost savings. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

This proposed rule contains no new information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*, therefore, an information collection submission to OMB is not required. The recordkeeping and reporting requirements already contained in part 215 became effective when it was approved by OMB on April 24, 2023. The OMB control number is 2130–0519, and OMB approval expires on April 30, 2026.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations, FRA has determined this undertaking has no potential to affect historic properties. FRA has also determined that this rulemaking does not approve a project resulting in a use of a resource protected by Section 4(f).

F. Federalism Implications

This proposed rule will not have a substantial effect on the States, on the relationship between the national

government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”⁵ FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁶ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities

for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL–14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at [regulations.gov](http://www.regulations.gov), Docket No. FRA–2025–0119, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 215

Freight, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend part 215 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 215—RAILROAD FREIGHT CAR SAFETY STANDARDS

- 1. The authority citation for part 215 continues to read as follows:

Authority: 49 U.S.C. 20102–03, 20107, 20171; 28 U.S.C. 2461; and 49 CFR 1.89.

- 2. Amend § 215.127 by removing paragraph (c) and redesignating paragraphs (d), (e), and (f) as paragraphs (c), (d), and (e), to read as follows:

§ 215.127 Defective draft arrangement.

A railroad may not place or continue in service a car, if—

- (a) The car has a draft gear that is inoperative;
- (b) The car has a broken yoke;
- (c) A vertical coupler pin retainer plate—
 - (1) Is missing (except by design); or
 - (2) Has a missing fastener;
 - (d) The car has a draft key, or draft key retainer, that is—
 - (1) Inoperative; or

⁵ 66 FR 28355 (May 22, 2001).

⁶ 19 U.S.C. ch. 13.

(2) Missing; or
(e) The car has a missing or broken follower plate.
■ 3. Amend § 215.129 by redesignating paragraph (c) as paragraph (e), and adding new paragraphs (c) and (d) and to read as follows:

§ 215.129 Defective cushioning device.

A railroad may not place or continue in service a car if it has a cushioning device that is—

- (a) Broken;
- (b) Inoperative;
- (c) Leaking clearly formed droplets, when not equipped with a unit condition indicator (UCI);
- (d) Equipped with a UCI that indicates a discharged cushioning unit; or
- (e) Missing a part—unless its sliding components have been effectively immobilized.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

49 CFR Part 215

[Docket No. FRA–2025–0118]

RIN 2130–AD54

Removing Stenciling Requirement for Freight Cars Used for Tourist, Historic, Excursion, Educational, Recreational, or Private Purposes and Not Interchanged

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: FRA proposes to exclude railroad freight cars used exclusively for tourist, historic, excursion, educational, recreational, or private purposes and that are not interchanged from the requirement that all restricted freight cars, including cars more than 50 years old, be stenciled with specific information.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES:

Comments: Comments related to Docket No. FRA–2025–0118 may be

submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA–2025–0118), and Regulatory Identification Number (RIN) for this rulemaking (2130–AD54). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT: Steven Zuiderveen, Railroad Safety Specialist, Office of Railroad Safety, at email: steven.zuiderveen@dot.gov or telephone: (202) 493–6337 or Elliott Gillooly, Attorney Adviser, at email: elliott.gillooly@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR).

Title 49 CFR part 215 establishes railroad freight car safety requirements. Some of the requirements contained in part 215 can be updated to reduce burdens, make technical or conforming changes, or otherwise adjust to advancing technology without any adverse effect on railroad safety. FRA proposes in this NPRM to exempt freight cars used for tourist, historic, excursion, educational, recreational, or private purposes (THEERP) from the general stenciling requirement applicable to restricted cars, provided such THEERP cars are not interchanged among railroads, for the reasons discussed in the below section-by-section analysis.

II. Section-by-Section Analysis

Section 215.303 Stenciling of Restricted Cars

Section 215.303 currently requires any car described in “§ 215.205(a)” of

this part to be stenciled or marked to display certain information relevant to restricted freight cars, such as the car's age and those components needed to completely indicate the basis for the restricted operation of the car. FRA proposes to exempt THEERP cars from this requirement based on requests from the owners and operators of such cars and the review and recommendations of FRA's Railroad Safety Advisory Committee (RSAC) working group assigned to this topic.¹ In addition, FRA intends to correct the reference to § 215.205(a), which is a typographical error, with the correct reference to § 215.203(a).

The proposed exclusion of THEERP freight cars from the general stenciling requirement applicable to restricted cars is intended to reduce burdens on the owners and operators of this equipment. This regulatory relief would incorporate long-standing waivers granted by FRA to individual THEERP owners and operators. This relief would also not diminish safety, as each freight car that is a restricted car, as freight cars are under § 215.203(a) when they become more than 50 years old, is still subject to § 215.203(a) and its safety requirements.²

In addition to petitions for waivers from stenciling requirements, FRA has also historically received petitions from many of the same THEERP car owners or operators requesting that FRA waive reflectorization requirements. FRA published an NPRM on the subject of reflectorization on July 21, 2022 (87 FR 43467) and intends that any final rule following from that NPRM will be consistent with the currently proposed amendments to § 215.303.

III. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this NPRM under E.O. 12866 (58 FR 51735, Oct. 4, 1993), Regulatory Planning and Review, and DOT Regulatory Policies

¹ In April 1996, the RSAC formed the Tourist and Historic Railroads and Private Passenger Car Working Group (Working Group). Since that time, the Working Group has considered numerous issues affecting tourist and historic rail operations and, in 2014, identified issues involving FRA's regulatory treatment of tourist, scenic, historic, excursion, educational or recreational rail operations or private passenger rail car operations, including stenciling requirements. See RSAC Meeting Minutes, available at <https://rsac.fra.dot.gov/radcms/rsac/File/DownloadFile?id=44>.

² FRA is publishing an NPRM proposing to revise § 215.203(a) concurrently with this NPRM. Thus, FRA proposes to clarify in both § 215.203 and § 215.303 that THEERP cars will be exempted from stenciling requirements, but not from other requirements applicable to restricted cars.

and Procedures. The Office of Management and Budget's Office of Information and Regulatory Affairs determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866.

FRA analyzed the potential costs and benefits of this proposed rule. Railroads (or other owners of THEERP cars) would benefit from this regulatory relief because they would not incur the costs of stenciling and marking cars that are used for tourist, historic, excursion, educational, recreational, or private purposes and not interchanged. In addition, the proposed amendments would reduce costs for the owners of these cars as they would no longer be required to file individual petitions for waivers from the stenciling requirements.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192 (90 FR 9065, Jan. 31, 2025), *Unleashing Prosperity Through Deregulation*, requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”³ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.⁴

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA affirms that each amendment proposed in this NPRM has a cost that is “less than zero” consistent with E.O. 14192, FRA requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,⁵ requires Federal agencies to consider the effects of the regulatory action on small business and

other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule would not preclude small entities from continuing existing practices that comply with part 215; it merely offers flexibilities that could result in cost savings, if a small entity or other regulated entity chooses to utilize those flexibilities. By extending this regulatory relief, many regulated entities, including small entities, would experience a cost savings. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

The recordkeeping and reporting requirements already contained in part 215 became effective when the information collection request was approved by OMB on April 24, 2023. The OMB control number is 2130–0519, and OMB approval expires on April 30, 2026. However, the stenciling requirement for restricted cars has not previously been reported as a burden under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). This NPRM proposes a deregulatory action and FRA anticipates that the overall burden on owners and operators of restricted cars will be reduced relative to the existing regulatory requirements.

FRA requests public comment on any PRA burdens associated with the proposed amendments to § 215.303.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Pursuant to section 106 of the National Historic Preservation Act and its implementing regulations, FRA has determined this undertaking has no potential to affect historic properties. FRA has also determined that this rulemaking does not approve a project resulting in a use of a resource protected by section 4(f).

F. Federalism Implications

This proposed rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, Federalism (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”⁶ FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is

³ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

⁴ Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

⁵ Public Law 104–121, 110 Stat. 857 (Mar. 29, 1996).

⁶ 66 FR 28355 (May 22, 2001).

not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁷ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL–14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at www.regulations.gov, Docket No. FRA–2025–

0118, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 215

Freight, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend part 215 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 215—RAILROAD FREIGHT CAR SAFETY STANDARDS

- 1. The authority citation for part 215 continues to read as follows:

Authority: 49 U.S.C. 20102–03, 20107, 20171; 28 U.S.C. 2461; and 49 CFR 1.89.

§ 215.303 [Amended]

- 2. Amend § 215.303 by revising paragraph (a) to read as follows:

§ 215.303 Stenciling of restricted cars.

(a) Each restricted railroad freight car that is described in § 215.203(a) of this part, except for railroad freight cars used exclusively for tourist, historic, excursion, educational, recreational, or private purposes and that are not interchanged, shall be stenciled, or marked—

49 CFR Part 222

[Docket No. FRA–2025–0121]

RIN 2130–AD39

Regulatory Relief From Locomotive Horn Sounding Pattern at Public Highway-Rail Grade Crossings

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This proposed rule would provide greater flexibility for compliance with FRA’s train horn regulation. Specifically, this proposed rule would allow for regulatory relief from the required pattern of sounding the locomotive horn in two long blasts,

one short blast, and one long blast where trains, locomotive consists, and individual locomotives have stopped in close proximity to a public highway-rail grade crossing location. This proposed rule would instead allow locomotive engineers to vary the pattern of sounding the locomotive horn to only one single blast of the horn as they enter onto and cross over these grade crossing locations.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES:

Comments: Comments related to Docket No. FRA–2025–0121 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA–2025–0121), and Regulatory Identification Number (RIN) for this rulemaking (2130–AD39). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT:

James Payne, Staff Director, Grade Crossing and Trespasser Outreach, FRA, telephone: (202) 441–2787, email: James.Payne@dot.gov; or Amanda Maizel, Attorney Adviser, FRA, telephone: (202) 308–3753, email: Amanda.Maizel@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR). The requirements for FRA-regulated entities to sound the train horn when the train’s locomotive or lead cab car is approaching a public highway-rail grade crossing are

⁷ 19 U.S.C. ch. 13.

established in 49 CFR part 222, “Use of Locomotive Horns at Public Highway-Rail Grade Crossings.” Specifically, 49 CFR 222.21(a) generally requires the locomotive horn to be sounded in a pattern of two long blasts, one short blast, and one long blast as the locomotive approaches and occupies the crossing. Currently, this pattern may be varied as necessary where crossings are spaced closely together. *Id.* Relatedly, § 222.21(b)(2) generally requires that the locomotive horn be sounded at least 15 seconds, but not more than 20 seconds, before the locomotive enters the crossing. However, § 222.21(d) provides that trains, locomotive consists, and individual locomotives that have stopped in close proximity to a public highway-rail grade crossing may approach the crossing and sound the locomotive horn for less than 15 seconds before the locomotive enters the highway-rail grade crossing, under certain conditions. Where these same conditions are present, FRA believes that the pattern of sounding the locomotive horn may also be varied, to include one single blast of the horn. This proposed amendment would recognize that the locomotive engineer’s determination as to the duration of sounding the locomotive horn in these situations is often closely related to the necessary pattern of sounding the horn. This proposal would reduce the burden on railroads and surrounding communities without an adverse effect on railroad safety.

II. Section-by-Section Analysis

Section 222.21 When Must a Locomotive Horn Be Used?

As discussed above, this proposed rule would revise the language of 49 CFR 222.21(d) to make clear that a locomotive engineer, in addition to being permitted to sound the horn less than the required 15 seconds in certain situations, may also vary the horn sounding pattern, including, potentially, one single blast of the horn.

III. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has evaluated this NPRM in accordance with E.O. 12866 (58 FR 51735, Oct. 4, 1993), Regulatory Planning and Review and DOT Regulatory Policies and Procedures. The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866.

FRA analyzed the potential costs and benefits of this proposed rule. FRA concluded that this proposed rule reduces the burden on railroads and communities by offering flexibility on rules regarding train horns.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192 requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA affirms that the amendment proposed in this NPRM has a cost that is negligible or “less than zero” consistent with E.O. 14192, FRA still requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,³ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

² Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

³ Public Law 104–121, 110 Stat. 857 (Mar. 29, 1996).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule would allow for regulatory relief in certain situations from the pattern of locomotive horn soundings in FRA’s train horn regulation. By extending this regulatory relief, many regulated entities, including small entities, would experience benefits. Consequently, FRA certifies that the proposed rule would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

There is no new collection of information requirements contained in this proposed rule, and in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, an information collection submission to OMB is not required. The recordkeeping and reporting requirements already contained in part 222 were approved by OMB on Nov. 9, 2022. The information collection requirements thereby became effective when they were approved by OMB. The OMB approval number is OMB No. 2130–0560, and OMB approval expires on Nov. 31, 2025.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations, FRA has determined this undertaking has no potential to affect historic properties. FRA has also determined that this rulemaking does not approve a project resulting in a use of a resource protected by Section 4(f).

F. Federalism Implications

This proposed rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”⁴ FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁵ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards, and where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL–14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at regulations.gov, Docket No. FRA–2025–0121, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 222

Administrative practice and procedure, Locomotives, Railroad safety, Train horn.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend part 222 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 222—USE OF LOCOMOTIVE HORNS AT PUBLIC HIGHWAY-RAIL GRADE CROSSINGS

■ 1. The authority citation for part 222 continues to read as follows:

Authority: 28 U.S.C. 2461, note; 49 U.S.C. 20103, 20107, 20153, 21301, 21304; 49 CFR 1.49.

■ 2. Amend § 222.21 by revising paragraph (d) introductory text to read as follows:

* * * * *

(d) Trains, locomotive consists and individual locomotives that have stopped in close proximity to a public highway-rail grade crossing may approach the crossing and sound the locomotive horn for less than 15 seconds, and may vary the sounding pattern set forth in paragraph (a), before the locomotive enters the highway-rail grade crossing, if the locomotive engineer is able to determine that the public highway-rail grade crossing is not obstructed and either:

[Docket No. FRA–2025–0128]

RIN 2130–AD18

Enhancing Railroad Discretion in Sounding Locomotive Horns at Passenger Stations

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: FRA proposes to amend its safety standards related to the use of the locomotive horn to clarify that no Federal regulation requires a railroad to sound a locomotive horn because of the presence of a passenger station. The proposed rule would clarify that a railroad has discretion to determine policies for sounding a locomotive horn at a passenger station through railroad operating rules. The proposed rule would also provide that if a railroad decides to sound a locomotive horn at a passenger station, the minimum sound level requirements in FRA’s *Railroad Locomotive Safety Standards* would not apply to the sound produced by the horn.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received

⁴ 66 FR 28355 (May 22, 2001).

⁵ 19 U.S.C. ch. 13.

after that date, but only to the extent practicable.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR). The requirements related to the use of locomotive horns by FRA-regulated entities are established in 49 CFR part 222, "Use of Locomotive Horns at Public Highway-Rail Grade Crossings." Although part 222 focuses on the use of locomotive horns at public highway-rail grade crossings, it also provides clarification regarding the use of locomotive horns in emergencies and other situations. Some of the requirements contained in part 222 could be updated to reduce burdens, make technical or conforming changes, or otherwise adjust to advancing technology without any adverse effect on railroad safety. The amendment to part 222 proposed in this NPRM aims to address public concerns about excessive

horn sounding, to provide greater flexibility to railroads regarding Federal requirements, and to eliminate any confusion by clarifying that no Federal regulation requires the sounding of a locomotive horn at a passenger station. Please review the Section-by-Section Analysis below for the relevant information related to each proposed change.

II. Section-by-Section Analysis

Section 222.9 Definitions

FRA proposes to add a definition of "passenger station" to mean a location designated in a railroad's timetable where passengers are regularly scheduled to get on or off any train, adopting the same definition of "passenger station" in § 238.5 of FRA's *Passenger Equipment Safety Standards*. FRA proposes to add this definition to clarify specific locations that are not subject to a Federal requirement for sounding of the locomotive horn.

Section 222.23 How does this regulation affect sounding of a horn during an emergency or other situations?

This proposed rule would revise the language of 49 CFR 222.23 to clarify that no Federal regulation requires a railroad to sound a locomotive horn because of the presence of a passenger station. Unless other conditions or circumstances trigger Federal regulations requiring the use of a locomotive horn, such as providing audible warning from trains or locomotives that approach roadway workers and roadway maintenance machines as required under 49 CFR 214.339, a railroad has discretion over the decision to sound a locomotive horn at a passenger station and the relevant railroad operating rules it adopts to address such a situation. If a railroad decides to sound a locomotive horn at a passenger station at its own discretion, under this proposed rule, the minimum sound level requirements in 49 CFR 229.129(a) would not apply to the sound produced by the horn.

Historically, railroads have sounded the locomotive horn at passenger stations as one method of warning passengers of approaching trains and safeguarding passenger movements at passenger stations. The railroad industry has developed additional methods for providing such warning to passengers and safeguarding their movements at passenger stations, including advancements in station design, providing physical separation of passengers from train movements, and providing other forms of warnings and

measures for increasing situational awareness, including both audible and visual station announcements. In the context of this more robust array of methods to warn passengers of approaching trains and to safeguard passenger movements at passenger stations, and in consideration that different methods may be employed depending on whether trains are stopping at a station, moving through a station without stopping, or moving over tracks adjacent to a station, the proposed rule would enhance a railroad's discretion in using the locomotive horn at passenger stations. FRA invites comment on the effectiveness of current railroad operating rules and procedures that address locomotive horn sounding at passenger stations and other methods for ensuring safety at passenger stations.

III. Regulatory Impact and Notices

A. Executive Orders (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this NPRM under E.O. 12866 (58 FR 51735, Oct. 4, 1993), Regulatory Planning and Review, and DOT Regulatory Policies and Procedures. The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866.

FRA analyzed the potential costs and benefits of this proposed rule. This proposed rule would provide transparency regarding Federal locomotive horn sounding requirements and eliminate any confusion to the public, rail labor organizations, and the rail industry by clarifying that no Federal regulation requires the sounding of a locomotive horn because of the presence of a passenger station. Additionally, this proposed rule would allow railroads the discretion to sound a locomotive horn without being subject to the minimum sound level requirements for locomotive horns in 49 CFR part 229. This rule would provide railroads greater flexibility to operate their businesses without adversely impacting railroad safety.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192 (90 FR 9065, Jan. 31, 2025), Unleashing Prosperity Through Deregulation, requires that for "each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination."¹

¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing*

Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA is confident that each change proposed in this NPRM has a cost that is negligible or “less than zero” consistent with E.O. 14192, FRA requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,³ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule would not have a significant economic impact on a substantial number of small entities. This proposed rule would not preclude small entities from continuing existing practices that comply with part 222 or another Federal regulation; it merely offers flexibilities that could result in cost savings, if a small entity or other regulated entity chooses to utilize those flexibilities. By extending this regulatory relief, many regulated

entities, including small entities, would experience a cost savings. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

This proposed rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, therefore, an information collection submission to OMB is not required. The recordkeeping and reporting requirements already contained in part 222 became effective when it was approved by OMB on November 09, 2022. The OMB control number is 2130–0560, and OMB approval expires on November 30, 2025.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations, FRA has determined this undertaking has no potential to affect historic properties. FRA has also determined that this rulemaking does not approve a project resulting in a use of a resource protected by Section 4(f).

F. Federalism Implications

This proposed rule would not have a substantial effect on the States, on the relationship between the national

government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”⁴ FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁵ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards, and where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities

Prosperity Through Deregulation. 90 FR 9065–9067. Feb. 6, 2025.

⁵ 19 U.S.C. ch. 13.

for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL-14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments would be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at [regulations.gov](http://www.regulations.gov), Docket No. FRA-2025-0128, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 222

Administrative practice and procedure, Locomotives, Railroad safety, Train horn.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend part 222 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

■ 1. The authority citation for part 222 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20153, 21301, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Amend § 222.9 by adding the definition of “passenger station” in alphabetical order to read as follows:

§ 222.9 Definitions

* * * * *

Passenger station means a location designated in a railroad’s timetable where passengers are regularly scheduled to get on or off any train.

* * * * *

■ 3. Amend § 222.23 by adding paragraph (d) to read as follows:

§ 222.23 How does this regulation affect sounding of a horn during an emergency or other situations?

* * * * *

(d) Nothing in this part requires the use of the locomotive horn at a passenger station or for purposes other

than highway-rail crossing safety. Unless a Federal regulation requires the use of a locomotive horn because of conditions present at a specific passenger station, the decision to sound a locomotive horn is subject to railroad discretion and railroad operating rules adopted under part 217 of this chapter. A locomotive horn used pursuant to this discretion is not subject to the minimum sound level requirement specified in 49 CFR 229.129(a).

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

49 CFR Part 222

[Docket No. FRA-2025-0120]

RIN 2130-AD14

Regulatory Relief To Allow Speeds Up to 45 MPH for Non-Traversable Curbs

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This proposed rule would revise the definition of a non-traversable curb in FRA’s train horn regulation in conformance with five longstanding FRA Safety Board waivers that allow highway speeds up to 45 miles per hour (mph) where these highway curbs are present.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES:

Comments: Comments related to Docket No. FRA-2025-0120 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA-2025-0120), and Regulatory Identification Number (RIN) for this rulemaking (2130-AD14). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of

this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT:

James Payne, Staff Director, Grade Crossing and Trespasser Outreach, FRA, telephone: (202) 441-2787, email: James.Payne@dot.gov; or Amanda Maizel, Attorney Adviser, FRA, telephone: (202) 308-3753, email: Amanda.Maizel@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR) to provide regulatory relief to regulated entities. One such regulatory relief proposal would revise the definition of a non-traversable curb to allow for speeds up to 45 mph.

The current definition of a non-traversable curb is established in 49 CFR part 222, “Use of Locomotive Horns at Public Highway-Rail Grade Crossings.” It describes a highway curb designed to discourage a motor vehicle from leaving the roadway and notes that they are used at locations where highway speeds do not exceed 40 mph. At the time that 49 CFR part 222 was issued, the American Association of State Highway and Transportation Officials (AASHTO) provided guidance that vertical curbs should not be used with speeds greater than 40 mph. Subsequently, AASHTO modified its guidance stating that vertical curbs should not be used with speeds greater than 45 mph.¹ FRA proposes to revise the definition in 49 CFR 222.9 in conformance with AASHTO’s updated guidance.

In addition, the revision of this definition is in conformance with the waivers that FRA has previously granted to applicants who have sought relief from the requirement that medians with non-traversable curbing may not be used where highway speeds exceed 40 mph. See Docket Nos. FRA-2009-0066, 2010-0137, 2012-0030, 2012-0031, 2012-0074.

¹ See Section 6.3.2.5, Policy on Geometric Design of Highways and Streets (7th Ed., 2018).

II. Section-by-Section Analysis

Section 222.9 Definitions

This proposed rule would revise the definition of a non-traversable curb, which currently provides for use of such curbs at locations where highway speeds do not exceed 40 mph, to allow use at locations where highway speeds do not exceed 45 mph. This proposed rule would thereby codify five longstanding waivers in FRA's train horn regulation.

III. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this NPRM under E.O. 12866 (58 FR 51735, Oct. 4, 1993), Regulatory Planning and Review, and DOT Regulatory Policies and Procedures. The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866.

FRA analyzed the potential costs and benefits of this proposed rule. Because this rule would revise the definition of a non-traversable curb and would codify five longstanding waivers in FRA's train horn regulation, this proposed rule would impart no additional burdens on regulated entities. Moreover, this rule would provide some qualitative benefits to regulated entities and the U.S. government, by clarifying, simplifying, and updating the language of part 222. This rule, if finalized as proposed, would result in cost savings. Impacted parties would no longer be required to submit periodic, repetitive waiver requests related to the regulatory definition of a non-traversable curb. This rule would also conform FRA regulations with guidance provided by industry.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192 (90 FR 9065, Jan. 31, 2025), Unleashing Prosperity Through Deregulation, requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”² Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O.

14192 deregulatory action, and an E.O. 14192 regulatory action.³

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA affirms that each amendment proposed in this NPRM has a cost that is negligible or “less than zero” consistent with E.O. 14192, FRA still requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,⁴ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule would not preclude small entities from continuing existing practices that comply with part 222; it merely offers flexibilities that could result in cost savings, if a small entity or other regulated entity chooses to utilize those flexibilities. By extending this regulatory relief, many regulated entities, including small entities, would experience a cost savings. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

³ Executive Office of the President. Office of Management and Budget. Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.” Memorandum M–25–20. March 26, 2025.

⁴ Public Law 104–121, 110 Stat. 857 (Mar. 29, 1996).

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

There is no new collection of information requirements contained in this proposed rule, and in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, an information collection submission to OMB is not required. The recordkeeping and reporting requirements already contained in part 222 were approved by OMB on Nov. 9, 2022. The information collection requirements thereby became effective when they were approved by OMB. The OMB approval number is OMB No. 2130–0560, and OMB approval expires on Nov. 31, 2025.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations, FRA has determined this undertaking has no potential to affect historic properties. FRA has also determined that this rulemaking does not approve a project resulting in a use of a resource protected by Section 4(f).

F. Federalism Implications

This proposed rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in

² Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”⁵ FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁶ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL–14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at www.regulations.gov, Docket No. FRA–2025–0120, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 222

Administrative practice and procedure, Locomotives, Railroad safety, Train horn.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend part 222 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 222—USE OF LOCOMOTIVE HORNS AT PUBLIC HIGHWAY-RAIL GRADE CROSSINGS

■ 1. The authority citation for part 222 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20153, 21301, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Section 222.9 is amended by revising the definition of “non-traversable curb” to read as follows:

§ 222.9 Definitions

* * * * *

Non-traversable curb means a highway curb designed to discourage a motor vehicle from leaving the roadway. Non-traversable curbs are used at locations where highway speeds do not exceed 45 miles per hour and are at least six inches high. Additional design specifications are determined by the standard traffic design specifications used by the governmental entity constructing the curb.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of Title 49, Code of Federal Regulations (CFR). The requirements for FRA-regulated entities to report accidents and incidents meeting certain criteria are established in 49 CFR part 225, "Railroad Accidents/Incidents: Reports Classification, and Investigations." Some of the requirements contained in part 225 could be updated to reduce burdens, make technical or conforming changes, or otherwise adjust to advancing technology, without any adverse effect on railroad safety. Please review the SECTION-BY-SECTION ANALYSIS below for the relevant information related to each proposed change.

II. Section-by-Section Analysis

Section 225.25 Recordkeeping

Paragraph (h) of this section requires that railroads post a listing of all injuries and occupational illnesses reported to FRA "in a conspicuous location at that establishment." Over the past several years, several Class I railroads have submitted waivers requesting permission to satisfy this posting requirement electronically.¹ FRA has granted these waivers, and is unaware of any issues that have resulted from Class I railroads using electronic posting to fulfill this requirement. Thus, FRA is proposing to allow railroads to post these injuries and illnesses electronically, if certain conditions are met.

To achieve this objective, FRA proposes to reorganize paragraph (h). The proposed introductory text of paragraph (h) contains the general posting requirement. Proposed paragraph (h)(1) states the length of time and the sequence that information should be posted. Paragraph (h)(2), which is currently addressed in paragraph (h)(15) of this section, would state that railroads do not have to post

information on an occupational injury or illness that is a privacy concern case. New paragraph (h)(3) would contain the list of information that must be included in this posting. FRA is proposing to remove some of the current requirements for these postings. Specifically, FRA proposes removing the requirement in current paragraph (h)(11) that the posting include the annual average number of railroad employees reporting to the establishment. FRA also proposes removing the signature requirement found in current paragraph (h)(12). Finally, FRA is proposing new paragraph (h)(4) which would allow railroads to post the listings required under this paragraph in an electronic format if certain conditions are met. Specifically, railroads using electronic posting would have to ensure that: employees are given instructions or training on accessing the electronic posting; there is a device at the facility employees can use to access the posting or employees are issued a device that can access the posting; and supervisors can show the posting to an employee or FRA representative upon request. These conditions are designed to ensure that railroad employees have guaranteed access to these postings if a railroad decides to post this information electronically.

Lastly, FRA will revise the FRA Guide for Preparing Accident/Incident Reports in accordance with any changes to part 225 finalized in this rulemaking.²

III. Regulatory Impact and Notices

A. Executive Orders (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this NPRM under E.O. 12866 (58 FR 51735, Oct. 4, 1993), Regulatory Planning and Review, and DOT Regulatory Policies and Procedures. The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866. This rule would allow railroads to electronically post a listing of injuries and occupational illnesses and would remove some of the requirements for what information railroads must include in these listings.

FRA analyzed the potential costs and benefits of this proposed rule. Since this rule would allow railroads to post listings electronically and would remove some requirements for what must be included in these listings,

benefits would include increased flexibility and decreased reporting requirements and reduced burden for railroads. Additionally, this rule would provide further clarity by making technical or conforming changes, and otherwise adjusting to advancing technology. Since this rule would not impose any new requirements, it is not expected to have additional costs.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192 (90 FR 9065, Jan. 31, 2025), Unleashing Prosperity Through Deregulation, requires that for "each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination."³ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M-25-20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.⁴

An E.O. 14192 deregulatory action is defined as "an action that has been finalized and has total costs less than zero." This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA affirms that each amendment proposed in this NPRM has a cost that is negligible or "less than zero" consistent with E.O. 14192, FRA still requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,⁵ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently

³ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065-9067 (Feb. 6, 2025).

⁴ Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled "Unleashing Prosperity Through Deregulation."* Memorandum M-25-20. March 26, 2025.

⁵ Public Law 104-121, 110 Stat. 857 (Mar. 29, 1996).

¹ See, e.g. FRA-2018-0083.

² <https://railroads.dot.gov/elibrary/fra-guide-preparing-accidentincident-reports-0>.

owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule would not preclude small entities from continuing existing practices that comply with part 225; it merely offers flexibilities that could result in cost savings, if a small entity or other regulated entity chooses to utilize those flexibilities. By extending this regulatory relief, many regulated entities, including small entities, would experience a cost savings. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult either person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

This proposed rule offers regulatory flexibilities, and there are no new collection of information requirements contained in this proposed rule, in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The recordkeeping and reporting requirements already contained in part 225 were approved by the Office of Management and Budget (OMB) on December 5, 2023, and the information collection requirements thereby became effective when they were approved by OMB. The OMB approval number is 2130–0500, and OMB approval expires on December 31, 2026.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not

involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This proposed rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”⁶ FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁷ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL–14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at [regulations.gov](http://www.regulations.gov), Docket No. FRA–2025–0122, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 225

Investigations, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend part 225 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 225—RAILROAD ACCIDENTS/ INCIDENTS: REPORTS CLASSIFICATION, AND INVESTIGATIONS

■ 1. The authority citation for part 225 continues to read as follows:

⁶ 66 FR 28355 (May 22, 2001).

⁷ 19 U.S.C. Ch. 13.

Authority: 49 U.S.C. 103, 322(a), 20103, 20107, 20901–20902, 21301, 21302, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise § 225.25(h) to read as follows:

§ 225.25 Recordkeeping.

* * * * *

(h) Except as provided in paragraph (h)(2) of this section, a listing of all injuries and occupational illnesses reported to FRA as having occurred at an establishment shall be posted in a conspicuous location at that establishment, within 30 days after the expiration of the month during which the injuries and illnesses occurred, if the establishment has been in continual operation for a minimum of 90 calendar days. If the establishment has not been in continual operation for a minimum of 90 calendar days, the listing of all injuries and occupational illnesses reported to FRA as having occurred at the establishment shall be posted, within 30 days after the expiration of the month during which the injuries and illnesses occurred, in a conspicuous location at the next higher organizational level establishment, such as one of the following: an operating division headquarters; a major classification yard or terminal headquarters; a major equipment maintenance or repair installation, *e.g.*, a locomotive or rail car repair or construction facility; a railroad signal and maintenance-of-way division headquarters; or a central location where track or signal maintenance employees are assigned as a headquarters or receive work assignments. These examples include facilities that are generally major facilities of a permanent nature where the railroad generally posts or disseminates company informational notices and policies, *e.g.*, the policy statement in the internal control plan required by § 225.33 concerning harassment and intimidation. At a minimum, “establishment” posting is required and shall include locations where a railroad reasonably expects its employees to report during a 12-month period and to have the opportunity to observe the posted list containing any reportable injuries or illnesses they have suffered during the applicable period.

(1) This listing shall be posted and shall remain continuously displayed for the next 12 consecutive months. Incidents reported for employees at that establishment shall be displayed in date sequence.

(2) Railroads do not have to post information on an occupational injury or illness that is a privacy concern case.

(3) The listing shall contain all of the following information:

- (i) Name and address of the establishment.
- (ii) Calendar year of the cases being displayed.
- (iii) Incident number used to report case.
- (iv) Date of the injury or illness.
- (v) Location of incident.
- (vi) Regular job title of employee injured or ill.
- (vii) Description of the injury or condition.
- (viii) Number of days employee was absent from work at time of posting.
- (ix) Number of days of work restriction for employee at time of posting.
- (x) If the employee died, include the date of death.
- (xi) The preparer’s name, title, and telephone number (including the area code).
- (xii) The date the record was completed.
- (xiii) When there are no reportable injuries or occupational illnesses associated with an establishment for a month, the listing shall reference this fact.
- (4) A railroad may maintain the posting required under paragraph (h) of this section in electronic format if:
 - (i) Employees are provided instructions or training on how to properly access the electronic posting;
 - (ii) There is a device at the facility which employees may use to access the posting or employees are issued a device that can access the posting; and
 - (iii) Supervisors at the establishment can show the posting to employees or an FRA representative upon request.

* * * * *

Issued in Washington, DC.

Kyle D. Fields,

Chief Counsel.

[FR Doc. 2025–12177 Filed 6–27–25; 4:15 pm]

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 225

[Docket No. FRA–2025–0124]

RIN 2130–AD59

Retiring Form FRA F 6180.107 and Form FRA F 6180.150

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This proposed rule would retire Form FRA F 6180.107, “Alternative Record for Illnesses Claimed to be Work-Related” (Form 6180.107), and Form FRA F 6180.150, “Highway User Injury Inquiry Form” (Form 6180.150). The proposed rule would also change the record retention period required under FRA’s accident reporting regulations and make other technical corrections.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES: *Comments:* Comments related to Docket No. FRA–2025–0124 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA–2025–0124), and Regulatory Identification Number (RIN) for this rulemaking (2130–AD59). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT:

Michael Wissman, Railroad Safety Specialist, Part 225, Federal Railroad Administration, telephone: 610–314–5729, email: michael.wissman@dot.gov; or Michael C. Spinnicchia, Attorney Adviser, Federal Railroad Administration, telephone: 202–713–7671, email: michael.spinnicchia@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of Title 49, Code of Federal Regulations (CFR). The requirements for FRA-regulated entities to report accidents and incidents meeting certain criteria

are established in 49 CFR part 225, “Railroad Accidents/Incidents: Reports Classification, and Investigations.” Some of the requirements contained in part 225 could be updated to reduce burdens, make technical or conforming changes, or otherwise adjust to advancing technology without any adverse effect on railroad safety. Please review the Section-by-Section Analysis below for the relevant information related to each proposed change.

II. Section-by-Section Analysis

Section 225.3 Applicability

As is discussed in the Section-by-Section Analysis for § 225.33, FRA is proposing the removal of § 225.33(a)(11). Since the introductory text of § 225.3(b) currently references § 225.33(a)(3) through (11), FRA is proposing to revise this text to refer to § 225.33(a)(3) through (10).

Section 225.21 Forms

Section 225.25 Recordkeeping

FRA is proposing to retire Form 6180.107 and Form 6180.150. Form 6180.107 is a form railroads may use in lieu of Form FRA F 6180.98, “Railroad Employee Injury and/or Illness Record,” (Form 6180.98) to record illnesses claimed by an employee to be work-related but for which there is insufficient information for the railroad to determine work-relatedness. FRA initially proposed the creation of this form because it thought it would promote better accounting of contested illness claims, provide an appropriate audit trail, and “result in a body of information that can be used in the future for research into the causes of prevalent illnesses.”¹

Two decades later, the desired benefits of this form have not come to fruition as railroads rarely use this form. Furthermore, § 225.21(h) already allows railroads to use alternative designed forms, in lieu of Form 6180.98, to record accountable injuries and illnesses. Form 6180.107 is rarely used and has not achieved its desired goals. For railroads that want to continue using this form, § 225.21(h) would allow them to design their own form that is modeled after Form 6180.107. Therefore, FRA proposes retiring this form and removing §§ 225.21(j) and 225.25(i)–(j) which describe the requirements for completing Form 6180.107 or an alternative railroad-designed form in lieu of Form 6180.107.

Railroads are required to send Form 6180.150 to every potentially injured highway user in a highway-rail grade

crossing accident. The form was designed to assist railroads in making determinations about whether a highway user incurred an injury that must be reported to FRA. However, similar to Form 6180.107, Form 6180.150’s intended goals have not been attained. FRA estimates that railroads receive responses from approximately 1% of highway users that are sent this form. Thus, FRA is proposing retiring this form and removing § 225.21(k).

Section 225.27 Retention of Records

Paragraph (a) of this section creates two categories of retention periods for certain FRA forms and the monthly listing of injuries and illnesses required by § 225.25: a five-year retention period and a two-year retention period. In the interest of uniformity, FRA is proposing that all records subject to this paragraph have a single retention period. FRA expects that a five-year retention period is unnecessarily long. However, a two-year retention period may be too short given FRA’s audit schedule. Thus, FRA is proposing to revise this paragraph so that all records must be retained for at least three years after the end of the calendar year to which they relate. Since FRA is proposing retiring Form 6180.107 and Form 6180.150, these forms have also been removed from proposed paragraph (a).

Section 225.33 Internal Control Plans

Paragraph (a)(11) of this section requires a railroad’s internal control plan to include a statement specifying the name, title, and address of the custodian of a railroad’s Form 6180.107’s or the alternate railroad-designed forms. Since FRA is proposing retiring the Form 6180.107, FRA is also proposing removing this paragraph.

Section 225.35 Access to Records and Reports

Since FRA is proposing retiring Form 6180.107, it is also proposing removing the references to Form 6180.107 in paragraph (b) of this section. In addition, paragraph (b) incorrectly cites to § 225.31(b) for FRA’s subpoena authority. FRA is proposing correcting this citation to § 225.31(a)(2).

Lastly, FRA will revise the FRA Guide for Preparing Accident/Incident Reports in accordance with any changes to part 225 finalized in this rulemaking.²

III. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this NPRM under E.O. 12866 (58 FR 51735, Oct. 4, 1993), Regulatory Planning and Review, and DOT Regulatory Policies and Procedures. The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866.

FRA analyzed the potential costs and benefits of this proposed rule. FRA concluded that this proposed rule may impart minimal additional burden on regulated entities, but overall would provide greater relief to railroads. Regulated entities may see a minimal increased burden to retain certain forms for an additional year under the proposed rule. However, those same entities would also see a decreased burden by other forms that have a shorter retention period (three years instead of five years). FRA expects any potential additional burden to be outweighed by the benefits of this NPRM, and therefore estimates the proposed rule to be overall cost beneficial. Because this proposed rule would retire two FRA Forms and change the retention period under § 225.27(a), this proposed rule would provide qualitative benefits by requiring regulated entities to fill out fewer forms and require less storage and retention. This rule will also provide flexibility by clarifying, simplifying, and updating the language of part 225.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192 (90 FR 9065, Jan. 31, 2025), Unleashing Prosperity Through Deregulation, requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”³ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.⁴

An E.O. 14192 deregulatory action is defined as “an action that has been

³ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067 (Feb. 6, 2025).

⁴ Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. March 26, 2025.

² <https://railroads.dot.gov/elibrary/fra-guide-preparing-accidentincident-reports-0>.

¹ 67 FR 63022, 63031 (Oct. 9, 2002).

finalized and has total costs less than zero.” This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA affirms that each amendment proposed in this NPRM has a cost that is negligible or “less than zero” consistent with E.O. 14192, FRA requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,⁵ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule may impart minimal additional burden under part 225, but overall would provide greater relief to railroads. This proposed rule offers flexibilities that would result in cost savings. By extending this regulatory relief, small regulated entities, including small entities, would experience a cost savings. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or

governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

This proposed rule offers regulatory flexibilities, and there are no new collection of information requirements contained in this proposed rule, in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The recordkeeping and reporting requirements already contained in part 225 were approved by the Office of Management and Budget (OMB) on December 5, 2023, and the information collection requirements thereby became effective when they were approved by OMB. The OMB approval number is 2130–0500, and OMB approval expires on December 31, 2026. However, this proposed rule will decrease the paperwork burden in 49 CFR part 225 by retiring Form 6180.107 and Form 6180.150. All other paperwork requirements within part 225 remain the same. By removing this reporting and recordkeeping requirement, the currently approved total burden of 30,284 hours will decrease by 904 hours for a revised estimate of 29,380 hours.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This proposed rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”⁶ FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁷ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without

⁵ Public Law 104–121, 110 Stat. 857 (Mar. 29, 1996).

⁷ 19 U.S.C. Ch. 13.

edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL-14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at [regulations.gov](http://www.regulations.gov), Docket No. FRA-2025-0124, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 225

Investigations, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend part 225 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

- 1. The authority citation for part 225 continues to read as follows:

Authority: 49 U.S.C. 103, 322(a), 20103, 20107, 20901-20902, 21301, 21302, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

- 2. Revise § 225.3(b) introductory text to read as follows:

§ 225.3 Applicability.

* * * * *

(b) The Internal Control Plan requirements in § 225.33(a)(3) through (a)(10) do not apply to:

* * * * *

- 3. Remove § 225.21(j) and (k).

- 4. Remove § 225.25(i) and (j).

- 5. Revise § 225.27(a) to read as follows:

§ 225.27 Retention of records.

(a) Each railroad shall retain all of the following records for at least three years after the end of the calendar year to which they relate:

(1) Form FRA F 6180.98, "Railroad Employee Injury and/or Illness Record."

(2) Monthly List of Injuries and Illnesses required by § 225.25.

(3) Form FRA F 6180.97, "Initial Rail Equipment Accident/Incident Record," required by § 225.25.

(4) The Employee Human Factor Attachments (Form FRA F 6180.81, "Employee Human Factor Attachment")

required by § 225.12, that have been received by the railroad.

(5) The written notices to employees required by § 225.12 (Part I of Form FRA F 6180.78, "Notice to Railroad Employee Involved in Rail Equipment Accident/Incident Attributed to Employee Human Factor; Employee Statement Supplementing Railroad Accident Report"), that have been received by the railroad.

(6) The employee statements supplementing railroad accident reports described in § 225.12(g) (Part II of Form FRA F 6180.78, "Notice to Railroad Employee Involved in Rail Equipment Accident/Incident Attributed to Employee Human Factor; Employee Statement Supplementing Railroad Accident Report"), that have been received by the railroad.

* * * * *

- 6. Remove § 225.33(a)(11).

- 7. Revise § 225.35(b) to read as follows:

§ 225.35 Access to records and reports.

* * * * *

(b) Each railroad subject to this part shall also provide to any representative of the Federal Railroad Administration or of a State agency participating in investigative and surveillance activities under part 212 of this chapter or any other authorized representative access to relevant medical and claims records for examination and photocopying in a reasonable manner during normal business hours. Such representatives shall display proper credentials when requested. Each railroad shall identify the locations where a copy of any record and report required under this part is accessible for inspection and photocopying by maintaining a list of such establishment locations at the office where the railroad's reporting officer conducts his or her official business. A copy of any record and report required under this part shall be accessible within four business hours after the request. FRA will not assess a monetary penalty against the railroad for its failure to provide the requested documentation when circumstances outside the railroad's control preclude it from fulfilling the four-business-hour time limit and the railroad has made a reasonable effort to correct the problem. Should a railroad assert a legal privilege with respect to certain claims and medical records, failure to provide FRA access to such records would not constitute a violation of this section. FRA retains the right to issue a subpoena to obtain such records under 49 U.S.C. §§ 20107 and 20902 and §§ 209.7(a) and 225.31(a)(2) of this title,

and the railroad may contest that subpoena.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 225

[Docket No. FRA-2025-0123]

RIN 2130-AD58

Miscellaneous Amendments to FRA's Accident Reporting Regulations

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This proposed rule would make various miscellaneous amendments to FRA's accident reporting regulations. Specifically, these amendments would promote submitting documents to FRA electronically, would eliminate redundant regulations, and would allow railroads with additional time to complete certain forms.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES:

Comments: Comments related to Docket No. FRA-2025-0123 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA-2025-0123), and Regulatory Identification Number (RIN) for this rulemaking (2130-AD58). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT:

Michael Wissman, Railroad Safety Specialist, Part 225, Federal Railroad Administration, telephone: 610-314-5729, email: michael.wissman@dot.gov; or Michael C. Spinnicchia, Attorney Adviser, Federal Railroad Administration, telephone: 202-713-7671, email: michael.spinnicchia@dot.gov.

SUPPLEMENTARY INFORMATION:**I. Background**

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of Title 49, Code of Federal Regulations (CFR). The requirements for FRA-regulated entities to report accidents and incidents meeting certain criteria are established in 49 CFR part 225, "Railroad Accidents/Incidents: Reports Classification, and Investigations" (Part 225). Some of the requirements contained in part 225 could be updated to reduce burdens, make technical or conforming changes, or otherwise adjust to advancing technology without any adverse effect on railroad safety. Please review the SECTION-BY-SECTION ANALYSIS below for the relevant information related to each proposed change.

II. Section-by-Section Analysis*Section 225.5 Definitions*

Part 225 currently contains separate definitions of "railroad" and "railroad carrier" even though this section states that "railroad" means a railroad carrier and "railroad carrier" means a person providing railroad transportation. Since these two definitions are duplicative, FRA is proposing revising the definition of "railroad" to "a person providing railroad transportation" and removing the definition of "railroad carrier." Also, since the definition of "highway-rail grade crossing" references "railroad carrier," FRA is proposing removing the word "carrier" from that definition. Lastly, the definition of "privacy concern case" appears before the definition of "person." FRA is proposing switching the order of these two definitions so that they are in alphabetical order.

Section 225.6 Consolidated Reporting

FRA proposes to reorganize this section to make it more readable for regulated entities. FRA is also proposing several substantive changes to this

section in the interest of efficiency. First, FRA proposes to add paragraph (b)(2) which lists eight factors that railroads should address in their consolidated reporting requests. These are the factors that FRA currently considers when deciding whether to grant such requests. Listing these factors in this section would better inform railroads of what information they should include in their requests. Thus, this proposed change would assist railroads in drafting more well-organized requests and would make it less likely that FRA would have to ask the railroad for additional information. While a railroad does not necessarily have to prove that all eight factors are present for FRA to grant a request, railroads should be aware that the most important factor in FRA's determination is listed in proposed paragraph (b)(2)(i) (whether all of the properties are physically connected and by what means).

Next, paragraph (c) proposes that railroads submit their consolidated reporting requests to FRA via email instead of by mail. The last substantive proposed change is in paragraph (d), which proposes reducing FRA's review period for these requests from 90 days to 60 days. Proposed paragraph (d) notes that FRA's 60-day deadline will be tolled while the agency is waiting for any additional information it requests from the railroad.

Section 225.7 Use of Reports

FRA proposes removing paragraph (a) of this section, as it is redundant of DOT's regulations related to the Freedom of Information Act in 49 CFR part 7. The continued inclusion of paragraph (a) in this section unnecessarily risks confusion. Since this section would no longer address "public examination," FRA proposes renaming this section title to "Use of reports." Lastly, FRA proposes to retain the text of paragraph (b) of this section but would remove the paragraph designation and would instead be the only text found in § 225.7.

Section 225.12 Rail Equipment Accident/Incident Reports Alleging Employee Human Factor as Cause; Employee Human Factor Attachment; Notice to Employee; Employee Supplement

FRA proposes revising paragraph (h)(2) of this section to remove the fixed \$5,000 fine amount and instead state that such persons be subject to a fine under title 18 of the U.S. code.

Section 225.13 Late Reports

FRA proposes revising this section to instruct railroads to submit their late reports via email.

Section 225.25 Recordkeeping

FRA proposes revising paragraph (f) of this section to allow railroads 15 calendar days (instead of 7 working days) to enter each reportable and accountable injury and illness and each reportable and accountable rail equipment accident/incident on the appropriate record as required by § 225.25(a)-(e). This proposed change would give railroads additional time to ensure the accuracy of the information on these forms.

Lastly, FRA will revise the FRA Guide for Preparing Accident/Incident Reports in accordance with any changes to part 225 finalized in this rulemaking.¹

III. Regulatory Impact and Notices*A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures*

FRA has considered the impact of this NPRM under E.O. 12866 (58 FR 51735, Oct. 4, 1993), Regulatory Planning and Review, and DOT Regulatory Policies and Procedures. The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866.

FRA analyzed the potential costs and benefits of this proposed rule. Because this proposed rule makes administrative changes such as revising definitions, allowing railroads to submit information to FRA electronically, and lists suggesting factors to be included in consolidated reporting requests, this final rule imparts minimal to no additional burdens on regulated entities. Moreover, this proposed rule would provide some qualitative benefits to regulated entities and the U.S. government by clarifying, simplifying, and updating the language of part 225. This rule would also provide flexibility to regulated entities by increasing the time given to railroads for completing certain forms from 7 working days to 15 calendar days. Additionally, this rule would expedite the speed at which documents are delivered while reducing costs that would otherwise exist from having to physically print, mail, and process documents.

¹ <https://railroads.dot.gov/elibrary/fra-guide-preparing-accidentincident-reports-0>.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192 (90 FR 9065, Jan. 31, 2025), Unleashing Prosperity Through Deregulation, requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”² Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, March 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.³

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA affirms that each amendment proposed in this NPRM has a cost that is negligible or “less than zero” consistent with E.O. 14192, FRA still requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,⁴ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a

substantial number of small entities. This proposed rule may impart minimal additional burden under part 225, but overall would provide greater relief to railroads. This proposed rule offers flexibilities that would result in cost savings. By extending this regulatory relief, many regulated entities, including small entities, would experience a cost savings. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

This proposed rule offers regulatory flexibilities, and there are no new collection of information requirements contained in this proposed rule, in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The recordkeeping and reporting requirements already contained in part 225 were approved by the Office of Management and Budget (OMB) on December 5, 2023, and the information collection requirements thereby became effective when they were approved by OMB. The OMB approval number is 2130–0500, and OMB approval expires on December 31, 2026.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This proposed rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”⁵ FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁶ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where

appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL-14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at [regulations.gov](http://www.regulations.gov), Docket No. FRA-2025-0123, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 225

Investigations, Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend part 225 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 225—RAILROAD ACCIDENTS/ INCIDENTS: REPORTS CLASSIFICATION, AND INVESTIGATIONS

■ 1. The authority citation for part 225 continues to read as follows:

Authority: 49 U.S.C. 103, 322(a), 20103, 20107, 20901–20902, 21301, 21302, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Revise § 225.5 by putting the definition for “privacy concern case” after the definition of “person,” removing the word “carrier” from paragraph (2) under the definition of “highway-rail grade crossing,” removing the definition of “railroad carrier,” and revising the definition of “railroad” to read as follows:

§ 225.5 Definitions.

* * * * *

Railroad means a person providing railroad transportation.

* * * * *

■ 3. Revise § 225.6 to read as follows:

§ 225.6 Consolidated reporting.

(a) A parent corporation may request in writing that FRA treat its commonly controlled railroads, which operate as a single, seamless, integrated United States rail system, as a single railroad for purposes of this part.

(b) The written request must include all of the following:

(1) A list of the subsidiary railroads controlled by the parent corporation.

(2) An explanation as to how the subsidiary railroads operate as a single, seamless, integrated United States railroad system as opposed to separate and independent entities. This explanation should address factors such as:

(i) Whether all of the properties are physically connected, and by what means (*i.e.*, is the track contiguous, are the properties connected by track rights);

(ii) Whether the parent and its subsidiaries are held out to the public as a single entity;

(iii) Whether the parent is involved in the decision-making of its subsidiaries, and to what extent;

(iv) Whether the parent and/or subsidiaries share officers, equipment, and/or other personnel;

(v) Whether the operation of trains and crews are seamless, as trains and crews move over various properties with most employees unaware that they have changed property owners;

(vi) Whether there is a single set of operating rules over all of the properties (there may be different signal and train control systems);

(vii) Whether there is a single Internal Control Plan or a single reporting or claims officer; and

(viii) Whether there is a single dispatching center.

(3) Supporting evidence or documentation, to the extent reasonably practicable, to support the parent corporation's assertion that the subsidiary railroads operate as a single, seamless, integrated railroad system. If it is not practical to submit documentation for certain factors, the parent corporation should identify the location of the supporting evidence.

(4) A point of contact at the parent corporation and all subsidiary railroads to address agency questions related to the consolidated reporting petition.

(c) The request must be sent via email to RsisAiReports@dot.gov. Each request received shall be acknowledged in writing via email and shall contain the docket number assigned to the request.

(d) FRA will notify the applicant parent corporation of the agency's decision within 60 days of receipt of the application. This deadline will be tolled pending any FRA requests to the parent corporation or subsidiary railroads for missing or additional information needed for the agency to reach a decision.

(e) If FRA approves the request, the parent corporation must enter into a written agreement with FRA specifying which subsidiaries are included in its railroad system, agreeing to assume responsibility for compliance with this part for all named subsidiaries making up the system, and consenting to guarantee any monetary penalty assessments or other liabilities owed to the United States government that are incurred by the named subsidiaries for violating Federal accident/incident reporting requirements. Any change in the subsidiaries making up the railroad system requires immediate notification to FRA and execution of an amended agreement. Executed agreements will be published in the docket for the petition.

■ 4. Revise and republish § 225.7 to change the title to “Use of reports,” and remove paragraph (a), to read as follows:

§ 225.7 Use of reports.

49 U.S.C. 20903 provides that monthly reports filed by railroads under § 225.11 may not be admitted as evidence or used for any purpose in any action for damages growing out of any matters mentioned in these monthly reports. The Employee Human Factor Attachment, Notice, and Employee Supplement under § 225.12 are part of the reporting railroad's accident report to FRA pursuant to 49 U.S.C. 20901 and, as such, shall not “be admitted as evidence or used for any purpose in any suit or action for damages growing out of any matter mentioned in said report * * *.” 49 U.S.C. 20903.

■ 5. Revise § 225.12(h)(2) to read as follows:

§ 225.12 Rail Equipment Accident/Incident Reports alleging employee human factor as cause; Employee Human Factor Attachment; notice to employee; employee supplement.

* * * * *

(h) * * *

(2) Any person who knowingly and willfully files a false Supplement is subject to a fine under title 18 of the U.S. Code, imprisonment for up to two years, or both, in accordance with 49 U.S.C. 21311(a).

■ 6. In § 225.13, revise the first sentence to read as follows:

§ 225.13 Late reports.

Whenever a railroad discovers that a report of an accident/incident, through mistake or otherwise, has been improperly omitted from or improperly reported on its regular monthly accident/incident report, a report covering this accident/incident together with a letter of explanation must be submitted immediately by email to RsisAiReports@dot.gov.

* * * * *

■ 7. In § 225.25(f), replace “seven working days” with “15 calendar days”.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION**Federal Railroad Administration****49 CFR Part 229**

[Docket No. FRA–2025–0126]

RIN 2130–AD50

Expanding Certain Locomotive Wheel Set Diameter Variations

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: FRA proposes to amend its locomotive safety regulations to expand the maximum permitted variation in diameter for locomotive wheel sets using alternating current technology, in response to a Class I railroad’s May 2019 petition for rulemaking and innovations in traction motor control.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES:

Comments: Comments related to Docket No. FRA–2025–0126 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA–2025–0126), and Regulatory Identification Number (RIN) for this rulemaking (2130–AD50). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the

Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT: Gary Fairbanks, Staff Director, Motive Power & Equipment Division, Federal Railroad Administration, telephone: (202) 230–9594, email: gary.fairbanks@dot.gov; or Michael Masci, Attorney Adviser, Federal Railroad Administration, telephone: (202) 302–7177, email: michael.masci@dot.gov.

SUPPLEMENTARY INFORMATION:**I. Background**

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America’s economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR). Under 49 CFR part 229, *Railroad Locomotive Safety Standards*, FRA prescribes minimum Federal safety standards for all locomotives except those propelled by steam power. Some of the requirements contained in part 229 could be updated to reduce burdens, make technical or conforming changes, or otherwise adjust to advancing technology without any adverse effect on railroad safety. Please review the Section-by-Section Analysis below for the relevant information related to each proposed change.

II. Section-by-Section Analysis*Section 229.73 Wheel Sets*

FRA proposes to amend paragraph (b) of this section to expand the maximum permitted variation in diameter for locomotive wheel sets using alternating current (AC) technology. In May 2019, Union Pacific Railroad submitted a petition for rulemaking under 49 CFR part 209 on the basis that “[n]ew technology with individual axle control developed and placed in service after 1980 provides the basis for change which will result in better customer service through a reduction of locomotive out of service time and

increased wheel life without impacting safety.”¹

Generally, excessive wheel size variation is a safety concern due to the potential impact on wheel slip and truck dynamics. For older locomotives equipped with direct current (DC) traction motors, excessive wheel size variation causes current imbalance and triggers wheel slip corrections, including unnecessary sanding, removing tractive effort, and removing power. These corrections can have adverse effects on the equipment and efficiency of operations but are necessary to prevent more serious safety hazards like damage to the rail. Newer locomotives equipped with AC traction motors utilize single axle control technology to apply voltage and control current more precisely to each wheel set based on operating conditions. As such, the AC traction motors function as an independent wheel slip correction system that do not use wheel size variation as a trigger for correction.

Despite the improvements to prevent wheel slip, wheel sets on locomotives equipped with AC traction motors still need to minimize wheel size variation to help maintain proper truck dynamics. Excessive wheel size variation can decrease the effectiveness of weight distribution from corresponding trucks, and the trucks’ inability to help absorb the impact of a shifting load could lead to a derailment.

Existing paragraph (b) of § 229.73 specifies that the maximum variation in the diameter between any two wheel sets on different trucks on a locomotive that has three-powered-axle trucks may not exceed 1¼ inches. FRA proposes to separate the existing requirement in current paragraph (b) into new paragraphs (b)(1)(i) and (b)(1)(ii), generally continuing the current 1¼ inch maximum variation for wheel sets on older locomotives equipped with DC traction motors. FRA proposes to add a new paragraph (b)(2)(i), generally allowing a 1½ inch maximum variation for wheel sets on newer locomotives equipped with AC traction motors that utilize single axle control. Proposed new paragraph (b)(2)(ii) would eliminate the wheel set variation requirement of this section for wheel sets on non-powered axles on locomotives equipped with AC traction motors that utilize single axle control because FRA does not expect wheel variation to have a significant impact on truck dynamics in that case. FRA expects this proposal would better

¹ UP’s petition for rulemaking is available in Docket No. FRA–2025–0126 on <https://www.regulations.gov>.

accommodate new technology and maintain current levels of safety.

III. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this proposed rule under E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866. This proposed rule would amend FRA's locomotive safety regulations to expand the maximum permitted variation in diameter for wheel sets using alternating current technology.

FRA expects that this proposed rule would result in cost savings to the industry as it would increase a maximum threshold for certain locomotives under 49 CFR 229.73(b) due to innovations in traction motor control. This would, in turn, result in a reduction of locomotive out-of-service time and increased wheel life without impacting safety. The increased allowable variation would help reduce the regulatory burden on the railroad industry while maintaining proper truck dynamics.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”² Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.³

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule.

While FRA affirms that each amendment proposed in this NPRM has a cost that is negligible or “less than zero” consistent with E.O. 14192, FRA requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,⁴ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule would not have a significant economic impact on a substantial number of small entities. This proposed rule would not preclude small entities from continuing existing practices that comply with part 229; it merely offers flexibilities that could result in cost savings if a small entity or other regulated entity chooses to utilize those flexibilities. By extending this regulatory relief, many regulated entities, including small entities, would experience a cost savings. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

⁴ Public Law 104–121, 110 Stat. 857 (Mar. 29, 1996).

D. Paperwork Reduction Act

This proposed rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations, FRA has determined this undertaking has no potential to affect historic properties. FRA has also determined that this rulemaking does not approve a project resulting in a use of a resource protected by Section 4(f).

F. Federalism Implications

This proposed rule would not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use, 66 FR 28355 (May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant

² Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067 (Feb. 6, 2025).

³ Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

energy action.” FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments (Nov. 6, 2000). The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁵ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <https://www.regulations.gov>, as described in the system of records notice, DOT/ALL-14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at <https://www.regulations.gov>, Docket No. FRA-2025-0126, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 229

Penalties, Railroad safety, Reporting and recordkeeping requirements.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend part 229 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 229—RAILROAD LOCOMOTIVE SAFETY STANDARDS

■ 1. The authority citation for part 229 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20133, 20137–38, 20143, 20168, 20701–03, 21301–02, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Amend § 229.73 by revising paragraph (b) to read as follows:

§ 229.73 Wheel sets.

* * * * *

(b) The maximum variation in the diameter between any two wheel sets (the average diameter of the two wheels on an axle) shall not exceed the following:

(1) For wheel sets on locomotives equipped with direct current traction motors:

(i) Within the same three-powered-axle truck, $\frac{3}{4}$ inch, except that when shims are used at the journal box springs to compensate for wheel diameter variation, the maximum variation may not exceed $1\frac{1}{4}$ inches.

(ii) On different trucks on a locomotive that has three-powered-axle trucks, $1\frac{1}{4}$ inches.

(2) For wheel sets on locomotives equipped with alternating current traction motors that utilize individual truck or single axle control technology:

(i) Powered axles, $1\frac{1}{2}$ inches, with or without shims.

(ii) Non-powered axles in the middle of two powered axles, the restriction of $1\frac{1}{2}$ inches, with or without shims, does not apply.

* * * * *

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

[Docket No. FRA-2025-0130]

RIN 2130-AD24

Amendments to Brake System Maintenance and Inspection Requirements

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: FRA proposes to amend its mechanical equipment safety standards related to brake inspections for passenger and freight rail equipment. The proposed changes focus on the incorporation of longstanding waivers for locomotive brake system maintenance and inspection requirements. The amendments are consistent with the mandates of the Infrastructure Investment and Jobs Act (IIJA), which require FRA to review and analyze certain longstanding waivers to determine whether incorporating the waivers into FRA’s regulations is justified, and the Executive Order for Ensuring Lawful Governance and Implementing the President’s “Department of Government Efficiency” Deregulatory Initiative.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES:

Comments: Comments related to Docket No. FRA-2025-0130 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA-2025-0130), and Regulatory Identification Number (RIN) for this rulemaking (2130-AD24). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the

⁵ 19 U.S.C. ch. 13.

online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT: Gary Fairbanks, Supervisory Railroad Safety Specialist, FRA, telephone: (202) 230-9594, email: Gary.Fairbanks@dot.gov; or James Mecone, Attorney Adviser, FRA, telephone: (202) 380-5324, email: James.Mecone@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR). Some of the requirements contained in 49 CFR parts 229, 232, and 238 could be updated to reduce burdens, make technical or conforming changes, or otherwise adjust to advancing technology without any adverse effect on railroad safety. The amendments proposed in this NPRM would codify certain waivers to make permanent the safety benefits of these waivers and eliminate uncertainty about potential extensions. The codification of these waivers would also eliminate the need for railroads to submit waiver petitions (and repeated extensions of those waivers every five years) from the various applicable regulations and FRA's review and approval burden for the waiver petitions and extension requests. Please review the Section-by-Section Analysis below for the relevant information related to each proposed change.

II. Section-by-Section Analysis

PART 229—LOCOMOTIVE SAFETY STANDARDS

Section 229.29 Air Brake System Calibration, Maintenance, and Testing

This section currently provides requirements for periodic calibration, maintenance, and testing of locomotive air brake systems. FRA proposes to extend brake equipment service life and maintenance intervals for periodic cleaning, repairing, and testing of air brake equipment, based on extensive industry and FRA experience implementing test waivers. For industry convenience and clarity, FRA also proposes to improve consistency between passenger locomotive standards located in parts 229 and 238, by reorganizing and restating certain requirements. FRA recognizes that some equipment on passenger railroads must

comply with both §§ 229.29 and 238.309, which currently require the same brake maintenance, but are expressed differently. FRA's proposal includes editorial changes to match terms and definitions in both parts 229 and 238.

FRA proposes to remove existing paragraph (b) of this section and combine its requirements with those in § 232.205(c)(1)(iii) for clarity and ease of reference. As discussed in the analysis of § 232.205(c)(1)(iii) below, FRA is proposing to revise the requirements to account for the use of digital air flow method (AFM) indicators. Part 232 already includes the use of digital AFMs as an acceptable option for conducting a brake test.¹ Additionally, FRA proposes to remove existing paragraph (g)(1) requiring that the date of AFM indicator calibration be recorded on form FRA F 6180-49A (the blue card). This requirement is already codified at 49 CFR 232.205(c)(1)(iv).

With the removal of existing paragraph (b), FRA proposes to redesignate existing paragraph (c) as paragraph (b) and to revise new paragraph (b)(1) to account for the use of electronic air brake (EAB) control valves. This revision effectively codifies a condition of the longstanding waiver in Docket Number FRA-2005-21613.

The longstanding waiver in Docket Number FRA-2005-21613 involves locomotive EAB systems manufactured by New York Air Brake (NYAB) (CCB-1, CCB-2, and CCB-26), and Wabtec (EPIC 3102D2, EPIC 2, and FastBrake). Approximately 17,000 locomotives in the U.S. (over half the U.S. locomotive operating fleet) and approximately 70 percent of the Class I operating fleet are equipped with these types of brakes. These brake systems electronically control the pneumatic brakes on freight locomotives. During the course of this waiver, the test committee overseeing implementation of the relief concluded that the periodic inspection period interval for these brake systems could be extended from 1,472 days to 3,680 days.²

FRA proposes to redesignate paragraphs (d) as paragraph (c), and to redesignate paragraph (e) as paragraph (c).

FRA proposes to revise redesignated paragraph (e) to update the intervals and be consistent with the language in § 238.309(b). First, FRA proposes to revise the reference to "26 L or equivalent brake system" in paragraph

(e)(1) to a full listing of all 26 type brake systems and to generally identify those brake systems as "26 type brake systems." Consistent with that change, FRA proposes to revise the reference to 26 L or equivalent brake systems in paragraph (e)(2) to "26 type brake systems."

FRA proposes to revise redesignated paragraph (e)(3) to remove the references to brake systems subject to longstanding age exploration waivers.

FRA proposes to add new paragraphs (e)(4) through (6) to incorporate the results of age exploration waiver in docket number FRA-2005-21613.

FRA proposes to add new paragraphs (f) and (g) to incorporate specific conditions of the waiver in docket number FRA-2005-21613. These paragraphs would require maintenance of the critical components of the brake systems designed to control contaminants to ensure the effectiveness of those systems throughout the inspection cycle.

Finally, FRA proposes to redesignate paragraph (g) as paragraph (h). Specifically, FRA proposes to redesignate paragraph (g)(2) as paragraph (h)(1), and to redesignate paragraph (g)(3) as paragraph (h)(2) and modify redesignated paragraph (h)(2) with the provision for a unique employee identifier to permit the use of electronic signature of required records. As described above, FRA proposes to remove existing paragraph (g)(1) requiring a record of the AFM indicator calibration date on form FRA F 6180-49A (the blue card) because this requirement is already codified at 49 CFR 232.205(c)(1)(iv).

PART 232—BRAKE SYSTEM SAFETY STANDARDS FOR FREIGHT AND OTHER NON-PASSENGER TRAINS AND EQUIPMENT; END-OF-TRAIN DEVICES

Section 232.205 Class I Brake Test-Initial Terminal Inspection

As noted above, FRA is proposing to combine the requirements of existing paragraph (b) of § 229.29 with those of paragraph (c)(1)(iii) of this section. Specifically, FRA proposes to revise paragraph (c)(1)(iii) to address the use of digital AFM indicators. The existing regulation governs the use and calibration of standalone analog mechanical AFM indicators, but, recognizing the self-diagnostic capabilities of these digital devices, a longstanding FRA test waiver extended the calibration interval to 184 days.³

¹ § 232.205(c)(1)(ii).

² See <https://www.regulations.gov/document/FRA-2005-21613-0129>. There are no comments in opposition to the relief in this docket.

³ Docket Number FRA-2016-0086.

This has resulted in 98 percent of AFM devices remaining in calibration for each day of the 184-day interval without attention (as compared to 78 percent remaining in calibration prior to the waiver).

PART 238—PASSENGER EQUIPMENT SAFETY STANDARDS

Section 238.307 Periodic Mechanical Inspection of Passenger Cars and Unpowered Vehicles Used in Passenger Trains

FRA proposes to add paragraph (d)(4) to require the execution and passing of a self-test of all EAB systems as part of the 368-day periodic mechanical inspection. This requirement is intended to make paragraph (d)(4) consistent with a similar requirement to perform the self-test on EAB systems at the level one inspection for locomotives at § 229.29(b)(1) and effectively codifies the requirements of the longstanding waiver in Docket No. FRA–2005–21613.

Section 238.309 Periodic Brake Equipment Maintenance

FRA proposes to extend brake equipment service life and maintenance intervals for periodic cleaning, repairing, and testing of air brake equipment, based on extensive industry and FRA experience implementing test waivers. For industry convenience and clarity, FRA also proposes to improve harmonization between passenger locomotive standards located in 49 CFR parts 229 and 238, by reorganizing and restating certain requirements. FRA recognizes that some equipment on passenger railroads must comply with both § 229.29, Air brake system calibration, maintenance, and testing, and § 238.309, which collectively require the same brake maintenance but are expressed differently. Accordingly, FRA proposes reordering the requirements in § 238.309 within each type of equipment category, in chronological order, by length of service period, and also proposes replacing the word “every” with the phrase “at intervals that do not exceed” to match the language in § 229.29. These changes would clarify the period of performance or maintenance governed by § 238.309.

Additionally, in § 238.309, FRA uses the term “fleet” regarding whether equipment is (or is not) equipped with air dryers. FRA considers a “fleet” to be a group of equipment that operates independently of other groups of equipment on a railroad. Typically, this equipment is operated interchangeably and maintained uniformly within its group, but not operated with equipment outside of the group. Testing on the EAB

valves specified in this proposed section has shown that recently designed brake systems have sufficient internal filtration and engineering design to withstand operation without air dryers, and be safe and suitable for service during intervals between the proposed inspections. Older air brake equipment may use metallic piston rings, brass-on-brass slide valves, and older filtration schemes that have not proven to withstand non-dryer treated air for extended use. Therefore, FRA proposes to continue its two-tiered approach to the use of air dryers for older air brake systems and require separate operation of fleets if a railroad desires to utilize the longer maintenance period for older equipment fitted with air dryers.

For DMU and MU locomotives, FRA proposes to move present paragraph (b)(2) to new paragraph (b)(3) with modifications. Modified (b)(2) would retain the 1,104-day⁴ inspection frequency but be assigned to only brake systems not listed in new paragraphs (b)(3) through (b)(7) that are for brake systems that are air dryer equipped.

New paragraph (b)(3) would make DMU and MU locomotive air brake requirements consistent with the freight locomotive requirements found at existing § 229.29(f)(2) (proposed to be redesignated as (e)(2)). As such, all of these different types of locomotives equipped with 26-type brake equipment with air dryers, would be permitted 1,472 days between inspections.

Proposed new paragraphs (b)(4) through (7) would incorporate the findings of AAR’s 2005 test waiver for the service life extension of EABs. See Docket No. FRA–2005–21613. While the principal investigations for the service life extension were conducted by freight railroads in cooperation with manufacturers of EABs and interested parties, in 2013 the American Public Transportation Association petitioned and received relief for consistency of passenger locomotives and cab cars equipped with EABs with the requirements of proposed § 229.29(e)(4)–(6), therefore “piggybacking” on Docket no. FRA–2005–21613. See FRA–2007–28306–0011. FRA is proposing to move current paragraph (b)(3) to paragraph (b)(4) and modify it by the addition of EPIC 1 (formerly EPIC 3102) to the list of brake systems permitted 1,840 days between

cleaning, repair, and test, to be consistent with the requirement of § 229.29. As explained regarding EAB valves, FRA is also proposing deleting the requirement for air dryers for the brake systems listed in paragraph (b)(4). The reference to KBC’s “KBCT1” is being removed from this paragraph and placed in paragraph (b)(7) as “CT–1.”

In 2004, Long Island Rail Road (LIRR) and Metro-North Commuter Railroad (MNCR) petitioned and were granted a waiver of compliance from FRA for age exploration of the KBC CT–1 air brake for their fleets of M–7 MU locomotives to extend time intervals between brake maintenance cycles beyond the five years (1,840 days) required in § 238.309 (Docket No. FRA–2004–17099). After completing 12 years of thorough testing and component evaluation, the waiver test committee recommended a 10-year (3,680-day) interval for cleaning, repair, and test. The LIRR (836 cars) and the MNCR (336 cars) M–7 fleets entered revenue service between 2002 and 2007.

In 2013, FRA granted MNCR’s petition to add its M–8 fleet (405 units) identified as a KBC CT–1a air brake system to Docket No. FRA–2004–17099. FRA concurred that the similar components of the KBC CT–1a system are considered to have the same life expectancy as the KBC CT–1 system. Based on its analysis of the LIRR/MNCR data and the overall fleet brake system reliability and safety performance, the waiver test committee recommended approval for a 10-year (3,680-day) clean, oil, test, and stencil (COT&S) interval for the KBC CT–1 family of brake systems. FRA proposes to incorporate the results of this test waiver in proposed paragraph (b)(7).

FRA also proposes to codify the remaining EABs that were investigated under Docket No. FRA–2005–21613 to make this section consistent with proposed revisions to § 229.29. FRA proposes to add paragraph (b)(5) to permit 2,944-day intervals between brake maintenance for DMU or MU locomotives equipped with EPIC 3102(D2) or EPIC 2 brake systems. FRA proposes to add paragraph (b)(6) to permit 3,128-day intervals between brake maintenance for DMU or MU locomotives equipped with CCB–1 brake systems. FRA proposes to add paragraph (b)(7) to permit 3,680-day intervals between brake maintenance for DMU or MU locomotives equipped with CCB–2, CCB–26, or FastBrake electronic air brake systems, as specified in Docket No. FRA–2005–21613, and to permit the of the CT–1 brake system as specified in Docket No. FRA–2004–17099.

For passenger coaches and other unpowered passenger vehicles, FRA

⁴ Since publication of the revised Railroad Locomotive Safety Standards final rule in 1980, FRA has typically expressed periodic inspections for all railroad equipment in multiples of 92-day quarters, which allows for clarity in calculating service days without concern for variances in the number of days in a calendar month (28 to 31 days) in making calculations.

proposes to exchange paragraphs (d)(1) and (3) to arrange the paragraphs in chronological order, and to change the brake system reference in new paragraph (d)(1) to “brake system not specifically identified” to provide consistency with § 229.29 and to reflect that 1,104 days is the default interval for brake systems not otherwise noted in paragraph (d). The interval in paragraph (d)(2) is being changed from 1,476 days to 1,472 days to correct a long-standing typographical error and conform with FRA’s method for calculating periodic inspection dates.

Proposed paragraph (d)(3) would address AB-type brake systems used on passenger equipment (currently in paragraph (d)(1)), and the interval between required brake maintenance would remain 2,208 days.

For cab cars, FRA proposes to reorder paragraph (e) to arrange the requirements in chronological order, and to change the brake system reference to “brake system not specifically identified” in new paragraph (e)(1) (currently (e)(4)), to provide consistency with § 229.29. In paragraph (e)(2), FRA proposes the same conforming change from “1,476 days” to “1,472 days,” as discussed above, and current paragraph (e)(3) would be removed. Splitting of the intervals between 26–C “under floor” equipment and 26–L control cab equipment, as in current paragraph (e)(2) and (3), would no longer be required due to the proposed parity of treatment of all 26-type brake valves in part 238 and part 229. Proposed (e)(3), which is current (e)(1), would specify the 1,840-day brake interval equipment requirements. Proposed new paragraphs (e)(4) through (6) would codify the provisions of EAB test waivers under Docket Nos. FRA–2005–21613 and FRA–2007–28306 for the brake maintenance intervals.

Similar to proposed paragraphs (f) and (g) for § 229.29 described above, proposed paragraphs (f) and (g) would provide for the maintenance of automatic drain valves and air dryers, and air compressors (with an emphasis on elimination of oil contamination). These paragraphs are identical to two general conditions of the test waiver at Docket No. FRA–2005–21613,⁵ and are considered essential elements to the success of the test waiver. These paragraphs require maintenance of the critical components of the brake systems designed to control contaminants to ensure the effectiveness of those

systems throughout the inspection cycle.

FRA proposes to redesignate paragraph (f) as new paragraph (h) and modify new paragraph (h)(1) with the provision for a unique employee identifier to permit the use of electronic signature of required records.

III. Regulatory Impact and Notices

A. Executive Orders (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this NPRM under E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866. FRA is proposing to incorporate longstanding waivers for locomotive and passenger equipment brake system maintenance and inspection requirements.

FRA expects that this proposed rule would result in cost savings to the industry as it would codify mostly longstanding waivers and save railroads the need to submit waiver petitions (and repeated extensions of those waivers every five years) to FRA for continued relief of various applicable regulations and the Federal Government’s review and approval burden for the waiver petitions and extension requests. In instances where a current waiver may not be longstanding, FRA estimates the cost savings would be greater since a railroad would now be granted additional time in between regulatory maintenance and inspection intervals. FRA also expects this proposed rule would provide clarity to railroads regarding regulatory maintenance and inspection requirements.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192 (90 FR 9065, Jan. 31, 2025), Unleashing Prosperity Through Deregulation, requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”⁶ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O.

14192 deregulatory action, and an E.O. 14192 regulatory action.⁷

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA is confident that each amendment proposed in this NPRM has a cost that is negligible or “less than zero” consistent with E.O. 14192, FRA requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,⁸ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule would not preclude small entities from continuing existing practices that comply with parts 229, 232, or 238; it merely offers flexibilities that would result in cost savings, if a small entity or other regulated entity chooses to utilize those flexibilities. By extending this regulatory relief, many regulated entities, including small entities, would experience a cost savings. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

⁷ Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. March 26, 2025.

⁸ Public Law 104–121, 110 Stat. 857 (Mar. 29, 1996).

⁶ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation.* 90 FR 9065–9067. Feb. 6, 2025.

⁵ See FRA–2005–21613–0088, “U.S. Dot/FRA—Decision,” conditions no. 6–7.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

This proposed rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.* With this NPRM, FRA will be using the OMB control numbers: 2130–0544, *Passenger Equipment Safety Standards*; 2130–0008, *Brake System Safety Standards for Freight and Other Non-Passenger Trains and Equipment*; and 2130–0004, *Railroad Locomotive Safety Standards and Event Recorders*.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations, FRA has determined this undertaking has no potential to affect historic properties. FRA has also determined that this rulemaking does not approve a project resulting in a use of a resource protected by Section 4(f).

F. Federalism Implications

This proposed rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10,

1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”⁹ FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979¹⁰ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

⁹ 66 FR 28355 (May 22, 2001).

¹⁰ 19 U.S.C. ch. 13.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL–14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at www.regulations.gov, Docket No. FRA–2025–0130, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 229

Locomotives, Railroad safety.

List of Subjects in 49 CFR Part 232

Power brakes, Railroad safety.

List of Subjects in 49 CFR Part 238

Passenger equipment, Railroad safety, Reporting and recordkeeping requirements.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend parts 229, 232, and 238 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 229—RAILROAD LOCOMOTIVE SAFETY STANDARDS

■ 1. The authority citation for part 229 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20133, 20137–38, 20143, 20168, 20701–03, 21301–02, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. Amend § 229.29 by revising paragraph (a), removing paragraph (b), redesignating paragraphs (c) through (f) as paragraphs (b) through (e) and revising newly redesignated paragraphs (b) through (e), redesignating paragraph (g) as paragraph (h) and revising newly redesignated paragraph (h), and adding new paragraphs (f) and (g) to read as follows:

§ 229.29 Air brake system calibration, maintenance, and testing.

(a) A locomotive's air brake system shall receive the calibration, maintenance, and testing as prescribed in this section. The level of maintenance and testing and the intervals for receiving such maintenance and testing of locomotives with various types of air brake systems shall be conducted in accordance with paragraphs (c) through (e) of this section. Records of the maintenance and testing required in this section shall be maintained in accordance with paragraph (h) of this section.

(b) Except for DMU or MU locomotives covered under § 238.309 of this chapter, the extent of air brake system maintenance and testing that is required on a locomotive shall be in accordance with the following levels:

(1) *Level one:* Locomotives shall have the filtering devices or dirt collectors located in the main reservoir supply line to the air brake system cleaned, repaired, or replaced. Locomotives equipped with electronic air brake (EAB) control valves, must execute and pass a self-test of the operational health of the brake system.

(2) *Level two:* Locomotives shall have the following components cleaned, repaired, and tested: brake cylinder relay valve portions; main reservoir safety valves; brake pipe vent valve portions; and, feed and reducing valve portions in the air brake system (including related dirt collectors and filters).

(3) *Level three:* Locomotives shall have the components identified in this paragraph removed from the locomotive and disassembled, cleaned and lubricated (if necessary), and tested. In addition, all parts of such components that can deteriorate within the inspection interval as defined in paragraphs (c) through (e) of this section shall be replaced and tested. The components include: all pneumatic components of the locomotive equipment's brake system that contain moving parts and are sealed against air leaks; all valves and valve portions; electric-pneumatic master controllers in the air brake system; and all air brake related filters and dirt collectors.

(c) Except for MU locomotives covered under § 238.309 of this chapter, all locomotives shall receive level one air brake maintenance and testing as described in this section at intervals that do not exceed 368 days.

(d) Locomotives equipped with an air brake system not specifically identified in paragraphs (e)(1) through (6) of this section shall receive level two air brake maintenance and testing as described in

this section at intervals that do not exceed 368 days and level three air brake maintenance and testing at intervals that do not exceed 736 days.

(e) Level two and level three air brake maintenance and testing shall be performed on each locomotive identified in this paragraph in accordance with the following:

(1) At intervals that do not exceed 1,104 days for a locomotive equipped with PS-68, 26-C, 26-L, PS-90, CS-1, RT-2, RT-5A, GRB-1, CS-2, or 26-R brake systems (26 type brake systems). (This listing of brake system types is intended to subsume all brake systems using 26 type, 6N, MC30, ABD, or ABDW control valves and PS68, PS-90, 26B-1, 26C, 26CE, 26-B1, 30CDW, or 30ECDW engineer's brake valves.);

(2) At intervals that do not exceed 1,472 days for locomotives equipped with an air dryer and a 26 type brake system and for locomotives not equipped with an air compressor and that are semi-permanently coupled and dedicated to locomotives with an air dryer;

(3) At intervals that do not exceed 1,840 days for locomotives equipped with KB-HL1, KB-HS1, or EPIC 1 (formerly EPIC 3102) brake systems;

(4) At intervals that do not exceed 2,944 days for locomotives equipped with EPIC 3102(D2) or EPIC 2 brake systems;

(5) At intervals that do not exceed 3,128 days for locomotives equipped with CCB-1 brake systems; or

(6) At intervals that do not exceed 3,680 days for locomotives equipped with CT-1, CCB-2, CCB-26, or FastBrake brake systems.

(f) All systems for the discharge or removal of moisture, such as automatic drain valves and air dryers, must be maintained to function as intended.

(g) The air compressor (if equipped) must be maintained to function as intended with emphasis on detection and elimination of oil contamination of the main reservoir air.

(h) Records of the air brake system maintenance and testing required by this section shall be generated and maintained in accordance with the following:

(1) The date and place of the cleaning, repairing and testing required by this section shall be recorded on Form FRA F 6180-49A, and the work shall be certified. A record of the parts of the air brake system that are cleaned, repaired, and tested shall be kept in the railroad's files or in the cab of the locomotive.

(2) At its option, a railroad may fragment the work required by this section. In that event, a separate record shall be maintained under a transparent

cover in the cab. The air record shall include: the locomotive number; a list of the air brake components; and the date and place of the inspection and testing of each component. The signature or unique employee identifier of the person performing the work and the signature or unique employee identifier of that person's supervisor shall be included for each component. A duplicate record shall be maintained in the railroad's files.

PART 232—BRAKE SYSTEM SAFETY STANDARDS FOR FREIGHT AND OTHER NON-PASSENGER TRAINS AND EQUIPMENT; END-OF-TRAIN DEVICES

■ 2. The Authority citation for part 232 continues to read as follows:

Authority: 49 U.S.C. 201012–20103, 20107, 20133, 20141, 20301–20303, 20306, 21301–20302, 21304; 28 U.S.C. 2461, note; and 49 CFR 1.89.

■ 4. Amend 232.5 by adding, in alphabetical order, the following definition:

§ 232.5 Definitions.

* * * * *

Electronic air brake (EAB) means a brake system controlled by a computer which provides the means for control of the locomotive brakes or train brakes or both.

* * * * *

■ 5. Revise § 232.205(c)(1)(iii) to read as follows:

§ 232.205 Class 1 brake test-initial terminal inspection.

* * * * *

(c) * * *

(1) * * *

(iii) An analog AFM indicator must be calibrated for accuracy at periodic intervals not to exceed 92 days. A digital AFM integrated into an EAB system must be calibrated for accuracy at periodic intervals not to exceed 184 days. The AFM indicator and all test orifices must be calibrated at temperatures of not less than 20 °F. AFM indicators must be accurate to within ±3 standard cubic feet per minute (CFM) at 60 CFM air flow.

* * * * *

PART 238—PASSENGER EQUIPMENT SAFETY STANDARDS

■ 6. The authority citation for part 238 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20133, 20141, 20302–20303, 20306, 20701–20702, 21301–21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 7. Amend 238.5 by adding, in alphabetical order, the following definition:

§ 238.5 Definitions.

* * * * *

Electronic air brake (EAB) means a brake system controlled by a computer which provides the means for control of the locomotive brakes or train brakes or both.

* * * * *

■ 8. Amend § 238.307 by revising paragraph (d) to read as follows:

§ 238.307 Periodic mechanical inspection of passenger cars and unpowered vehicles used in passenger trains.

* * * * *

(d) * * *

(4) For passenger equipment equipped with an EAB system, a self-test of the operational health of the brake system must be performed and successfully passed as part of the periodic mechanical inspection.

* * * * *

■ 9. Amend § 238.309 by revising paragraphs (b), (d), and (e), redesignating paragraph (f) as paragraph (h) and revising newly designated paragraph (h), and adding new paragraphs (f) and (g) to read as follows:

§ 238.309 Periodic brake equipment maintenance.

* * * * *

* * * * *

(b) *DMU and MU locomotives.* The brake equipment and brake cylinders of each DMU or MU locomotive shall be cleaned, repaired, and tested, and the filtering devices or dirt collectors located in the main reservoir supply line to the air brake system cleaned, repaired, or replaced in accordance with the following schedule:

(1) At intervals that do not exceed 736 days if the DMU or MU locomotive is part of a fleet that is not 100 percent equipped with air dryers;

(2) At intervals that do not exceed 1,104 days if the DMU or MU locomotive is part of a fleet that is 100 percent equipped with air dryers and is equipped with a brake system not listed in paragraphs (b)(3) through (7) of this section;

(3) At intervals that do not exceed 1,472 days if the DMU or MU locomotive is part of a fleet that is 100 percent equipped with air dryers and is equipped with PS-68, 26-C, 26-L, PS-90, CS-1, RT-2, RT-5A, GRB-1, CS-2, or 26-R brake systems (26 Type brake system). (This listing of brake system types is intended to subsume all brake

systems using 26 Type, 6N, MC30, ABD, or ABDW control valves and PS68, PS-90, 26B-1, 26C, 26CE, 26-B1, 30CDW, or 30ECDW engineer's brake valves.);

(4) At intervals that do not exceed 1,840 days if the DMU or MU locomotive is equipped with KB-HL1, KB-HS1, or EPIC 1 (formerly EPIC 3102) brake systems;

(5) At intervals that do not exceed 2,944 days if the DMU or MU locomotive is equipped with EPIC 3102(D2) or EPIC 2 brake systems;

(6) At intervals that do not exceed 3,128 days if the DMU or MU locomotive is equipped with CCB-1 brake systems; or

(7) At intervals that do not exceed 3,680 days if the DMU or MU locomotive is equipped with CT-1, CCB-2, CCB-26, or FastBrake brake systems.

* * * * *

(d) *Passenger coaches and other unpowered vehicles.* The brake equipment on each passenger coach and each unpowered vehicle used in a passenger train shall be cleaned, repaired, and tested in accordance with following schedule:

(1) At intervals that do not exceed 1,104 days for a coach or vehicle equipped with a brake system not specifically identified in paragraphs (d)(2) through (4) of this section;

(2) At intervals that do not exceed 1,472 days for a coach or vehicle equipped with a 26 Type listed in paragraph (b)(3) of this section or equivalent brake system;

(3) At intervals that do not exceed 2,208 days for a coach or vehicle equipped with an AB-type brake system;

(4) At intervals that do not exceed 2,944 days for a coach or vehicle equipped with EE-26 (26-C emulation brake system) or any locomotive electronic air brake (EAB) control valve listed in (b)(5) through (7) of this section when used for brake cylinder control only; or

(5) At intervals that do not exceed 3,680 days for a coach or vehicle equipped with EE-26 (26-C emulation brake system), or any locomotive electronic air brake (EAB) control valve listed in (b)(5) through (7) of this section when used for brake cylinder control only, and operated in a fleet where continuous brake operational health information is displayed to the train operator.

(e) *Cab cars.* The brake equipment of each cab car shall be cleaned, repaired, and tested in accordance with the following schedule:

(1) At intervals that do not exceed 736 days for all types of a cab car brake

system not specifically identified in paragraphs (e)(2) through (6) of this section;

(2) At intervals that do not exceed 1,472 days for a cab car brake system equipped with 26 Type brake valves listed in paragraph (b)(3) of this section;

(3) At intervals that do not exceed 1,840 days for a cab car brake system equipped with KB-HL1, KB-HS1, KB-CT1, or EPIC 1 (formerly EPIC 3102);

(4) At intervals that do not exceed 2,944 days for a cab car brake system equipped with EPIC 3102(D2) or EPIC 2 brake systems;

(5) At intervals that do not exceed 3,128 days for a cab car brake system equipped with CCB-1 brake systems; or

(6) At intervals that do not exceed 3,680 days for a cab car brake system equipped with CT-1, CCB-2, CCB-26, or FastBrake brake systems.

(f) *Moisture discharge or removal system maintenance.* Automatic drain valve and air dryer maintenance. All systems for the discharge or removal of moisture, such as automatic drain valves and air dryers, must be maintained to function as intended.

(g) *Air compressor maintenance.* The air compressor (if equipped) must be maintained to function as intended with emphasis on detection and elimination of oil contamination of the main reservoir air.

(h) *Records of periodic maintenance.*

(1) The date and place of the cleaning, repairing, and testing required by this section shall be recorded on Form FRA 6180-49A or a similar form developed by the railroad containing the same information, and the person performing the work and that person's supervisor shall sign or mark the form with a unique employee identifier, if possible. Alternatively, the railroad may stencil the vehicle with the date and place of the cleaning, repairing, and testing and maintain an electronic record of the person performing the work and that person's supervisor.

(2) A record of the parts of the air brake system that are cleaned, repaired, and tested shall be kept in the railroad's files, the cab of the locomotive, or a designated location in the passenger car until the next such periodic test is performed.

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION**Federal Railroad Administration****49 CFR Part 232**

[Docket No. FRA–2025–0127]

RIN 2130–AD51

Permitting Use of Virtual Simulation for Periodic Refresher Training on Brake Systems

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: FRA proposes to allow railroads to use three-dimensional virtual simulation to satisfy the hands-on portion of periodic refresher training under FRA's brake system training requirements, consistent with waivers FRA has granted to date. FRA has found that such virtual training provides employees with randomized scenarios that may not be readily available for hands-on training and real-time feedback on performance of duties.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES:

Comments: Comments related to Docket No. FRA–2025–0127 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA–2025–0127), and Regulatory Identification Number (RIN) for this rulemaking (2130–AD51). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT:

Lance Hawks, Human Performance Specialist, Safety Partnerships Division, Federal Railroad Administration, telephone: (678) 633–7400, email:

Lance.Hawks@dot.gov; or Jason Schlosberg, Attorney Adviser, Federal Railroad Administration, telephone: (202) 302–7218, email: Jason.Schlosberg@dot.gov.

SUPPLEMENTARY INFORMATION:**I. Background**

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR). Under 49 CFR part 232, FRA prescribes Federal safety standards for freight and other non-passenger train brake systems and equipment. Based on its review, FRA has preliminarily determined that periodic refresher training requirements in § 232.203(b)(8) could be updated to permit railroads to use three-dimensional virtual simulation to meet the hands-on portion of the refresher training requirement. Please review the Section-by-Section Analysis below for the relevant information related to FRA's proposed change.

II. Section-by-Section Analysis*Section 232.203 Training Requirements*

FRA proposes to amend paragraph (b)(8) of this section to permit railroads to use three-dimensional virtual simulation to meet the hands-on portion of the periodic refresher training requirement. This section generally requires railroads to adopt and comply with a training, qualification, and designation program for employees who perform brake system inspections, tests, or maintenance. Currently, paragraph (b)(8) of this section specifies, in part, that a railroad's program must require periodic refresher training that includes classroom and hands-on training. Paragraph (b)(8) further provides that observation and evaluation of actual performance of duties may be used to meet the hands-on training requirement.

FRA's proposal would amend paragraph (b)(8) specifically to include three-dimensional virtual simulation as another way to meet the hands-on refresher training requirement, in addition to observation and evaluation of actual performance of duties. This proposal is consistent with waivers FRA has granted to several Class I freight railroads to use three-dimensional virtual simulation to meet the hands-on

refresher training requirement.¹ FRA first granted this relief to BNSF Railway (BNSF) in 2012 in a waiver that allowed BNSF to use a three-dimensional virtual simulation using web-based and desktop software, called the Air Brake System Virtual Training Environment (ABSVTE), to satisfy the hands-on portion of the periodic refresher training requirement for train, yard, and engine service employees.² Since that time, BNSF reports having provided such virtual refresher training using ABSVTE in over 72,000 training events, representing training provided to over 25,000 employees. At the same time, BNSF's number of reportable brake-related defects has trended downward. FRA subsequently provided similar relief to the Norfolk Southern Railway (NS), CSX Transportation, Inc. (CSX), and the Canadian National Railway (CN).³

Different types of freight equipment move across the nation's rail network, freely interchangeable between railroads. As a result, FRA has found that three-dimensional virtual simulation provides employees with randomized scenarios on equipment types that may not otherwise be readily available for hands-on training, as well as allows for real-time feedback on employee performance of duties. Three-dimensional virtual simulation training may also provide for more consistent training across employees and reduce the risk of hazards or potential injury that may occur in a field training setting. Accordingly, FRA proposes to amend § 232.203(b)(8) to provide railroads the flexibility to use three-dimensional virtual simulation to meet the hands-on refresher training requirement.

III. Regulatory Impact and Notices*A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures*

FRA has considered the impact of this proposed rule under E.O. 12866, Regulatory Planning and Review (58 FR 51735, Oct. 4, 1993), and DOT Order 2100.6B, Policies and Procedures for Rulemaking (Mar. 10, 2025). The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866.

¹ See Docket Nos. FRA–2011–0074, FRA–2018–0100, FRA–2020–0008, and FRA–2020–0087 on www.regulations.gov.

² See <https://www.regulations.gov/document/FRA-2011-0074-0011>.

³ See Docket Nos. FRA–2018–0100 (NS); FRA–2020–0008 (CSX); and FRA–2020–0087 (CN) on www.regulations.gov.

FRA proposes to amend § 232.203(b)(8) to permit railroads to use three-dimensional virtual simulation to meet the hands-on refresher training requirement for employees who perform brake system inspections, tests, or maintenance.

FRA analyzed the potential costs and benefits of this proposed rule. This rule proposes to allow railroads to use three-dimensional virtual simulation to satisfy the hands-on portion of periodic refresher training for employees who perform brake system inspections, tests, or maintenance. This rule would provide some qualitative benefits as it would enable training to become more consistent across employees, provide an alternative method to satisfy the hands-on portion of the periodic refresher training requirement, reduce the risk of potential hazards or injury that may occur in a field training environment, and facilitate real-time feedback on performance of duties. This rule, if finalized as proposed, would result in cost savings. Railroads would no longer be required to submit waiver requests to be able to use virtual simulation for hands-on training under § 232.203(b)(8). In addition, all railroads, not just those granted a waiver, would have the flexibility to use three-dimensional virtual simulation to satisfy the hands-on portion of the periodic refresher training requirement.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, *Unleashing Prosperity Through Deregulation* (90 FR 9065, Jan. 31, 2025), requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”⁴ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.⁵

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA affirms that each

amendment proposed in this NPRM has a cost that is negligible or “less than zero” consistent with E.O. 14192, FRA requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,⁶ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule would not preclude small entities from continuing practices that comply with part 232; it merely offers flexibilities that could result in cost savings, if a small entity or other regulated entity chooses to utilize those flexibilities. By extending this regulatory relief, many regulated entities, including small entities, would experience a cost savings. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

⁶ Public Law 104–121, 110 Stat. 857 (Mar. 29, 1996).

D. Paperwork Reduction Act

This proposed rule offers regulatory flexibilities, and it contains no new information collection requirements under the Paperwork Reduction Act of 1995, 44 U.S.C. 3501, *et seq.* Therefore, an information collection submission to OMB is not required. The recordkeeping and reporting requirements already contained in part 232 became effective when it was approved by OMB on April 24, 2024. The OMB control number is 2130–0506, and the OMB approval expires on April 30, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations, FRA has determined this undertaking has no potential to affect historic properties. FRA has also determined that this rulemaking does not approve a project resulting in a use of a resource protected by Section 4(f).

F. Federalism Implications

This proposed rule would not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

⁴ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067 (Feb. 6, 2025).

⁵ Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

H. Energy Impact

E.O. 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use, 66 FR 28355 (May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments (Nov. 6, 2000). The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁷ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <https://www.regulations.gov>, as described in the system of records notice, DOT/ALL-14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely

comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at regulations.gov, Docket No. FRA-2025-0127, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 232

Penalties; Railroad safety; Reporting and recordkeeping requirements.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend part 232 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 232—BRAKE SYSTEM SAFETY STANDARDS FOR FREIGHT AND OTHER NON-PASSENGER TRAINS AND EQUIPMENT; END-OF-TRAIN DEVICES

- 1. The authority citation for part 232 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20107, 20133, 20141, 20301–20303, 20306, 21301–20302, 21304; 28 U.S.C. 2461, note; and 49 CFR 1.89.

- 2. Amend § 232.203 by revising the second sentence of paragraph (b)(8) to read as follows:

§ 232.203 Training requirements.

* * * * *

(b) * * *

(8) * * * Observation and evaluation of actual performance of duties or three-dimensional virtual simulation may be used to meet the “hands-on” portion of this requirement, provided that such testing or training is documented as required in paragraph (e) of this section; and

* * * * *

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 237

[Docket No. FRA–2025–0129]

RIN 2130–AD28

Repealing Certain Bridge Load Capacity Evaluation Requirements

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: FRA proposes to eliminate the Federal requirement that defines the process a track owner must follow when scheduling the evaluation of bridges with no load capacity determination. The requirement was intended as a transitional measure to phase in compliance after the bridge safety regulations became effective. The restrictions on the track owner’s discretion to determine the process for evaluation of bridge load capacity are no longer necessary because the regulations have been in effect for almost fifteen years and the transitional period for compliance has ended.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES: *Comments:* Comments related to Docket No. FRA–2025–0129 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA–2025–0129), and Regulatory Identification Number (RIN) for this rulemaking (2130–AD28). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT: Yu-Jiang Zhang, Staff Director, FRA Track & Structures Division, FRA, telephone:

⁷ 19 U.S.C. ch. 13.

(202) 570–1508, email: Yujiang.Zhang@dot.gov; or Veronica Chittim, Attorney Adviser, FRA, telephone: (202) 480–3410, email: Veronica.Chittim@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR). The requirements for FRA-regulated entities to schedule the evaluation of bridges without a load capacity determination are established in 49 CFR part 237, Bridge Safety Standards. Some of the requirements contained in part 237 could be updated to reduce burdens, make technical or conforming changes, or otherwise adjust to advancing technology without any adverse effect on railroad safety. The specific requirement proposed for elimination in this NPRM creates an unnecessary infringement upon a track owner's authority to evaluate bridge load capacity and perform activities related to bridge management. Please review the SECTION-BY-SECTION ANALYSIS below for the relevant information related to this proposed change.

II. Section-by-Section Analysis

Section 237.71 Determination of Bridge Load Capacities

This proposed rule would remove the requirement in paragraph (e) that defines the process a track owner must follow when scheduling the evaluation of bridges with no load capacity determination. The existing requirement imposes a restriction on a track owner's ability to establish a bridge management policy (BMP) and evaluate bridge load capacity as the track owner sees fit. The existing regulation requires that an initial determination of load capacity must be completed within five years of the BMP's adoption. At this time, no bridges¹ lack an initial load capacity determination, making this requirement obsolete. This requirement was intended as a transitional measure to phase in compliance after the bridge safety regulations became effective.

¹ At this time, the load rating for all applicable railroad bridges should have been captured by the implementation of a compliant BMP. FRA notes, however, that there may be instances where a railroad carrier has a BMP in place, but a load rating may not have been completed on one of numerous bridges covered by that BMP. FRA seeks comment on this assumption.

Removing this regulatory text would remove an obsolete provision from the CFR, improving readability of this CFR part.

III. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this NPRM under E.O. 12866 (58 FR 51735, Oct. 4, 1993), Regulatory Planning and Review, and DOT Regulatory Policies and Procedures. The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866. This proposed rule removes requirements that were originally put in place for a transition period, which has since expired.

FRA analyzed the potential costs and benefits of this proposed rule. Because this proposed rule would remove obsolete requirements, it imposes no additional burdens on regulated entities. Moreover, this rule would provide benefits, improving readability of this CFR part.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192 (90 FR 9065, Jan. 31, 2025), Unleashing Prosperity Through Deregulation, requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”² Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O. 14192 deregulatory action, and an E.O. 14192 regulatory action.³

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA affirms that the amendment proposed in this NPRM has a cost that is negligible or “less than zero” consistent with E.O. 14192, FRA still requests comment on the extent of the

cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,⁴ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule would not preclude small entities from continuing practices that comply with proposed part 237; it merely offers flexibilities to track owners with respect to bridge management and bridge load capacity determination that could result in benefits, if a small entity or other regulated entity chooses to utilize those flexibilities. By extending this regulatory relief, many regulated entities, including small entities, would experience benefits. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

⁴ Public Law 104–121, 110 Stat. 857 (Mar. 29, 1996).

² Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067 (Feb. 6, 2025).

³ Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.”* Memorandum M–25–20. Mar. 26, 2025.

D. Paperwork Reduction Act

This proposed rule offers regulatory flexibilities, and it contains no new information collection requirements, in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, therefore, an information collection submission to OMB is not required. The recordkeeping and reporting requirements contained in part 237 became effective when it was approved by OMB on February 27, 2023. The OMB control number is 2130–0586, and OMB approval expires on February 28, 2026.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking. Pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations, FRA has determined this undertaking has no potential to affect historic properties. FRA has also determined that this rulemaking does not approve a project resulting in a use of a resource protected by Section 4(f).

F. Federalism Implications

This proposed rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to

prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”⁵ FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁶ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards, and where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL–14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters

identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at [regulations.gov](https://www.regulations.gov), Docket No. FRA–2025–0129, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 237

Bridge safety, Railroad safety.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend part 237 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 237—BRIDGE SAFETY STANDARDS

■ 1. The authority citation for part 237 continues to read as follows:

Authority: 49 U.S.C. 20102–20114; 28 U.S.C. 2461 note; Div. A, Sec. 417, Pub. L. 110–432, 122 Stat. 4848; and 49 CFR 1.89.

■ 2. Amend § 237.71 by revising and republishing paragraphs (e) through (g) to read as follows:

§ 237.71 Determination of bridge load capacities.

* * * * *

(e) Where a bridge inspection reveals that, in the determination of the railroad bridge engineer, the condition of a bridge or a bridge component might adversely affect the ability of the bridge to carry the traffic being operated, a new capacity shall be determined.

(f) Bridge load capacity may be expressed in terms of numerical values related to a standard system of bridge loads, but shall in any case be stated in terms of weight and length of individual or combined cars and locomotives, for the use of transportation personnel.

(g) Bridge load capacity may be expressed in terms of both normal and maximum load conditions. Operation of equipment that produces forces greater than the normal capacity shall be subject to any restrictions or conditions that may be prescribed by a railroad bridge engineer.

Issued in Washington, DC.

[Docket No. FRA–2025–0132]

RIN 2130–AD60

Miscellaneous Revisions to the Qualification and Certification of Locomotive Engineers

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This proposed rule would update FRA's locomotive engineer certification requirements by reducing the information that is required on an engineer's certificate and allowing certificates to be electronic. FRA is also proposing changes to the certification revocation process and the Administrative Hearing Officer (AHO) process. Lastly, FRA is proposing other administrative updates including revising definitions and correcting errors in the regulatory text.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES:

Comments: Comments related to Docket No. FRA–2025–0132 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA–2025–0132), and Regulatory Identification Number (RIN) for this rulemaking (2130–AD60). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the

SUPPLEMENTARY INFORMATION section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT: Christian Holt, Staff Director-Operating Practices Division, Federal Railroad Administration, telephone: 202–366–

0978, email: christian.holt@dot.gov; or Michael C. Spinnicchia, Attorney Adviser, Federal Railroad Administration, telephone: 202–713–7671, email: michael.spinnicchia@dot.gov.

SUPPLEMENTARY INFORMATION:**I. Background**

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of Title 49, Code of Federal Regulations (CFR). The requirements for FRA-regulated entities to certify locomotive engineers are established in 49 CFR part 240, "Qualification and Certification of Locomotive Engineers." Some of the requirements contained in part 240 could be updated to reduce burdens, make technical or conforming changes, ensure due process and constitutionality, or otherwise adjust to advancing technology without any adverse effect on railroad safety. Please review the SECTION-BY-SECTION ANALYSIS below for the relevant information related to each proposed change.

II. Section-by-Section Analysis*Section 240.7 Definitions*

To be consistent with 49 CFR 209.5, FRA is proposing to amend this section by adjusting the definitions for "File, filed and filing" and "Serve or service." In this rule, FRA would amend the definition of "File, filed and filing" to mean submission of a document under this part on the date when the DOT Docket Clerk or FRA receives it, or if served as that term is defined under 49 CFR 209.5, the date of service. FRA also proposes adding a comma after the word "filed." Further, FRA proposes amending the definition of "Serve or service," in the context of serving documents, to have the meaning given in § 209.5.

Section 240.11 Penalties and Consequences for Noncompliance

FRA is proposing to amend paragraph (a) of this section by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is proposing to add language to this section referring readers to 49 CFR part 209, appendix A, where FRA specifies statutorily provided civil

penalty amounts updated for inflation. FRA is also proposing to amend this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>.

Section 240.103 Approval of Design of Individual Railroad Programs by FRA

This section explains the approval process for a railroad's locomotive engineer certification program. Paragraphs (b)(1) and (b)(2) and the introductory text of paragraph (c) currently refer to resubmissions filed pursuant to paragraph (f) of this section and material modifications filed pursuant to paragraph (g) of this section. However, these cross-references are incorrect as paragraph (g) of this section discusses the process for resubmitting a certification program and paragraph (h) addresses material modifications. Therefore, FRA is proposing to correct these cross-references in paragraphs (b)(1) and (b)(2) and the introductory text of paragraph (c).

Section 240.217 Time Limitations for Making Determinations

Paragraph (a) of this section currently lists five scenarios where a railroad shall not certify or recertify a person as a locomotive engineer. Paragraph (a)(3) states railroads cannot make certification decisions based on a knowledge examination that was conducted more than 366 days before the date of the railroad's certification decision. Paragraph (a)(4) is intended to provide an exception to paragraph (a)(3) that allows for railroads to rely on knowledge examinations performed in the 24 months prior to the certification decision if the railroad administers its knowledge testing program at intervals that do not exceed 24 months.¹ However, the way this section is written, a railroad that conducts its knowledge testing exams on a two-year cycle would still be prohibited from relying on a knowledge exam performed more than 366 days before the certification decision under paragraph (a)(3). This is a clear drafting error that does not conform with the intent of the regulation and makes paragraph (a)(4) superfluous. Therefore, FRA is proposing to amend paragraph (a)(3) to add "except as provided for in paragraph (a)(4) of this section" at the end of the paragraph to clarify that paragraph (a)(4) provides an exception to the limitation in paragraph (a)(3).

¹ 84 FR 20472, 20485 (May 9, 2019).

Section 240.223 Criteria for the Certificate

As part of the requirement that locomotive engineers be certified, railroads must issue certificates to those individuals that they certify. This section details what information must be included in these certificates.

Paragraph (a)(3) of this section states that the certificate must identify the person to whom the certificate is being issued. This must include the person's name, employee identification number, the year of birth, and either a physical description or photograph of the person. FRA is proposing to remove the requirement that the certificate include the person's year of birth.

In 2023, FRA issued NPRMs proposing the establishment of certification requirements for dispatchers and signal employees.² The Association of American Railroads (AAR) and the American Short Line and Regional Railroad Association (ASLRRA) submitted joint comments to both NPRMs requesting that FRA remove the year of birth requirement from dispatcher and signal employee certificates.³ In support of their comment, AAR and ASLRRA noted that a person's birth year provides little to no assistance in confirming a person's identity and there are other ways, such as a physical description or photograph that better serve this purpose. When FRA issued the final rules establishing dispatcher and signal employee certification, the agency agreed with AAR and ASLRRA's rationale that it was unnecessary to include the year of birth on the certificates and this requirement was removed from the final rules.⁴ For similar reasons, FRA is proposing removing the requirement that a person's year of birth be included on their locomotive engineer certificate.

Paragraph (a)(8) of this section states the certificate must be sufficiently small to permit being carried in an ordinary pocket wallet. FRA is proposing amending this paragraph to allow railroads to issue electronic certificates. Section 240.301(b) already provides for railroads to issue temporary replacement certificates electronically and FRA does not find any safety concerns with extending this allowance to the certificates issued under this section. Electronic certificates will allow for railroads to issue certificates more efficiently while also making it much less likely that a railroad would

have to issue a replacement certificate under § 240.301. Lastly, while FRA is not proposing any revisions to paragraph (a)(6) of this section, which requires that a certificate be signed by a supervisor of locomotive engineers or other designated individual, based on the proposed revision to paragraph (a)(8), it logically follows that FRA would allow for electronic signatures under this proposed rule.

Section 240.307 Revocation of Certification

Many railroads issue their written decisions to revoke a person's certification without findings of fact and a clear application of the regulation. That approach conflicts with an existing requirement in paragraph (c)(11) of this section which requires that each railroad decision must include "the findings of fact as well as the basis therefor, concerning all material issues of fact presented on the record and citations to all applicable railroad rules and practices." Although paragraph (d) allows a railroad to use hearing procedures under an applicable collective bargaining agreement, and such an agreement might not contain the same or similar requirements as in paragraph (c)(11), including findings of fact is normally what would be expected in such a decision. Thus, a railroad's failure to include such basic information in a decision has led to an inefficient and more complicated process. For instance, a railroad's failure to include findings of fact in its revocation decision means that the person who is challenging the decision cannot quickly and effectively pinpoint whether the basis for the parties' disagreement is based on a misunderstanding or material disagreement of the facts.

FRA's Operating Crew Review Board (OCRB), which is delegated the authority to review a person's challenge to a railroad's revocation decision, has similarly been less efficient in its review because it must spend an inordinate amount of time dissecting the evidentiary record in a way that exceeds the appropriate, accelerated consideration of a case envisioned by this certification review. Railroads often include findings of fact in their responses to petitions filed with the OCRB, but that is too late in the process to give the affected engineer an opportunity to consider the findings of fact and respond. To obviate this inefficient process, FRA proposes to revise paragraph (d) of this section to clarify that written findings of fact and application of the regulation must always be provided in a railroad's

written decision prior to consideration of a case before the OCRB, regardless of any alternative requirement provided in a collective bargaining agreement. This amendment would be deregulatory insofar as it provides required information to the affected person earlier in the certification revocation process, ensuring due process for locomotive engineers subject to the certification requirements in part 240, and increasing efficiency of the process.

Section 240.409 Hearings

Executive Order (E.O.) 14219, Ensuring Lawful Governance and Implementing the President's "Department of Government Efficiency" Deregulatory Initiative (90 FR 10583, Feb. 19, 2025), requires agencies to review regulations for a variety of concerns and rescind or modify such regulations identified. This section raises concerns due to its potential shifting of the burden of proof. The existing regulation grants a party adversely affected by an OCRB decision the right to a *de novo* hearing before an AHO with more robust evidentiary and procedural protections than the expedited OCRB proceeding but shifts the burden of proof at this AHO hearing stage to the party that was adversely affected by the OCRB decision. In cases where the locomotive engineer or locomotive engineer candidate was the party adversely affected by the preceding OCRB decision, the burden of proof at the AHO hearing stage currently shifts to the impacted engineer/engineer candidate.

To correct for this concern, FRA proposes to amend paragraph (q) of this section to clarify that the railroad taking a certification action is always the hearing petitioner at the AHO hearing stage and always bears the burden of proof by a preponderance of the evidence. FRA acknowledges that while this approach provides additional protections for a locomotive engineer or locomotive engineer candidate who has been subject to a denial or revocation of certification with related impacts on his or her livelihood, this burden could now shift to railroads. However, FRA expects the burden to be negligible. FRA requests comments on the extent of this shift in burden and any potential impacts.

Paragraph (r) of this section notes that FRA will be a mandatory party to the administrative hearing and will be a respondent at the start of the hearing. FRA is proposing to delete the requirement that FRA be a respondent at the start of each proceeding. Under the proposed revisions to paragraph (q) of this section, the hearing respondent

² 88 FR 35574 (May 31, 2023); 88 FR 35632 (May 31, 2023).

³ FRA-2022-0019-0041; FRA-2022-0020-0035.

⁴ 89 FR 44766, 44789 (May 21, 2024); 89 FR 44830, 44859 (May 21, 2024).

would always be the engineer or engineer candidate. FRA is more likely to align with the party who received a favorable decision before the OCRB, which could be, with the proposed changes to paragraph (q), either the petitioner or respondent at the AHO hearing stage. Therefore, it would no longer make sense for FRA to always be the respondent at the AHO hearing stage.

FRA is also requesting comments on whether it should remove paragraph (r) in its entirety and no longer require that FRA be a mandatory party to the administrative hearing.

Lastly, under these proposed changes, if FRA is a mandatory party and agrees with the railroad, FRA would be considered a hearing petitioner. However, in such circumstances, FRA would not be responsible for presenting any evidence, through witness testimony or exhibits, in support of the railroad's case. That responsibility would remain with the railroad.

III. Regulatory Impact and Notices

A. E.O. 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this NPRM under E.O. 12866 (58 FR 51735, Oct. 4, 1993), Regulatory Planning and Review, and DOT Regulatory Policies and Procedures. The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866.

FRA expects this NPRM would update FRA's locomotive engineer certification requirements by reducing the information that is required on an engineer's certificate and by allowing certificates to be electronic and proposes other administrative updates including revising definitions and correcting errors in the regulatory text. While some additional burdens may be added from the proposed changes to the revocation of certification requirements, FRA estimates that the overall benefits of this proposed rule would outweigh any potential burdens. Moreover, this proposed rule would provide additional benefits to regulated entities and the U.S. government, by clarifying, simplifying, and updating the language of part 240. This rule would also decrease the information requested on an engineer's certificate. FRA requests any comments from the public on the impacts of this proposed rule.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for "each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination."⁵ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines an E.O. 14192 deregulatory action as "an action that has been finalized and has total costs less than zero."⁶ This proposed rulemaking is expected to have total costs less than zero, and therefore, if finalized, it would be considered an E.O. 14192 deregulatory action. While FRA affirms that each amendment proposed in this NPRM has a cost that is negligible or "less than zero" consistent with E.O. 14192, FRA still requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,⁷ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule would not preclude small entities from continuing existing practices that comply with part 240; it merely offers clarity and updates that

could result in benefits, if a small entity or other regulated entity chooses to utilize those flexibilities. By extending this regulatory relief, many regulated entities, including small entities, would experience some benefits. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

This proposed rule offers regulatory flexibilities, and there is no new information collection requirement, in accordance with the Paperwork Reduction Act of 1995 U.S.C. 3501 *et seq.*, therefore, an information collection submission to OMB is not required. The recordkeeping and reporting requirements already contained in Part 240 became effective when it was approved by OMB on July 12, 2024. The OMB approval number is 2130–0533, which expires on July 31, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), "[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives." This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This proposed rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132,

⁵ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

⁶ Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled "Unleashing Prosperity Through Deregulation."* Memorandum M–25–20. March 26, 2025.

⁷ Public Law 104–121, 110 Stat. 857 (Mar. 29, 1996).

“Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”⁸ FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁹ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL–14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at regulations.gov, Docket No. FRA–2025–0132, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 240

Administrative practice and procedure, Locomotive engineer, Penalties, Railroad employees, Railroad operating procedures, Railroad safety, Reporting and recordkeeping requirements.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend part 240 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 240—QUALIFICATION AND CERTIFICATION OF LOCOMOTIVE ENGINEERS

■ 1. The authority citation for part 240 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20135, 21301, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. In § 240.7, revise the definitions of “File, filed and filing” and “Serve or service” to read as follows:

§ 240.7 Definitions.

File, filed, and filing mean submission of a document under this part on the date when the DOT Docket Clerk or FRA receives it, or if served as that term is defined under 49 CFR 209.5, the date of service.

Serve or service, in the context of serving documents, has the meaning given in 49 CFR 209.5. The computation

of time provisions in Rule 6 of the Federal Rules of Civil Procedure as amended are also applicable in this part. *See also* the definition of “file, filed, and filing” in this section.

* * * * *

■ 3. Revise § 240.11(a) to read as follows:

§ 240.11 Penalties and consequences for noncompliance.

(a) A person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where: (1) a grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons, or (2) a death or injury has occurred. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. See FRA’s website at <https://railroads.dot.gov/> for a statement of agency civil penalty policy.

* * * * *

■ 4. Revise § 240.103(b)(1), (b)(2), and (c) introductory text to read as follows:

§ 240.103 Approval of design of individual railroad programs by FRA.

* * * * *

(b) * * *

(1) Simultaneous with its filing with FRA, provide a copy of the submission filed pursuant to paragraph (a) of this section, a resubmission filed pursuant to paragraph (g) of this section, or a material modification filed pursuant to paragraph (h) of this section to the president of each labor organization that represents the railroad’s employees subject to this part; and

(2) Include in its submission filed pursuant to paragraph (a) of this section, a resubmission filed pursuant to paragraph (g) of this section, or a material modification filed pursuant to paragraph (h) of this section a statement affirming that the railroad has provided a copy to the president of each labor organization that represents the railroad’s employees subject to this part, together with a list of the names and addresses of persons provided a copy.

(c) Not later than 45 days from the date of filing a submission pursuant to paragraph (a) of this section, a resubmission pursuant to paragraph (g) of this section, or a material modification pursuant to paragraph (h)

⁸ 66 FR 28355 (May 22, 2001).

⁹ 19 U.S.C. Ch. 13.

of this section, any designated representative of railroad employees subject to this part may comment on the submission, resubmission, or material modification.

* * * * *

■ 5. Revise § 240.217(a)(3) to read as follows:

§ 240.217 Time limitations for making determinations.

(a) * * *

(3) Demonstrated knowledge and the knowledge examination being relied on was conducted more than 366 days before the date of the railroad's certification decision except as provided for in paragraph (a)(4) of this section;

* * * * *

■ 6. Revise § 240.223(a)(3) and (8) to read as follows:

§ 240.223 Criteria for the certificate.

(a) * * *

(3) Identify the person to whom it is being issued (including the person's name, employee identification number, and either a physical description or photograph of the person);

* * * * *

(8) Be electronic or be of sufficiently small size to permit being carried in an ordinary pocket wallet.

* * * * *

■ 7. Revise § 240.307(d) to read as follows:

§ 240.307 Revocation of certification.

* * * * *

(d) A hearing required by this section which is conducted in a manner that conforms procedurally to the applicable collective bargaining agreement shall be deemed to satisfy the procedural requirements of this section except that the railroad's decision must comply with the requirements in paragraph (c)(11) of this section.

* * * * *

■ 8. Revise § 240.409(q) and (r) to read as follows:

§ 240.409 Hearings.

* * * * *

(q) Regardless of the prevailing party before the Operating Crew Review Board, the railroad involved in taking the certification action shall be the "hearing petitioner" and shall have the burden of proving its case by a preponderance of the evidence. The impacted locomotive engineer or locomotive engineer candidate shall be the "hearing respondent."

(r) FRA will be a mandatory party to the administrative hearing.

* * * * *

Issued in Washington, DC.

Kyle D. Fields,

Chief Counsel.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Parts 240 and 242

[Docket No. FRA-2025-0131]

RIN 2130-AD32

Qualification and Certification of Locomotive Engineers and Conductors: Incorporation of Longstanding C³RS Waivers

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: FRA proposes to amend its regulations governing the qualification and certification of locomotive engineers and conductors, to codify longstanding waivers that have granted relief from certain certification requirements for railroads that participate in the FRA-sponsored Confidential Close Call Reporting System (C³RS). FRA does not intend this NPRM to be a disincentive to railroads implementing alternative close call reporting programs outside C³RS, which the agency believes can still positively impact safety culture. FRA would still entertain waiver requests to implement alternative close call reporting programs, as necessary.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES:

Comments: Comments related to Docket No. FRA-2025-0131 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA-2025-0131), and Regulatory Identification Number (RIN) for this rulemaking (2130-AD32). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act

information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT:

Mike Long, Director of Railroad Operations and Outreach, FRA, telephone: (202) 770-8203, email: Mike.Long@dot.gov; or Elizabeth A. Gross, Attorney Adviser, FRA, telephone: (202-253-6281), email: Elizabeth.Gross@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of title 49, Code of Federal Regulations (CFR). The requirements for FRA-regulated entities to establish programs for certifying the qualifications of locomotive engineers and conductors are established in 49 CFR part 240, Qualification and Certification of Locomotive Engineers, and part 242, Qualification and Certification of Conductors, respectively. FRA proposes to amend parts 240 and 242 to codify longstanding waivers that have granted relief from certain certification requirements for railroads that participate in the FRA-sponsored C³RS.

The History of C³RS and the Waiver Process

C³RS is a partnership between FRA and an independent third party (currently, the National Aeronautics and Space Administration (NASA)), in conjunction with participating railroads and labor organizations, that allows participating railroads and their employees to report close calls voluntarily and confidentially.¹ A close call is an event or sequence of events having a potential for more serious adverse consequences to railroad safety,² and close call reports provide an opportunity to improve safety in support of railroad operations.³

¹ See generally <https://c3rs.arc.nasa.gov/information/summary.html>.

² See C³RS Frequently Asked Questions, available at https://c3rs.arc.nasa.gov/docs/C3RS_FAQ.pdf ("A close call is any condition or event that may have the potential for more serious safety consequences.")

³ See *id.* ("C³RS de-identified reports may be used by the railroad community and/or government

Employees of participating railroads can report close calls to NASA, which protects the identity of both the reporting employee and the railroad by generalizing or removing all identifying information. C³RS thereby allows railroads to gain railroad safety information about why close calls occur. Without C³RS, many close calls would go unreported, which would deprive railroads of this important information.

C³RS is established at participating railroads through Implementing Memoranda of Understanding (IMOU) that are developed and signed by all stakeholders, including the participating railroad, FRA, and any participating non-profit employee labor organization. While development of a C³RS IMOU typically begins with a template provided by FRA, C³RS stakeholders can modify the template to contain provisions specific to their program that they have agreed upon. Nothing in the proposed rule would limit stakeholders' ability to modify the template IMOU to fit their specific program, except that no IMOU may provide protection from revocation of certification in certain specified situations that have traditionally been excluded from C³RS, such as violations involving the prohibited use of alcohol or controlled substances, as discussed below in the section-by-section analysis for §§ 240.307 and 242.407.

All C³RS IMOUs provide that employees who report close calls in accordance with the IMOU's provisions are protected from railroad discipline, FRA enforcement, and revocation of a locomotive engineer or conductor certification under part 240 or 242, respectively. To effectuate an IMOU's protections against revocation of certification, a railroad wishing to participate in C³RS must request relief from the provisions in parts 240 and 242 that require the railroad to revoke an employee's certification for certain violations of the railroad's operating rules and practices. A railroad requests this relief by submitting a waiver request to FRA in accordance with 49 CFR part 211, subpart C—Waivers. Once granted, this relief allows the railroad to honor the commitment it made in the IMOU not to revoke an employee's certification for a close call that has been reported in accordance with all applicable provisions of an IMOU.

As of February 28, 2025, a total of 25 railroads were participating in C³RS, including passenger railroads, Class III short line freight railroads, and Class I

freight railroads.⁴ Because the relief provided by the waivers expires, railroads must submit a new waiver request approximately every five years, even when there have been no significant changes to the provisions of the IMOU or the relief requested. FRA's Railroad Safety Board must similarly review and respond to each waiver request pursuant to the procedures in part 211. Because C³RS has been established for approximately 20 years, the waiver process has essentially become a *pro forma* paperwork exercise, with railroads submitting template waiver requests that are routinely granted by FRA. Several C³RS waivers have been in effect for numerous years, having been renewed multiple times.⁵ As such, requiring railroads to go through the waiver process impedes a more streamlined and efficient implementation of C³RS at participating railroads.

Because C³RS has proven to be a valuable tool for improving railroad safety, FRA is proposing to codify these longstanding C³RS waivers by revising parts 240 and 242 to provide that a railroad may not revoke an engineer's or conductor's certification for a close call event that has been reported in accordance with all applicable provisions of a C³RS IMOU. FRA is not currently proposing to amend recently published rules at 49 CFR part 245, Qualification and Certification of Dispatchers, and part 246, Certification of Signal Employees in this rule, but may consider similar amendments to these rules in the future.⁶ Further, no C³RS waivers for dispatchers or signal employees have yet been granted.⁷

The proposed revisions would reduce burdens on C³RS-participating railroads in two ways. First, a railroad would no longer have to apply for a waiver from the implicated provisions in part 240 or 242 to participate in C³RS and be protected from FRA enforcement for failing to revoke a certification for a

close call event that has been reported in accordance with all applicable provisions of a C³RS IMOU. Second, the railroad would be relieved from the associated burden of revoking a certification for a close call event, including burdens associated with suspending a person's certificate; providing notice of the reason for the suspension, the pending revocation, and an opportunity for a hearing before a president officer other than the investigating officer; convening a hearing; and issuing a decision in the proceeding after the hearing.⁸ The proposed revisions would also relieve FRA of the burden of reviewing and approving a unending series of nearly-identical C³RS waiver requests.

Nothing in this proposed rule changes the voluntary and cooperative nature of C³RS, as participating stakeholders retain the ability to terminate their participation in the program in accordance with the provisions of the applicable C³RS IMOU.

Railroad Safety Advisory Committee (RSAC) Task No. 2022–03

On October 17, 2022, the RSAC voted to adopt Task No 2022–03: Confidential Close Call Reporting System (C³RS Task Statement), with a stated purpose of “consider[ing] how FRA could promote rail safety through regulation, voluntary standards, or guidance for voluntary, non-punitive railroad safety reporting system industry-wide.” After a series of RSAC C³RS Working Group meetings, it became apparent that stakeholders generally agreed that FRA should engage in a rulemaking that would streamline C³RS participation by relieving railroads of the burden associated with submitting waivers and recurrent waiver extension requests. FRA presented draft rule text to the C³RS Working Group in May 2024, soliciting stakeholder feedback. The feedback received generally supported the goal of the rule text, although some stakeholders suggested revisions or alternative approaches. FRA subsequently withdrew Task No. 2022–03 from the RSAC in March 2025, in part with the view to begin a rulemaking that would propose amending parts 240 and 242 to remove the need for C³RS waivers. The rule text FRA is proposing in this NPRM is substantially the same as that shared with the C³RS Working Group in May 2024.⁹

⁸ See 49 CFR 240.307 and 242.407.

⁹ FRA will also be placing the draft rule text shared with the C³RS Working Group in the docket for this rulemaking.

⁴ See <https://railroads.dot.gov/railroad-safety/divisions/safety-partnerships/c3rs/participating-railroads>.

⁵ For example, Amtrak has had a waiver from part 240 since 2010 and from part 242 since 2013. See Docket Nos. FRA–2010–0152 and FRA–2012–0054. Similarly, New Jersey Transit has had a part 240 waiver since 2009 and a part 242 waiver since 2012. See Docket Nos. FRA–2009–0096 and FRA–2012–0056.

⁶ FRA is exercising enforcement discretion on the current compliance deadlines in these two regulations. See FRA Follow-up Response to Petitions for Reconsideration (March 14, 2025), Document ID Nos. FRA–2022–0020–0049 and FRA–2022–0019–0058.

⁷ FRA has a pending C³RS waiver request, submitted by the Association of American Railroads on behalf of its members, for dispatchers. See Docket No. FRA–2024–0089.

II. Section-by-Section Analysis

FRA is proposing to amend parts 240 and 242 to codify longstanding waivers that have granted relief from certain certification requirements for railroads that participate in the FRA-sponsored C³RS. FRA would codify these longstanding C³RS waivers by revising parts 240 and 242 to provide that a railroad may not revoke an engineer's or conductor's certification for a close call event that has been reported in accordance with all applicable provisions of a C³RS IMOU.

Section 240.7—Definitions

FRA is proposing to amend this section to add the below definitions to part 240.

C³RS Implementing Memorandum of Understanding or C³RS IMOU

FRA proposes to define “C³RS Implementing Memorandum of Understanding” or “C³RS IMOU” as a voluntary written agreement that implements C³RS on a participating railroad and is signed by FRA, the participating railroad, and any non-profit employee labor organization(s) representing participating employees. The proposed definition would clarify that if the participating employees are not represented by a non-profit labor organization, or if the non-profit labor organization is not a stakeholder to the program, a C³RS IMOU may be signed only by FRA and the participating railroad. Further, when contractor employees are participating in C³RS, the C³RS IMOU must also be signed by the contractor for the railroad and can be signed by any non-profit employee labor organization representing the contractor employees. The proposed definition states that FRA will post all C³RS IMOUs to the Federal Docket Management System's website at <https://www.regulations.gov>.

Close Call

FRA proposes to define “close call” as an unsafe event or sequence of unsafe events that had a potential for more serious adverse consequences to railroad safety and has been reported to C³RS and accepted by both the independent third party and the peer review team (PRT) as a reportable close call, in accordance with all applicable provisions of a C³RS IMOU. The proposed definition has been adapted from C³RS IMOUs that are currently in effect.

Confidential Close Call Reporting System or C³RS

FRA proposes to define “Confidential Close Call Reporting System” or “C³RS”

as an FRA-sponsored voluntary program designed to improve the safety of railroad operations by allowing railroad workers to confidentially report currently unreported or underreported unsafe events without the repercussions of suspension or revocation of certification under 49 CFR part 240 or 242.

Electronic Device

FRA proposes to define “electronic device” by referencing the definition in § 220.5 for purposes of FRA regulations establishing prohibitions, restrictions, and requirements that apply to the use of personal and railroad-supplied cellular telephones and other electronic devices. Section 220.5 currently states that an electronic device is an electronic or electrical device used to conduct oral, written, or visual communication; place or receive a telephone call; send or read an electronic mail message or text message; look at pictures; read a book or other written material; play a game; navigate the internet; navigate the physical world; play, view, or listen to a video; play, view, or listen to a television broadcast; play or listen to a radio broadcast other than a radio broadcast by a railroad; play or listen to music; execute a computational function; or, perform any other function that is not necessary for the health or safety of the person and that entails the risk of distracting the employee or another railroad operating employee from a safety-related task. The definition in § 220.5 further clarifies that the term “electronic device” does not include (1) electronic control systems and information displays within the locomotive cab (whether the displays or systems be fixed or portable) or on a remote control transmitter necessary to operate a train or conduct switching operations; or (2) a digital watch whose only purpose is as a timepiece.

FRA proposes to include a definition of “electronic device” in part 240 to define the term as used in the proposed definition of “personal electronic device.” By using the same definition as found in § 220.5, FRA would promote consistency across its regulations and enhance compliance because the railroad industry is already familiar with the definition. Referencing the § 220.5 definition also removes the need for FRA to make conforming revisions to § 240.5 if the § 220.5 definition is revised in the future.

Hazardous Material

FRA proposes to define “hazardous material” as a commodity designated as a hazardous material by 49 CFR part 172—Hazardous Materials Table,

Special Provisions, Hazardous Materials Communications, Emergency Response Information, Training Requirements, and Security Plans. The term “hazardous material” would be used in proposed § 240.307(i)(3)(ii)(C)(6), which states that an employee is not protected from certification revocation for any alleged violation of a railroad operating rule or practice that involves an event resulting in the identifiable release of a hazardous material. The proposed definition also appears in C³RS IMOUs that are currently in effect.

ID Strip

FRA proposes to define “ID strip” as the identification strip the independent third party issues to an employee who has reported a close call to C³RS to indicate that the independent third party has accepted the close call.

Independent Third Party

FRA proposes to define “independent third party” to mean the non-FRA organization that manages C³RS, accepts close call reports, and protects the confidentiality of both a reporting employee and a participating railroad.

Peer Review Team (PRT)

FRA proposes to define “peer review team” or “PRT” as a problem-solving team consisting of representatives for the primary stakeholders to a C³RS IMOU, including FRA, the participating railroad, and any participating non-profit employee labor organization(s). The proposed definition has been adapted from C³RS IMOUs that are currently in effect.

Personal Electronic Device

FRA proposes to define “personal electronic device” by referencing the definition established in § 220.5 for purposes of FRA regulations establishing prohibitions, restrictions, and requirements that apply to the use of personal and railroad-supplied cellular telephones and other electronic devices. Section 220.5 currently states that “personal electronic device” means an electronic device that was not provided to the railroad operating employee by the employing railroad for a business purpose.

FRA is proposing to include a definition of “personal electronic device” in part 240 to define the term as used in proposed § 240.307(i)(3)(ii)(C)(8), which states that an employee is not protected from certification revocation for any alleged violation of a railroad operating rule or practice that involves use of a personal electronic device prohibited by a Federal railroad safety law or railroad

operating rule. By using the same definition as § 220.5, FRA would promote consistency across its regulations and enhance compliance because the railroad industry is already familiar with the definition. Referencing the § 220.5 definition also removes the need for FRA to make conforming revisions to § 240.5 if the § 220.5 definition is revised in the future.

Section 240.117—Criteria for Consideration of Operating Rules Compliance Data

FRA proposes to amend § 240.117 to add a new paragraph (f)(5) that references proposed § 240.307(i)(3) to provide that a railroad shall not deny or revoke an employee's certification based on an alleged violation of the railroad's operating rules or practices that the employee reported to C³RS and that was accepted as a close call by both the independent third party and the PRT in accordance with all applicable provisions of a C³RS IMOU. FRA also proposes to add references to new paragraph (f)(5) in paragraphs (b) and (c)(1) to clarify that those paragraphs' requirements regarding certification do not apply to reported close calls.

Section 240.307—Revocation of Certification

FRA proposes to amend § 240.307 by revising paragraph (i) to include a new paragraph (i)(3)(i) providing that a railroad shall not revoke a person's certification for an alleged violation of a railroad operating rule or practice that was reported to C³RS and accepted as a close call by both the independent third party and the PRT in accordance with all applicable provisions of a C³RS IMOU and proposed new language in paragraphs (i)(3)(ii), as described below. FRA also proposes minor technical revisions to paragraphs (i)(1) and (i)(2) that would accommodate new paragraph (i)(3) by replacing the current punctuation marks at the end of each paragraph with a period.

Proposed paragraph (i)(3)(ii)(A) would provide that if a railroad initiates certification suspension or revocation and the person indicates the event was reported to C³RS as a close call, all time limits in § 240.307 are put in abeyance until the employee (or the employee's representative) provides an ID strip to the investigating officer or charging officer and confirmation is received from the PRT regarding whether the alleged violation was reported and accepted as a close call. The proposed language is adapted from C³RS IMOU currently in effect that put time limits for pursuing revocation of certification into abeyance until an ID strip is

delivered, with additional language clarifying that the PRT must also determine that the alleged violation was reported and accepted as a close call.

Proposed paragraph (i)(3)(ii)(B) would provide that a determination made by the independent third party or the PRT regarding whether a report was accepted as a close call may not be overturned pursuant to the administrative hearing and dispute resolution procedures in subpart E of part 240. The cooperative and voluntary nature of C³RS requires that these important stakeholder determinations—particularly PRT determinations, which are generally made by consensus pursuant to the applicable C³RS IMOU—are not subject to the administrative review procedures of part 240. Not only would such review be inconsistent with the nature of C³RS, but it would create an unfair situation where locomotive engineers and conductors covered by a C³RS IMOU would have an avenue to appeal a determination made by the independent third party or the PRT that was not available to other employees who did not possess a certification, but who would still be potentially subject to railroad discipline and FRA enforcement as a result of a reported event that was not accepted by either the independent third party or the PRT.

Proposed paragraph (i)(3)(ii)(B) further provides, however, that such determinations can be included as a finding of fact for purposes of determining whether a railroad impermissibly revoked a person's certification for an alleged violation that was reported and accepted as a close call by both the independent third party and the PRT. In other words, if a railroad suspends or revokes a person's certification even though the alleged violation was reported and accepted as a close call by both the independent third party and the PRT, the existence of that acceptance determination can be a factual finding introduced during a subpart E proceeding to demonstrate that the railroad impermissibly revoked the person's certification under proposed paragraph (i)(3)(i).

Proposed paragraph (i)(3)(ii)(C) establishes that an employee is not protected from decertification for an alleged violation of a railroad's operating rules or practices that involves any of the following, even if the employee reported the event to C³RS:

- An event that caused or is alleged to have caused death, injury, illness, or medical treatment of any kind to any person (including a passenger) involved in the event;

- An event that results in damages above the current monetary rail equipment accident/incident reporting threshold described in 49 CFR part 225—Railroad Accidents/Incidents and published annually by FRA;

- An event that results in a highway-rail grade crossing accident/incident, as described in 49 CFR 225.19(b);

- A willful violation of a Federal railroad safety law or railroad operating rule or practice, including the prohibited use of alcohol or a controlled substance;

- A substance abuse disorder;

- An event resulting in the identifiable release of a hazardous material;

- An act of sabotage or other criminal offense; or

- An event involving use of a personal electronic device that is prohibited by a Federal railroad safety law or railroad operating rule.

Because there is longstanding consensus among C³RS stakeholders that events involving the above situations are ineligible to be reported to C³RS, FRA proposes to memorialize them in part 240. Doing would assure all railroad safety stakeholders, including the public, that violations involving a heightened or willful degree of risk to the safety of railroad operations, or which resulted in casualties or significant property damage, are ineligible for the C³RS protections against decertification.

Further, all C³RS IMOU currently in effect contain the above exclusions, with the exception of the prohibited use of personal electronic devices. Some C³RS IMOU predate FRA's personal electronic device regulations in part 220 (which went into effect on March 28, 2011),¹⁰ and therefore these earlier IMOU did not state that the prohibited use of a personal electronic device could not be reported to C³RS. However, FRA interprets these IMOU to exclude prohibited use of a personal electronic device from C³RS because such uses are willful violations of a railroad operating rule or practice or Federal railroad safety law, as the prohibited use of a personal electronic device can be presumed to be willful. More recent C³RS IMOU specifically exclude prohibited use of electronic devices, including IMOU establishing C³RS

¹⁰ Before issuing the part 220 regulations governing the use of personal electronic devices, FRA had published Emergency Order (E.O.) 28 on October 7, 2008. E.O. 28 restricted on-duty railroad operating employees from improperly using cellular telephones and other distracting electronic and electrical devices. 73 FR 58702.

pilot programs for certain Class I freight railroads, which helps improve clarity.

For these reasons, FRA proposes to exclude prohibited use of personal electronic devices from C³RS decertification protections in part 240, especially since it would be antithetical to the railroad safety purposes of the program to permit an employee to escape consequences for prohibited use of a personal electronic device simply by reporting such use.

In addition to these identified exclusions, C³RS stakeholders would retain the flexibility they currently have to develop IMOU provisions establishing other limits or exclusions to C³RS reporting.

Section 242.7—Definitions

FRA is proposing to amend this section to add the definitions to part 242 for “close call”; “Confidential Close Call Reporting System” or “C³RS”; “C³RS Implementing Memorandum of Understanding” or “C³RS IMOU”; “electronic device”; “hazardous material”; “ID strip”; “independent third party”; “Peer Review Team” or “PRT”; and “personal electronic device.” Because these are the same definitions FRA is proposing to add to § 240.7, please refer to the above section-by-section analysis for § 240.7 for discussion of FRA’s rationale for the proposed definitions.

Section 242.403—Criteria for Revoking Certification

FRA proposes to amend § 242.403 to add a new paragraph (f)(5) that references proposed § 242.407(i)(3) to provide that a railroad shall not deny or revoke an employee’s certification based on an alleged violation of the railroad’s operating rules or practices that the employee reported to C³RS and that was accepted as a close call by both the independent third party and the PRT in accordance with all applicable provisions of a C³RS IMOU. FRA also proposes to add references to new paragraph (f)(5) in paragraphs (b) and (c)(1) to clarify that those paragraphs’ requirements regarding certification do not apply to reported close calls. These are substantively the same revisions FRA is proposing to § 240.117.

Section 242.407—Process for Revoking Certification

FRA proposes to amend § 242.407 to include new language in paragraph (i)(3)(i) stating that a railroad shall not suspend or revoke a person’s certification if the violation was reported to C³RS and accepted by both the independent third party and the PRT in accordance with all applicable

provisions of a C³RS IMOU and additional criteria contained in paragraphs (i)(3)(ii). Because these are substantively the same revisions FRA is proposing to § 240.307, please refer to the above section-by-section analysis for § 240.307 for discussion of FRA’s rationale for the proposed revisions.

III. Regulatory Impact and Notices

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this NPRM under E.O. 12866 (58 FR 51735, Oct. 4, 1993), Regulatory Planning and Review, and DOT Regulatory Policies and Procedures. The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866.

This rule proposes to amend its regulations governing the qualification and certification of locomotive engineers and conductors and codifies longstanding waivers that have granted relief from certain certification requirements for railroads that participate in the FRA-sponsored C³RS program, reducing burdens on C³RS-participating railroads. Nothing in this proposed rule changes the voluntary and cooperative nature of C³RS, as participating stakeholders retain the ability to terminate their participation in the program in accordance with the provisions of the applicable C³RS IMOU. Moreover, this rule would provide some qualitative benefits to regulated entities and the U.S. government, by clarifying, simplifying, and updating the language of part 240 and 242. The proposed rule would also promote more efficient use of government resources by reducing the time spent by FRA on reviewing and approving these types of waivers.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192 (90 FR 9065, Jan. 31, 2025), Unleashing Prosperity Through Deregulation, requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.”¹¹ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines two different types of E.O. 14192 actions: an E.O.

14192 deregulatory action, and an E.O. 14192 regulatory action.¹²

An E.O. 14192 deregulatory action is defined as “an action that has been finalized and has total costs less than zero.” This proposed rulemaking is expected to have total costs less than zero, and therefore it would be considered an E.O. 14192 deregulatory action upon issuance of a final rule. While FRA affirms that each amendment proposed in this NPRM has a cost that is negligible or “less than zero” consistent with E.O. 14192, FRA requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,¹³ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule would not preclude small entities from continuing existing practices that comply with part 240 or 242; it merely offers flexibilities that could result in cost savings, if a small entity or other regulated entity chooses to utilize those flexibilities. By extending this regulatory relief, many regulated entities, including small entities, would experience a cost savings. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

¹² Executive Office of the President. Office of Management and Budget. Guidance Implementing Section 3 of Executive Order 14192, Titled “Unleashing Prosperity Through Deregulation.” Memorandum M–25–20. Mar. 26, 2025.

¹³ Public Law 104–121, 110 Stat. 857 (Mar. 29, 1996).

¹¹ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation.* 90 FR 9065–9067. Feb. 6, 2025.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed above under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

This proposed rule offers regulatory flexibilities, and it contains no new information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), therefore an information collection submission to OMB is not required. The recordkeeping and reporting requirements contained in parts 240 and 242 became effective when they were approved by OMB in 2024. The OMB approval numbers are OMB No. 2130–0533, which expires on July 31, 2027, and OMB No. 2130–0596, which expires on October 31, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations, FRA has determined this undertaking has no potential to affect historic properties. FRA has also determined that this rulemaking does not approve a project resulting in a use of a resource protected by Section 4(f).

F. Federalism Implications

This proposed rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in

accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”¹⁴ FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979¹⁵ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

¹⁴ 66 FR 28355 (May 22, 2001).

¹⁵ 19 U.S.C. ch. 13.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL–14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at [regulations.gov](http://www.regulations.gov), Docket No. FRA–2025–0131, in the **SUMMARY** section of this proposed rule.

List of Subjects

49 CFR Part 240

Administrative practice and procedures, Penalties, Railroad employees, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 242

Administrative practice and procedure, Penalties, Railroad employees, Railroad safety, Reporting and recordkeeping requirements.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend parts 240 and 242 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 240—QUALIFICATION AND CERTIFICATION OF CONDUCTORS

- 1. The authority citation for part 240 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20135, 21301, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

- 2. Amend § 240.7 by adding definitions in alphabetical order for “C³RS Implementing Memorandum of Understanding (C³RS IMOU)”, “Close call”, “Confidential Close Call Reporting System (C³RS)”, “Electronic device”, “Hazardous material”, “ID strip”, “Independent third party”, “Peer Review Team (PRT)”, and “Personal electronic device” to read as follows:

§ 240.7 Definitions.

* * * *

C³RS Implementing Memorandum of Understanding (C³RS IMOU) means a voluntary written agreement that implements C³RS on a participating railroad and is signed by FRA, the participating railroad, and any non-profit employee labor organization(s) representing participating employees for purposes of the C³RS IMOU. If the participating employees are not represented by a non-profit labor organization, or if a non-profit employee labor organization representing employees covered by a C³RS IMOU is not a stakeholder to the program, a C³RS IMOU may be signed only by FRA and the participating railroad. When contractor employees are participating in C³RS, the C³RS IMOU must also be signed by the contractor for the railroad and can be signed by any non-profit employee labor organization representing the contractor employees for purposes of the C³RS IMOU. FRA will post all C³RS IMOUs to the Federal Docket Management System's website at <https://www.regulations.gov>.

Close call means an unsafe event or sequence of unsafe events that had a potential for more serious adverse consequences to railroad safety and has been reported to C³RS and accepted by both the independent third party and the Peer Review Team (PRT) as a reportable close call in accordance with all applicable provisions of a C³RS IMOU.

* * * *

Confidential Close Call Reporting System (C³RS) means an FRA-sponsored voluntary program designed to improve the safety of railroad operations by allowing railroad workers to confidentially report currently unreported or underreported unsafe events without the repercussions of suspension or revocation of certification.

* * * *

Electronic device has the meaning assigned by § 220.5 of this chapter.

* * * *

Hazardous material means a commodity designated as a hazardous material by part 172 of this title.

ID strip means the identification strip the independent third party issues to an employee who has reported a close call to C³RS to indicate that the independent third party has accepted the close call.

Independent third party means the non-FRA organization that manages C³RS, accepts close call reports, and protects the confidentiality of both a

reporting employee and a participating railroad.

* * * *

Peer Review Team (PRT) is a problem-solving team consisting of representatives for the primary stakeholders to a C³RS IMOU, including FRA, the participating railroad, and any participating non-profit employee labor organization(s).

* * * *

Personal electronic device has the meaning assigned by § 220.5.

■ 3. Amend § 240.117 by revising paragraph (b) and paragraph (c)(1) and adding a new paragraph (f)(5) to read as follows:

§ 240.117 Criteria for consideration of operating rules compliance data.

* * * *

(b) Except as provided in paragraph (f)(5) of this section, a person who has demonstrated a failure to comply, as described in paragraph (e) of this section, with railroad rules and practices for the safe operation of trains shall not be currently certified as a locomotive engineer.

(c)

(1) Except as provided in paragraph (f)(5) of this section, a certified locomotive engineer who has demonstrated a failure to comply with railroad rules and practices described in paragraph (e) of this section shall have his or her certification revoked.

* * * *

(f) * * *

(5) In accordance with § 240.307(i)(3), a railroad shall not deny or revoke an employee's certification based on an alleged violation of the railroad's operating rules or practices that the employee reported to C³RS as a close call and was accepted as a close call by both the independent third party and the PRT in accordance with all applicable provisions of a C³RS IMOU.

* * * *

■ 4. Amend § 240.307 by revising paragraph (i) to read as follows:

§ 240.307 Revocation of certification.

* * * *

(i) A railroad:

(1) Shall not revoke the person's certification as provided for in paragraph (a) of this section if sufficient evidence exists to establish that an intervening cause prevented or materially impaired the locomotive engineer's ability to comply with the railroad operating rule or practice that constitutes a violation under § 240.117(e)(1) through (5).

(2) May decide not to revoke the person's certification as provided for in

paragraph (a) of this section if sufficient evidence exists to establish that the violation of § 240.117(e)(1) through (5) was of a minimal nature and had no direct or potential effect on rail safety.

(3)(i) Shall not suspend or revoke the person's certification as provided for in paragraph (a) of this section if the person reported the alleged violation of the railroad's operating rule or practice that constitutes a violation under § 240.117(e)(1) through (5) to C³RS as a close call; and if the person's report was accepted as a close call by both the independent third party and the PRT in accordance with all applicable provisions of a C³RS IMOU.

(ii)(A) If a railroad initiates suspension or revocation of the person's certification and the person indicates the alleged violation was reported to C³RS as a close call, the time limits prescribed in this section for pursuing certificate suspension or revocation will be put in abeyance, pending provision of an ID strip from the reporting employee, or the employee's designated representative, to the investigating officer or presiding officer and confirmation from the PRT that the alleged violation was reported and accepted as a close call.

(B) A determination made by the independent third party or the PRT regarding whether a report was accepted as a close call may not be overturned pursuant to the administrative hearing and dispute resolution procedures in subpart E of this part, but may be included as a finding of fact for purposes of determining whether the railroad impermissibly revoked a person's certification for an alleged violation that was reported and accepted as a close call by both the third party and the PRT.

(C) Paragraph (i)(3) of this section will not apply to any alleged violation of a railroad's operating rules or practices that constitutes a violation under § 240.117(e)(1) through (5) that involves:

(1) An event that caused or is alleged to have caused death, injury, illness, or medical treatment of any kind to any person (including a passenger) involved in the event;

(2) An event that results in damages above the current monetary rail equipment accident/incident reporting threshold described in part 225 of this chapter and published annually by FRA;

(3) An event that results in a highway-rail grade crossing accident/incident, as described in § 225.19(b) of this chapter;

(4) A willful violation of a Federal railroad safety law or railroad operating rule or practice, including the prohibited use of alcohol or a controlled substance;

(5) A substance abuse disorder;
 (6) An event resulting in the identifiable release of a hazardous material;

(7) An act of sabotage or other criminal offense; or

(8) An event involving use of a personal electronic device that is prohibited by a Federal railroad safety law or railroad operating rule.

PART 242—QUALIFICATION AND CERTIFICATION OF CONDUCTORS

■ 5. The authority citation for part 242 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20135, 20138, 20162, 20163, 21301, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 6. Amend § 242.7 by adding definitions in alphabetical order for “C³RS Implementing Memorandum of Understanding (C³RS IMOU)”, “Close call”, “Confidential Close Call Reporting System (C³RS)”, “Electronic device”, “Hazardous material”, “ID strip”, “Independent third party”, “Peer Review Team (PRT)”, and “Personal electronic device” to read as follows:

§ 242.7 Definitions.

C³RS Implementing Memorandum of Understanding (C³RS IMOU) means a voluntary written agreement that implements C³RS on a participating railroad and is signed by FRA, the participating railroad, and any non-profit employee labor organization(s) representing participating employees for purposes of the C³RS IMOU. If the participating employees are not represented by a non-profit labor organization, or if a non-profit employee labor organization representing employees covered by a C³RS IMOU is not a stakeholder to the program, a C³RS IMOU may be signed only by FRA and the participating railroad. When contractor employees are participating in C³RS, the C³RS IMOU must also be signed by the contractor for the railroad and can be signed by any non-profit employee labor organization representing the contractor employees for purposes of the C³RS IMOU. FRA will post all C³RS IMOs to the Federal Docket Management System’s website at <https://www.regulations.gov>.

Close call means an unsafe event or sequence of unsafe events that had a potential for more serious adverse consequences to railroad safety and has been reported to C³RS and accepted by both the independent third party and the Peer Review Team (PRT) as a reportable close call in accordance with

all applicable provisions of a C³RS IMOU.

Confidential Close Call Reporting System (C³RS) means an FRA-sponsored voluntary program designed to improve the safety of railroad operations by allowing railroad workers to confidentially report currently unreported or underreported unsafe events without the repercussions of suspension or revocation of certification.

Electronic device has the meaning assigned by § 220.5 of this chapter.

Hazardous material means a commodity designated as a hazardous material by part 172 of this title.

ID strip means the identification strip the independent third party issues to an employee who has reported a close call to C³RS to indicate that the independent third party has accepted the close call.

Independent third party means the non-FRA organization that manages C³RS, accepts close call reports, and protects the confidentiality of both a reporting employee and a participating railroad.

Peer Review Team (PRT) is a problem-solving team consisting of representatives for the primary stakeholders to a C³RS IMOU, including FRA, the participating railroad, and any participating non-profit employee labor organization(s).

Personal electronic device has the meaning assigned by § 220.5 of this chapter.

■ 7. Amend § 242.403 by revising paragraph (b) and paragraph (c)(1) and adding a new paragraph (f)(5) to read as follows:

§ 242.403 Criteria for revoking certification.

(b) Except as provided in paragraph (f)(5) of this section, it shall be unlawful to fail to comply with any of the railroad rules and practices described in paragraph (e) of this section.

(c) (1) Except as provided in paragraph (f)(5) of this section, a certified conductor who has demonstrated a failure to comply with railroad rules and practices described in paragraph (e) of this section shall have his or her certification revoked.

(f) (5) In accordance with § 242.407(i)(3), a railroad shall not deny or revoke an

employee’s certification based on an alleged violation of the railroad’s operating rules or practices that the employee reported to C³RS as a close call and was accepted as a close call by both the independent third party and the PRT in accordance with all applicable provisions of a C³RS IMOU.

■ 8. Amend § 242.407 by revising paragraph (i) to read as follows:

§ 242.407 Process for revoking certification.

(i) A railroad:

(1) Shall not revoke the person’s certification as provided for in paragraph (a) of this section if sufficient evidence exists to establish that an intervening cause prevented or materially impaired the conductor’s ability to comply with the railroad operating rule or practice which constitutes a violation under § 242.403(e)(1) through (e)(11).

(2) May decide not to revoke the person’s certification as provided for in paragraph (a) of this section if sufficient evidence exists to establish that the violation of § 242.403(e)(1) through (e)(11) was of a minimal nature and had no direct or potential effect on rail safety.

(3)(i) Shall not suspend or revoke the person’s certification as provided for in paragraph (a) of this section if the person reported the alleged violation of the railroad’s operating rule or practice that constitutes a violation under § 242.403(e)(1) through (11) to C³RS as a close call; and if the person’s report was accepted as a close call by both the independent third party and the PRT in accordance with all applicable provisions of a C³RS IMOU.

(ii)(A) If a railroad initiates suspension or revocation of the person’s certification and the person indicates the alleged violation was reported to C³RS as a close call, the time limits prescribed in this section for pursuing certificate suspension or revocation will be put in abeyance, pending provision of an ID strip from the reporting employee, or the employee’s designated representative, to the investigating officer or presiding officer and confirmation from the PRT that the alleged violation was reported and accepted as a close call.

(B) A determination made by the independent third party or the PRT regarding whether a report was accepted as a close call may not be overturned pursuant to the administrative hearing and dispute resolution procedures in subpart F of this part, but may be included as a finding of fact for

purposes of determining whether the railroad impermissibly revoked a person's certification for an alleged violation that was reported and accepted as a close call by both the third party and the PRT.

(C) Paragraph (i)(3) of this section will not apply to any alleged violation of a railroad's operating rules or practices that constitutes a violation under § 242.403(e)(1) through (11) that involves:

(1) An event that caused or is alleged to have caused death, injury, illness, or medical treatment of any kind to any person (including a passenger) involved in the event;

(2) An event that results in damages above the current monetary rail equipment accident/incident reporting threshold described in part 225 of this chapter and published annually by FRA;

(3) An event that results in a highway-rail grade crossing accident/incident, as described in § 225.19(b) of this chapter;

(4) A willful violation of a Federal railroad safety law or railroad operating rule or practice, including the prohibited use of alcohol or a controlled substance;

(5) A substance abuse disorder;

(6) An event resulting in the identifiable release of a hazardous material;

(7) An act of sabotage or other criminal offense; or

(8) An event involving use of a personal electronic device that is prohibited by a Federal railroad safety law or railroad operating rule.

Issued in Washington, DC.

Kyle D. Fields,

Chief Counsel.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 242

[Docket No. FRA–2025–0133]

RIN 2130–AD61

Miscellaneous Revisions to the Qualification and Certification of Conductors

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This proposed rule would update FRA's conductor certification requirements by reducing the

information that is required on a conductor's certificate and allowing certificates to be electronic. FRA is also proposing changes to the certification revocation process and the Administrative Hearing Officer (AHO) process. Lastly, FRA is proposing other administrative updates including revising definitions and correcting errors in the regulatory text.

DATES: Comments on the proposed rule must be received by September 2, 2025. FRA may consider comments received after that date, but only to the extent practicable.

ADDRESSES:

Comments: Comments related to Docket No. FRA–2025–0133 may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket number (FRA–2025–0133), and Regulatory Identification Number (RIN) for this rulemaking (2130–AD61). All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT:

Christian Holt, Staff Director-Operating Practices Division, Federal Railroad Administration, telephone: 202–366–0978, email: christian.holt@dot.gov; or Michael C. Spinnicchia, Attorney Adviser, Federal Railroad Administration, telephone: 202–713–7671, email: michael.spinnicchia@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Consistent with the deregulatory agenda of President Donald J. Trump and Secretary of Transportation Sean P. Duffy, which seeks to unleash America's economic prosperity without compromising transportation safety, FRA is reviewing its regulatory requirements in parts 200 through 299 of Title 49, Code of Federal Regulations (CFR). The requirements for FRA-regulated entities to certify conductors are established in 49 CFR part 242,

“Qualification and Certification of Conductors.” Some of the requirements contained in part 242 could be updated to reduce burdens, make technical or conforming changes, ensure due process or constitutionality, or otherwise adjust to advancing technology without any adverse effect on railroad safety. Please review the SECTION-BY-SECTION ANALYSIS below for the relevant information related to each proposed change.

II. Section-by-Section Analysis

§ 242.7 Definitions

To be consistent with 49 CFR 209.5, FRA is proposing to amend this section by adjusting the definitions for “File, filed and filing” and “Serve or service.” In this rule, FRA would amend the definition of “File, filed and filing” to mean submission of a document under this part on the date when the DOT Docket Clerk or FRA receives it, or if served as that term is defined under 49 CFR 209.5, the date of service. FRA also proposes adding a comma after the word “filed.” Further, FRA proposes amending the definition of “Serve or service,” in the context of serving documents, to have the meaning given in § 209.5.

§ 242.11 Penalties and Consequences for Noncompliance

FRA is proposing to amend paragraph (a) of this section by replacing references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA is proposing to add language to this section referring readers to 49 CFR part 209, appendix A, where FRA specifies statutorily provided civil penalty amounts updated for inflation. FRA is also proposing to amend this section to update the web address from www.fra.dot.gov to <https://railroads.dot.gov/>.

Section 242.201 Time Limitations for Certification

Paragraph (a) of this section currently lists four scenarios where a railroad shall not certify or recertify a person as a conductor. Paragraph (a)(3) states railroads cannot make certification decisions based on a knowledge examination that was conducted more than 366 days before the date of the railroad's certification decision. Paragraph (a)(4) is intended to provide an exception to paragraph (a)(3) that allows for railroads to rely on knowledge examinations performed in the 24 months prior to the certification

decision *if* the railroad administers its knowledge testing program at intervals that do not exceed 24 months.¹ However, the way this section is written, a railroad that conducts its knowledge testing exams on a two-year cycle would still be prohibited from relying on a knowledge exam performed more than 366 days before the certification decision under paragraph (a)(3). This is a clear drafting error that does not conform with the intent of the regulation and makes paragraph (a)(4) superfluous. Therefore, FRA is proposing to amend paragraph (a)(3) to add “except as provided for in paragraph (a)(4) of this section” at the end of the paragraph to clarify that paragraph (a)(4) provides an exception to the limitation in paragraph (a)(3).

Section 242.207 Certificate Components

As part of the requirement that conductors be certified, railroads must issue certificates to those individuals that they certify. This section details what information must be included in these certificates.

Paragraph (a)(3) of this section states that the certificate must identify the person to whom the certificate is being issued. This must include the person's name, employee identification number, the year of birth, and either a physical description or photograph of the person. FRA is proposing to remove the requirement that the certificate include the person's year of birth.

In 2023, FRA issued NPRMs proposing the establishment of certification requirements for dispatchers and signal employees.² The Association of American Railroads (AAR) and the American Short Line and Regional Railroad Association (ASLRRA) submitted joint comments to both NPRMs requesting that FRA remove the year of birth requirement from dispatcher and signal employee certificates.³ In support of their comment, AAR and ASLRRA noted that a person's birth year provides little to no assistance in confirming a person's identity and there are other ways, such as a physical description or photograph, that better serve this purpose. When FRA issued the final rules establishing dispatcher and signal employee certification, the agency agreed with AAR and ASLRRA's rationale that it was unnecessary to include the year of birth on the certificates, and this requirement was removed from the final

rules.⁴ For similar reasons, FRA is proposing removing the requirement that a person's year of birth be included on their conductor certificate.

Paragraph (a)(7) of this section states the certificate must be sufficiently small to permit being carried in an ordinary pocket wallet. FRA is proposing amending this paragraph to allow railroads to issue electronic certificates. Section 242.211(b) already provides for railroads to issue temporary replacement certificates electronically, and FRA does not find any safety concerns with extending this allowance to the certificates issued under this section. Electronic certificates would allow for railroads to issue certificates more efficiently while also making it much less likely that a railroad would have to issue a replacement certificate under § 242.211. Lastly, while FRA is not proposing any revisions to paragraph (a)(6) of this section, which requires that a certificate be signed by an individual designated in accordance with paragraph (b) of this section, based on the proposed revision to paragraph (a)(7), it logically follows that FRA would allow for electronic signatures under this proposed rule.

Section 242.407 Process for Revoking Certification

Many railroads issue their written decisions to revoke a person's certification without findings of fact and a clear application of the regulation. That approach conflicts with an existing requirement in paragraph (c)(11) of this section which requires that each railroad decision must include “the findings of fact as well as the basis therefor, concerning all material issues of fact presented on the record and citations to all applicable railroad rules and practices.” Although paragraph (d) allows a railroad to use hearing procedures under an applicable collective bargaining agreement, and such an agreement might not contain the same or similar requirements as in paragraph (c)(11), including findings of fact is normally what would be expected in such a decision. Thus, a railroad's failure to include such basic information in a decision has led to an inefficient and more complicated process. For instance, a railroad's failure to include findings of fact in its revocation decision means that the person who is challenging the decision cannot quickly and effectively pinpoint whether the basis for the parties' disagreement is based on a

misunderstanding or material disagreement of the facts.

FRA's Operating Crew Review Board (OCRB), which is delegated the authority to review a person's challenge to a railroad's revocation decision, has similarly been less efficient in its review because it must spend an inordinate amount of time dissecting the evidentiary record in a way that exceeds the appropriate, accelerated consideration of a case envisioned by this certification review. Railroads often include findings of fact in their responses to petitions filed with the OCRB, but that is too late in the process to give the affected conductor an opportunity to consider the findings of fact and respond. To obviate this inefficient process, FRA proposes to revise paragraph (d) of this section to clarify that written findings of fact and application of the regulation must always be provided in a railroad's written decision prior to consideration of a case before the OCRB, regardless of any alternative requirement provided in a collective bargaining agreement. This amendment would be deregulatory insofar as it provides required information to the affected person earlier in the certification revocation process, ensuring due process for conductors subject to the certification requirements in part 242, and increasing efficiency of the process.

Section 242.509 Hearings

Executive Order (E.O.) 14219, Ensuring Lawful Governance and Implementing the President's “Department of Government Efficiency” Deregulatory Initiative (90 FR 10583, Feb. 19, 2025), requires agencies to review regulations for a variety of concerns and rescind or modify such regulations identified. This section raises concerns due to its potential shifting of the burden of proof. The existing regulation grants a party adversely affected by an OCRB decision the right to a *de novo* hearing before an AHO with more robust evidentiary and procedural protections than the expedited OCRB proceeding but shifts the burden of proof at this AHO hearing stage to the party that was adversely affected by the OCRB decision. In cases where the conductor or conductor candidate was the party adversely affected by the preceding OCRB decision, the burden of proof at the AHO hearing stage currently shifts to the impacted conductor/conductor candidate.

To correct for this concern, FRA proposes to amend paragraph (q) of this section to clarify that the railroad taking a certification action is always the

¹ 84 FR 20472, 20485 (May 9, 2019).

² 88 FR 35574 (May 31, 2023); 88 FR 35632 (May 31, 2023).

³ FRA–2022–0019–0041; FRA–2022–0020–0035.

⁴ 89 FR 44766, 44789 (May 21, 2024); 89 FR 44830, 44859 (May 21, 2024).

petitioner at the AHO hearing stage and always bears the burden of proof by a preponderance of the evidence. FRA acknowledges that while this approach provides additional protections for a conductor or conductor candidate who has been subject to a denial or revocation of certification with related impacts on his or her livelihood, this burden could now shift to railroads. However, FRA expects the burden to be negligible. FRA requests comments on the extent of this shift in burden and any potential impacts.

Paragraph (r) of this section notes that FRA will be a mandatory party to the administrative hearing and will be a respondent at the start of the hearing. FRA is proposing to delete the requirement that FRA be a respondent at the start of each proceeding. Under the proposed revisions to paragraph (q) of this section, the hearing respondent would always be the conductor or conductor candidate. FRA is more likely to align with the party who received a favorable decision before the OCRB, which could be, with the proposed changes to paragraph (q), either the petitioner or respondent at the AHO hearing stage. Therefore, it would no longer make sense for FRA to always be the respondent at the AHO hearing stage.

FRA is also requesting comments on whether it should remove paragraph (r) in its entirety and no longer require that FRA be a mandatory party to the administrative hearing.

Lastly, under these proposed changes, if FRA is a mandatory party and agrees with the railroad, FRA would be considered a hearing petitioner. However, in such circumstances, FRA would not be responsible for presenting any evidence, through witness testimony or exhibits, in support of the railroad's case. That responsibility would remain with the railroad.

III. Regulatory Impact and Notices

A. E.O. 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

FRA has considered the impact of this NPRM under E.O. 12866 (58 FR 51735, Oct. 4, 1993), Regulatory Planning and Review, and DOT Regulatory Policies and Procedures. The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this NPRM is not a significant regulatory action under section 3(f) of E.O. 12866.

FRA expects this NPRM would update FRA's conductor certification requirements by reducing the information that is required on a

conductor's certificate and by allowing certificates to be electronic and proposes other administrative updates including revising definitions and correcting errors in the regulatory text. While some additional burdens may be added from the proposed changes to the revocation of certification requirements, FRA estimates that the overall benefits of this proposed rule would outweigh any potential burdens. Moreover, this proposed rule would provide additional benefits to regulated entities and the U.S. government, by clarifying, simplifying, and updating the language of part 242. This rule would also decrease the information requested on a conductor's certificate. FRA requests any comments from the public on the impacts of this proposed rule.

B. E.O. 14192 (Unleashing Prosperity Through Deregulation)

E.O. 14192, Unleashing Prosperity Through Deregulation (90 FR 9065, Jan. 31, 2025), requires that for "each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination."⁵ Implementation guidance for E.O. 14192 issued by OMB (Memorandum M–25–20, Mar. 26, 2025) defines an E.O. 14192 deregulatory action as "an action that has been finalized and has total costs less than zero."⁶ This proposed rulemaking is expected to have total costs less than zero, and therefore, if finalized, it would be considered an E.O. 14192 deregulatory action. While FRA affirms that each amendment proposed in this NPRM has a cost that is negligible or "less than zero" consistent with E.O. 14192, FRA still requests comment on the extent of the cost savings for the changes proposed in this NPRM.

C. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996,⁷ requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities, and mandates that

⁵ Executive Office of the President. *Executive Order 14192 of January 31, 2025. Unleashing Prosperity Through Deregulation*. 90 FR 9065–9067. Feb. 6, 2025.

⁶ Executive Office of the President. Office of Management and Budget. *Guidance Implementing Section 3 of Executive Order 14192, Titled "Unleashing Prosperity Through Deregulation."* Memorandum M–25–20. March 26, 2025.

⁷ Public Law 104–121, 110 Stat. 857 (Mar. 29, 1996).

agencies strive to lessen any adverse effects on these businesses. The term *small entities* comprises small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000 (5 U.S.C. 601(6)).

No regulatory flexibility analysis is required, however, if the head of an Agency or an appropriate designee certifies that the rule will not have a significant economic impact on a substantial number of small entities. This proposed rule would not preclude small entities from continuing existing practices that comply with part 242; it merely offers clarity and updates that could result in benefits, if a small entity or other regulated entity chooses to utilize those flexibilities. By extending this regulatory relief, many regulated entities, including small entities, would experience some benefits. Consequently, FRA certifies that the proposed action would not have a significant economic impact on a substantial number of small entities.

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FRA wants to assist small entities in understanding this proposed rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

D. Paperwork Reduction Act

This proposed rule offers regulatory flexibilities, and there is no new information collection requirement, in accordance with the Paperwork Reduction Act of 1995, U.S.C. 3501 *et seq.*, therefore, an information collection submission to OMB is not required. The recordkeeping and reporting requirements already contained in Part 242 became effective when it was approved by OMB on October 24, 2024. The OMB approval number is 2130–0596, and OMB approval expires on October 31, 2027.

E. Environmental Assessment

FRA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FRA has determined that this rule is categorically

excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

F. Federalism Implications

This proposed rule will not have a substantial effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with E.O. 13132, “Federalism” (64 FR 43255, Aug. 10, 1999), preparation of a Federalism Assessment is not warranted.

G. Unfunded Mandates Reform Act of 1995

This proposed rule would not result in the expenditure, in the aggregate, of \$100,000,000 or more, adjusted for inflation, in any one year by State, local, or Indian Tribal governments, or the private sector. Thus, consistent with section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1532), FRA is not required to prepare a written statement detailing the effect of such an expenditure.

H. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.”⁸ FRA has evaluated this proposed rule in accordance with E.O. 13211 and determined that this proposed rule is not a “significant energy action” within the meaning of E.O. 13211.

I. E.O. 13175 (Tribal Consultation)

FRA has evaluated this proposed rule in accordance with the principles and criteria contained in E.O. 13175, Consultation and Coordination with Indian Tribal Governments, dated November 6, 2000. The proposed rule would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal laws. Therefore, the funding and consultation requirements of E.O. 13175 do not apply, and a tribal summary impact statement is not required.

J. International Trade Impact Assessment

The Trade Agreement Act of 1979⁹ prohibits Federal agencies from engaging in any standards or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and where appropriate, that they be the basis for U.S. standards. This rulemaking is purely domestic in nature and is not expected to affect trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

K. Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to <http://www.regulations.gov>, as described in the system of records notice, DOT/ALL–14 FDMS, accessible through www.transportation.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

L. Rulemaking Summary

As required by 5 U.S.C. 553(b)(4), a summary of this rule can be found at regulations.gov, Docket No. FRA–2025–0133, in the **SUMMARY** section of this proposed rule.

List of Subjects in 49 CFR Part 242

Administrative practice and procedure, Conductor, Penalties, Railroad employees, Railroad operating procedures, Railroad safety, Reporting and recordkeeping requirements.

The Proposed Rule

For the reasons discussed in the preamble, FRA proposes to amend part 242 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 242—QUALIFICATION AND CERTIFICATION OF CONDUCTORS

■ 1. The authority citation for part 242 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20135, 20138, 20162, 20163, 21301, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 2. In § 242.7, revise the definitions of “File, filed and filing” and “Serve or service” to read as follows:

§ 242.7 Definitions.

* * * * *

File, filed, and filing mean submission of a document under this part on the date when the DOT Docket Clerk or FRA receives it, or if served as that term is defined under 49 CFR 209.5, the date of service.

* * * * *

Serve or service, in the context of serving documents, has the meaning given in 49 CFR 209.5. The computation of time provisions in Rule 6 of the Federal Rules of Civil Procedure as amended are also applicable in this part. *See also* the definition of “file, filed, and filing” in this section.

* * * * *

■ 3. Revise § 242.11(a) to read as follows:

§ 242.11 Penalties and consequences for noncompliance.

(a) A person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation. However, penalties may be assessed against individuals only for willful violations, and a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed, where: (1) a grossly negligent violation, or a pattern of repeated violations, has created an imminent hazard of death or injury to persons, or (2) a death or injury has occurred. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. See FRA’s website at <https://railroads.dot.gov> for a statement of agency civil penalty policy.

* * * * *

■ 4. Revise § 242.201(a)(3) to read as follows:

§ 242.201 Time limitations for certification.

(a) * * *

(3) A determination concerning demonstrated knowledge and the knowledge examination being relied on was conducted more than 366 days before the date of the railroad’s certification decision except as provided for in paragraph (a)(4) of this section; or

* * * * *

■ 5. Revise § 242.207(a)(3) and (7) to read as follows:

⁸ 66 FR 28355 (May 22, 2001).

⁹ 19 U.S.C. Ch. 13.

§ 242.207 Certificate components.

(a) * * *

(3) Identify the person to whom it is being issued (including the person's name, employee identification number, and either a physical description or photograph of the person);

* * * * *

(7) Be electronic or be of sufficiently small size to permit being carried in an ordinary pocket wallet.

* * * * *

■ 6. Revise § 242.407(d) to read as follows:

§ 242.407 Process for revoking certification.

* * * * *

(d) A hearing required by this section which is conducted in a manner that conforms procedurally to the applicable collective bargaining agreement shall be deemed to satisfy the procedural requirements of this section except that the railroad's decision must comply with the requirements in paragraph (c)(11) of this section.

* * * * *

■ 7. Revise § 242.509(q) and (r) to read as follows:

§ 242.509 Hearings.

* * * * *

(q) Regardless of the prevailing party before the Operating Crew Review Board, the railroad involved in taking the certification action shall be the "hearing petitioner" and shall have the burden of proving its case by a preponderance of the evidence. The impacted conductor or conductor candidate shall be the "hearing respondent."

(r) FRA will be a mandatory party to the administrative hearing.

* * * * *

Issued in Washington, DC.

Kyle D. Fields,
Chief Counsel.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION**Federal Transit Administration****49 CFR Part 602**

[Docket No. FTA-2025-0012]

RIN 2132-AB61

Emergency Relief Program

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: FTA proposes to reduce the regulatory burden on grant recipients by extending the baseline period to establish a waiver of certain administrative requirements related to FTA's Public Transportation Emergency Relief Program.

DATES: Comments should be filed by September 2, 2025. FTA will consider comments received after that date to the extent practicable.

ADDRESSES: You may send comments, identified by docket number FTA-2025-0012 by any of the following methods:

- *Federal Rulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for sending comments.
- *Fax:* (202) 493-2251.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12-140, Washington, DC 20590-0001.
- *Hand Delivery/Courier:* West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

Instructions: All submissions received must include the agency name and docket number or Regulatory Information Number (RIN) for this rulemaking. All comments received will be posted without change to <https://www.regulations.gov>, including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov>. Background documents and comments received may also be viewed at the U.S. Department of Transportation, 1200 New Jersey Ave. SE, Docket Operations, M-30, West Building Ground Floor, Room W12-140, Washington, DC 20590-0001, between 9 a.m. and 5 p.m. EST, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: For program matters, contact Thomas Wilson, Office of Program Management, telephone at (202) 366-5279 or thomas.wilson@dot.gov. For legal matters, contact Diane Alexander, Attorney-Advisor, FTA, telephone at 202-366-3101 or diane.alexander@dot.gov. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:**I. Background**

Under Section 20017 of The Moving Ahead for Progress in the 21st Century

Act (MAP-21, Pub. L. 112-141) (2012), codified at 49 U.S.C. 5324, Congress authorized FTA to establish and implement the Public Transportation Emergency Relief Program (the Program). The Program allows FTA to make grants for eligible public transportation capital and operating costs in the event of a catastrophic event, such as a natural disaster, that affects a wide area, as a result of the Governor of a State declaring an emergency and the Secretary of Transportation concurring, or the President declaring a major disaster under section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act, 42 U.S.C. 5170). On March 29, 2013, FTA published an interim final rule implementing this statutory requirement and request for comments (78 FR 19136). On October 7, 2014, FTA published a final rule establishing procedures governing the implementation of FTA's Public Transportation Emergency Relief Program (79 FR 60349).

After more than 10 years of administering the Program, FTA proposes to reduce the regulatory burden on grant recipients to align with actual practice and extend the baseline time period for a waiver from certain administrative requirements.

II. Discussion of Major Changes

To reduce the burden for grant recipients, FTA proposes to modify section 602.15(b)(2) to establish a longer baseline time period within which grant recipients can qualify for a waiver of certain administrative requirements in order to obtain emergency relief funding. Currently, section 602.15(b)(2) establishes 45 days as the baseline time period for which FTA can determine whether certain FTA grant requirements, the requirements for E.O. 11988 floodplain analysis, and the labor protection requirements at 49 U.S.C. 5333(b) are waived. As stated in the March 29, 2013, interim final rule (78 FR 19140) and the October 7, 2014, final rule (79 FR 60355-56, 60357), FTA may waive these requirements as necessary and appropriate for emergency repairs, permanent repairs, and emergency operating expenses.

FTA proposes to modify section 602.15(b)(2) to extend the baseline time period to 90 days to align the regulatory text with existing practice and reduce the regulatory burden on grant recipients. In the October 7, 2014, final rule, FTA justified establishing the 45-day baseline time period to align with FTA's charter service rule at 49 CFR 604.2(f) (79 FR 60356). However, after

administering the program for more than 10 years, FTA has determined this is an insufficient period of time to address emergencies in practice and it has frequently extended the time period to 90 days or longer, during prior emergency events.

Based on the foregoing, and to ensure consistency with Administration priorities, including E.O. 14192 (“Unleashing Prosperity Through Deregulation”), FTA seeks to implement this deregulatory action.

III. Regulatory Analyses and Notices

A. E.O.s 12866 and 13563 (Regulatory Review)

E.O. 12866 (“Regulatory Planning and Review”), as supplemented by E.O. 13563 (“Improving Regulation and Regulatory Review”), directs Federal agencies to assess the benefits and costs of regulations, to select regulatory approaches that maximize net benefits when possible, and to consider economic, environmental, and distributional effects. This action does not meet the criteria of a “significant regulatory action.” Therefore, the Office of Management and Budget (OMB) has not reviewed this action.

The proposed rule would increase the waiver period during eligible emergencies to align with current FTA practice as FTA has consistently extended the period to 90 days or longer during prior events. Although the proposed rule would not change existing practices for recipients, it would allow recipients greater predictability in planning for emergencies by ensuring that the regulation aligns with historical FTA practice and accordingly would have minor, unquantified cost savings.

B. E.O. 14192 (Deregulatory Action)

E.O. 14192 (“Unleashing Prosperity Through Deregulation”) requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.” Implementation Guidance for E.O. 14192, issued by OMB (Memorandum M–25–20, March 25, 2025) defines an E.O. 14192 deregulatory action as “an action that has been finalized and has total costs less than zero.”

This proposed rule, if finalized, is expected to have total costs less than zero, and therefore is expected to be an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires Federal agencies to assess the impact of a

regulation on small entities unless the agency determines the regulation is not expected to have a significant economic impact on a substantial number of small entities. Under the Act, public-sector organizations and local governments qualify as small entities if they serve a population of less than 50,000. This proposed rule does not create an economic impact; rather, this proposed rule would reduce regulatory burden by extending the baseline time period within which the FTA Administrator can waive certain administrative requirements for grant recipients. For this reason, FTA certifies this action will not have a significant economic impact on a substantial number of small entities.

D. Unfunded Mandates Reform Act of 1995

This final rule will not impose unfunded mandates as defined by the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, March 22, 1995, 109 Stat. 48). This rule does not include a Federal mandate that may result in expenditures of \$100 million or more in any one year, adjusted for inflation, by State, local, and tribal governments in the aggregate or by the private sector.

E. E.O. 13132 (Federalism Assessment)

E.O. 13132 (“Federalism”) requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. This action has been analyzed in accordance with the principles and criteria contained in E.O. 13132 dated August 4, 1999, and FTA determined this action would not have sufficient Federalism implications to warrant the preparation of a Federalism assessment. FTA also determined this action will not preempt any State law or regulation or affect the States’ ability to discharge traditional State governmental functions.

F. Paperwork Reduction Act

Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct, sponsor, or require through regulations. FTA has analyzed this rule under the Paperwork Reduction Act and believes it does not impose additional information collection requirements for the purposes of the Act above and beyond existing

information collection clearances from OMB.

G. National Environmental Policy Act

FTA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FTA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

H. E.O. 13175 (Tribal Consultation)

FTA has analyzed this rule under E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”) and it will not have substantial direct effects on one or more Indian tribes; will not impose substantial direct compliance costs on Indian tribal governments; and will not preempt tribal laws. Therefore, a tribal summary impact statement is not required.

I. E.O. 13211 (Energy Effects)

FTA has analyzed this action under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”). FTA has determined this action is not a significant energy action under that order and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, a Statement of Energy Effects is not required.

J. Privacy Act

Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review U.S. DOT’s complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477).

K. Regulation Identifier Number (RIN)

A Regulation Identifier Number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used

to cross-reference this rule with the Unified Agenda.

List of Subjects in 49 CFR Part 602

Disaster assistance, Grant programs—transportation, Mass transportation, Transportation.

For the reasons stated in the preamble, FTA proposes to amend title 49, Code of Federal Regulations, part 602, as set forth below:

PART 602—EMERGENCY RELIEF

■ 1. The authority citation for part 602 continues to read as follows:

Authority: 49 U.S.C. 5324 and 5334; 49 CFR 1.91.

■ 2. Amend Section 602.15 by revising paragraph (b)(2) to read as follows:

§ 602.15 Grant requirements.

(a) * * *

(b) * * *

(2) The FTA Administrator may determine certain requirements associated with public transportation programs are inapplicable as necessary and appropriate for emergency repairs, permanent repairs, emergency protective measures and emergency operating expenses incurred within 90 days of the emergency or major disaster, or longer as determined by FTA. If the FTA Administrator determines any requirement is inapplicable, the determination shall apply to all eligible activities undertaken with funds authorized under 49 U.S.C. 5324, as well as funds authorized under 49 U.S.C. 5307 and 5311 and used for eligible emergency relief activities.

* * * * *

Issued in Washington, DC, under authority delegated in 49 CFR 1.91.

Tariq Bokhari,

Acting Administrator.

[Docket No. FTA–2025–0010]

RIN 2132–AB59

Project Management Oversight

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: FTA is proposing to modify the applicability of project management oversight by raising the total cost and Federal investment thresholds to align with the statutory thresholds for Small Starts projects under FTA's Capital Investment Grant program.

DATES: Comments should be filed by September 2, 2025. FTA will consider comments received after that date to the extent practicable.

ADDRESSES: You may send comments, identified by docket number FTA–2025–0010, by any of the following methods:

- *Federal Rulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for sending comments.
- *Fax:* (202) 493–2251.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC, 20590–0001.
- *Hand Delivery/Courier:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

Instructions: All submissions received must include the agency name and docket number or Regulatory Information Number (RIN) for this rulemaking. All comments received will be posted without change to <https://www.regulations.gov>, including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov>. Background documents and comments received may also be viewed at the U.S. Department of Transportation, 1200 New Jersey Ave. SE, Docket Operations, M–30, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001, between 9 a.m. and 5 p.m. EST, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: For program matters, contact Corey Walker, Office of Program Management (TPM), (202) 366–0826 or corey.walker@dot.gov. For legal matters, contact Mark Montgomery, Office of Chief Counsel, (202) 366–1017 or mark.montgomery@dot.gov. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

 - C. Summary of Provisions
- II. Regulatory Analyses and Notices

I. Executive Summary

This NPRM proposes to amend the PMO regulation at 49 CFR part 633. The proposed rule would modify the applicability of project management oversight by raising the total cost threshold from \$300 million to \$400 million and the Federal investment threshold from \$100 to \$150 million, to align with the statutory thresholds for Small Starts projects under FTA's Capital Investment Grant (CIG) program. This amendment would reduce the number of projects subject to project management oversight requirements and therefore reduce regulatory burden.

A. Statutory Authority

This rulemaking is issued under the authority of 49 U.S.C. 5327, which requires the Secretary to conduct oversight of major capital projects and to promulgate a rule for that purpose that includes a definition of major capital project to delineate the types of projects governed by the rule.

B. Background

Recognizing a compelling need to strengthen the management and oversight of major capital projects, in the Surface Transportation and Uniform Relocation Assistance Act of 1987 (STURAA) (Pub. L. 100–17) (April 2, 1987), Congress authorized FTA's predecessor agency, the Urban Mass Transportation Administration (UMTA), to conduct oversight of major capital projects and to promulgate a rule for that purpose. The statute, now codified at 49 U.S.C. 5327, authorizes FTA to obtain the services of project management oversight contractors (PMOCs) to assist FTA in overseeing the expenditure of Federal financial assistance for major capital projects. Further, the statute requires FTA to promulgate a regulation that includes a definition of “major capital project” to identify the types of projects governed by the rule. Accordingly, UMTA promulgated a rule for oversight of major capital projects on September 1, 1989, at 49 CFR part 633 (54 FR 36708). At that time, the average total cost of CIG projects was \$266 million (not adjusted for inflation). The UMTA regulation defined “major capital project” as any project for the construction of a new fixed guideway or extension of an existing fixed guideway or a project involving the rehabilitation or modernization of an existing fixed guideway with a total project cost of \$100 million or more. The rule limited covered projects to those receiving funds made available under sections 3, 9, or 18 of the Urban Mass

Transportation Act of 1964, as amended; 23 U.S.C. 103(e)(4); or section 14(b) of the National Capital Transportation Amendments of 1979.

By 2011, the annual dollar value of the Federal transit capital programs was nearly five times the level authorized under STURAA in 1987, and the number of active PMOC task orders was more than double the number in 1987. Furthermore, FTA funded a larger number of projects with a total cost of more than one billion dollars that presented significant oversight challenges. On September 13, 2011, FTA published a Notice of Proposed Rulemaking (NPRM) (76 FR 56378) that proposed to: (1) enable FTA to identify the necessary management capacity and capability of a sponsor of a major capital project more clearly; (2) spell out the many facets of project management that must be addressed in a project management plan; (3) tailor the level of FTA oversight to the costs, complexities, and risks of a major capital project; (4) set forth the means and objectives of risk assessments for major capital projects and; (5) articulate the roles and responsibilities of FTA's PMOCs.

After the NPRM was published, however, the Moving Ahead for Progress in the 21st Century Act (MAP-21) (Pub. L. 112-141) (July 6, 2012) expanded the scope of the project management oversight requirements to cover major capital projects for public transportation under any provision of Federal law. Moreover, MAP-21 shifted the initiation of project management oversight to the project development phase and removed the statutory requirement that recipients of financial assistance for projects with a total cost of \$1 billion submit an annual financial plan. Given the fundamental changes to the project management oversight requirements and scope, FTA withdrew the NPRM (78 FR 16460) to reexamine its proposed definition of major capital project and its policy and procedures for risk assessment. Subsequently, the Fixing America's Surface Transportation (FAST) Act (Pub. L. 114-94) (December 4, 2015) further amended 49 U.S.C. 5327 to limit project management oversight to quarterly reviews, absent a finding that more frequent oversight was necessary, and mandated that the Secretary prescribe regulations outlining a process for at-risk recipients to return to quarterly reviews.

FTA has become much more knowledgeable about the risks common to major capital projects, having conducted its own risk assessments since 2005, witnessed some project sponsors' lack of management capacity

and capability and appropriate project controls for some projects, and studied the reasons for cost and schedule changes on many major capital projects. Consequently, on September 23, 2020, following a notice of proposed rulemaking (84 FR 44590) and an opportunity for comment, FTA published a final rule (85 FR 59672) that changed the applicability of the regulation by shifting the definition of a "major capital project" from one based on the type of project or total project cost to one based on both the amount of Federal financial assistance and the total project cost, which FTA views as a more appropriate benchmark than the type of project or total capital cost of a project alone.

The rule applied a project cost threshold to all fixed guideway capital projects. As a default, the rule raised the total project cost threshold to \$300 million or more and required that the project receive \$100 million or more in Federal investment to be subject to project management oversight. A key consideration for selecting these thresholds was that they reflect the thresholds Congress chose to distinguish Small Starts projects from New Starts projects in the CIG program. New Starts projects have more steps to complete in the CIG process and tend to be more complex, potentially requiring more oversight. Reducing the number of lower-risk Small Starts projects undergoing project management oversight will allow FTA to focus on higher-risk New Starts projects while yielding annual cost savings to FTA and its recipients.

Subsequently, the Infrastructure Investment and Jobs Act (Pub. L. 117-58; November 15, 2021) amended 49 U.S.C. 5309 to raise the thresholds for Small Starts projects in the CIG program to \$400 million or more in total costs and \$150 million or more in Federal investment. Accordingly, FTA proposes to amend the definition of "major capital project" under 49 CFR 633.5 to align with these statutory thresholds, consistent with the rationale in its 2020 final rule.

C. Summary of Provisions

FTA proposes to amend the definition of "major capital project" in 49 CFR 633.5 by raising the total cost and Federal investment thresholds to match those established for Small Starts projects under 49 U.S.C. 5309. The current regulation defines the term as a project to construct, expand, rehabilitate, or modernize a fixed guideway of \$300 million or more that receives \$100 million or more in Federal financial assistance. This NPRM

proposes to raise the thresholds to \$400 million and \$150 million, respectively.

II. Regulatory Analyses and Notices

Executive Order 12866 and 13563 (Regulatory Review)

E.O. 12866 ("Regulatory Planning and Review"), as supplemented by E.O. 13563 ("Improving Regulation and Regulatory Review"), directs Federal agencies to assess the benefits and costs of regulations and to select regulatory approaches that maximize net benefits when possible. OMB has determined the proposed rule is not significant within the meaning of E.O. 12866 and has not reviewed the rule under that order.

Project management oversight requirements apply to all major capital projects. The current definition of a "major capital project" includes all projects involving the construction, expansion, rehabilitation, or modernization of a fixed guideway with a total project cost of \$300 million or more and \$100 million or more in Federal investment. The proposed rule would increase the total project cost threshold to \$400 million and the Federal investment threshold to \$150 million.

Removing project management oversight from projects with total costs between \$300 and \$400 million and Federal investment between \$100 million and \$150 may increase the risk of materially exceeding budget or falling behind schedule for some projects; however, the potential negative impacts are not quantifiable. First, it is not the case that project management oversight eliminates the risk of cost or schedule overruns, nor that the lack of project management oversight necessarily implicates a high risk of such overruns.

Second, falling under the total cost and Federal investment thresholds does not preclude a project from receiving project management oversight. Section 633.5(e)(2) allows the Administrator to determine on a case-by-case basis that certain projects should be subject to project management oversight based on an assessment of risk, which would include an analysis of the likelihood of budget and schedule overruns. Of the 33 CIG projects currently in construction, FTA utilized this provision to designate six as major capital projects based on this risk assessment to receive additional oversight.

The proposed rule would result in cost savings for recipients and for FTA by reducing the number of capital projects subject to project management oversight. Removing the oversight requirements would reduce labor hours for oversight procedures, which include

attending meetings, preparing quarterly reports and other requested documents, and accompanying contractors at project construction sites.

Currently, there are 59 CIG and formula-funded major capital projects for public transportation subject to project management oversight. Seventeen of those projects have total costs between \$300 million and \$400 million or Federal investments between \$100 million and \$150 million. Eight of the projects between the existing and proposed thresholds have received grant agreements and are in construction. Those projects would not be impacted by the new thresholds under this proposed rule if it becomes a final rule. However, the remaining nine projects still in project development would no longer meet the definition of major capital project and not be subject to project management oversight requirements if the new thresholds become final before the project receives a grant agreement.

In 2020, FTA estimated that the oversight required approximately 1 FTE (full-time equivalent) of recipient time (2,080 hours) and 0.5 FTE of FTA staff time (1,040 hours) per project per year. Removing oversight requirements for nine projects annually would result in annual savings of 18,720 hours for recipients and 9,360 hours for FTA staff.

To estimate cost savings for project sponsors, FTA used May 2024 occupational wage data from the Bureau of Labor Statistics, the latest available as of May 2025, in the “Transit and Ground Passenger Transportation” industry (North American Industry Classification System code 485000).¹ To estimate the wages of agency staff completing the auditing requirements, FTA used the “General and Operations Managers” job category (code 11–1021). FTA used median hourly wages (\$42.45) as a basis for the estimates, multiplying the wages by 1.62 ($\$42.45 \times 1.62 = \$68.69$) to account for employer benefits.²

To estimate cost savings for FTA, FTA estimated an hourly wage of \$64.06 for oversight staff, based on the hourly wage rate for federal GS (General

Schedule) employees at step 5 of the GS–13 grade level in the Washington, DC locality pay area.³ The hourly rate was then multiplied by 1.62 to account for employer benefits ($\$64.06 \times 1.62 = \$103.65$).

The proposed rule would result in annual cost savings of \$2.3 million ($18,720 \text{ recipient hours} \times \$68.69 + 9,360 \text{ FTA hours} \times \$103.65$) in undiscounted 2024 dollars, \$1.9 million at a 3 percent discount rate (discounted to 2024), and \$1.5 million at a 7 percent discount rate over the ten year period from 2025 to 2035. Additionally, there would be cost savings for future FTA projects between \$300 million and \$400 million in total cost or \$100 million and \$150 million in Federal investment, that would have otherwise been subject to project management oversight under the current thresholds. However, because projects under the CIG and formula programs comprise a broad range of complexity, total costs, and amounts of Federal investment and vary from year to year, these cost savings are unquantifiable.

Executive Order 14192 (Deregulatory Action)

E.O. 14192 (“Unleashing Prosperity Through Deregulation”) requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.” Implementation Guidance for E.O. 14192, issued by OMB (Memorandum M–25–20, March 25, 2025) defines an E.O. 14192 deregulatory action as “an action that has been finalized and has total costs less than zero.” This proposed rule, if finalized, is expected to have total costs less than zero, and therefore is expected to be an E.O. 14192 deregulatory action.

Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (RFA) (5 U.S.C. 601 *et seq.*) requires Federal agencies to assess the impact of a regulation on small entities unless the agency determines that the regulation is not expected to have a significant economic impact on a substantial number of small entities.

This proposed rule would not change any requirements for public transportation projects with a total cost of \$400 million or more and Federal investment of \$150 million or more, nor for projects with a total cost of less than \$300 million and Federal investment of less than \$100 million. The NPRM would narrow the applicability of project management oversight

requirements, thereby reducing burden on capital projects with total costs between \$300 million and \$400 million and Federal investments between \$100 million and \$150 million. The only small entities impacted by the proposed rule would be project sponsors of projects with total costs and amounts of Federal investment between the existing and proposed thresholds, and that impact would be a burden reduction. FTA therefore certifies that the proposed rule would not have a significant effect on a substantial number of small entities.

Unfunded Mandates Reform Act of 1995

FTA has determined that this proposed rule does not impose unfunded mandates, as defined by the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, March 22, 1995). This rule does not include a Federal mandate that may result in expenditures of \$100 million or more in any one year, adjusted for inflation, by State, local, and tribal governments in the aggregate or by the private sector.

Executive Order 13132 (Federalism Assessment)

E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. This action has been analyzed in accordance with the principles and criteria contained in E.O. 13132, dated August 4, 1999, and FTA determined this action will not have a substantial direct effect or sufficient federalism implications on the States. FTA also determined this action will not preempt any State law or regulation or affect the States’ ability to discharge traditional State governmental functions.

Executive Order 12372 (Intergovernmental Review)

The regulations implementing E.O. 12372 regarding intergovernmental consultation on Federal programs and activities do not apply to this rulemaking.

Paperwork Reduction Act

In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), and OMB implementing regulation at 5 CFR 1320.8(d), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of

¹ Bureau of Labor Statistics. 2025. “May 2024 National Occupational Employment and Wage Estimates: United States: NAICS 485000—Transit and Ground Passenger Transportation.” <https://data.bls.gov/oes/#/industry/485000>.

² Multiplier derived using Bureau of Labor Statistics data on employer costs for employee compensation in December 2024 (<https://www.bls.gov/news.release/ecec.htm>). Employer costs for state and local government workers averaged \$63.46 an hour, with \$39.22 for wages and \$24.23 for benefit costs. To estimate full costs from wages, one would use a multiplier of $\$63.46/\$39.22$, or 1.62.

³ Office of Personnel Management. 2023. “Salary Table 2024–DCB.” https://www.opm.gov/policy-data-oversight/pay-leave/salaries-wages/salary-tables/pdf/2024/DCB_h.pdf.

information they conduct, sponsor, or require through regulations. The costs and burdens associated with the information collection requirements under 49 CFR part 633 are included in the individual information collections of FTA's major capital programs. FTA has analyzed this proposed rule under the Paperwork Reduction Act and determined that it does not impose additional information collection requirements for the purposes of the Act above and beyond the existing information collection clearances from OMB. If the final rule results in a measurable reduction in burden hours or costs associated with existing information collections, FTA will revise the relevant information collection requests accordingly in compliance with the Paperwork Reduction Act.

National Environmental Policy Act

FTA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FTA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), "[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives." This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary circumstances present in connection with this rulemaking.

Executive Order 13175 (Tribal Consultation)

FTA has analyzed this proposed rule under E.O. 13175, dated November 6, 2000, and it will not have substantial direct effects on one or more Indian Tribes; will not impose substantial direct compliance costs on Indian Tribal governments; and will not preempt tribal laws. Therefore, a Tribal summary impact statement is not required.

Executive Order 13211 (Energy Effects)

FTA has analyzed this action under E.O. 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. FTA has determined this action is not a significant energy action under that order and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, a Statement of Energy Effects is not required.

Privacy Act

Anyone can search the electronic form of all comments received into any

of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** at 65 FR 19477 (April 11, 2000).

Regulation Identifier Number

A Regulation Identifier Number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross-reference this proposed rule with the Unified Agenda.

List of Subjects in 49 CFR Part 633

Government contracts, Grant programs-transportation, Mass transportation, Reporting and recordkeeping requirements.

In consideration of the foregoing, and under the authority of 49 U.S.C. 5327 and 5334, and the delegation of authority at 49 CFR 1.91, the Federal Transit Administration proposes to amend title 49, Code of Federal Regulations, part 633, as set forth below:

PART 633—PROJECT MANAGEMENT OVERSIGHT

- 1. The authority citation for part 633 is revised to read as follows:

Authority: 49 U.S.C. 5327; 49 U.S.C. 5334; 49 CFR 1.91.

- 2. Revise § 633.5 to read as follows:

§ 633.5 Definitions.

* * * * *

Except as provided in § 633.19, Major capital project means a project that:

(1) * * *

(i) Has a total project cost of \$400 million or more and receives Federal funds of \$150 million or more; and

* * * * *

Issued in Washington, DC, under authority delegated in 49 CFR 1.91.

Tariq Bokhari,

Acting Administrator.

Federal Transit Administration

49 CFR Part 650

[Docket No. FTA-2025-0011]

RIN 2132-AB60

Private Investment Project Procedures

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: In this action, the Federal Transit Administration (FTA) seeks to reduce the regulatory burden on recipients subject to FTA's private investment procedures by removing an unnecessary reporting requirement.

DATES: Comments should be filed by July 31, 2025. FTA will consider comments received after that date to the extent practicable.

ADDRESSES: You may send comments, identified by docket number FTA-2025-0011 by any of the following methods:

- *Federal Rulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for sending comments.
- *Fax:* (202) 493-2251.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Room W12-140, Washington, DC 20590-0001.

- *Hand Delivery/Courier:* West Building, Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

Instructions: All submissions received must include the agency name and docket number or Regulatory Information Number (RIN) for this rulemaking. All comments received will be posted without change to <https://www.regulations.gov>, including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov>. Background documents and comments received may also be viewed at the U.S. Department of Transportation, 1200 New Jersey Ave. SE, Docket Operations, West Building, Ground Floor, Room W12-140, Washington, DC 20590-0001, between 9 a.m. and 5 p.m. EST, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Please contact Mark Montgomery, Office of Chief Counsel, FTA, telephone at

202–684–5301 or mark.montgomery@dot.gov. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

I. Background

Section 20013(b)(1) of the Moving Ahead for Progress in the 21st Century Act (MAP–21), Public Law 112–141 (July 6, 2012), required FTA to identify any provisions of 49 U.S.C. chapter 53, and any regulations or practices thereunder, that impede greater use of public-private partnerships and private investment and to develop and implement, on a project basis, procedures and approaches that address such impediments. Section 20013(b)(1) of MAP–21 provided FTA discretion in addressing impediments to public-private partnerships.

On May 30, 2018, FTA published the final rule promulgating the Private Investment Project Procedures at 49 CFR part 650 with the primary goal of promoting the use of public-private partnerships and private investment in public transportation capital projects (83 FR 24672). Since issuing the final rule, FTA has determined that a reporting requirement, not required by MAP–21, has never been used and is inconsistent with FTA's purpose for issuing the rule.

II. Discussion of Major Changes

To reduce the burden for recipients, FTA proposes to remove subpart C (Reporting) from 49 CFR part 650. This subpart requires recipients with projects for which the Administrator has modified or waived any FTA requirement pursuant to 49 CFR 650.11, to submit to FTA a report evaluating the effects of the modification or waiver on the delivery of the project. This subpart requires the report to describe the modification or waiver applied to the project; evaluate the success or failure of the modification or waiver; evaluate the extent to which the modification or waiver addressed impediments to greater use of public-private partnerships and private investment in public transportation capital projects; and may include recommended changes with an explanation of how the changes would encourage greater use of public-private partnerships and private investment in public transportation capital projects. Under the current regulation, an initial report is due one year after completing construction of the project and, for projects that include private entity involvement in operations or maintenance, a second report is due two years after the project begins revenue operations.

Since issuing this rule, FTA has not received any reports pursuant to this section and thus determined this requirement is unnecessary and fails to promote public-private partnerships because it adds an additional burden to recipients that seek modification or waiver. Therefore, FTA proposes to promote public-private partnerships and reduce unnecessary regulatory burdens on FTA recipients by removing this subpart and reporting requirement.

To ensure consistency with the objectives of part 650, as well as Administration priorities, including Executive Order (E.O.) 14192 (“Unleashing Prosperity Through Deregulation”), FTA proposes this deregulatory action.

III. Regulatory Analyses and Notices

A. Executive Orders 12866 and 13563 (Regulatory Review)

E.O. 12866 (“Regulatory Planning and Review”), as supplemented by E.O. 13563 (“Improving Regulation and Regulatory Review”), directs Federal agencies to assess the benefits and costs of regulations and to select regulatory approaches that maximize net benefits when possible. This action does not meet the criteria of a “significant regulatory action.” Therefore, the Office of Management and Budget (OMB) has not reviewed this action.

The proposed rule would eliminate a reporting requirement for recipients receiving a modification or waiver pursuant to 49 CFR 650.11. To date, no recipient has submitted a report. Although recipients would not experience direct cost savings from removing the reporting requirement if they do not need to submit reports, removing the requirement could reduce the time needed for recipients to understand federal requirements.

B. Executive Order 14192 (Deregulatory Action)

E.O. 14192 (“Unleashing Prosperity Through Deregulation”) requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.” Implementation Guidance for E.O. 14192, issued by OMB (Memorandum M–25–20, March 25, 2025) defines an E.O. 14192 deregulatory action as “an action that has been finalized and has total costs less than zero.” This proposed rule, if finalized, is expected to have total costs less than zero, and therefore is expected to be an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires Federal

agencies to assess the impact of a regulation on small entities unless the agency determines the regulation is not expected to have a significant economic impact on a substantial number of small entities.

FTA has determined that the proposed rule would not have a significant effect on a substantial number of small entities. The proposed rule would eliminate a reporting requirement for recipients receiving a modification or waiver pursuant to 49 CFR 650.11. To date, no recipient has submitted a report.

D. Unfunded Mandates Reform Act of 1995

FTA has determined that this rule would not impose unfunded mandates, as defined by the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). This rule does not include a Federal mandate that may result in expenditures of \$100 million or more in any one year, adjusted for inflation, by State, local, and tribal governments in the aggregate or by the private sector.

E. Executive Order 13132 (Federalism Assessment)

E.O. 13132 (“Federalism”) requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. This action has been analyzed in accordance with the principles and criteria contained in E.O. 13132 dated August 4, 1999, and FTA determined this action does not have sufficient Federalism implications to warrant the preparation of a Federalism assessment. FTA also determined this action will not preempt any State law or regulation or affect the States' ability to discharge traditional State governmental functions.

F. Paperwork Reduction Act

Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct, sponsor, or require through regulations. FTA has analyzed this rule under the Paperwork Reduction Act and determined it does not impose additional information collection requirements for the purposes of the Act above and beyond existing information collection clearances from OMB.

G. National Environmental Policy Act

Federal agencies are required to adopt implementing procedures for the National Environmental Policy Act (NEPA) that establish specific criteria for, and identification of, three classes of actions: (1) Those that normally require preparation of an Environmental Impact Statement, (2) those that normally require preparation of an Environmental Assessment, and (3) those that are categorically excluded from further NEPA review. This rule qualifies for categorical exclusions under 23 CFR 771.118(c)(4) (planning and administrative activities that do not involve or lead directly to construction). FTA has evaluated whether the rule will involve unusual or extraordinary circumstances and has determined that it will not.

H. Executive Order 13175 (Tribal Consultation)

FTA has analyzed this rule under E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”) and it will not have substantial direct effects on one or more Indian tribes; will not impose substantial direct compliance costs on Indian tribal governments; and will not preempt tribal laws. Therefore, a tribal summary impact statement is not required.

I. Executive Order 13211 (Energy Effects)

FTA has analyzed this action under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”). FTA has determined this action is not a significant energy action under that order and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, a Statement of Energy Effects is not required.

J. Privacy Act

Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review U.S. DOT’s complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477).

K. Regulation Identifier Number (RIN)

A Regulation Identifier Number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the

heading of this document can be used to cross-reference this rule with the Unified Agenda.

List of Subjects in 49 CFR Part 650

Grant programs-transportation, Mass transportation, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, FTA proposes to amend title 49, Code of Federal Regulations, part 650, as set forth below:

PART 650—PRIVATE INVESTMENT PROJECT PROCEDURES

■ 1. The authority citation for part 650 continues to read as follows:

Authority: Sec. 20013(b)(5), Pub. L. 112–141, 126 Stat 405; 49 CFR 1.91.

Subpart C—Reporting [Removed and Reserved]

■ 2. Remove and reserve subpart C, consisting of § 650.21.

Issued in Washington, DC, under authority delegated in 49 CFR 1.91.

Tariq Bokhari,
Acting Administrator.

[Docket No. FTA–2025–0008]

RIN 2132–AB57

Rail Transit Roadway Worker Protection

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: In this action, the Federal Transit Administration (FTA) seeks to reduce the regulatory burden on State Safety Oversight Agencies (SSOAs) in conducting oversight of the Roadway Worker Protection (RWP) programs within the jurisdiction of a State. FTA proposes to extend the time period for reporting RWP programs to FTA and to allow SSOAs to complete annual audits simultaneously with other required audits.

DATES: Comments should be filed by July 31, 2025. FTA will consider comments received after that date to the extent practicable.

ADDRESSES: You may send comments, identified by docket number FTA–

2025–0008 by any of the following methods:

- **Federal Rulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for sending comments.

- **Fax:** (202) 493–2251.

- **Mail:** Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

- **Hand Delivery/Courier:** West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

Instructions: All submissions received must include the agency name and docket number or Regulatory Information Number (RIN) for this rulemaking. All comments received will be posted without change to <https://www.regulations.gov>, including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov>. Background documents and comments received may also be viewed at the U.S. Department of Transportation, 1200 New Jersey Ave. SE, Docket Operations, M–30, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001, between 9 a.m. and 5 p.m. EST, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: For program matters, contact Jeremy Furrer, Office of Transit Safety and Oversight, FTA, telephone at (202) 366–8929 or jeremy.furrer@dot.gov. For legal matters, contact Heather Ueyama, Attorney Advisor, FTA, telephone at 202–366–7374 or heather.ueyama@dot.gov. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:**I. Background**

On March 25, 2024, FTA published a notice of proposed rulemaking (NPRM) proposing to promulgate a Rail Transit Roadway Worker Protection rule at 49 CFR part 671 that would require rail transit agencies (RTAs) to implement a minimum, baseline RWP program to provide a standardized and consistent approach to protecting roadway workers (89 FR 20605). On October 31, 2024, FTA published a final rule establishing the RWP regulatory framework (89 FR 87166). During the comment period for the NPRM, FTA received comments concerning § 671.25, which address the role of SSOAs in overseeing the RWP program. Based on further

consideration, FTA proposes to address some of these comments in this NPRM.

II. Section-by-Section Analysis

To reduce a regulatory burden, FTA proposes to modify 49 CFR 671.25(a)(2) to allow SSOAs to submit RWP program information to FTA with their annual report. Currently, section 671.25(a)(2) requires SSOAs to submit each RTA's RWP program to FTA within 30 calendar days of approval. In reply to FTA's NPRM published March 25, 2024, FTA received comments from SSOAs recommending FTA add the RWP program submission requirement to the annual reporting process.¹ In the final rule, FTA declined to extend the 30-day submission period responsive to the comments. However, since administering this program, FTA has recognized the 30-day submission requirement is burdensome for SSOAs. In proposing to streamline the submission process by aligning the deadline with the SSOA annual report in section 674.39, FTA seeks to reduce regulatory burden.

FTA also proposes to amend 49 CFR 671.25(c)(1) to align with industry practice. In section 671.25(c)(1), FTA currently requires SSOAs to conduct an annual audit of the RTA's compliance with its RWP program. FTA explained in the preamble to the final rule (89 FR 87192) that SSOAs are allowed to combine audits "[t]o avoid redundancy," so long as the review meets "the RWP program audit requirements specified at § 671.25(c)." See also 89 FR 87211. Furthermore, in reply to a DOT-wide Request for Information seeking public comments on reducing regulatory burden (90 FR 14593), FTA received a comment from the American Public Transportation Association asking FTA to consider modifying section 671.25(c) based on existing audit practice and address the undue burden of completing non-simultaneous audits (Docket No. DOT-OST-2025-0026). FTA proposes to modify section 671.25(c)(1) to ensure this authorization is included in the regulatory text.

Based on the foregoing, and to ensure consistency with Administration priorities, including Executive Order 14192 ("Unleashing Prosperity Through Deregulation"), FTA seeks to implement this deregulatory action to reduce the regulatory burden on RTAs and SSOAs.

¹ FTA received comments from the Texas Department of Transportation (Comment ID No. FTA-2023-0024-5680), the Pennsylvania Department of Transportation (Comment ID No. FTA-2023-0024-7147), and the Transit Safety Oversight Association (Comment ID No. FTA-2023-0024-7174).

III. Regulatory Analyses and Notices

A. Executive Orders 12866 and 13563 (Regulatory Review)

E.O. 12866 ("Regulatory Planning and Review"), as supplemented by E.O. 13563 ("Improving Regulation and Regulatory Review"), directs Federal agencies to assess the benefits and costs of regulations and to select regulatory approaches that maximize net benefits when possible. It also directs the Office of Management and Budget (OMB) to review significant regulatory actions, including regulations with annual economic effects of \$100 million or more. OMB has determined the proposed rule is not significant within the meaning of Executive Order 12866 and has not reviewed the rule under that order.

The proposed rule would allow SSOAs to conduct their annual audits of RTA RWP programs simultaneously with other reviews. SSOAs could conduct the audits simultaneously with annual or triennial ASP reviews, for example, if the reviews meet RWP program audit requirements. The proposed rule would also allow SSOAs to submit RWP program information with their annual reports rather than within 30 calendar days of approval.

The proposed rule would result in cost savings for SSOAs and RTAs by streamlining auditing requirements. The rule would affect 31 SSOAs and 64 RTAs in operation as of May 30, 2025. In 2024, FTA estimated that SSOAs would spend 40 hours auditing each RTA RWP program, for a total of 2,560 hours per year. FTA estimates that allowing SSOAs to conduct the audits with other reviews would reduce the time needed from 40 hours to 20 hours, or 1,280 hours total. Allowing SSOAs to submit RWP program information with annual reports could result in additional cost savings as well.

To estimate cost savings, FTA used May 2024 occupational wage data from the Bureau of Labor Statistics, the latest available as of May 2025, in the "Transit and Ground Passenger Transportation" industry (North American Industry Classification System code 485000).² To estimate the wages of agency staff completing the auditing requirements, FTA used the "General and Operations Managers" job category (code 11-1021). FTA used median hourly wages (\$42.45) as a basis for the estimates, multiplying the wages by 1.62 ($\$42.45 \times 1.62 =$

\$68.69) to account for employer benefits.³

Over the next ten years, the rule would result in annual cost savings of \$87,000 (1,280 hours $\times$ \$68.69) in undiscounted 2024 dollars, \$73,000 at a 3 percent discount rate, and \$58,000 at a 7 percent discount rate, discounted to 2024.

B. Executive Order 14192 (Deregulatory Action)

E.O. 14192 ("Unleashing Prosperity Through Deregulation") requires that for "each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination." Implementation Guidance for E.O. 14192, issued by OMB (Memorandum M-25-20, March 25, 2025) defines an E.O. 14192 deregulatory action as "an action that has been finalized and has total costs less than zero."

This proposed rule, if finalized, is expected to have total costs less than zero, and therefore is expected to be an E.O. 14192 deregulatory action.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires Federal agencies to assess the impact of a regulation on small entities unless the agency determines that the regulation is not expected to have a significant economic impact on a substantial number of small entities.

FTA has determined that the proposed rule would not have a significant effect on a substantial number of small entities. The proposed rule would streamline auditing and reporting requirements for SSOAs and RTAs. Under the Regulatory Flexibility Act, public-sector organizations and local governments qualify as small entities if they serve a population of less than 50,000. RTAs do not qualify as small entities because they all operate in urbanized areas with populations of more than 50,000, and SSOAs do not qualify because they are state agencies.

D. Unfunded Mandates Reform Act of 1995

FTA has determined that this rule would not impose unfunded mandates, as defined by the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4). This rule does not include a Federal

³ Multiplier derived using Bureau of Labor Statistics data on employer costs for employee compensation in December 2024 (<https://www.bls.gov/news.release/eccec.htm>). Employer costs for state and local government workers averaged \$63.46 an hour, with \$39.22 for wages and \$24.23 for benefit costs. To estimate full costs from wages, one would use a multiplier of \$63.46/\$39.22, or 1.62.

² Bureau of Labor Statistics. 2025. "May 2024 National Occupational Employment and Wage Estimates: United States: NAICS 485000—Transit and Ground Passenger Transportation." <https://data.bls.gov/oes/#/industry/485000>.

mandate that may result in expenditures of \$100 million or more in any one year, adjusted for inflation, by State, local, and tribal governments in the aggregate or by the private sector.

E. Executive Order 13132 (Federalism Assessment)

E.O. 13132 (“Federalism”) requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. This action has been analyzed in accordance with the principles and criteria contained in E.O. 13132 and FTA determined this action will not have a substantial direct effect or sufficient federalism implications on the States. FTA also determined this action will not preempt any State law or regulation or affect the States’ ability to discharge traditional State governmental functions.

F. Paperwork Reduction Act

In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, *et seq.*) (PRA), and the White House Office of Management and Budget’s (OMB) implementing regulation at 5 CFR 1320.8(d), FTA will not seek a revision to an approved OMB information collection 2132–0584 as there is no change in burden or cost associated with this new regulatory action.

G. National Environmental Policy Act

Federal agencies are required to adopt implementing procedures for the National Environmental Policy Act (NEPA) that establish specific criteria for, and identification of, three classes of actions: (1) Those that normally require preparation of an Environmental Impact Statement, (2) those that normally require preparation of an Environmental Assessment, and (3) those that are categorically excluded from further NEPA review. This rule qualifies for categorical exclusions under 23 CFR 771.118(c)(4) (planning and administrative activities that do not involve or lead directly to construction). FTA has evaluated whether the rule will involve unusual or extraordinary circumstances and has determined that it will not.

H. Executive Order 13175 (Tribal Consultation)

FTA has analyzed this rule under E.O. 13175 (“Consultation and Coordination

with Indian Tribal Governments”) and believes that it will not have substantial direct effects on one or more Indian tribes; will not impose substantial direct compliance costs on Indian tribal governments; and will not preempt tribal laws. Therefore, a tribal summary impact statement is not required.

I. Executive Order 13211 (Energy Effects)

FTA has analyzed this action under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”). FTA has determined that this action is not a significant energy action under that order and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, a Statement of Energy Effects is not required.

J. Privacy Act

Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review U.S. DOT’s complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477).

K. Regulation Identifier Number (RIN)

A Regulation Identifier Number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross-reference this rule with the Unified Agenda.

List of Subjects in 49 CFR Part 671

Mass transportation, Reporting and recordkeeping requirements, Safety, Transportation.

For the reasons stated in the preamble, FTA proposes to amend title 49, Code of Federal Regulations, part 671, as set forth below:

PART 671—RAIL TRANSIT ROADWAY WORKER PROTECTION

■ 1. The authority citation for part 671 continues to read as follows:

Authority: 49 U.S.C. 5329, 49 CFR 1.91.

■ 2. Amend § 671.25 by revising paragraphs (a)(2) and (c)(1) to read as follows:

§ 671.25 State safety oversight agency.

(a) * * *

(2) The SSOA must submit the current approved RWP program for each RTA in its jurisdiction to FTA annually with the annual report required by 49 CFR 674.39.

* * * * *

(c) *Annual RWP program audit.*

(1) The SSOA must conduct an annual audit of the RTA’s compliance with its RWP program, including all required RWP program elements, for each RTA that it oversees. This review may be conducted in conjunction with the review and approval of the RTA’s Public Transportation Agency Safety Plan or any other review or audit.

* * * * *

Issued in Washington, DC, under authority delegated in 49 CFR 1.91.

I. Executive Summary

This NPRM proposes to amend the PTSCPT regulation at 49 CFR part 672. The proposed rule maintains the existing minimum training requirements for State Safety Oversight Agency (SSOA) employees and contractors who conduct reviews, inspections, examinations, and other safety oversight activities of public transportation systems, and employees and contractors who are directly responsible for the safety oversight of a rail fixed guideway public transportation system. However, the NPRM proposes changes to reduce the burden of the semiannual reporting requirement in 49 CFR 672.21(d) by reducing the reporting frequency from semi-annual to annual.

A. Statutory Authority

Congress directed FTA to create and implement a comprehensive Public

Transportation Safety Program, one element of which is the requirement for PTSCPT, in the Moving Ahead for Progress in the 21st Century Act (MAP–21) (Pub. L. 112–141; July 6, 2012), codified at 49 U.S.C. 5329. Specifically, 49 U.S.C. 5329(c) directed FTA to establish a PTSCPT for Federal and State employees, or other designated personnel, who conduct safety audits and examinations of public transportation systems and employees of public transportation agencies directly responsible for safety oversight.

B. Background

To implement the requirements of 49 U.S.C. 5329(c), FTA issued a final rule on July 19, 2018, that added part 672, “Public Transportation Safety Certification Training Program,” to title 49 of the Code of Federal Regulations (83 FR 34053). Subsequently, the Infrastructure Investment and Jobs Act (Pub. L. 117–58; November 15, 2021), added new requirements to FTA’s Public Transportation Safety Program that FTA addressed in the PTSCPT curriculum through a final rule on August 14, 2024 (89 FR 65999). To ensure compliance with safety training requirements, the 2024 final rule established a semiannual reporting requirement at 49 CFR 672.21(d) for each SSOA and RTA to submit a current list of individuals designated as required PTSCPT participants, and the course or courses that that agency has identified as required for PTSCPT recertification.

On April 3, 2025, as part of its implementation of E.O. 14219, “Ensuring Lawful Governance and Implementation of the President’s ‘Department of Government Efficiency’ Deregulatory Agenda,” issued on February 19, 2025, and E.O. 14192, “Unleashing Prosperity through Deregulation,” issued on January 31, 2025, DOT issued a request for information (RFI) seeking comments and information to assist DOT in identifying existing regulations, guidance, paperwork requirements, and other regulatory obligations to be modified or repealed, consistent with law, to achieve meaningful burden reduction while continuing to meet statutory obligations and ensure the safety of the U.S. transportation system (90 FR 14953). In response to the RFI, the American Public Transportation Association (APTA), a nonprofit group that advocates for the interests of the public transportation industry in the United States, commented that the semiannual reporting requirement in 49 U.S.C. 672.21(d) is an “undue burden” on transit agencies. APTA also noted

that some SSOAs are implementing this requirement through the program standards they must establish under 49 CFR 674.27. Responsive to APTA’s comment, and to achieve meaningful burden reduction, FTA proposes to reduce the frequency of the reporting requirement from semiannual to annual.

C. Summary of Provisions

FTA proposes to amend 49 CFR 672.21(d) to require annual, rather than semiannual, reporting of compliance with safety training requirements.

II. Regulatory Analyses and Notices

Executive Order 12866 and 13563 (Regulatory Review)

E.O. 12866 (“Regulatory Planning and Review”), as supplemented by E.O. 13563 (“Improving Regulation and Regulatory Review”), directs Federal agencies to assess the benefits and costs of regulations and to select regulatory approaches that maximize net benefits when possible. This action does not meet the criteria of a “significant regulatory action.” Therefore, the Office of Management and Budget (OMB) has not reviewed this action.

The proposed rule would reduce reporting requirements for SSOAs and rail transit agencies subject to the PTSCPT. Currently, agencies must report information on designated participants and recertification courses semiannually to FTA; the proposed rule would reduce the frequency from semiannual to annual.

The reduced reporting requirements would result in cost savings for regulated entities. The requirements affect 31 SSOAs and 64 rail transit agencies in operation as of March 1, 2023, for a total of 95 agencies. In the 2024 final rule, FTA estimated that an agency would spend 4 hours per year to fulfill semi-annual reporting requirements, for a total of 380 hours per year across the 95 agencies. Reducing the frequency to annual reporting would result in a total savings of 190 hours (380 hours ÷ 2) per year.

To estimate cost savings, FTA used May 2024 occupational wage data from the Bureau of Labor Statistics, the latest available as of May 2025, in the “Transit and Ground Passenger Transportation” industry (North American Industry Classification System code 485000).¹ To estimate the wages of agency staff completing the auditing requirements, FTA used the “General and Operations

¹ Bureau of Labor Statistics. 2025. “May 2024 National Occupational Employment and Wage Estimates: United States: NAICS 485000—Transit and Ground Passenger Transportation.” <https://data.bls.gov/oes/#/industry/485000>.

Managers” job category (code 11–1021). FTA used median hourly wages (\$42.45) as a basis for the estimates, multiplying the wages by 1.62 ($\$42.45 \times 1.62 = \$68.69$) to account for employer benefits.²

Over the next ten years, the rule would result in annual cost savings of \$11,000 discounted at a 3 percent rate and \$9,000 discounted at a 7 percent rate in 2024 dollars.

Executive Order 14192 (Deregulatory Action)

E.O. 14192 (“Unleashing Prosperity Through Deregulation”) requires that for “each new [E.O. 14192 regulatory action] issued, at least ten prior regulations be identified for elimination.” Implementation Guidance for E.O. 14192, issued by OMB (Memorandum M–25–20, March 25, 2025) defines an E.O. 14192 deregulatory action as “an action that has been finalized and has total costs less than zero.” This proposed rule, if finalized, is expected to have total costs less than zero, and therefore is expected to be an E.O. 14192 deregulatory action.

Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (RFA) (5 U.S.C. 601 *et seq.*) requires Federal agencies to assess the impact of a regulation on small entities unless the agency determines that the regulation is not expected to have a significant economic impact on a substantial number of small entities.

Under the Act, public-sector organizations and local governments qualify as small entities if they serve a population of less than 50,000. RTAs do not qualify as small entities because they operate in urbanized areas with populations of more than 50,000, and SSOAs do not qualify because they are state agencies. In addition, this proposed rule would reduce regulatory burdens. Therefore, FTA certifies that the proposed rule would not have a significant effect on a substantial number of small entities.

Unfunded Mandates Reform Act of 1995

FTA has determined that this proposed rule does not impose unfunded mandates, as defined by the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, March 22, 1995). This rule does not include a Federal mandate

that may result in expenditures of \$100 million or more adjusted for inflation in any one year, adjusted for inflation, by State, local, and tribal governments in the aggregate or by the private sector.

Executive Order 13132 (Federalism Assessment)

E.O. 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. This action has been analyzed in accordance with the principles and criteria contained in E.O. 13132, dated August 4, 1999, and FTA determined this action would not have a substantial direct effect or sufficient federalism implications on the States. FTA also determined this action would not preempt any State law or regulation or affect the States’ ability to discharge traditional State governmental functions.

Executive Order 12372 (Intergovernmental Review)

The regulations implementing E.O. 12372 regarding intergovernmental consultation on Federal programs and activities do not apply to this rulemaking.

Paperwork Reduction Act

In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), and OMB implementing regulation at 5 CFR 1320.8(d), FTA is seeking approval from OMB for a currently approved information collection, OMB control number 2132–0578, associated with the existing regulation. FTA believes there will be a reduction in burden hours per submission resulting from this rulemaking.

National Environmental Policy Act

FTA has analyzed this rule for the purposes of the National Environmental Policy Act of 1969 (NEPA). In accordance with 42 U.S.C. 4336 and DOT NEPA Order 5610.1C, FTA has determined that this rule is categorically excluded pursuant to 23 CFR 771.118(c)(4), “[p]lanning and administrative activities that do not involve or lead directly to construction, such as: [p]romulgation of rules, regulations, and directives.” This rulemaking is not anticipated to result in any environmental impacts, and there are no unusual or extraordinary

circumstances present in connection with this rulemaking.

Executive Order 13175 (Tribal Consultation)

FTA has analyzed this proposed rule under E.O. 13175, dated November 6, 2000, and it will not have substantial direct effects on one or more Indian Tribes; will not impose substantial direct compliance costs on Indian Tribal governments; and will not preempt tribal laws. Therefore, a Tribal summary impact statement is not required.

Executive Order 13211 (Energy Effects)

FTA has analyzed this action under E.O. 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. FTA has determined this action is not a significant energy action under that order and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, a Statement of Energy Effects is not required.

Privacy Act

Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT’s complete Privacy Act Statement in the **Federal Register** at 65 FR 19477 (April 11, 2000).

Regulation Identifier Number

A Regulation Identifier Number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross-reference this proposed rule with the Unified Agenda.

List of Subjects in 49 CFR Part 672

Mass transportation, Reporting and recordkeeping requirements, Safety.

In consideration of the foregoing, and under the authority of 49 U.S.C. 5329 and 5334, and the delegation of authority at 49 CFR 1.91, the Federal Transit Administration proposes to amend title 49, Code of Federal Regulations, part 672, as set forth below:

PART 672—PUBLIC TRANSPORTATION SAFETY CERTIFICATION

■ 1. The authority citation for part 672 continues to read as follows:

² Multiplier derived using Bureau of Labor Statistics data on employer costs for employee compensation in December 2024 (<https://www.bls.gov/news.release/ecec.htm>). Employer costs for state and local government workers averaged \$63.46 an hour, with \$39.22 for wages and \$24.23 for benefit costs. To estimate full costs from wages, one would use a multiplier of $\$63.46/\$39.22$, or 1.62.

Authority: 49 U.S.C. 5329, 5334; 49 CFR 1.91.

■ 2. Amend § 672.21 by revising paragraph (d) to read as follows:

§ 672.21 Records.

* * * * *

(d) *Annual reporting.* The identified POC must submit documentation annually to FTA, via electronic method defined by FTA, that identifies:

* * * * *

Issued in Washington, DC, under authority delegated in 49 CFR 1.91.

Tariq Bokhari,

Acting Administrator.

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

49 CFR Part 675

[Docket No. FTA–2023–0018]

RIN 2132–AB46

Transit Worker Hours of Service and Fatigue Risk Management; Withdrawal

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Advance notice of proposed rulemaking (ANPRM); withdrawal.

SUMMARY: FTA is withdrawing the October 30, 2023, advance notice of proposed rulemaking (ANPRM) concerning minimum safety standards to address fatigue-related safety incidents. FTA has determined not to issue a notice of proposed rulemaking at this time.

DATES: The ANPRM published on October 30, 2023, at 88 FR 74107 is withdrawn as of July 1, 2025.

ADDRESSES: You may send comments, identified by docket number FTA–2023–0018, by any of the following methods:

- *Federal Rulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for sending comments.
- *Fax:* (202) 493–2251.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery/Courier:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

Instructions: All submissions received must include the agency name and docket number or Regulatory Information Number (RIN) for this rulemaking. All comments received will be posted without change to <https://www.regulations.gov>, including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov>. Background documents and comments received may also be viewed at the U.S. Department of Transportation, 1200 New Jersey Ave. SE, Docket Operations, M–30, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001, between 9 a.m. and 5 p.m. EST, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: For program matters, contact Jeremy Furrer, Office of Transit Safety and Oversight (TSO), (202) 366–8929, or jeremy.furrer@dot.gov. For legal matters, contact Mark Montgomery, Office of Chief Counsel, (202) 366–1017, or mark.montgomery@dot.gov. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

On October 30, 2023, FTA published an ANPRM seeking public input on minimum safety standards to provide protections for transit workers to obtain adequate rest to reduce the risk of fatigue-related safety incidents (88 FR 74107). Specifically, FTA sought public input in two areas: (1) hours of service; and (2) fatigue risk management programs. FTA received 76 relevant comments in response to the ANPRM but did not receive specific information about current hours of service and fatigue policies and regulations. The submitted comments were generally supportive of FTA action to mitigate transit worker fatigue but expressed concerns about the lack of available data needed to produce an effective rulemaking.

Subsequently, FTA issued a request for information (RFI) directly to all 797 agencies subject to the Public Transportation Agency Safety Plan (PTASP) regulation at 49 CFR part 673, including State departments of transportation and State safety oversight agencies (SSOAs). The RFI sought to collect information related to current policies and requirements mitigating the risk of fatigue-related safety incidents through hours of service policies and/or fatigue risk management programs. FTA received responses from 261

organizations, including 239 comments from PTASP agencies sharing useful information about current fatigue mitigation praxis. The comments revealed that 129 agencies already have some form of hours of service policy and 41 agencies have a fatigue risk management plan. An additional 32 agencies use fatigue management practices without having a fully formalized policy in place.

FTA's Reason for Withdrawal

FTA has determined not to proceed with an NPRM at this time because safety risks associated with transit worker fatigue are covered by the PTASP regulation at 49 CFR part 673. That regulation requires operators of public transportation systems that receive Federal funds under the FTA Urbanized Area Formula Grants (49 U.S.C. 5307), and rail transit agencies subject to the FTA State Safety Oversight (SSO) Program under 49 CFR part 674, to develop an Agency Safety Plan (ASP) that includes the processes and procedures to implement a Safety Management System (SMS). SMS is a comprehensive, collaborative, and systematic approach to managing safety. The regulation sets scalable and flexible minimum standards for ASPs, including requirements for the identification, assessment, and mitigation of risk and strategies to minimize exposure to hazards. In cases where transit agencies determine there is a risk of operator fatigue or related safety risks, the PTASP regulation requires agencies as part of their SMS processes to develop methods to identify mitigations or strategies to reduce the likelihood and severity of the potential consequences.

As an alternative to rulemaking, FTA may take other actions pursuant to its safety authorities under 49 U.S.C. 5329 to address risks associated with transit worker fatigue, including the issuance of special or general directives. Additionally, FTA must issue restrictions and prohibitions by whatever means are determined necessary and appropriate if it determines that an unsafe condition or practice, or a combination of unsafe conditions and practices, exist such that there is a substantial risk of death or personal injury. 49 U.S.C. 5329(h). This would include unsafe conditions or practices associated with operator fatigue.

Conclusion

Based on the foregoing reasons, FTA withdraws the October 30, 2023, ANPRM titled “Transit Worker Hours of Service and Fatigue Risk Management.” If FTA determines further action to be

necessary, it will consider regulatory action.

Authority: 49 U.S.C. 5329, 49 CFR 1.91

Issued in Washington, DC, under authority delegated in 49 CFR 1.91.

Tariq Bokhari,

Acting Administrator.

FXES1111090FEDR–256–FF09E21000]

RIN 1018–BI18

Endangered and Threatened Wildlife and Plants; Endangered Species Status for Barrens Darter

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), propose to list the Barrens darter (*Etheostoma forbesi*), a fish species from Cannon, Coffee, Grundy, and Warren Counties, Tennessee, as an endangered species under the Endangered Species Act of 1973, as amended (Act). This determination also serves as our 12-month finding on a petition to list the Barrens darter. After a review of the best scientific and commercial data available, we find that listing the species is warranted. Accordingly, we propose to list the Barrens darter as an endangered species under the Act. If we finalize this rule as proposed, it would add this species to the List of Endangered and Threatened Wildlife and extend the Act's protections to the species. We find that designating critical habitat for this species is not determinable at this time.

DATES: We will accept comments received or postmarked on or before September 2, 2025. Comments submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES**, below) must be received by 11:59 p.m. eastern time on the closing date. We must receive requests for a public hearing, in writing, at the address shown in **FOR FURTHER INFORMATION CONTACT** by August 15, 2025.

ADDRESSES: *Comment submission:* You may submit comments by one of the following methods:

(1) *Electronically:* Go to the Federal eRulemaking Portal: [https://](https://www.regulations.gov)

www.regulations.gov. In the Search box, enter FWS–R4–ES–2025–0033, which is the docket number for this rulemaking. Then, click on the Search button. On the resulting page, in the panel on the left side of the screen, under the Document Type heading, check the Proposed Rule box to locate this document. You may submit a comment by clicking on “Comment.”

(2) *By hard copy:* Submit by U.S. mail to: Public Comments Processing, Attn: FWS–R4–ES–2025–0033, U.S. Fish and Wildlife Service, MS: PRB/3W, 5275 Leesburg Pike, Falls Church, VA 22041–3803.

We request that you send comments only by the methods described above. We will post all comments on <https://www.regulations.gov>. This generally means that we will post any personal information you provide us (see Information Requested, below, for more information).

Availability of supporting materials: Supporting materials, such as the species status assessment report, are available on the Service's website at <https://www.fws.gov/office/tennessee-ecological-services>, at <https://www.regulations.gov> at Docket No. FWS–R4–ES–2025–0033, or both.

FOR FURTHER INFORMATION CONTACT: Daniel Elbert, Field Supervisor, U.S. Fish and Wildlife Service, Tennessee Ecological Services Field Office; telephone 931–431–2480; daniel_elbert@fws.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. Please see Docket No. FWS–R4–ES–2025–0033 on <https://www.regulations.gov> for a document that summarizes this proposed rule.

SUPPLEMENTARY INFORMATION:

Information Requested

We intend that any final action resulting from this proposed rule will be based on the best scientific and commercial data available and be as accurate and as effective as possible. Therefore, we request comments or information from other governmental agencies, Native American Tribes, the scientific community, industry, or any other interested parties concerning this proposed rule. We particularly seek comments concerning:

(1) The species' biology, range, and population trends, including:

(a) Biological or ecological requirements of the species, including habitat requirements for feeding, breeding, and sheltering;

(b) Genetics and taxonomy;

(c) Historical and current range, including distribution patterns and the locations of any additional populations of this species;

(d) Historical and current population levels, and current and projected trends; and

(e) Past and ongoing conservation measures for the species, its habitat, or both.

(2) Threats and conservation actions affecting the species, including:

(a) Factors that may be affecting the continued existence of the species, which may include habitat modification or destruction, overutilization, disease, predation, the inadequacy of existing regulatory mechanisms, or other natural or manmade factors;

(b) Biological, commercial trade, or other relevant data concerning any threats (or lack thereof) to this species; and

(c) Existing regulations or conservation actions that may be addressing threats to this species.

(3) Additional information concerning the historical and current status of this species.

Please include sufficient information with your submission (such as scientific journal articles or other publications) to allow us to verify any scientific or commercial information you include.

Please note that submissions merely stating support for, or opposition to, the action under consideration without providing supporting information, although noted, do not provide substantial information necessary to support a determination, as section 4(b)(1)(A) of the Act directs that determinations as to whether any species is an endangered or a threatened species must be made solely on the basis of the best scientific and commercial data available, and section 4(b)(2) of the Act directs that the Secretary shall designate critical habitat on the basis of the best scientific data available.

You may submit your comments and materials concerning this proposed rule by one of the methods listed in **ADDRESSES**. We request that you send comments only by the methods described in **ADDRESSES**.

If you submit information via <https://www.regulations.gov>, your entire submission—including any personal identifying information—will be posted on the website. If your submission is made via a hardcopy that includes personal identifying information, you

may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. We will post all hardcopy submissions on <https://www.regulations.gov>.

Comments and materials we receive, as well as supporting documentation we used in preparing this proposed rule, will be available for public inspection on <https://www.regulations.gov>.

Our final determination may differ from this proposal because we will consider all comments we receive during the comment period as well as any information that may become available after this proposal. Based on the new information we receive (and, if relevant, any comments on that new information), we may conclude that the species is threatened instead of endangered, or we may conclude that the species does not warrant listing as either an endangered species or a threatened species. In our final rule, we will clearly explain our rationale and the basis for our final decision, including why we made changes, if any, that differ from this proposal.

Public Hearing

Section 4(b)(5) of the Act provides for a public hearing on this proposal, if requested. Requests must be received by the date specified in **DATES**. Such requests must be sent to the address shown in **FOR FURTHER INFORMATION CONTACT**. We will schedule a public hearing on this proposal, if requested, and announce the date, time, and place of the hearing, as well as how to obtain reasonable accommodations, in the **Federal Register** and local newspapers at least 15 days before the hearing. We may hold the public hearing in person or virtually via webinar. We will announce any public hearing on our website, in addition to the **Federal Register**. The use of virtual public hearings is consistent with our regulations at 50 CFR 424.16(c)(3).

Previous Federal Actions

For a detailed description of Federal actions concerning the Barrens darter that occurred prior to April 2019, please refer to the 12-month not-warranted finding we published in the **Federal Register** on April 4, 2019 (84 FR 13237).

On September 27, 2022, the Center for Biological Diversity (CBD) filed a complaint challenging the merits of our 2019 12-month not-warranted finding (*Center for Biological Diversity v. Service, et al.*, No. 1:22-cv-02922

(D.D.C.)). Subsequently, the CBD and Service entered into a stipulated settlement agreement whereby both parties agreed the Service would submit to the Office of the Federal Register for publication a new 12-month finding for the Barrens darter by June 30, 2025. By publishing this proposed rule, which constitutes our 12-month finding and proposes to list the Barrens darter as an endangered species under the Act, the Service is complying with the settlement agreement.

Peer Review

To inform the new 12-month finding stipulated by the settlement agreement, a species status assessment (SSA) team prepared, updated, and revised the Barrens darter SSA report (Service 2025, entire). The SSA team was composed of Service biologists, in consultation with other species experts. The SSA report (version 3.0: Service 2025, entire) represents a compilation of the best scientific and commercial data available concerning the status of the species, including new scientific information that has become available since our initial SSA report (version 1.0: Service 2018, entire); the SSA report also includes the impacts of past, present, and future factors (both negative and beneficial) affecting the species.

In accordance with our joint policy on peer review published in the **Federal Register** on July 1, 1994 (59 FR 34270), and our August 22, 2016, memorandum updating and clarifying the role of peer review in listing and recovery actions under the Act (<https://www.fws.gov/sites/default/files/documents/peer-review-policy-directors-memo-2016-08-22.pdf>), we will solicit the independent scientific review of the Barrens darter SSA report (Service 2025, entire) from at least three appropriate specialists. The SSA report will be made available for peer and partner review concurrently with this proposed listing rule. We will address and incorporate the results of the peer reviews, as appropriate, into the updated SSA report and the final decision document.

I. Proposed Listing Determination Background

A thorough review of the taxonomy, life history, and ecology of the Barrens darter is presented in the SSA report (version 3.0; Service 2025, pp. 5–9).

The Barrens darter is a small fish endemic to streams in the Barrens Plateau region of middle Tennessee. It is found in the Collins River watershed,

which is a tributary to the Caney Fork of the Cumberland River drainage (see figure 1, below). The Barrens darter belongs to the *Stigmacerca* clade (lineage of species that includes a common ancestor and its descendants), with all 11 member species sharing the distinguishing characteristic of a vertical row of three black dots at the base of the tail fin. Per the formal species description that is part of a larger review of closely related species (Page et al. 1992, entire), females and non-breeding males in the clade have a pattern of brown mottling on a light tan background, 9 to 13 small blotches along the sides, and 6 to 8 dark brown saddles on the back. In breeding male Barrens darters, the second dorsal fin is black with a yellow-gold margin that is lightly speckled with black.

Barrens darters occur almost exclusively in small headwater streams with slab rock substrates and strong groundwater influence. They likely prey on larval aquatic insects and microcrustaceans, as has been observed for other species in *Stigmacerca*. Spawning occurs between mid-March and early June. During spawning, the male establishes a territory around a cavity under a slab rock and, based on its body size and quality of its nest cavity, attracts females. Males also produce sounds to court females and defend the nest cavity from other males. Once a female has chosen to spawn with a male, the pair invert under the rock and the female adheres eggs to the underside of the rock in a single layer. Multiple females will lay eggs in a single nest, with average count per nest of 457 eggs and a maximum count of 1,992 eggs observed in one study (Bergen et al. 2012, p. 235). The male cleans the eggs and guards them from predators until they hatch, in about 15.5 days on average. After hatching larvae quickly drop toward the stream bottom, remaining among the substrates near the nest rock. In the closely related spottail darter (*Etheostoma squamiceps*), the transition from the relatively non-mobile larval stage to the more mobile juvenile stage was complete at approximately 2 months (Page 1974, pp. 11–12). Time from larva to juvenile is likely similar in the Barrens darter. Barrens darters reach adulthood (sexual maturity) between one to two years post-hatching, have an approximate lifespan of 3 years, and may rarely live to 4 years of age.

BILLING CODE 4333–15–P

Figure 1. Map of the Collins River system in Tennessee.

BILLING CODE 4333-15-C

We assessed the viability of the Barrens darter in our initial SSA report (Service 2018, entire), which informed our 2019 not-warranted 12-month finding (84 FR 13237; April 4, 2019). Concurrent with development of the initial SSA report, ichthyologists had initiated a Barrens darter distribution and population genetics survey. The analysis of the survey was published in a peer-reviewed journal and mapped the expansion of native fringed darters (*Etheostoma crossotum*) upstream, in some cases into headwater streams occupied by Barrens darters where fringed darters completely replaced Barrens darters, through competition and hybridization (see Summary of Biological Status and Threats, below), over time (Harrington et al. 2020, entire). The information provided in Harrington et al. (2020) highlighted the immediacy of the threat posed by the

fringed darter, which was not well understood when we produced our 2018 SSA report. It also documented the current rangewide distribution of the Barrens darter, detecting extirpations and adding occurrence records in previously undocumented sites. As discussed in this proposed rule, we compiled and used the best scientific information currently available, including the data provided in Harrington et al. (2020) to update our SSA (Service 2025, entire) and subsequent 12-month finding and status determination.

Regulatory and Analytical Framework

Regulatory Framework

Section 4 of the Act (16 U.S.C. 1533) and the implementing regulations in title 50 of the Code of Federal Regulations set forth the procedures for determining whether a species is an

endangered species or a threatened species, issuing protective regulations for threatened species, and designating critical habitat for endangered and threatened species.

The Act defines an “endangered species” as a species that is in danger of extinction throughout all or a significant portion of its range and a “threatened species” as a species that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range. The Act requires that we determine whether any species is an endangered species or a threatened species because of any of the following factors:

- (A) The present or threatened destruction, modification, or curtailment of its habitat or range;
- (B) Overutilization for commercial, recreational, scientific, or educational purposes;
- (C) Disease or predation;

(D) The inadequacy of existing regulatory mechanisms; or
 (E) Other natural or manmade factors affecting its continued existence.

These factors represent broad categories of natural or human-caused actions or conditions that could have an effect on a species' continued existence. In evaluating these actions and conditions, we look for those that may have a negative effect on individuals of the species, as well as other actions or conditions that may ameliorate any negative effects or may have positive effects.

We use the term "threat" to refer in general to actions or conditions that are known to or are reasonably likely to negatively affect individuals of a species. The term "threat" includes actions or conditions that have a direct impact on individuals (direct impacts), as well as those that affect individuals through alteration of their habitat or required resources (stressors). The term "threat" may encompass—either together or separately—the source of the action or condition or the action or condition itself.

However, the mere identification of any threat(s) does not necessarily mean that the species meets the statutory definition of an "endangered species" or a "threatened species." In determining whether a species meets either definition, we must evaluate all identified threats by considering the species' expected response and the effects of the threats—in light of those actions and conditions that will ameliorate the threats—on an individual, population, and species level. We evaluate each threat and its expected effects on the species, then analyze the cumulative effect of all of the threats on the species as a whole. We also consider the cumulative effect of the threats in light of those actions and conditions that will have positive effects on the species, such as any existing regulatory mechanisms or conservation efforts. The Secretary determines whether the species meets the definition of an "endangered species" or a "threatened species" only after conducting this cumulative analysis and describing the expected effect on the species.

The Act does not define the term "foreseeable future," which appears in the statutory definition of "threatened species." Our implementing regulations at 50 CFR 424.11(d) set forth a framework for evaluating the foreseeable future on a case-by-case basis which is further described in the 2009 Memorandum Opinion on the foreseeable future from the Department of the Interior, Office of the Solicitor

(M-37021, January 16, 2009; "M-Opinion," available online at <https://www.doi.gov/sites/doi.opengov.ibmcloud.com/files/uploads/M-37021.pdf>). We need not identify the foreseeable future in terms of a specific period of time. We will describe the foreseeable future on a case-by-case basis, using the best available data and taking into account considerations such as the species' life-history characteristics, threat projection timeframes, and environmental variability.

Analytical Framework

The SSA report documents the results of our comprehensive biological review of the best scientific and commercial data available regarding the status of the species, including an assessment of the potential threats to the species. The SSA report does not represent our decision on whether the species should be proposed for listing as an endangered or threatened species under the Act. However, it does provide the scientific basis that informs our regulatory decisions, which involve the further application of standards within the Act and its implementing regulations and policies.

To assess the viability of the Barrens darter, we used the three conservation biology principles of resiliency, redundancy, and representation (Shaffer and Stein 2000, pp. 306–310). Briefly, resiliency is the ability of the species to withstand environmental and demographic stochasticity (for example, wet or dry, warm or cold years); redundancy is the ability of the species to withstand catastrophic events (for example, droughts, large pollution events); and representation is the ability of the species to adapt to both near-term and long-term changes in its physical and biological environment (for example, climate conditions, pathogens). In general, species viability will increase with increases in resiliency, redundancy, and representation (Smith et al. 2018, p. 306). Using these principles, we identified the species' ecological requirements for survival and reproduction at the individual, population, and species levels, and described the beneficial and risk factors influencing the species' viability.

The SSA process can be categorized into three sequential stages. During the first stage, we evaluated the individual species' life-history needs. The next stage involved an assessment of the historical and current condition of the species' demographics and habitat characteristics, including an explanation of how the species arrived

at its current condition. The final stage of the SSA involved making predictions about the species' responses to positive and negative environmental and anthropogenic influences. Throughout all of these stages, we used the best scientific and commercial data available to characterize viability as the ability of a species to sustain populations in the wild over time, which we then used to inform our regulatory decision.

The following is a summary of the key results and conclusions from the SSA report; the full SSA report can be found at Docket No. FWS–R4–ES–2025–0033 on <https://www.regulations.gov>.

Summary of Biological Status and Threats

In this discussion, we review the biological condition of the species and its resources, and the threats that influence the species' current and future condition, in order to assess the species' overall viability and the risks to that viability.

Species Needs

To maintain viability at the individual level and species level, Barrens darters need third-order (method in Strahler 1957, p. 914) or smaller headwater streams (Zuber 2014, p. 46), as they are not generally found in larger streams. Areas with intact, rather than eroded, stream banks are another important habitat feature that support Barrens darters (Zuber 2014, p. 47). Intact stream banks harbor vegetation that provides shade that moderates water temperatures, and these banks ensure rocks used for shelter and spawning are not covered by excessive sediments. Barrens darters have been observed mostly in streams with moderate pH (average 7.3, but in one case, as high 9.0), and relatively low total dissolved solids (less than 135 parts per million) (Zuber 2014, p. 45), indicating these values are reasonable parameters for viability. Observations during the March to June spawning season indicated important habitat features for individuals, including flat rocks for nesting, relatively low water depth (40 centimeters (15.7 inches) or less), and water temperatures ranging from 6 to 23 degrees Celsius (43 to 73 degrees Fahrenheit) (Bergen et al. 2012, pp. 436–437). As discussed below (see *Threats*), fringed darters are a threat to Barrens darter persistence. Therefore, Barrens darters need sites that are free of fringed darters.

At the species level, the Barrens darter needs connected populations distributed across multiple streams and watersheds. The Barrens darter also needs sufficient resources (food, space,

refugia, etc.) to sustain enough individuals so that populations can withstand normal demographic and environmental stochasticity (resiliency). In addition, dispersion of populations within multiple streams and watersheds (redundancy) reduces the likelihood of rangewide impacts from catastrophic events, such as an extreme drought or flood that kills individuals or causes them to move to unsuitable habitats, or invasion of a species that competes for spawning and feeding resources. Long-term viability will require multiple resilient populations to persist into the future; for the Barrens darter, this means good habitat (resiliency) to support multiple populations in close enough proximity and with sufficient connectivity to allow for emigration/immigration (redundancy). Sufficient connectivity will also support maintenance of genetic diversity and adaptive capacity (representation).

Threats

The greatest threat to the Barrens darter is competition and hybridization with the fringed darter, which has expanded its range in the Collins River drainage over the past several decades (Harrington et al. 2020, entire). The spatial pattern of fringed darter incursion into and near streams occupied by Barrens darters was not fully assessed and mapped until 2020 (Harrington et al. 2020, entire). Due to temporal and spatial gaps in fish surveys in the Collins River system, the intensity of the fringed darter invasion remained unclear prior to the new Barrens darter and fringed darter distribution records reported in 2020. Additionally, the taxonomic identity of several collected specimens held in museum collections was uncertain prior to 2020. This uncertainty was resolved as the museum specimens that were not confidently identified as Barrens darter, fringed darter, or hybrids were verified genetically or morphologically in the study reported in 2020. In summary and as reported in Harrington et al. (2020, entire), compiling all historical distribution data, resurveying historical sites and surveying new sites, and verifying the taxonomic identity of female specimens and hybrids using genetics and morphology provided the most comprehensive information to date on the changes in the distribution of the two species in the Collins River system. This information clearly showed the broad expansion of the fringed darter into or close to streams occupied by Barrens darters. Because fringed darters hybridize and compete with Barrens darters for nesting space (see “Fringed Darter Threat of Native Invasion”,

below), the ongoing expansion of fringed darters into Barrens darter habitat is the greatest threat to the Barrens darter. This threat was not fully understood or incorporated in the 2019 status determination (84 FR 13237), which was informed by a Species Status Assessment completed in 2018 (Service 2018, entire); however, the imminence and magnitude of this threat is now fully recognized and used to inform this determination.

Other major threats influencing the viability of the Barrens darter are habitat loss from degradation of stream banks, loss of instream cover, degradation of water quality, and habitat fragmentation and isolation. When these threats are combined with effects from the invasion of the fringed darter, they act synergistically to negatively impact Barrens darter populations. The habitat-related threats stem from agricultural activities and associated riparian clearing that alters instream habitat and hydrology needed by the Barrens darter. In addition to row crops and grazing, agriculture on the Barrens Plateau includes several plant nurseries, which require water withdrawals that may reduce flows in headwater streams and exacerbate the effects of drought.

Fringed Darter Threat of Native Invasion

The fringed darter has a large native range, occurring in the middle and lower Cumberland River system, middle and lower Tennessee River system, and two Mississippi River tributaries. Fringed darters occupy a broader range of stream sizes than Barrens darters, and based on historical records, fringed darters likely occurred in tributaries to the lower Collins River system (see figure 2, below). One fringed darter specimen voucher (University of Tennessee Etnier Ichthyological Collection, UT 91.646) was collected in the mainstem of Barren Fork, in McMinnville, in 1972. Records from 1994 show several sites with fringed darter occurrences in Mountain Creek (where Barrens darters are not known to have occurred), which is the lower-most tributary to the Collins River, and in tributaries of the Caney Fork, downstream from the mouth of the Collins River (Madison 1995, p. 78). Further, fringed darters likely are native to the lower Collins River system as indicated by the presence of a mitochondrial DNA haplotype found in the Upper Caney River and Collins River systems that is not found elsewhere in the Cumberland River system (Harrington et al. 2020, p. 6).

Over the past 40 to 50 years, fringed darters have expanded their range into the upper reaches of the Collins River

system, which may be due to a phenomenon called native invasion (Scott and Helfman 2001, pp. 9–11). This occurs when changes to the landscape make habitats in headwater streams resemble those in medium and larger streams, creating favorable conditions for invasion by species that naturally occur and once were limited to downstream habitats. Fringed darters have replaced Barrens darters in the West Fork Hickory Creek system, where Barrens darters were extirpated sometime between 1983 and 2001, and in Mud Creek (Barren Fork system), where Barrens darters were extirpated sometime between 2009 and 2018 (Harrington et al. 2020, p. 4; see figure 2, below). Both creek systems are impaired by alteration of streamside vegetation, and West Fork Hickory Creek is also impaired by *E. coli* and nutrients (Tennessee 2024 List of Impaired and Threatened Waters), suggesting native invasion as a factor in the extirpations.

Data collected to date suggest gene flow from Barrens darters into fringed darter populations, and possible bias of female Barrens darters hybridizing with male fringed darters, which is the larger of the two species (Service 2018, p. 15; Harrington et al. 2020, pp. 17–19). Of 364 Collins River system fringed darters examined, 4 specimens from the West Fork Hickory Creek system and 8 specimens from the Mud Creek and McAfee Creeks in the South Fork Barren system were found to have Barrens darter mitochondrial DNA and fringed darter nuclear DNA (Harrington et al. 2020, pp. 14–15). Mitochondrial DNA is inherited only from the mother in most species, including fishes. Therefore, the occurrence of Barrens darter DNA in fringed darters (based on morphology) may point to female Barrens darters preferentially selecting the larger male fringed darters to breed with when the species co-occur or that fringed darters are more successful in competing for spawning cavities. Because female Barrens darters must mate in spawning cavities, male fringed darters successfully competing for the spawning cavities results in female Barrens darters mating with male fringed darters rather than with male Barrens darters.

Fringed darters are a substantial threat to Barrens darters by competing for spawning space and mates, and likely for other resources including prey and cover. After fringed darters colonize a Barrens darter site, the Barrens darter population is at high risk of becoming replaced over time, as some of the Barrens darters lose their genetic identity through hybridization. The

male Barrens darters, due to competition for mates and spawning cavities or female preference for fringed darters, may fail to produce offspring at sufficient rates to sustain future generations. Because Barrens darters have a short 3-year lifespan, most males survive long enough to attempt spawning in two seasons per lifetime. Thus, if only a few male Barrens darters successfully produce annually due to competition with fringed darters, the pace of replacing generations will be insufficient, quickly driving the Barrens darter population to extirpation.

Except for the upper Collins River, fringed darters have advanced relatively rapidly into the headwater habitats that Barrens darters need for survival. Habitat degradation present in many

stream reaches of the Collins River system is a major threat to Barrens darters because, in addition to its direct effect of lost cover, it promotes invasion of fringed darters into the headwaters. Where Barrens darters and fringed darters have been observed to co-occur, Barrens darters became extirpated within 15 years. Therefore, due to competition, hybridization, and their ongoing expansion in the Collins River system, which comprises the entirety of the range of the Barrens darter, fringed darters pose the greatest threat to the viability of the Barrens darter.

Although fish survey records prior to the 1980s are sparse, it appears that the Barrens darter's decline did not start (or the decline was not noticed) until fringed darters began moving into the

Barrens darter's headwater habitat. Because Barrens darters withstood habitat and water quality disturbances for a long period prior to the fringed darter invasions, including times prior to the CWA or when the CWA regulations were first being implemented, it is more likely that the invasions together with habitat and water quality impacts, rather than habitat and water quality impacts alone, are a crucial driver of Barrens darter declines. In summary, competition and hybridization with the fringed darter is occurring in two of the three systems that comprise the Barren darter's range and is highly likely to continue.

BILLING CODE 4333-15-P

BILLING CODE 4333–15–C

Habitat Threats From Agricultural Activities and Riparian Clearing

Land cover and land use have a strong influence on the quality and quantity of water in streams (Allan 2004, entire; Freeman and Marcinek 2006, entire). Vegetation coverage and type can affect the timing, amount, temperature, and quality of water in streams, and

livestock with free access to stream channels and streambanks can have direct and indirect effects on water quality through waste and sedimentation. The Barrens Plateau area of Tennessee is very susceptible to impacts from agriculture according to the Tennessee State Wildlife Action Plan (Tennessee Wildlife Resources Agency (TWRA) 2015, p. 23).

Many of the streams within the Barrens darter's range are used as water sources for cattle and other livestock. Reduced riparian vegetation on lands where livestock have access to streams and where vegetation is destroyed by livestock or fencing is absent or insufficiently maintained can lead to increased water temperatures due to loss of shade. Elevated temperatures may reduce Barrens darter nest success

by reducing the number of eggs produced, hatching rates, or larval survival, as was observed in a laboratory study of temperature effects on the fountain darter (*Etheostoma fonticola*) (Bonner et al 1998 p. 974). Unfettered cattle access increases bank erosion, which is negatively associated with Barrens darter occurrence (Zuber 2014, p. 95), and unfettered cattle access increases turbidity and sedimentation in streams. Sedimentation from livestock and other sources has the potential to cover cobble and other instream substrates, resulting in lower habitat quality, fewer food items, and fewer spawning cavities. In addition, influxes of large amounts of animal waste increase the amount of nutrients in streams and further reduce visibility, which can impact the spawning displays of Barrens darters. Increased bacterial levels, associated with nitrification, may increase the risk of infection to eggs, reducing egg viability (Pat Rakes, Conservation Fisheries, Inc. 2018, pers. comm.). Fungus-covered eggs in Barrens darter nests have been observed in Lewis Creek and Duke Creek in the Barren Fork system (Hansen et al. 2006, p. 66; Bergen et al. 2012, p. 438).

Several streams currently occupied by the Barrens darter have impaired water, impaired habitat quality, or both (Tennessee 2024 List of Impaired and Threatened Waters, not paginated). Charles Creek, a direct tributary to the lower Collins River, is impaired by *Escherichia coli* (*E. coli*) along its entire length, but the State reports the source of the *E. coli* is unknown. Liberty Creek, in the Barren Fork system, is impaired by alteration of stream-side vegetation and cover due to crop production and grazing in the riparian area. Two tributaries to the Upper Collins River, Savage Cove Creek and Taylor Creek, are listed by the State as impaired. Savage Cove Creek is impaired by alteration of streamside vegetative cover due to specialty crop production (nurseries) and grazing in the riparian area. Taylor Creek is impaired by alteration of streamside vegetative cover, low dissolved oxygen, and sedimentation due to nurseries and silviculture activities. In summary, all three MUs currently occupied by the Barrens darter contain streams listed by the State as impaired and 4 of the 8 streams occupied by the species are experiencing impaired water or habitat quality, or both, and that impairment is expected to continue.

Effects of Drought

Barrens darter habitat can be diminished during droughts, and some

streams in the Collins River system have occasionally dried out completely during periods of moderate drought (Harrington et al. 2020, p. 19). Flow in Duke Creek and Lewis Creek in the Barren Fork system ceased during parts of May and June 2009, coinciding with the species' spawning period, when the streams were reduced to stretches of isolated pools (Bergen et al. 2012, p. 237). As a headwater species, Barrens darters are likely adapted and resilient to occasional intermittent reduced flows or streambed drying. During moderate droughts, unless there is strong groundwater influence, the pattern of drying typically starts near the head of the stream channel and progresses downstream, and Barrens darters have adapted to this headwater flow dynamic. However, periods of drought require movement, usually downstream, to access wetted stream channels. Currently, the suitability of these downstream areas as drought refugia is diminished because they have impaired habitat quality, are occupied by fringed darters, or both (see "Fringed Darter Threat of Native Invasion," above).

Conservation Efforts and Regulatory Mechanisms

Application of best management practices (BMPs), such as fencing livestock away from streambanks and riparian areas, providing alternative watering sources, and maintaining or planting riparian buffers with native vegetation, can positively affect the viability of the Barrens darter. However, outside of the few surveys and life-history studies that informed our SSA report, there have not been any targeted conservation efforts for the Barrens darter. This species occurs in streams located entirely on private land and does not receive the benefits of public conservation land. Efforts have been made to fence livestock out of streams and provide them alternate water sources in some places where Barrens darters occur. These are very limited in scale and amount of overlap with the Barrens darter's range. Most of these efforts have been funded and organized through Partners for Fish and Wildlife agreements with landowners, but most of the agreements have expired, so it is unclear whether riparian buffer maintenance is continuing at sites where the agreements were applied.

The Barrens darter is afforded some protection via State and Federal regulatory mechanisms. It is listed as endangered by the State of Tennessee (TWRA 2024, p. 2), making it unlawful to take the Barrens darter without a State permit. Additionally, the bluemask darter (*Etheostoma akatulo*) is

federally listed as an endangered species under the Act, and the Barrens darter currently benefits from the Act's protections where these species' ranges overlap along approximately 2.3 mi (3.7 km) of the upper Collins River. The Clean Water Act of 1977 (CWA; 33 U.S.C. 1251 *et seq.*), as amended, which is implemented by Tennessee Department of Environmental Conservation through Tennessee's Water Quality Control Act of 1977 and its implementing State regulations, provides a level of protection to Barrens darter habitat and water quality. While the protections afforded by these regulatory mechanisms have not fully prevented the degradation of some habitats used by the Barrens darter, as some streams occupied by the Barrens darter are recognized as having impaired water and habitat quality, the species has benefited from improvements in water quality and habitat conditions stemming from these mechanisms. For example, CWA section 319 grants for States to address nonpoint source runoff or CWA section 402 permits to reduce pollutants in point source discharges to levels that are protective of aquatic life have served to reduce impacts to Tennessee streams from effluents, runoff, and landscape disturbance.

Cumulative Effects

We note that, by using the SSA framework to guide our analysis of the scientific information documented in the SSA report (Service 2025, entire), we have analyzed the cumulative effects of identified threats and conservation actions on the species. To assess the current and future condition of the species, we evaluate the effects of all the relevant factors that may be influencing the species, including threats and conservation efforts. Because the SSA framework considers not just the presence of the factors, but to what degree they collectively influence risk to the entire species, our assessment integrates the cumulative effects of the factors and replaces a standalone cumulative-effects analysis.

Current Condition

Historically, the Barrens darter occurred in four watersheds in the Collins River system: Charles Creek, Barren Fork, West Fork Hickory Creek, and the upper Collins River. West Fork Hickory Creek feeds Hickory Creek, which feeds the lower Barren Fork upstream from the Barren Fork confluence with the Collins River (see figure 2, above). Charles Creek and Barren Fork feed the lower Collins River directly. The Barrens darter is extirpated

from the West Fork Hickory Creek system, where it was last collected in 1982.

Each of the three watersheds where the Barrens darter is extant and the watershed where it is extirpated is treated as a management unit (MU) in our SSA report (version 3.0: Service 2025, entire). To assess the current resiliency of the MUs, we selected seven metrics that included two habitat factors and five population factors (see table 1, below). For habitat factors, the physical habitat metric was determined using the Tennessee Department of Environment and Conservation (TDEC) stream habitat assessment protocol for moderate to high gradient streams (TDEC 2017, p. I.I-D-1-24). This protocol scores habitat quality based on factors such as sediment deposition, substrate availability, channel alteration, riparian vegetation, etc. Water quality was rated based on designations from the U.S. Environmental Protection Agency (USEPA) and TDEC, such as the List of

Impaired and Threatened Waters (covered by CWA section 303(d)) (see Habitat Threats from Agricultural Activities and Riparian Clearing section, above) as well as observations from field surveys.

We obtained population factor data from surveys and other records for the Barrens darter from 2009 through 2019 (Harrington et al. 2020, entire; Mattingly and Johansen 2017, entire; and Zuber 2014, entire). These survey efforts were standardized and used methods to specifically target darters across all size classes. Age structure criteria (high, moderate, or low categories) were based on the number of age classes present and whether juveniles were collected in the most recent survey. Due to population variability through time and across sites, as well as differential collection techniques between surveys, we characterized approximate abundance as the average number of Barrens darters collected at all the sites in a management unit. Occurrence

extent was measured as the distance between the upstream-most and downstream-most occurrence record in a MU stream network, which approximated the size of the Barrens darter's range within each MU. Occurrence complexity describes the dispersion of the Barrens darter in each MU as the number of occupied tributaries feeding the mainstem. Presence of fringed darters characterizes the degree of threat they pose to Barrens darters via competition, hybridization, and likely replacement of Barrens darters once the two species come into contact. Within each MU, the fringed darter presence metric was measured as the ratio of streams occupied by the fringed darter to streams occupied by the Barrens darter. If fringed darters are present in a MU, the overall current resiliency is rated as low, given the scope and magnitude of this threat to the species, which outweigh all other threats combined.

TABLE 1—FACTORS AND CRITERIA FOR ASSESSING POPULATION (MU) RESILIENCY

Factor	Type	High	Moderate	Low	Unsuitable
Physical Habitat Score.	Habitat	151–200	101–150	0–100	Does not support survival.
Water Quality ...	Habitat	Minimal issues	Issues recognized, e.g., CWA 303(d) streams.	Issues known to impact populations ...	Does not support survival.
Age Structure ...	Population ...	Two to three age classes, including juveniles.	One adult age class and juveniles	One age class	Extirpated.
Approximate Abundance.	Population ...	Greater than 15 fish per 100 meters (m) (328 feet (ft)).	5 to 15 fish per 100 m (328 ft)	Fewer than 5 fish per 100 m (328 ft) ..	Extirpated.
Occurrence Extent.	Population ...	Range greater than 10 stream mi (16.1 km).	Range 5 to 10 stream mi (8.0 to 16.1 km).	Range less than 5 stream mi (8.0 km)	Extirpated.
Occurrence Complexity.	Population ...	Occupies main channel and multiple tributaries.	Occupies main channel and one tributary.	Occupies main channel only	Extirpated.
Fringed Darter Occurrence.	Population ...	None in MU	Ratio of tributaries occupied by fringed darter to those occupied by Barrens darter less than 50 percent.	Ratio of tributaries occupied by fringed darter to those occupied by Barrens darter greater than 50 percent.	Extirpated.

Currently, the Barren Fork and Charles Creek MUs have low resiliency, the Upper Collins River MU has moderate to high resiliency, and the Barrens darter is extirpated from the Hickory Creek MU (table 2). Although occurrence extent is classified as “high” in the Upper Collins River and Barren

Fork MUs, the stream lengths that approximate the range in these units are small, measuring 10.4 mi (16.7 km) and 14.7 mi (23.7 km), respectively. The Barren Fork system's overall moderate habitat and water quality (table 2) derives from averaging the classifications for those two metrics in

all streams currently and historically occupied by Barrens darters, although both metrics are low in some occupied streams (discussed below). Occurrence extent is only 1 mi (1.6 km) in the Charles Creek unit, in a single reach of the mainstem (low occurrence complexity).

TABLE 2—CLASSIFICATION OF RESILIENCY FACTORS AND CURRENT RESILIENCY OF BARRENS DARTER MANAGEMENT UNITS (MUS)

MU	Physical habitat	Water quality	Age structure	Approximate abundance	Occurrence extent	Occurrence complexity	Fringed darter presence*	Resiliency
Charles Creek	Moderate	Moderate	Low	Low	Low	Low	Low	Low.
Barren Fork	Moderate	Moderate	High	High	High	Moderate	Low	Low.
Hickory Creek	Moderate	Low	Extirpated	Extirpated	Extirpated	Extirpated	Extirpated	None (Extirpated).
Upper Collins River	Moderate-Low	Low	High	Mod	High	High	High	Moderate-High.

* Low resiliency rating is assigned for MUs with high levels of fringed darter presence.

Considering the strong negative influence that fringed darters have on Barrens darters, coupled with the

impacts of habitat and water quality impairment in some of its tributaries, the Barren Fork MU has low resiliency.

Within the Barren Fork system since 2002, records of Barrens darters are from only Duke (includes McMahan Creek

and its tributary, Lewis Creek), Mud, and Liberty Creeks. In Mud Creek, fringed darters replaced Barrens darters between 2009 and 2018 (Harrington et al. 2020, p. 17). Mud and Liberty Creeks have poor habitat quality and are listed as impaired by the State. By stream miles, Liberty Creek comprises just over one-third of the stream systems within the Barren Fork where the Barrens darter remains extant. The Barrens darter is extirpated from the North Prong Barren Fork system and Dog Branch, a direct tributary to mainstem Barren Fork. North Prong Barren Fork is listed as impaired by the State, and fringed darters currently occur in the lower end of Dog Branch. The mouth of Mud Creek is just below the current record of Barrens darter in Liberty Creek. Therefore, the Liberty Creek Barrens darters are at very high risk of fringed darter invasion, owing both to poor habitat and fringed darter proximity. The Duke Creek system is farther upstream (about 6 mi (9.7 km)) from fringed darter records, but fringed darters have been encroaching closer over the past 40 years. Water quality and habitat in Duke Creek is moderate, and one of its tributary systems, McMahan Creek (including Lewis Creek), has high habitat quality (Service 2018, p. 24). As noted above (see *Threats*), Duke Creek and Lewis Creek, as well as other headwater streams in the Collins River system, have gone dry during moderate drought, which has the potential to put Barrens darters in contact with fringed darters as they move downstream to find watered stream channels.

The ability of Barrens darters to disperse and recolonize tributaries where they once occurred is likely precluded by the occurrence of fringed darters along several pathways in the stream network comprising the Barren Fork MU. This MU has moderate complexity because there are three tributaries occupied by the Barrens darter but Barrens darters are absent from the mainstem. Because fringed darters are in the mainstem and have colonized several tributary systems in the Barren Fork MU, including the North Prong Barren Fork, Dog Branch, and Mud Creek systems (Harrington et al. 2020, pp. 17–19) where Barrens darters are extirpated, opportunities for Barrens darters to recolonize historically occupied tributaries are extremely reduced. Together, the occurrence of fringed darters in multiple tributaries, several stream reaches with poor habitat quality, and the threat of occasional moderate droughts contribute to the low

resiliency of the Barrens darter in the Barren Fork MU.

In addition to population (MU) resiliency, we assessed species redundancy, which is low. The Barrens darter is confined to three of its four historically occupied MUs, and two of those MUs, Charles Creek and Barren Fork, have low resiliency. Only the Upper Collins River MU has moderate to high resiliency. There is likely no connectivity allowing for dispersal from the Upper Collins River MU to colonize and “rescue” the two low resiliency MUs because fringed darters are in the intervening stream reaches. With only one moderate to high resiliency MU, no connectivity between the three occupied MUs, and the close spatial arrangement of the three occupied MUs, which makes all of the occupied MUs vulnerable to incurring the same harmful effect of a catastrophic event, such as an extreme flood that passively pushes the species downstream or a drought that prompts dispersal downstream to sites occupied by fringed darters or that are unsuitable habitat, Barrens darter redundancy is low.

Species representation is also low. The range of the Barrens darter is naturally narrow, consisting of headwater streams in the Collins River subbasin of the Caney Fork that drains four counties situated on the Barrens Plateau within a single physiographic province, the Eastern Highland Rim. There are no areas within the species’ natural range that contain unique habitat features that might promote development of different adaptive traits. Genetic data show very little variation between the Charles Creek and Barren Fork populations. However, the Collins River population harbors a unique mitochondrial DNA (mtDNA) haplotype, and the frequency of (mtDNA) haplotypes in the Collins population is measurably different from Barren Fork and Charles Creek populations (Harrington et al. 2020, pp. 16–17). Although this spatial structuring of genetic variation is based on haplotypes from a single region of mtDNA (locus) and should be interpreted with caution until more loci can be assessed, it suggests there has been little recent gene flow between the Upper Collins River MU and the other MUs (Harrington et al. 2020, p. 16) and indicates there is potentially greater adaptive capacity within the upper Collins system. Nevertheless, Barrens darter representation is likely to erode over time because the unique alleles (gene variants) in the Upper Collins River MU that may bolster adaptive capacity cannot be shared with the rest of the basin where there is little allelic

diversity due to a lack of connectivity among MUs. Overall, the Barrens darter’s habitat diversity and genetic diversity are low, indicating the species’ capacity to adapt to environmental changes, such as channel widening that can result from streambank alteration or novel exposure to a species such as the fringed darter, are limited. Therefore, the Barrens darter’s representation is low.

Future Condition

Considering the accumulation of the best scientific information to date on the severity of threats currently affecting the viability of the Barrens darter, which includes new data that clearly shows the imminence and high magnitude of the threat posed by the ongoing fringed darter expansion into or near streams occupied by the Barrens darter, we determined that the current condition of the Barrens darter is consistent with an endangered species (see Determination of Barrens Darter Status, below) and did not conduct a new future condition analysis for the SSA report (version 3.0: Service 2025, entire). As part of our initial SSA report (version 1.0: Service 2018, entire), we developed three future-condition scenarios to capture the range of uncertainties regarding future threats and the projected responses by the Barrens darter. Our scenarios considered three main elements of change: land development, conservation levels, and changes in precipitation and drought. The scenarios differ by considering variations that were forecast in each of the three elements of change and capture the range of outcomes the Barrens darter was expected to exhibit in the MUs by 2050. Effects of storms and drought were expected to worsen regardless of scenario, whereas projected development and conservation effects vary depending on scenario but were generally expected to remain similar to current levels or worsen. Please refer to the initial SSA report (Service 2018, pp. 25–39) for the full analysis of future scenarios.

Determination of Barrens Darter Status

Section 4 of the Act (16 U.S.C. 1533) and its implementing regulations (50 CFR part 424) set forth the procedures for determining whether a species meets the definition of an endangered species or a threatened species. The Act defines an “endangered species” as a species in danger of extinction throughout all or a significant portion of its range and a “threatened species” as a species likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range. The

Act requires that we determine whether a species meets the definition of an endangered species or a threatened species because of any of the following factors: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or manmade factors affecting its continued existence.

Status Throughout All of Its Range

The Barrens darter has a small range, which has been reduced from its historical size. Barrens darters currently occur in three of four stream systems that we defined as management units (MUs) in our SSA report (Service 2025, entire): Charles Creek, Barren Fork, and the upper Collins River. The species is extirpated from the Hickory Creek system. In Charles Creek, the Barrens darter's known range consists of a single, linear, 1-mi (1.6 km) reach in the creek's mainstem. In Barren Fork and the upper Collins River, the extent of the Barrens darter's range (upstream to downstream-most occurrence) is 14.7 and 10.4 mi (23.7 and 16.7 km), respectively.

Some streams within each MU are listed by the State of Tennessee as having impaired water and habitat quality along their entire length. Degraded habitat likely provides conditions favorable for invasion by fringed darters, and Barrens darters have been completely replaced in all streams colonized by fringed darters, including in the entire Hickory Creek MU. Species replacement has been rapid, with Barrens darters disappearing within 15 years after contact between the two species.

Overall, the resiliency, redundancy, and representation of the Barrens darter are low. Population resiliency in Charles Creek is low, given the 1-mi (1.6-km), single occupied stream segment, and fringed darter occupation of the downstream reach. Resiliency in the Barren Fork also is low due the ongoing colonization of upstream reaches by the fringed darter, and poor habitat conditions in some stream reaches that favor the fringed darter and directly impact Barrens darter populations via sedimentation and reduced cover. Resiliency in the Upper Collins River MU is moderate to high, but there is no connectivity between the Upper Collins River MU and the other MUs. Barrens darter redundancy is low. Among the three extant MUs, Charles

Creek and the Barren Fork contribute little to redundancy, due to their low resiliency. In addition, the close spatial arrangement of the MUs leaves the species vulnerable to the effects of a single catastrophic event. For example, an extreme or prolonged drought would likely affect the entire range of the species, with individuals that survive desiccation by moving downstream encountering fringed darters. An extreme flooding event would likely affect the entire range of the species by scouring or smothering nesting habitat and washing individuals downstream and into contact with fringed darters. Representation is low because the breadth of occupied habitat types and number of physiographic regions occupied by Barrens darters is naturally low, and genetic diversity is low rangewide, except for a unique genetic marker in the Upper Collins River MU that cannot be shared with the other MU populations because of the lost connectivity.

After evaluating threats to the species and assessing the cumulative effect of the threats under the Act's section 4(a)(1) factors, we find that the primary threats influencing the viability of the Barrens darter are habitat loss; degradation of stream banks, instream cover, and water quality; and habitat fragmentation and isolation (Factor A); and the invasion of Barrens darter-occupied streams by the fringed darter (Factor E). The scope, magnitude, and imminency of these threats have reduced the resiliency, redundancy, and representation of the Barrens darter such that the species is in danger of extinction throughout its range. We did not identify threats to the continued existence of the Barrens darter due to overutilization for commercial, recreational, scientific, or educational purposes (Factor B); or disease or predation (Factor C). After evaluating the threats to the species, we found that past and ongoing changes in habitat, together with the current number of Barrens darter sites colonized by fringed darters, result in conditions that present a high risk of extinction for the Barrens darter. Thus, after assessing the best scientific and commercial data available, we determine that the Barrens darter is in danger of extinction throughout all of its range.

Status Throughout a Significant Portion of Its Range

Under the Act and our implementing regulations, a species may warrant listing if it is in danger of extinction or likely to become so within the foreseeable future throughout all or a

significant portion of its range. We have determined that the Barrens darter is in danger of extinction throughout all of its range and accordingly did not undertake an analysis of any significant portion of its range. Because the Barrens darter warrants listing as endangered throughout all of its range, our determination does not conflict with the decision in *Center for Biological Diversity v. Everson*, 435 F. Supp. 3d 69 (D.D.C. 2020), because that decision related to significant portion of the range analyses for species that warrant listing as threatened, not endangered, throughout all of their ranges.

Determination of Status

Based on the best scientific and commercial data available, we determine that the Barrens darter meets the Act's definition of an endangered species. Therefore, we propose to list the Barrens darter as an endangered species in accordance with sections 3(6) and 4(a)(1) of the Act.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened species under the Act include recognition as a listed species, planning and implementation of recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing results in public awareness, and conservation by Federal, State, Tribal, and local agencies, foreign governments, private organizations, and individuals. The Act encourages cooperation with the States and other countries and calls for recovery actions to be carried out for listed species. The protection required by Federal agencies, including the Service, and the prohibitions against certain activities are discussed, in part, below.

The primary purpose of the Act is the conservation of endangered and threatened species and the ecosystems upon which they depend. The ultimate goal of such conservation efforts is the recovery of these listed species, so that they no longer need the protective measures of the Act. Section 4(f) of the Act calls for the Service to develop and implement recovery plans for the conservation of endangered and threatened species. The goal of this process is to restore listed species to a point where they are secure, self-sustaining, and functioning components of their ecosystems.

The recovery planning process begins with development of a recovery outline made available to the public soon after a final listing determination. The recovery outline guides the immediate implementation of urgent recovery actions while a recovery plan is being developed. Recovery teams (composed of species experts, Federal and State agencies, nongovernmental organizations, and stakeholders) may be established to develop and implement recovery plans. The recovery planning process involves the identification of actions that are necessary to halt and reverse the species' decline by addressing the threats to its survival and recovery. The recovery plan identifies recovery criteria for review of when a species may be ready for reclassification from endangered to threatened ("downlisting") or removal from protected status ("delisting"), and methods for monitoring recovery progress. Recovery plans also establish a framework for agencies to coordinate their recovery efforts and provide estimates of the cost of implementing recovery tasks. Revisions of the plan may be done to address continuing or new threats to the species, as new substantive information becomes available. The recovery outline, draft recovery plan, final recovery plan, and any revisions will be available on our website as they are completed (<https://www.fws.gov/program/endangered-species>) or from our Tennessee Ecological Services Field Office (see **FOR FURTHER INFORMATION CONTACT**).

Implementation of recovery actions generally requires the participation of a broad range of partners, including other Federal agencies, States, Tribes, nongovernmental organizations, businesses, and private landowners. Examples of recovery actions include habitat restoration (e.g., restoration of native vegetation), research, captive propagation and reintroduction, and outreach and education. The recovery of many listed species cannot be accomplished solely on Federal lands because their range may occur primarily or solely on non-Federal lands. To achieve recovery of these species requires cooperative conservation efforts on private, State, and Tribal lands.

If this species is listed, funding for recovery actions may be available from a variety of sources, including Federal budgets, State programs, and cost-share grants for non-Federal landowners, the academic community, and nongovernmental organizations. In addition, pursuant to section 6 of the Act, the State of Tennessee would be eligible for Federal funds to implement management actions that promote the

protection or recovery of the Barrens darter. Information on our grant programs that are available to aid species recovery can be found at: <https://www.fws.gov/service/financial-assistance>.

Although the Barrens darter is only proposed for listing under the Act at this time, please let us know if you are interested in participating in recovery efforts for this species. Additionally, we invite you to submit any new information on this species whenever it becomes available and any information you may have for recovery planning purposes (see **FOR FURTHER INFORMATION CONTACT**).

Section 7 of the Act is titled, "Interagency Cooperation," and it mandates all Federal action agencies to use their existing authorities to further the conservation purposes of the Act and to ensure that their actions are not likely to jeopardize the continued existence of listed species or adversely modify critical habitat. Regulations implementing section 7 are codified at 50 CFR part 402.

Section 7(a)(2) states that each Federal action agency shall, in consultation with the Secretary, ensure that any action they authorize, fund, or carry out is not likely to jeopardize the continued existence of a listed species or result in the destruction or adverse modification of designated critical habitat. Each Federal agency shall review its action at the earliest possible time to determine whether it may affect listed species or critical habitat. If a determination is made that the action may affect listed species or critical habitat, formal consultation is required (50 CFR 402.14(a)), unless the Service concurs in writing that the action is not likely to adversely affect listed species or critical habitat. At the end of a formal consultation, the Service issues a biological opinion, containing its determination of whether the Federal action is likely to result in jeopardy or adverse modification.

In contrast, section 7(a)(4) of the Act requires Federal agencies to confer with the Service on any action which is likely to jeopardize the continued existence of any species proposed to be listed under the Act or result in the destruction or adverse modification of critical habitat proposed to be designated for such species. Although the conference procedures are required only when an action is likely to result in jeopardy or adverse modification, action agencies may voluntarily confer with the Service on actions that may affect species proposed for listing or critical habitat proposed to be designated. In the event that the subject

species is listed or the relevant critical habitat is designated, a conference opinion may be adopted as a biological opinion and serve as compliance with section 7(a)(2) of the Act.

Examples of discretionary actions for the Barrens darter that may be subject to conference and consultation procedures under section 7 are actions that require a Federal permit (such as a permit from the U.S. Army Corps of Engineers under section 404 of the CWA (33 U.S.C. 1251 *et seq.*)) or actions funded by Federal agencies such as the Federal Highway Administration, the U.S. Department of Agriculture's Natural Resources Conservation Service, or the Federal Emergency Management Agency. Federal actions not affecting listed species or critical habitat—and actions on State, Tribal, local, or private lands that are not federally funded, authorized, or carried out by a Federal agency—do not require section 7 consultation. Federal agencies should coordinate with the Tennessee Ecological Services Field Office (see **FOR FURTHER INFORMATION CONTACT**) with any specific questions on section 7 consultation and conference requirements.

The Act and its implementing regulations set forth a series of prohibitions and exceptions that apply to endangered wildlife. The prohibitions of section 9(a)(1) of the Act, and the Service's implementing regulations codified at 50 CFR 17.21, make it illegal for any person subject to the jurisdiction of the United States to commit, to attempt to commit, to solicit another to commit, or to cause to be committed any of the following acts with regard to any endangered wildlife: (1) import into, or export from, the United States; (2) take (which includes harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct) within the United States, within the territorial sea of the United States, or on the high seas; (3) possess, sell, deliver, carry, transport, or ship, by any means whatsoever, any such wildlife that has been taken illegally; (4) deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of commercial activity; or (5) sell or offer for sale in interstate or foreign commerce. Certain exceptions to these prohibitions apply to employees or agents of the Service, the National Marine Fisheries Service, other Federal land management agencies, and State conservation agencies.

We may issue permits to carry out otherwise prohibited activities involving endangered wildlife under certain circumstances. Regulations

governing permits for endangered wildlife are codified at 50 CFR 17.22, and general Service permitting regulations are codified at 50 CFR part 13. With regard to endangered wildlife, a permit may be issued: for scientific purposes, for enhancing the propagation or survival of the species, or for take incidental to otherwise lawful activities. The statute also contains certain exemptions from the prohibitions, which are found in sections 9 and 10 of the Act.

II. Critical Habitat

Background

Section 4(a)(3) of the Act requires that, to the maximum extent prudent and determinable, we designate a species' critical habitat concurrently with listing the species. Critical habitat is defined in section 3(5)(A) of the Act as:

(1) The specific areas within the geographical area occupied by the species, at the time it is listed in accordance with the Act, on which are found those physical or biological features.

(a) Essential to the conservation of the species, and

(b) Which may require special management considerations or protection; and

(2) Specific areas outside the geographical area occupied by the species at the time it is listed, upon a determination that such areas are essential for the conservation of the species.

Our regulations at 50 CFR 424.02 define the geographical area occupied by the species as an area that may generally be delineated around species' occurrences, as determined by the Secretary (*i.e.*, range). Such areas may include those areas used throughout all or part of the species' life cycle, even if not used on a regular basis (*e.g.*, migratory corridors, seasonal habitats, and habitats used periodically, but not solely by vagrant individuals).

Conservation, as defined under section 3(3) of the Act, means to use and the use of all methods and procedures that are necessary to bring an endangered or threatened species to the point at which the measures provided pursuant to the Act are no longer necessary. Such methods and procedures include, but are not limited to, all activities associated with scientific resources management such as research, census, law enforcement, habitat acquisition and maintenance, propagation, live trapping, and transplantation, and, in the

extraordinary case where population pressures within a given ecosystem cannot be otherwise relieved, may include regulated taking.

Critical habitat receives protection under section 7 of the Act through the requirement that each Federal action agency ensure, in consultation with the Service, that any action they authorize, fund, or carry out is not likely to result in the destruction or adverse modification of designated critical habitat. The designation of critical habitat does not affect land ownership or establish a refuge, wilderness, reserve, preserve, or other conservation area. Such designation also does not allow the government or public to access private lands. Such designation does not require implementation of restoration, recovery, or enhancement measures by non-Federal landowners. Rather, designation requires that, where a landowner requests Federal agency funding or authorization for an action that may affect an area designated as critical habitat, the Federal agency consult with the Service under section 7(a)(2) of the Act. If the action may affect the listed species itself (such as for occupied critical habitat), the Federal agency would have already been required to consult with the Service even absent the designation because of the requirement to ensure that the action is not likely to jeopardize the continued existence of the listed species. Even if the Service were to conclude after consultation that the proposed activity is likely to result in destruction or adverse modification of the critical habitat, the Federal action agency and the landowner are not required to abandon the proposed activity, or to restore or recover the species; instead, they must implement "reasonable and prudent alternatives" to avoid destruction or adverse modification of critical habitat.

Under the first prong of the Act's definition of critical habitat, areas within the geographical area occupied by the species at the time it was listed are included in a critical habitat designation if they contain physical or biological features (1) which are essential to the conservation of the species and (2) which may require special management considerations or protection. For these areas, critical habitat designations identify, to the extent known using the best scientific data available, those physical or biological features that are essential to the conservation of the species (such as space, food, cover, and protected habitat).

Under the second prong of the Act's definition of critical habitat, we can designate critical habitat in areas outside the geographical area occupied by the species at the time it is listed, upon a determination that such areas are essential for the conservation of the species.

Section 4(b)(2) of the Act requires that we designate critical habitat on the basis of the best scientific data available. Further, our Policy on Information Standards Under the Endangered Species Act (published in the **Federal Register** on July 1, 1994 (59 FR 34271)), the Information Quality Act (section 515 of the Treasury and General Government Appropriations Act for Fiscal Year 2001 (Pub. L. 106–554; H.R. 5658)), and our associated Information Quality Guidelines provide criteria, establish procedures, and provide guidance to ensure that our decisions are based on the best scientific data available. They require our biologists, to the extent consistent with the Act and with the use of the best scientific data available, to use primary and original sources of information as the basis for recommendations to designate critical habitat.

When we are determining which areas should be designated as critical habitat, our primary source of information is generally the information compiled in the SSA report and information developed during the listing process for the species. Additional information sources may include any generalized conservation strategy, criteria, or outline that may have been developed for the species; the recovery plan for the species; articles in peer-reviewed journals; conservation plans developed by States and counties; scientific status surveys and studies; biological assessments; other unpublished materials; or experts' opinions or personal knowledge.

Habitat is dynamic, and species may move from one area to another over time. We recognize that critical habitat designated at a particular point in time may not include all of the habitat areas that we may later determine are necessary for the recovery of the species. For these reasons, a critical habitat designation does not signal that habitat outside the designated area is unimportant or may not be needed for recovery of the species. Areas that are important to the conservation of the species, both inside and outside the critical habitat designation, will continue to be subject to:

(1) Conservation actions implemented under section 7(a)(1) of the Act; (2) regulatory protections afforded by the requirement in section 7(a)(2) of the Act for Federal agencies to ensure their actions are not likely to jeopardize the continued existence of any endangered or threatened species; and (3) the prohibitions found in section 9 of the Act. Federally funded or permitted projects affecting listed species outside their designated critical habitat areas may still result in jeopardy findings in some cases. These protections and conservation tools will continue to contribute to recovery of the species. Similarly, critical habitat designations made on the basis of the best scientific data available at the time of designation will not control the direction and substance of future recovery plans, habitat conservation plans (HCPs), or other species conservation planning efforts if new information available at the time of those planning efforts calls for a different outcome.

Critical Habitat Determinability

Our regulations at 50 CFR 424.12(a)(2) state that critical habitat is not determinable when one or both of the following situations exist:

(i) Data sufficient to perform required analyses are lacking, or

(ii) The biological needs of the species are not sufficiently well known to identify any area that meets the definition of “critical habitat.”

We reviewed the available information pertaining to the biological needs of the Barrens darter and habitat characteristics where the species is located. A careful assessment of the economic impacts is pending, and we will begin working to acquire the complex information needed to perform that assessment. Therefore, due to the current lack of data sufficient to perform required analyses, we conclude that the designation of critical habitat for the Barrens darter is not determinable at this time. The Act allows the Service an additional year to publish a critical habitat designation that is not determinable at the time of listing (16 U.S.C. 1533(b)(6)(C)(ii)).

Required Determinations

Clarity of the Proposed Rule

We are required by Executive Orders (E.O.s) 12866 and 12988 and by the Presidential memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

(1) Be logically organized;

(2) Use the active voice to address readers directly;

(3) Use clear language rather than jargon;

(4) Be divided into short sections and sentences; and

(5) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in **ADDRESSES**. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that are unclearly written, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

Government-to-Government Relationship With Tribes

In accordance with the President’s memorandum of April 29, 1994 (Government-to-Government Relations with Native American Tribal Governments; 59 FR 22951, May 4, 1994), E.O. 13175 (Consultation and Coordination with Indian Tribal Governments), the President’s memorandum of November 30, 2022 (Uniform Standards for Tribal Consultation; 87 FR 74479, December 5, 2022), and the Department of the Interior’s manual at 512 DM 2, we readily acknowledge our responsibility to communicate meaningfully with federally recognized Tribes and Alaska Native Corporations on a government-to-government basis. In accordance with Secretary’s Order 3206 of June 5, 1997 (American Indian Tribal Rights, Federal-Tribal Trust Responsibilities, and the Endangered Species Act), we readily acknowledge our responsibilities to work directly with Tribes in developing programs for healthy ecosystems, to acknowledge that Tribal lands are not subject to the same controls as Federal public lands, to remain sensitive to

Indian culture, and to make information available to Tribes. We have determined that no Tribal lands fall within the boundaries of the proposed critical habitat for the Barrens darter, so no Tribal lands would be affected by the proposed designation.

List of Subjects in 50 CFR Part 17

Endangered and threatened species, Exports, Imports, Plants, Reporting and recordkeeping requirements, Transportation, Wildlife.

Signing Authority

Paul Souza, Regional Director, Region 8, Exercising the Delegated Authority of the Director of the U.S. Fish and Wildlife Service, approved this action on June 6, 2025, for publication. On June 25, 2025, Paul Souza authorized the undersigned to sign the document electronically and submit it to the Office of the Federal Register for publication as an official document of the U.S. Fish and Wildlife Service.

Proposed Regulation Promulgation

Accordingly, we propose to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

- 1. The authority citation for part 17 continues to read as follows:
- Authority:** 16 U.S.C. 1361–1407; 1531–1544; and 4201–4245, unless otherwise noted.
- 2. In § 17.11, in paragraph (h), amend the List of Endangered and Threatened Wildlife by adding an entry for “Darter, Barrens” in alphabetical order under FISHES to read as follows:

§ 17.11 Endangered and threatened wildlife.

* * * * *

Federal Register

Vol. 90, No. 124

Tuesday, July 1, 2025

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by July 31, 2025 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function. An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Food and Nutrition Service

Title: Federal-State Supplemental Nutrition Programs Agreement (Form FNS–339).

OMB Control Number: 0584–0332.

Summary of Collection: The Federal-State Supplemental Nutrition Programs Agreement (form FNS–339) is an annual contract between the U.S. Department of Agriculture (USDA) and each State, Territory, and Indian Tribal Government agency seeking to operate one or more of the following programs: The Special Supplemental Nutrition Program for Women, Infants and Children (WIC), the WIC Farmers' Market Nutrition Program (FMNP), and the Seniors Farmers' Market Nutrition Program (SFMNP). The Food and Nutrition Service (FNS), of the USDA, is authorized to administer the WIC and the FMNP Programs under the following authority: Section 17 of the Child Nutrition Act (CNA) of 1966, as amended, and the SFMNP under 7 U.S.C. 3007 as amended. Federal regulations at 7 Code of Federal Regulations (CFR) 246.3(c), 248.3(c), and 249.3(c) require that each State agency desiring to administer WIC, FMNP, and/or SFMNP must enter into a written agreement (using FNS–339) with the Department for administration of the program(s) in the jurisdiction of the State agency.

Need and Use of the Information: The FNS–339 requires the signature of the Chief State agency official and includes a certification/assurance regarding drug free workplace, a certification regarding lobbying, and a disclosure of lobbying activities. The signed agreement thereby authorizes USDA/FNS to make funds available to State agencies for the administration of the WIC, FMNP, and/or SFMNP Programs within the State, Indian Tribal Organizations, District of Columbia, and Territories, and in accordance with 7 Code of Federal Regulations (CFR) parts 246, 248, and 249. The State agency agrees to accept Federal funds for expenditure in accordance with applicable statutes and regulations and to comply with all the provisions of such statutes and regulations, and amendments thereto.

Description of Respondents: State, Local, or Tribal government.

Number of Respondents: 132.

Frequency of Responses: Reporting: Annually.

Total Burden Hours: 33.

Rachelle Ragland-Greene,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–30–P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meetings of the Montana Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: U.S. Commission on Civil Rights.

ACTION: Notice of public meetings.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act, that the Montana Advisory Committee (Committee) to the U.S. Commission on Civil Rights will hold a public business meeting every second Thursday of the month (August 2025 through December 2025) via Zoom at 3:00 p.m. MT. The purpose of these meetings is to discuss civil rights concerns in the state.

DATES: Thursday, August 14, 2025, from 3:00 p.m. to 4:30 p.m. Mountain Time; Thursday, September 11, 2025, from 3:00 p.m. to 4:30 p.m. Mountain Time; Thursday, October 9, 2025, from 3:00 p.m. to 4:30 p.m. Mountain Time; Thursday, November 13, 2025, from 3:00 p.m. to 4:30 p.m. Mountain Time; Thursday, December 11, 2025, from 3:00 p.m. to 4:30 p.m. Mountain Time.

ADDRESSES: The meetings will be held via Zoom Webinar. Members of the public only need to register once.

Registration Link (Audio/Visual) for All Meetings: <https://www.zoomgov.com/webinar/register/WN/SWk0SO7gTFSyPCGZ87Ls1w>.

Join by Phone (Audio Only) for All Meetings: (833) 435–1820 USA Toll-Free; Meeting ID: 160 910 9573.

FOR FURTHER INFORMATION CONTACT: Ana Victoria Fortes, Designated Federal Officer, at afortes@usccr.gov or (202) 681–0857.

SUPPLEMENTARY INFORMATION: This committee meeting is available to the public through the registration link above. Any interested member of the public may listen to the meeting. An open comment period will be provided

to allow members of the public to make a statement as time allows. Per the Federal Advisory Committee Act, public minutes of the meeting will include a list of persons who are present at the meeting. If joining via phone, callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any charges incurred. Callers will incur no charge for calls initiated over land-line connections to the toll-free telephone number. Closed captioning will be available for individuals who are deaf, hard of hearing, or who have certain cognitive or learning impairments. To request additional accommodations, please email Liliana Schiller, Support Services Specialist, at lschiller@usccr.gov at least 10 business days prior to the meeting.

Members of the public are entitled to submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be emailed to Ana Victoria Fortes at afortes@usccr.gov. Persons who desire additional information may contact the Regional Programs Coordination Unit at (202) 681-0857.

Records generated from this meeting may be inspected and reproduced at the Regional Programs Coordination Unit Office, as they become available, both before and after the meeting. Records of the meetings will be available via this file sharing website. Persons interested in the work of this Committee are directed to the Commission's website, <http://www.usccr.gov>, or may contact the Regional Programs Coordination Unit at the above phone number.

Agenda

- I. Welcome & Roll Call
- II. Discussion: Civil Rights in Montana
- III. Public Comment
- IV. Next Steps
- V. Adjournment

Dated: June 27, 2025.

David Mussatt,

Supervisory Chief, Regional Programs Unit.

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Florida Advisory Committee; Correction

AGENCY: Commission on Civil Rights.

ACTION: Notice; correction to meeting time.

SUMMARY: The Commission on Civil Rights published a notice in the **Federal**

Register on Friday, May 2, 2025, concerning a meeting of the Florida Advisory Committee. The meeting time has since changed from 4:00 p.m.–5:00 p.m. ET to 4:00 p.m.–5:30 p.m. ET.

FOR FURTHER INFORMATION CONTACT: Liliana Schiller, Support Services Specialist, at lschiller@usccr.gov or (202) 770-1856.

SUPPLEMENTARY INFORMATION:

Correction: In the **Federal Register** on Friday, May 2, 2025, in FR Document Number 2025-07618 on page 18833, first column, correct the meeting time to: 4:00 p.m.–5:30 p.m. ET.

Dated: June 26, 2025.

David Mussatt,

Supervisory Chief, Regional Programs Unit.

BILLING CODE P

DEPARTMENT OF COMMERCE

Office of the Secretary

[Docket No. 250627-0115]

XRIN: 0605-XR011

Procedures for Considering Environmental Impacts

AGENCY: Office of the Secretary (OS), Department of Commerce (DOC).

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Commerce (DOC or Department) is updating DOC Administrative Order 216-6, "Implementing the National Environmental Policy Act," which outlines the Department's responsibilities for complying with the National Environmental Policy Act (NEPA) and identifies procedures specific to sub-components of DOC that implement NEPA. The updated Order and procedures promote collaboration and efficiencies in the implementation of NEPA and modernize the processes and procedures for environmental review. DOC is not soliciting comments on the updated Order or sub-component NEPA procedures. The National Oceanic and Atmospheric Administration (NOAA) is soliciting comments on its proposal to establish new, and amend its existing, categorical exclusions (CEs) in its agency NEPA implementing procedures.

DATES: All documents identified in this notice are effective July 1, 2025. To ensure consideration, comments on NOAA's proposal to establish new, and amend its existing, CEs must be submitted by July 31, 2025.

ADDRESSES: Please submit your comments by only one of the following means, identifying your submission by

docket number. All electronic submissions must be made to <http://www.regulations.gov>.

- **Federal eRulemaking Portal:** Go to <http://www.regulations.gov> and follow the online instructions for submitting comments.

- **Mail:** NOAA NEPA Coordinator, 1315 East-West Highway, Room 15877, Silver Spring, MD 20910.

Instructions: All comment submissions must include the agency name, docket name, and docket number (NOAA-HQ-2025-0207). Note that all comments received will be posted without change to www.regulations.gov, including any personal information provided.

FOR FURTHER INFORMATION CONTACT:

Peter Viola, Attorney Advisor, Office of the Assistant General Counsel for Transactions and Program Management, pviola@doc.gov, (202) 482-4669.

SUPPLEMENTARY INFORMATION:

I. Background

NEPA requires all Federal agencies to assess the environmental impact of their actions. 42 U.S.C. 4332(2)(C). The statute establishes a national environmental policy of the Federal government to use all practicable means and measures to foster and promote the general welfare, create and maintain conditions under which man and nature can exist in productive harmony, and fulfill the social, economic, and other requirements of present and future generations of Americans. 42 U.S.C. 4331(a). NEPA Section 102(2) establishes the procedural requirements to carry out the policy stated in Section 101 of NEPA. It requires Federal agencies to consider the environmental effects of proposed actions in their decisionmaking and prepare detailed environmental statements on major Federal actions significantly affecting the quality of the human environment. 42 U.S.C. 4332(2)(C).

The Fiscal Responsibility Act of 2023 (FRA) was signed into law on June 3, 2023. The FRA amended NEPA, including limiting the definition of “major federal action” to include an action that an agency determines is subject to substantial Federal control and responsibility, limiting the scope of an environmental impact statement (EIS) review to reasonably foreseeable environmental effects of the proposed agency action, and limiting the alternatives in an EIS to a reasonable range of alternatives that are technically and economically feasible. In addition, the FRA established page and time limits for environmental assessments (EAs) and EISs, outlined specific roles

for lead agencies, and directed a lead agency to prescribe procedures to allow a project sponsor to prepare an EA or EIS under the supervision of the agency. Further, the FRA provided guidelines for the use of analysis from a prior programmatic environmental review document in a subsequent document for a specified time period, and a streamlined process for adopting another agency’s categorical exclusions (CEs).

CEQ previously issued regulations at 40 CFR parts 1500–1508 (CEQ regulations) implementing NEPA that were binding on Federal agencies. On February 25, 2025, CEQ issued an interim final rule to remove the existing CEQ regulations, in response to Executive Order (E.O.) 14154, “Unleashing American Energy.” The Department has accordingly revised DAO 216–6 and bureau-level procedures in consultation with CEQ. The revisions to DAO 216–6 and DOC bureau-level procedures are effective immediately. As part of revising its NEPA procedures, NOAA has made changes to its CEs and is requesting public comment on those changes. CEs are categories of actions that an agency has determined normally do not have a significant effect on the human environment, individually or in the aggregate. CEs are a form of review that agencies use to comply with NEPA for proposed actions that normally have no or minimal environmental effects.

II. Revision of DOC Bureau-Level NEPA Procedures

DAO 216–6 has been revised to identify the bureaus within the Department that undertake NEPA reviews and provide general direction regarding complying with the statute. The Department’s bureaus that undertake NEPA reviews include NOAA, the National Institute of Standards and Technology, the National Telecommunications and Information Administration, the Economic Development Administration, and the First Responder Network Authority. DAO 216–6 provides links to the NEPA procedures for each of these bureaus, thus providing a single source for applicants or other individuals seeking information on bureau-level NEPA procedures. The revised DAO 216–6 and bureau-level procedures update terminology for consistency with modern NEPA practice, including the definition of “major Federal action”, and remove references to the rescinded CEQ regulations; allow reliance on previously prepared EISs, EAs, and CEs; and set forth procedures for using

applicant-prepared and programmatic environmental documents.

III. Proposed Revisions to NOAA Categorical Exclusions; Request for Comments

In 2017, NOAA finalized its most recent revision to its NEPA procedures, including a wholesale overhaul of NOAA’s CEs, covering categories of actions that normally do not have a significant effect on the human environment, individually or in the aggregate, and therefore do not require preparation of an EA or EIS. 42 U.S.C. 4336(b)(2), 4336c, 4336e(1); 82 FR 4306. As part of the review of its agency NEPA procedures, NOAA has also reviewed and is proposing revisions to its categorical exclusions. This proposal is based on NOAA’s experience implementing these CEs, on a review of NOAA’s operational activities, based on input from the NOAA NEPA Working Group, legal and mission changes, and in order to prioritize efficient environmental review in tandem with NOAA’s revised NEPA procedures.

This section lists each proposed revision to NOAA’s CEs and summarizes NOAA’s rationale for each proposed revision. For a detailed discussion of and substantiation for each proposed revision to NOAA’s CEs, please refer to the substantiation record available at www.regulations.gov and www.noaa.gov/nepa.

Proposed New Categorical Exclusions

B13: Licensing of Private Remote Sensing Space Systems

NOAA is proposing a new CE to cover remote sensing licensing actions in response to regulatory and program changes under the Land Remote Sensing Policy Act (LRSPA), 51 U.S.C. 60101–60162, and its implementing regulations at 15 CFR part 960 following the update to NOAA’s NEPA procedures in 2017. The proposed new CE would cover the issuance of licenses under the LRSPA by the Commercial Remote Sensing Regulatory Affairs (CRSRA) division of NOAA’s Office of Space Commerce for private entities to operate space-based private remote sensing space systems. The CE will also cover associated actions related to the license such as the imposition of license conditions, shutter control directives issued in the interests of national security; the modification of such licenses, and disposal of the system “in a manner satisfactory to the President.”

Proposed CE text: “B13: Issuance of licenses, conditions, license modifications, and associated actions under the Land Remote Sensing Policy

Act, 51 U.S.C. 60101–60162, for the operation of private remote sensing space system activities.”

E5: Shellfish Outplanting

This proposed CE will cover the limited collection of shellfish from healthy, abundant wild populations using minimally invasive procedures and resulting in collection of few animals relative to the overall wild population. The farms and lease sites covered by proposed CE are those that employ recommended protocols that prevent the introduction of disease, chemicals, toxins, and non-native species, safeguard genetic integrity of native populations, and conduct their operations in compliance with established Federal and state regulatory guidelines and best management practices. The CE will cover small-scale, limited research that does not involve the introduction or use of new or modified gear, use of new or non-approved chemical compounds or chemicals, introduction of a species not previously present within the waterbody, an increase in the operational footprint of an existing farm or lease site, or the creation of a new commercial aquaculture farm or research lease site.

Proposed CE text: “E5: Research involving the limited collection and placement of native, naturalized, or shellfish species already found in the watershed (“outplanting”). This CE covers a limited collection of shellfish from healthy, abundant wild populations using minimally invasive procedures and resulting in collection of few animals relative to the overall wild population. This CE covers outplanting on existing commercial aquaculture farms or aquaculture research lease sites or in an established Floating Upweller System (FLUPSY) for experimental purposes. The farms and lease sites covered by this CE are those that employ recommended protocols that prevent the introduction of disease, chemicals, toxins, and non-native species, safeguard genetic integrity of native populations, and conduct their operations in compliance with established Federal and state regulatory guidelines and best management practices. This CE covers small-scale, limited research that does not involve the introduction or use of new or modified gear, use of new or non-approved chemical compounds or chemicals, a species not previously present within the waterbody, an increase in the operational footprint of an existing farm or lease site, or the creation of a new commercial aquaculture farm or research lease site.”

F8: Release Response and Cleanup

NOAA is proposing to add a new CE to cover environmental assessment, response, and cleanup for real property management purposes at sites and facilities that NOAA is responsible for managing. This CE will ensure increased effective response and management across NOAA properties while bringing NOAA’s program into alignment with similar management regimes at sister agencies.

Proposed CE text: “F8: Activities related to release response and cleanup from releases for which NOAA is responsible. This includes, but is not limited to, release response activities, site characterization studies, and environmental monitoring (including sampling, analytical testing, waste disposal, siting, construction, operation, surveying, as well as installation and decommissioning of characterization and monitoring devices).”

G10, G11, & G12: Aircraft Operations

NOAA’s Office of Marine and Aviation Operations (OMAO) manages and operates NOAA’s fleet of fifteen research and survey ships and ten specialized environmental data-collecting aircraft. NOAA aircraft operate throughout the world providing a wide range of capabilities including hurricane reconnaissance and research, marine mammal and fisheries assessment, and coastal mapping. NOAA aircraft carry scientists and specialized instrument packages to conduct research for NOAA’s missions.

These proposed CEs incorporate and adopt similar language and parameters established by other agencies that operate and maintain aircraft fleets, such as the U.S. Air Force and U.S. Navy. NOAA is proposing these CEs in order to ensure NEPA coverage for routine use of aircraft in NOAA’s missions. NOAA’s existing CEs are limited to the use of systems to collect data and the repositioning of assets, not fully covering the broad scope of NOAA’s aviation missions. These CEs fill this gap by extending CE coverage to OMAO’s training operations, special use airspace requests, airfield procedures, and routine use of aircraft for both operational and support purposes. In addition to bringing NOAA’s CE use into alignment with other operational agencies, these CEs will help ensure mission readiness across NOAA’s aircraft fleet.

Proposed CE texts: “G10: Aircraft operation trainings conducted on or over nonmilitary land or water areas, where such training is consistent with

the type and tempo of existing non-military airspace, land and water use.”

“G11: Formal requests to the Federal Aviation Administration, or host-nation equivalent agency, to establish or modify special use airspace.”

“G12: Adopting airfield approach, departure, and en route procedures that are less than 3,000 feet above ground level and that also do not route air traffic over noise-sensitive areas, including residential neighborhoods or cultural, historical, and outdoor recreational areas.”

Proposed Technical and Editorial Changes

NOAA is proposing technical and editorial corrections to the following twenty-two CEs. NOAA has determined these proposed changes do not substantively affect the scope or change the meaning of the CE. NOAA is making these revisions to correct grammatical errors, eliminate duplicative text, provide clarification for practitioners, ensure consistency, update examples, and use plain language.

The revised text of these CEs is as follows:

“A1: A fishery management action, including those that change regulations, which does not result in a substantial change in any of the following: fishing location, timing, effort, authorized gear types, or harvest levels.

A2: Preparation of a recovery plan pursuant to the Endangered Species Act § 4(f)(1), 16 U.S.C. 1533(f)(1). Such plans are advisory documents that provide consultative and technical assistance in recovery planning and do not implement site-specific or species-specific management actions. However, implementation of specific tasks identified in a recovery plan may require additional NEPA analysis depending on the nature of the action.

A3: Temporary fishery closures or extensions of closures under the Magnuson-Stevens Fishery Conservation and Management Act, § 305(c)(3)(C), 16 U.S.C. 1855(c)(3)(C), to ensure public health and safety.

A4: Minor updates to existing national marine sanctuary management plans. This CE does not apply to sanctuary designations, expansions, changes in terms of designation, or new sanctuary management plans.

A6: Review and approval of changes to state coastal management programs under the Coastal Zone Management Act § 306(e), 16 U.S.C. 1455(e), and NOAA’s regulations at 15 CFR pt. 923.

B1: Issuance of permits or permit modifications under Endangered Species Act (ESA) § 10(a)(1)(A), 16 U.S.C. 1539(a)(1)(A), for take, import, or

export of endangered species for scientific purposes or to enhance the propagation or survival of the affected species, or in accordance with the requirements of an ESA Section 4(d) regulation for threatened species.

B2: Issuance of permits or permit amendments under the Marine Mammal Protection Act § 104, 16 U.S.C. 1374, for take or import of marine mammals for scientific research, enhancement, commercial or educational photography or public display purposes; and issuance of Letters of Confirmation under the General Authorization for scientific research involving only Level B harassment.

B3: Issuance of, and amendments to, “low effect” Incidental Take Permits and their supporting “low effect” Habitat Conservation Plans under the Endangered Species Act § 10(a)(1)(B), 16 U.S.C. 1539(a)(1)(B).

B4: Issuance of incidental harassment authorizations under the Marine Mammal Protection Act § 101(a)(5)(A), (D), 16 U.S.C. 1371(a)(5)(A), (D), for the incidental, but not intentional, take by harassment of marine mammals during specified activities and for which no serious injury or mortality is anticipated.

B5: Issuance of, or amendments to, general permits for activities that are included in the established permit categories at 15 CFR 922.30–922.37, that meet the regulatory review criteria at 15 CFR 922.30–922.37, and any applicable site-specific regulations.

B6: Issuance of, or amendments to, special use permits for activities in a national marine sanctuary that are necessary to establish conditions of access to and use of any sanctuary resource or promote public use and understanding of a sanctuary resource and must be conducted in a manner that does not destroy, cause the loss of, or injure sanctuary resources in accordance with the National Marine Sanctuaries Act § 310, 16 U.S.C. 1441.

B7: Issuance of, or amendments to, authorizations for activities allowed by a valid federal, regional, state, local or tribal government approval (e.g., leases, permits, and licenses) issued after the effective date of designation or expansion, so long as such authorizations are based upon a consideration of the regulatory review criteria at 15 CFR 922.30–922.37.

B8: Issuance of, or amendments to, certifications for pre-existing activities authorized by a valid federal, regional, state, local, or tribal government approval (e.g., leases, permits, and licenses) or rights of subsistence use or access in existence on the effective date of the final regulations for a designation

or revised terms of designation of any national marine sanctuary where the Office of National Marine Sanctuaries issues terms and conditions that are either ministerial or prescribe avoidance, minimization, or mitigation measures.

B9: Issuance of, or amendments to Papahānaumokuākea Marine National Monument (as originally established by Proclamation No. 8031, 71 FR 36,443 (June 26, 2006) and named Papahānaumokuākea by Proclamation No. 8112, 72 FR 10031 (March 6, 2007)) permits for activities that are included in established permit categories (50 CFR pt. 404) and that meet the regulatory review criteria (50 CFR 404.11), that limit any potential impacts so that the proposed activity will be conducted in a manner compatible with the monument’s primary objective of resource protection.

B10: Issuance of, or amendments to, Papahānaumokuākea Marine National Monument special ocean use permits for activities or use of the monument that are engaged in to generate revenue or profits for one or more of the persons associated with the activity or use, and do not destroy, cause the loss of, or injure monument resources.

B11: Issuance of, or amendments to permits or authorizations for activities that are conducted within Marine National Monuments other than Papahānaumokuākea that are limited in scope so that the potential impacts of the proposed activities will be conducted in a manner compatible with a monument’s primary objective of resource protection, and do not destroy, cause the loss of, or injure monument resources.

B12: Issuance of Exempted Fishing Permits, Scientific Research Permits, and other permits for research that may impact species regulated under the authority of the Magnuson-Stevens Fishery Conservation and Management Act, 16 U.S.C. 1801–1884, and the Atlantic Tunas Convention Act, 16 U.S.C. 971–971k. This CE is limited to permits that authorize activities that are limited in size, magnitude, or duration.

C1: Habitat restoration actions, provided that such action: (1) Transplants only organisms currently or formerly present at the site or in its immediate vicinity (if transplant is a component of the action); (2) Does not require substantial placement of fill or dredging; (3) Does not involve any removal of debris, excavation, or conditioning of soils unless such removal of debris, excavation, or conditioning of soils is geographically limited to the impact area such that site conditions will not impede or

negatively alter natural processes, is in compliance with all permit and disposal requirements, and will not impact aquifers or recharge areas; and (4) Does not involve an added risk of human or environmental exposure to toxic or hazardous substances, pathogens, or radioactive materials.

Note on the application of C1: If applicable, limitations and mitigation measures identified in the NOAA Restoration Center Programmatic Environmental Impact Statement for Habitat Restoration Actions must be followed. This CE includes, but is not limited to, response or restoration actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. 9601–9628, the Oil Pollution Act (OPA), 33 U.S.C. 2701–2761, or the National Marine Sanctuaries Act (NMSA), 16 U.S.C. 1431–1445a, if such actions help to restore an ecosystem, habitat, biotic community, or population of living resources to a determinable pre-impact condition prior to the incident leading to the response or restoration. The decision maker should consider the scope and scale of response and restoration actions proposed under CERCLA, OPA, or NMSA, which may preclude the use of this CE.

D2: Provision of a grant, a contract or other financial assistance to a State, Fishery Management Council, or Marine Fisheries Commission under the Magnuson-Stevens Fishery Conservation and Management Act § 402(d), 16 U.S.C. 1881a(d).

E6: Research that involves the development and testing of new and modified fishing gear and technology in order to reduce adverse effects from fishing gear on non-target species, and is limited in size, magnitude, or duration.

G2: Routine movement of mobile assets, such as vessels and aircraft, for homeport reassignments or repair/overhaul, where no new support facilities are required.

G5: Enforcement operations conducted under statutory mandate. This does not include bringing judicial or administrative civil or criminal enforcement actions which are outside the scope of NEPA.”

Proposed Substantive Changes

NOAA’s review of its CEs determined that certain existing CEs would benefit from revisions that clarified the scope and applicability of the CE. Internal discussions also resulted in many instances in the addition or revision of examples provided for the CEs for the benefit of NOAA NEPA practitioners.

This section explains the substantive revisions NOAA made to its proposed CEs and the rationale for those revisions.

A5: Updates to National Estuarine Research Reserve Actions

NOAA is proposing to amend A5 to allow for National Estuarine Research Reserve (NERR) boundary changes so long as certain conditions are met. Additionally, the CE is limited in that it does not apply to new NERR management plans, the addition of a new component to the NERR, or to the execution of any specific action subsequently funded to support the updated NERR management plan. The proposed changes and revisions do not result in a substantial change in scope or applicability from the listed 2017 CEs.

The revised text is as follows: “A4: Updates to existing National Estuarine Research Reserve (NERR) management plans and boundary changes, as long as these changes do not significantly change allowable uses, uses requiring a permit, or restrictions on uses. This CE includes changes to the NERR boundary where the following conditions are met: (1) The boundary change meets site selection and feasibility criteria. 15 CFR 921.11; (2) The proposed management of the properties is consistent with the NERRS regulations. 15 CFR 921.1, 921.13; and (3) The state has adequate state control over the parcels. 15 CFR 921.30(a). This CE does not apply to management plans for newly designated NERRs, the addition of a new component to a multiple-site NERR, or to the execution of any specific action subsequently funded by NOAA to support the updated NERR management plan.”

E1* & E3

NOAA is proposing to create a streamlined and combined E-series CE E3 that combines a portion of the 2017 E1 CE with the 2017 E3, E4, and E5 CEs in an effort to consolidate research-related activities together. This consolidation will increase certainty and efficiency in practice and align NOAA's NEPA procedures more closely to other agencies' NEPA procedures, which often only have a single research related CE. This change is not intended to change the scope of actions covered under the E-series CEs. The past several years implementing the 2017 CEs has revealed practical inefficiencies and confusion around selecting the appropriate research-related CE—between E1, which largely focused on laboratory-based activities; E3, which

largely focused on nondestructive data collection techniques; E4, which largely focused on the observation of living resources, without physical contact; and E5, which largely focused on physical interaction with living resources. It was not uncommon for a proposed action to involve activities that fell within the gambit of more than one of these research-related CEs. Because the activities under each of these CEs have already been determined by NOAA in its existing NEPA Procedures to not have individual or cumulative significant impacts on the human environment and the research activities considered are at times a single proposed action, NOAA determined it is appropriate to combine E1 (in part), E3, E4, and E5 into a single research-related CE. The consolidation of E1 (in part), E3, E4, and E5 will rectify the unnecessary administrative burden present in the current NOAA NEPA Procedures and reduce uncertainty, increase efficiency, and ensure compliance with NEPA when applying CEs. Although this change is not intended to change the scope of actions covered under the 2017 E-series CEs, NOAA is proposing to clarify the bounds of the proposed revised E3 by identifying two prerequisites for its use. Specifically, the activities must: (1) use scientifically accepted best management practices (BMPs) or peer-reviewed scientifically accepted methods that minimize impacts, as applicable, and (2) avoid locations or times that would normally result in long-term adverse ecosystem impacts. These changes, along with a new definition of “long-term adverse ecosystem impacts” and examples of best management practices in the substantiation record, are intended to elucidate the types of “methodologies and locations to ensure that there are no long-term adverse impacts to ecosystems” that were considered in the 2017 version of E5.

The revised text is as follows: “E1*: Computational and dry laboratory activities including data input and analysis; database and software development and maintenance; virtual simulations and modeling; and bench-scale fabrication, development, calibration, and testing of prototypes.”

“E3: Scientific research activities that involve: field observation, measurements, or surveys; collecting, analyzing, processing, or archiving samples or data; capturing, handling, marking, or tagging living specimens; or any combination thereof.

This CE applies so long as the activities: (1) use scientifically accepted best management practices (BMPs) or

peer-reviewed scientifically accepted methods that minimize impacts, as applicable, and (2) avoid locations or times that would normally result in long-term adverse ecosystem impacts. Long-term adverse ecosystem impacts means an impact that persists after the project has concluded that alters or disrupts ecosystem functioning, such as modifying species behavioral patterns or altering habitat functions. The Administrative Record to this CE presents a nonexhaustive list of available resources on BMPs and peer-reviewed scientifically accepted methods that apply to many of the activities encompassed by this CE.”

E4: Aquaculture Research

The proposed edits to the 2017 aquaculture research CE, E8, will reduce unnecessary administrative burden for aquaculture activities with no potential for significant impacts to the human environment, reduce uncertainty, increase efficiency, and ensure compliance with NEPA. This CE is limited to research activities conducted at land-based facilities and does not extend to operations of the facility that are independent of research activities. The scope of this CE does not extend to aquaculture farms or aquaculture research sites operating in marine or coastal waters.

The revised text is as follows: “E4: Biological, chemical, food production, ecological, or toxicological research conducted in an established, land-based mesocosm or aquaculture facility (e.g., recirculating aquaculture system, biofloc system, hatchery) that employs recommended protocols providing for containment and disposal of waste, chemicals, toxins, non-native species, etc., in compliance with established Federal and state regulatory guidelines, and best management practices.”

NOAA requests comments from the public on its proposed revisions to existing CEs and new CEs. NOAA also invites comment on the substantiation record and supporting materials it has prepared to substantiate this proposal. The agency will consider input from the public and consult with CEQ for a conformity determination before finalizing its proposal.

Dated: June 27, 2025.

David Langdon,

Deputy Director, Office of Policy and Strategic Planning, Department of Commerce.

BILLING CODE 3510-DT-P

DEPARTMENT OF COMMERCE**Foreign-Trade Zones Board****[B-34-2025]****Foreign-Trade Zone (FTZ) 116, Notification of Proposed Production Activity; The Premcor Refining Group, Inc.; (Sustainable Aviation Fuel); Port Arthur, Texas**

Valero Energy Corporation submitted a notification of proposed production activity on behalf of its affiliate The Premcor Refining Group, Inc. (Premcor) to the FTZ Board (the Board) for Premcor's facilities in Port Arthur, Texas within Subzone 116C. The notification conforming to the requirements of the Board's regulations (15 CFR 400.22) was received on June 26, 2025.

Pursuant to 15 CFR 400.14(b), FTZ production activity would be limited to the specific finished product described in the submitted notification (summarized below) and subsequently authorized by the Board. The benefits that may stem from conducting production activity under FTZ procedures are explained in the background section of the Board's website—accessible via www.trade.gov/ftz. The proposed finished product would be added to the production authority that the Board previously approved for the operation, as reflected on the Board's website.

The proposed finished product is sustainable aviation fuel (duty rate 52.5 cents/barrel).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary and sent to: ftz@trade.gov. The closing period for their receipt is August 11, 2025.

A copy of the notification will be available for public inspection in the "Online FTZ Information System" section of the Board's website.

For further information, contact Juanita Chen at juanita.chen@trade.gov.

Dated: June 27, 2025.

Elizabeth Whiteman,

Executive Secretary.

BILLING CODE 3510-DS-P

DATES: Applicable July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Commerce official identified in the *Initiation of Review* section below at AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230. For information from the ITC, contact Mary Messer, Office of Investigations, U.S. International Trade Commission at (202) 205-3193.

SUPPLEMENTARY INFORMATION:**Background**

Commerce's procedures for the conduct of Sunset Reviews are set forth in its *Procedures for Conducting Five-Year (Sunset) Reviews of Antidumping and Countervailing Duty Orders*, 63 FR 13516 (March 20, 1998) and 70 FR 62061 (October 28, 2005). Guidance on methodological or analytical issues relevant to Commerce's conduct of Sunset Reviews is set forth in *Antidumping Proceedings: Calculation of the Weighted-Average Dumping Margin and Assessment Rate in Certain Antidumping Duty Proceedings; Final Modification*, 77 FR 8101 (February 14, 2012).

Initiation of Review

In accordance with section 751(c) of the Act and 19 CFR 351.218(c), we are initiating the Sunset Reviews of the following antidumping and countervailing duty order(s) and suspended investigation(s):

DEPARTMENT OF COMMERCE**International Trade Administration****Initiation of Five-Year (Sunset) Reviews**

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: In accordance with the Tariff Act of 1930, as amended (the Act), the U.S. Department of Commerce (Commerce) is automatically initiating the five-year reviews (Sunset Reviews) of the antidumping and countervailing duty (AD/CVD) order(s) and suspended investigation(s) listed below. The U.S. International Trade Commission (ITC) is publishing concurrently with this notice its notice of *Institution of Five-Year Reviews* which covers the same order(s) and suspended investigation(s).

Filing Information

As a courtesy, we are making information related to sunset proceedings, including copies of the pertinent statute and Commerce's regulations, Commerce's schedule for Sunset Reviews, a listing of past revocations and continuations, and current service lists, available to the public on Commerce's website at the following address: <https://enforcement.trade.gov/sunset/>. All submissions in these Sunset Reviews must be filed in accordance with Commerce's regulations regarding format, translation, and service of documents. These rules, including electronic filing requirements via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS), can be found at 19 CFR 351.303.

In accordance with section 782(b) of the Act, any party submitting factual information in an AD/CVD proceeding must certify to the accuracy and completeness of that information. Parties must use the certification formats provided in 19 CFR 351.303(g). Commerce intends to reject factual submissions if the submitting party does not comply with applicable revised certification requirements.

Letters of Appearance and Administrative Protective Orders

Pursuant to 19 CFR 351.103(d), Commerce will maintain and make available a public service list for these proceedings. Parties wishing to participate in any of these five-year reviews must file letters of appearance as discussed at 19 CFR 351.103(d). To facilitate the timely preparation of the public service list, it is requested that those seeking recognition as interested parties to a proceeding submit an entry of appearance within 10 days of the publication of the Notice of Initiation.

Because deadlines in Sunset Reviews can be very short, we urge interested parties who want access to proprietary information under administrative protective order (APO) to file an APO application immediately following publication in the **Federal Register** of this notice of initiation. Commerce's regulations on submission of proprietary information and eligibility to receive access to business proprietary information under APO can be found at 19 CFR 351.304-306. Note that Commerce has temporarily modified certain of its requirements for serving documents containing business proprietary information, until further notice.¹

Information Required From Interested Parties

Domestic interested parties, as defined in section 771(9)(C), (D), (E), (F), and (G) of the Act and 19 CFR 351.102(b), wishing to participate in a Sunset Review must respond not later than 15 days after the date of publication in the **Federal Register** of this notice of initiation by filing a notice of intent to participate. The required contents of the notice of intent to participate are set forth at 19 CFR 351.218(d)(1)(ii). In accordance with Commerce's regulations, if we do not receive a notice of intent to participate from at least one domestic interested party by the 15-day deadline, Commerce will automatically revoke the order without further review.²

If we receive an order-specific notice of intent to participate from a domestic interested party, Commerce's regulations provide that *all parties* wishing to participate in a Sunset Review must file complete substantive

responses not later than 30 days after the date of publication in the **Federal Register** of this notice of initiation. The required contents of a substantive response, on an order-specific basis, are set forth at 19 CFR 351.218(d)(3). Note that certain information requirements differ for respondent and domestic parties. Also, note that Commerce's information requirements are distinct from the ITC's information requirements. Consult Commerce's regulations for information regarding Commerce's conduct of Sunset Reviews. Consult Commerce's regulations at 19 CFR part 351 for definitions of terms and for other general information concerning antidumping and countervailing duty proceedings at Commerce.

Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).³ An electronically filed document must be received successfully in its entirety by ACCESS by 5:00 p.m. Eastern Time on the day on which it is due.

In prior proceedings we have encouraged interested parties to provide an executive summary of their comments, including footnotes. In these sunset reviews, we request that interested parties provide at the beginning of their comments, an executive summary for each issue raised in their comments. Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the decision memorandum that will accompany the notice to be published in

¹ See *Temporary Rule Modifying AD/CVD Service Requirements Due to COVID-19*, 85 FR 41363 (July 10, 2020).

² See 19 CFR 351.218(d)(1)(iii).

³ See *Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings; Final Rule*, 88 FR 67069 (September 29, 2023).

the **Federal Register**. Finally, we request that interested parties include footnotes for relevant citations in the public executive summary of each issue.

This notice of initiation is being published in accordance with section 751(c) of the Act and 19 CFR 351.218(c).

Dated: June 18, 2025.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

University of Minnesota et al.; Application(s) for Duty-Free Entry of Scientific Instruments

Pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, as amended by Pub. L. 106–36; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with 15 CFR 301.5(a)(3) and (4) of the regulations and be postmarked on or before July 21, 2025. Address written comments to Statutory Import Programs Staff, Room 40005, U.S. Department of Commerce, Washington, DC 20230. Please also email a copy of those comments to Eva.Kim@trade.gov.

Docket Number: 25–016. **Applicant:** University of Minnesota, 115 Union St. SE, PAN 241, Minneapolis, MN 55455. **Instrument:** High Temperature Laser Crystal Growth Furnace. **Manufacturer:** Scientific Instruments GmbH, Germany. **Intended Use:** The instrument is intended to synthesize single crystals of transition-metal-based oxide to discover new high high-temperature superconducting materials. **Justification for Duty-Free Entry:** According to the applicant, there are no instruments of the same general category manufactured in the United States. **Application accepted by Commissioner of Customs:** April 25, 2025.

Docket Number: 25–017. **Applicant:** California Institute of Technology, 1200 E. California Blvd., M/C 18–34, Pasadena, CA 91125. **Instrument:** Nd: Yag Laser System. **Manufacturer:** Laser Zentrum Hannover, Germany. **Intended Use:** The instrument is intended to detect gravitational waves. **Justification for Duty-Free Entry:** According to the

applicant, there are no instruments of the same general category manufactured in the United States. **Application accepted by Commissioner of Customs:** July 30, 2007.

Docket Number: 25–018. **Applicant:** Utah State University, 4415 Old Main Hill, Logan, UT 84322. **Instrument:** SLM–200 Spatial Light Modulator. **Manufacturer:** Santec USA Corporation, Japan. **Intended Use:** The instrument is intended to generate holography and vortex optical beams to provide hands-on training on holographic optics, diffraction options, and Fourier optics. **Justification for Duty-Free Entry:** According to the applicant, there are no instruments of the same general category manufactured in the United States. **Application accepted by Commissioner of Customs:** April 30, 2025.

Dated: June 27, 2025.

Marine Mammals; File No. 23554

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of permit amendment.

SUMMARY: Notice is hereby given that Colleen Reichmuth, Ph.D., Long Marine Laboratory, University of California at Santa Cruz, 115 McAllister Way, Santa Cruz, CA 95060, has been issued a minor amendment to Scientific Research Permit No. 23554.

ADDRESSES: The amendment and related documents are available for review upon written request via email to NMFS.Pr1Comments@noaa.gov.

FOR FURTHER INFORMATION CONTACT: Sara Young or Jennifer Skidmore, (301) 427–8401.

SUPPLEMENTARY INFORMATION: The requested amendment has been granted under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*) and the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et*

seq.), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

The original permit (No. 23554), issued on February 16, 2021 (86 FR 13700, March 10, 2021) authorized the permit holder to conduct comparative psychological and physiological studies with captive California sea lions (*Zalophus californianus*), harbor seals (*Phoca vitulina*), spotted seals (*Phoca largha*), ringed seals (*Pusa hispida*), bearded seals (*Erignathus barbatus*), and Hawaiian monk seals (*Neomonachus schauinslandi*) at Long Marine Laboratory (Santa Cruz, CA) and the Alaska SeaLife Center (Seward, AK). Up to four individuals per species may be studied at both facilities at any given time over the duration of the permit, with the exception of the Hawaiian monk seal, for which a max of one seal will be studied at a time. This minor amendment extends the duration of the permit through January 31, 2027, but does not change any other terms or conditions of the permit.

Dated: June 26, 2025.

Shannon Bettridge,

Chief, Marine Mammal and Sea Turtle Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

U. S. Integrated Ocean Observing System (IOOS®) Advisory Committee Public Meeting

AGENCY: U.S. Integrated Ocean Observing System (IOOS®), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice of open meeting; opportunity for public comment.

SUMMARY: Notice is hereby given of a virtual meeting of the U. S. Integrated Ocean Observing System (IOOS®) Advisory Committee (Committee). The meeting is open to the public and an opportunity for oral and written comments will be provided.

DATES: The meeting will be held virtually on July 21, 2025 from 1 p.m. to 3 p.m. Eastern Daylight Time (EDT) and July 23, 2025 from 3 p.m. to 5 p.m. (EDT). Registration is required to attend; please register online at <https://forms.gle/9yMK7MgQCgbTmJNJ7> or email Laura.Gewain@noaa.gov.

ADDRESSES: The meeting will be held virtually. To register for the meeting and/or submit public comments, use this link <https://forms.gle/9yMK7MgQCgbTmJNJ7> or email Laura.Gewain@noaa.gov. Registration is required. See **SUPPLEMENTARY INFORMATION** for instructions and other information about public participation.

FOR FURTHER INFORMATION CONTACT: Krisa Arzayus, Designated Federal Official, U.S. IOOS Advisory Committee, U.S. IOOS Program, 240–533–9455, krisa.arzayus@noaa.gov or visit the U.S. IOOS Advisory Committee website at <http://ioos.noaa.gov/community/u-s-ioos-advisory-committee/>.

SUPPLEMENTARY INFORMATION:

I. Background

The Committee was established by the NOAA Administrator as directed by section 12304(d) of the Integrated Coastal and Ocean Observation System Act (the Act) as amended by Section 103 of the Coordinated Ocean Observations and Research Act of 2020 (COORA) (Public Law 116–271, Title I). 33 U.S.C. 3603(d). The Committee advises the NOAA Administrator and the Interagency Ocean Observation Committee (IOOC) on matters related to the responsibilities and authorities set forth in the Act and other appropriate matters as the Administrator, the Ocean Policy Committee described at 33 U.S.C. 3603(c)(1), and IOOC may refer to the Committee for review and advice. The charter and summaries of prior meetings can be found online at <https://ioos.noaa.gov/community/u-s-ioos-advisory-committee/>.

II. Matters to Be Considered

The meeting will focus on: (1) working sessions on proposed work plan topics and (2) updates from NOAA and key partners. The latest version of the agenda will be posted at <http://ioos.noaa.gov/community/u-s-ioos-advisory-committee/>. The times and the agenda topics described here are subject to change.

III. Public Comment Instructions

The meeting will be open to public participation (check agenda on website to confirm time). The Committee expects that public statements presented at its meetings will not be repetitive of previously submitted verbal or written statements. In general, each individual or group making a verbal presentation will be limited to a total time of three (3) minutes. Written comments should be received by the Designated Federal Official by July 11, 2025 11:59 p.m. EDT, to provide sufficient time for

Committee review. Written comments received after July 11, 2025 11:50 p.m. EDT, will be distributed to the Committee, but may not be reviewed prior to the meeting date. To submit written comments, please fill out the brief form at <https://forms.gle/9yMK7MgQCgbTmJNJ7> or email your comments and the organization/company affiliation you represent to Laura.Gewain@noaa.gov. All comments received are a part of the public record. All personally identifiable information (name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the commenter will be publicly accessible. The written comment is considered the official comment and should include discussion of all points you wish to make. The Federal agencies will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). Comments that are not responsive or contain profanity, vulgarity, threats, or other inappropriate language will not be considered. This NOAA public meeting will be recorded for use in preparation of minutes. If you have a public comment, you acknowledge that you will be recorded and are aware you can opt out of the meeting. Participation in the meeting constitutes consent to the recording.

IV. Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Krisa Arzayus, Designated Federal Official by phone (240–533–9455) or email (Krisa.Arzayus@noaa.gov) or to Laura Gewain (Laura.Gewain@noaa.gov) by July 7, 2025 11:59 p.m.

Authority: Integrated Coastal and Ocean Observation System Act, part of the Omnibus Public Land Management Act of 2009 (Public Law 111–11), and the Coordinated Ocean Observations and Research Act of 2020 (Public Law No: 116–271)

Jeffrey L. Payne,

Acting Director, U.S. IOOS Program, National Ocean Service, National Oceanic and Atmospheric Administration.

[RTID 0648–XE964]

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to the Terminal 4 Expansion and Redevelopment Project at the Port of Grays Harbor, Washington

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments on proposed renewal incidental harassment authorization.

SUMMARY: NMFS received a request from the Port of Grays Harbor (Port) for the renewal of a currently active incidental harassment authorization (IHA) to take marine mammals incidental to construction activities associated with the Terminal 4 (T4) Expansion and Redevelopment Project (Project) at the Port of Grays Harbor in Grays Harbor County, Washington. The Port's activities will not be completed prior to the IHA's expiration. Pursuant to the Marine Mammal Protection Act (MMPA), prior to issuing the currently active IHA, NMFS requested comments on both the proposed IHA and the potential for renewing the initial authorization if certain requirements were satisfied. The renewal requirements have been satisfied, and NMFS is now providing an additional 15-day comment period to allow for any additional comments on the proposed renewal not previously provided during the initial 30-day comment period.

DATES: Comments and information must be received no later than July 16, 2025.

ADDRESSES: Comments should be addressed to the Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service, and should be submitted via email to ITP.Pauline@noaa.gov. Electronic copies of the original application, renewal request, and supporting documents (including NMFS **Federal Register** notices of the original proposed and final authorizations, and the previous IHA), as well as a list of the references cited in this document, may be obtained online at: <https://www.fisheries.noaa.gov/action/incidental-take-authorization-ag-processing-incs-port-grays-harbor-terminal-4-expansion-and>. In case of problems accessing these documents, please call the contact listed below.

Instructions: NMFS is not responsible for comments sent by any other method, to any other address or individual, or received after the end of the comment period. Comments, including all attachments, must not exceed a 25-megabyte file size. All comments received are a part of the public record and will generally be posted online at <https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act> without change. All personal identifying information (e.g., name, address) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information.

SUPPLEMENTARY INFORMATION:

Background

The MMPA prohibits the “take” of marine mammals, with certain exceptions. Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are proposed or, if the taking is limited to harassment, a notice of a proposed IHA is provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other “means of effecting the least practicable adverse impact” on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stocks for taking for certain subsistence uses (referred to here as “mitigation”); and requirements pertaining to the monitoring and reporting of the takings. The definition of all applicable MMPA statutory used above are included in the relevant sections below and can be found in section 3 of the MMPA (16 U.S.C. 1362) and the NMFS’s implementing regulations at 50 CFR 216.103.

NMFS’ regulations implementing the MMPA at 50 CFR 216.107(e) indicate that IHAs may be renewed for additional periods of time not to exceed one year for each reauthorization. In the notice of proposed IHA for the initial IHA, NMFS described the circumstances under which we would consider issuing a renewal for this activity, and requested public comment on a potential renewal under those circumstances. Specifically, on a case-by-case basis, NMFS may issue a one-time 1-year renewal of an IHA following notice to the public providing an additional 15 days for public comments when (1) up to another year of identical, or nearly identical, activities as described in the Detailed Description of Specified Activities section of the initial IHA issuance notice is planned or (2) the activities as described in the Description of the Specified Activities and Anticipated Impacts section of the initial IHA issuance notice would not be completed by the time the initial IHA expires and a renewal would allow for completion of the activities beyond that described in the **DATES** section of the notice of issuance of the initial IHA, provided all of the following conditions are met:

1. A request for renewal is received no later than 60 days prior to the needed renewal IHA effective date (recognizing that the renewal IHA expiration date cannot extend beyond 1 year from expiration of the initial IHA).

2. The request for renewal must include the following:

- An explanation that the activities to be conducted under the requested renewal IHA are identical to the activities analyzed under the initial IHA, are a subset of the activities, or include changes so minor (e.g., reduction in pile size) that the changes do not affect the previous analyses, mitigation and monitoring requirements, or take estimates (with the exception of reducing the type or amount of take); and
- A preliminary monitoring report showing the results of the required monitoring to date and an explanation showing that the monitoring results do not indicate impacts of a scale or nature not previously analyzed or authorized.

3. Upon review of the request for renewal, the status of the affected species or stocks, and any other pertinent information, NMFS determines that there are no more than minor changes in the activities, the mitigation and monitoring measures will remain the same and appropriate, and the findings in the initial IHA remain valid.

An additional public comment period of 15 days (for a total of 45 days), with direct notice by email, phone, or postal service to commenters on the initial IHA, is provided to allow for any additional comments on the proposed renewal. A description of the renewal process may be found on our website at: <https://www.fisheries.noaa.gov/national/marine-mammal-protection/incidental-harassment-authorization-renewals>. Any comments received on the potential renewal, along with relevant comments on the initial IHA, have been considered in the development of this proposed IHA renewal, and a summary of agency responses to applicable comments is included in this notice. NMFS will consider any additional public comments prior to making any final decision on the issuance of the requested renewal, and agency responses will be summarized in the final notice of our decision.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216-6A, NMFS must review our proposed action (*i.e.*, the issuance of a renewal IHA) with respect to potential impacts on the human environment.

This action is consistent with categories of activities identified in Categorical Exclusion B4 (incidental take authorizations with no anticipated serious injury or mortality) of the Companion Manual for NOAA Administrative Order 216-6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Accordingly, NMFS determined that the issuance of the initial IHA qualified to be categorically excluded from further NEPA review. NMFS has preliminarily determined that the application of this categorical exclusion remains appropriate for this renewal IHA.

History of Request

On June 7, 2024, NMFS issued an IHA to Ag Processing Inc. (AGP) to take marine mammals incidental to construction activities associated with the Terminal 4 (T4) Expansion and Redevelopment Project (Project) at the Port of Grays Harbor (Port) in both the City of Aberdeen and City of Hoquiam, Grays Harbor County, Washington (89 FR 48565), effective from July 16, 2024 through July 15, 2025. Note that this

Project is a joint effort between the Port and AGP. The initial IHA was issued to AGP but the Port is requesting to be the holder of the proposed renewal authorization. On April 16, 2025, NMFS received an application for the renewal of that initial IHA from the Port. As described in the application for renewal IHA, the activities for which incidental take is requested are consistent with activities that are covered by the initial authorization but will not be completed prior to its expiration. As required, AGP also provided a preliminary monitoring report which confirms that it implemented the required mitigation and monitoring, and which also shows that no impacts of a scale or nature not previously analyzed or authorized have occurred as a result of the activities conducted.

Description of the Specified Activities and Anticipated Impacts

The purpose of the project is to construct a new export facility at Terminal 4 (T4). The activity includes removal of existing piles and the installation of both temporary and permanent piles of various sizes. Takes of marine mammals by Level A and Level B harassment are expected to

occur as a result of noise produced by both impact and vibratory pile driving and vibratory removal. The initial IHA authorized take incidental to in-water construction activities associated with the installation of a new fendering system at Terminal 4A and the installation of a new commodity export facility at Terminal 4B. AGP has completed the in-water construction activities for the new commodity export facility at Terminal 4B. However, a one-year renewal of the initial IHA is needed to complete the in-water construction activities associated with the new fendering system at Terminal 4A.

Detailed Description of the Activity

A detailed description of the demolition and construction activities for which take is proposed here may be found in the Notices of the Proposed (89 FR 24436, April 8, 2024) and Final (89 FR 48565, June 7, 2024) IHAs for the initial authorization. The location, timing, and nature of the activities, including the types of equipment planned for use, are similar to those described in the previous notices. The proposed renewal would be effective for a period not exceeding 1 year from the date of expiration of the initial IHA.

The existing IHA authorizes take incidental to the in-water pile driving/removal activities shown in tables 1 and 2. The activities in table 1 are proposed to be completed under this renewal IHA and the activities in table 2 were completed under the initial IHA. The previously planned impact proofing of 24-inch (60.96 centimeter (cm)) steel pipe piles was not required at Terminal 4B. Since the impact proofing of 24-inch (60.96 cm) steel pipe piles planned for the Terminal 4B commodity export facility portion of the Project was not required, the Port intends to conduct similar impact proofing for the fendering system construction at Terminal 4A under the proposed renewal IHA. With the exception of impact proofing for the new fendering system, the Port did not propose any new activities or modifications from the originally proposed actions. Pile removal and installation activities are anticipated to occur during the in-water work window (July 16 through February 15). The most conservative estimate of time required to complete pile installation and removal activities under this renewal is 36 days of intermittent vibratory pile driving/removal and an additional 8 days of impact proofing.

TABLE 1—IN-WATER PILE REMOVAL AND INSTALLATION ACTIVITIES PROPOSED FOR THE RENEWAL IHA FOR THE TERMINAL 4A NEW FENDERING SYSTEM

Pile type and size	Activity	Removal/installation method	Number of piles	Total days of operation	Piles per day	Hours vibratory per day	Impact strikes per day
18-inch (45.72 cm) timber piles ..	Removal	Vibratory hammer, direct pull	Up to 50	Up to 12	Up to 10	Up to 5.0	
18-inch (45.72 cm) steel pipe pile	Installation	Vibratory hammer	Up to 15	Up to 6	Up to 6	Up to 3.0	
24-to-30-inch (60.96–76.2 cm) steel pipe pile.	Installation	Vibratory hammer	Up to 24	Up to 18	Up to 6	Up to 6.0	
24-inch (60.96 cm) steel pipe pile	Installation	Impact proof	Up to 24	Up to 8	Up to 4		2,000

TABLE 2—IN-WATER PILE REMOVAL AND INSTALLATION COMPLETED FOR NEW AGP COMMODITY EXPORT FACILITY AT TERMINAL 4B UNDER INITIAL IHA

Pile type and size	Activity	Installation/removal method	Number of piles	Total days of operation	Piles per day	Hours vibratory per day	Impact strikes per day
12-inch (30.48 cm) steel H sections.	Removal	Vibratory hammer or direct pull	Up to 6	Up to 3	Up to 3	Up to 1.5.	Up to 2,400. Up to 2,000.
16.5-inch (41.91 cm) concrete octagonal pile.	Removal	Vibratory hammer, direct pull	Up to 27	Up to 9	Up to 8	Up to 8.	
36-inch (91.44 cm) steel pipe pile.	Installation	Vibratory	Up to 50	Up to 24	Up to 4	Up to 8	
24-inch (60.96 cm) steel pipe pile.	Installation	* Impact proof	Up to 24	Up to 6	Up to 4	Up to 6	
12-inch (30.48 cm) steel H-piles	Installation	Vibratory and impact hammer ...	Up to 24	Up to 10	Up to 4	Up to 6	
24-inch (60.96 cm) steel pipe pile.	Installation	* Impact proof	Up to 24	Up to 2	Up to 3	Up to 1.5.	
24-inch (60.96 cm) steel pipe pile.	Installation	Vibratory hammer	Up to 6	Up to 3	Up to 3	Up to 4.	Up to 2,400. Up to 2,000.
24-inch (60.96 cm) steel pipe pile.	Installation	Vibratory hammer	Up to 24	Up to 6	Up to 8	Up to 4.	
24-inch (60.96 cm) steel pipe pile.	Removal	Vibratory hammer	Up to 24	Up to 6	Up to 8	Up to 4.	

* The planned impact proofing of 36-in and 24-in steel pipe pile was not required. Impact proofing of 24-inch steel piles has been added to work under the proposed renewal and has been applied to pile installation activities in table 1.

Description of Marine Mammals

A description of the marine mammals in the area of the activities for which

authorization of take is proposed here, including information on abundance, status, distribution, and hearing, may be found in the Notices of the Proposed

IHA for the initial authorization (89 FR 24436, April 8, 2024). NMFS has reviewed the monitoring data from the initial IHA, recent draft Stock

Assessment Reports, information on relevant Unusual Mortality Events, and other scientific literature, and determined there is no new information that affects which species or stocks have the potential to be affected or the pertinent information in the Description of the Marine Mammals in the Area of Specified Activities contained in the supporting documents for the initial IHA (89 FR 24436, April 8, 2024). Note that the abundance estimate for the Oregon/Washington coastal stock of harbor seal has been updated to 22,549 from 24,731 animals based on more recent best available information (Pearson *et al.* 2024), but this does not impact estimated take numbers under the proposed renewal or influence the findings made in support of the initial IHA.

Potential Effects on Marine Mammals and Their Habitat

A description of the potential effects of the specified activity on marine mammals and their habitat for the activities for which an authorization of incidental take is proposed here may be found in the notices of the proposed IHA for the initial authorization (89 FR 24436, April 8, 2024). NMFS has reviewed the monitoring data from the initial IHA, recent draft Stock Assessment Reports, information on

relevant Unusual Mortality Events, and other scientific literature, and determined that there is no new information that affects our initial analysis of impacts on marine mammals and their habitat.

Estimated Take

A detailed description of the methods used to estimate take for the specified activity are found in the notices of the proposed and final IHAs for the initial authorization (89 FR 24436, April 8, 2024; 89 FR 48565, June 7, 2024). Specifically, the action area and marine mammal density and occurrence data applicable to this authorization remain unchanged from the initial and modified IHA. Similarly, source levels, type of activity, methods of take, and types of take remain unchanged from the initial IHA. However, there are changes to the estimated Level A harassment zones based on the 2024 Updated Technical Guidance, further discussed below. The estimated number of takes proposed for authorization is based on the subset of activities to be completed under this renewal IHA, and therefore represents a proportion of the initial authorized takes. These takes reflect the estimated remaining number of days of work and number of piles to be driven. Estimated take by Level A and Level B harassment for the

proposed renewal was calculated using the same methodology as in the initial proposed and final IHAs (89 FR 24436, April 8, 2024; 89 FR 48565, June 7, 2024).

On October 24, 2024 NMFS published (89 FR 84872) its final Updated Technical Guidance (<https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-acoustic-technical-guidance-other-acoustic-tools>) which includes updated thresholds and weighting functions to inform auditory injury estimates and is replacing the 2018 Technical Guidance referenced in the notices of the proposed and final IHAs for the initial authorization (89 FR 24436, April 8, 2024; 89 FR 48565, June 7, 2024). In consideration of the best available science, NMFS conducted calculations using the Updated Technical Guidance and NMFS optional user spreadsheet, using the source levels and spreadsheet inputs provided in the notices for the proposed and final IHAs (89 FR 24436, April 8, 2024; 89 FR 48565, June 7, 2024), for the purpose of understanding how Level A harassment (auditory injury) zones might change from the initial IHA. The updated marine mammal hearing groups and updated thresholds can be found in tables 3 and 4.

TABLE 3—MARINE MAMMAL HEARING GROUPS
[NMFS, 2024]

Hearing group	Generalized hearing range *
Low-frequency (LF) cetaceans (baleen whales)	7 Hz to 36 kHz.
High-frequency (HF) cetaceans (dolphins, toothed whales, beaked whales, bottlenose whales)	150 Hz to 160 kHz.
Very High-frequency (VHF) cetaceans (true porpoises, <i>Kogia</i> , river dolphins, Cephalorhynchid, <i>Lagenorhynchus cruciger</i> & <i>L. australis</i>).	200 Hz to 165 kHz.
Phocid pinnipeds (PW) (underwater) (true seals)	40 Hz to 90 kHz.
Otariid pinnipeds (OW) (underwater) (sea lions and fur seals)	60 Hz to 68 kHz.

* Represents the generalized hearing range for the entire group as a composite (*i.e.*, all species within the group), where individual species' hearing ranges may not be as broad. Generalized hearing range chosen based on ~65-dB threshold from composite audiogram, previous analysis in NMFS, 2018, and/or data from Southall *et al.*, 2007; Southall *et al.*, 2019. Additionally, animals are able to detect very loud sounds above and below that "generalized" hearing range. Hz = Hertz. kHz = kilohertz.

TABLE 4—ONSET OF AUDITORY INJURY (AUD INJ)
[NMFS, 2024]

Hearing group	AUD INJ onset thresholds * (received level)	
	Impulsive	Non-impulsive
Low-Frequency (LF) Cetaceans	Cell 1: $L_{p,0-pk,flat}$: 222 dB; $L_{E,p,LF,24h}$: 183 dB	Cell 2: $L_{E,p,LF,24h}$: 197 dB.
High-Frequency (HF) Cetaceans	Cell 3: $L_{p,0-pk,flat}$: 230 dB; $L_{E,p,HF,24h}$: 193 dB	Cell 4: $L_{E,p,HF,24h}$: 201 dB.
Very High-Frequency (VHF) Cetaceans	Cell 5: $L_{p,0-pk,flat}$: 202 dB; $L_{E,p,VHF,24h}$: 159 dB	Cell 6: $L_{E,p,VHF,24h}$: 181 dB.
Phocid Pinnipeds (PW) (Underwater)	Cell 7: $L_{p,0-pk,flat}$: 223 dB; $L_{E,p,PW,24h}$: 183 dB	Cell 8: $L_{E,p,PW,24h}$: 195 dB.
Otariid Pinnipeds (OW) (Underwater)	Cell 9: $L_{p,0-pk,flat}$: 230 dB; $L_{E,p,OW,24h}$: 185 dB	Cell 10: $L_{E,p,OW,24h}$: 199 dB.

* Dual metric thresholds for impulsive sounds: Use whichever results in the largest isopleth for calculating AUD INJ onset. If a non-impulsive sound has the potential of exceeding the peak sound pressure level thresholds associated with impulsive sounds, these thresholds are recommended for consideration.

Note: Peak sound pressure level ($L_{p,0-pk}$) has a reference value of 1 μ Pa, and weighted cumulative sound exposure level ($L_{E,p}$) has a reference value of 1 μ Pa²s. In this table, thresholds are abbreviated to be more reflective of International Organization for Standardization standards (ISO 2017). The subscript “flat” is being included to indicate peak sound pressure are flat weighted or unweighted within the generalized hearing range of marine mammals (i.e., 7 Hz to 165 kHz). The subscript associated with cumulative sound exposure level thresholds indicates the designated marine mammal auditory weighting function (LF, HF, and VHF cetaceans, and PW and OW pinnipeds) and that the recommended accumulation period is 24 hours. The weighted cumulative sound exposure level thresholds could be exceeded in a multitude of ways (i.e., varying exposure levels and durations, duty cycle). When possible, it is valuable for action proponents to indicate the conditions under which these thresholds will be exceeded.

The inputs contained in the 2018 Technical Guidance user spreadsheet for the initial IHA are identical to those utilized in the 2024 Technical Guidance user spreadsheet. However, the estimated Level A harassment isopleths

have increased in some cases when the updated 2024 Technical Guidance is used as shown in table 5. The Port proposes to change the shutdown zones accordingly and consistent with the intent of the measures prescribed

through the initial IHA, as discussed in *Description of Proposed Mitigation, Monitoring and Reporting Measures* section.

TABLE 5—LEVEL A HARASSMENT ISOPLETHS USING 2024 UPDATED TECHNICAL GUIDANCE AND 2018 TECHNICAL GUIDANCE
[Meters]

Pile type and size	Activity	Removal/installation method	Harbor seal		Sea lion		Harbor porpoise	
			2024	2018	2024	2018	2024	2018
Up to 18-inch (45.72 cm) timber piles	Removal	Vibratory hammer	41	15	14	1	26	35
Up to 18-inch (45.72 cm) steel pipe pile.	Installation	Vibratory hammer	16	6	5	1	10	13
24-to-30-inch (60.96–76.2 cm) steel pipe pile.	Installation	Vibratory hammer	29	10	10	1	18	25
Up to 24-inch (60.96 cm) steel pipe pile.	Installation	Impact Proof	259	157	97	12	452	349

A detailed description of the methods and inputs used to estimate take for the specified activity are found in the Notices of the Proposed and/or Final IHAs (89 FR 24436, April 8, 2024; 89 FR 48565, June 7, 2024) for the initial authorization. Specifically, the source levels, days of operation, and marine mammal density/occurrence data

applicable to this authorization remain unchanged from the previously issued IHA. The sizes of the estimated Level A harassment zones have changed in some cases as shown in table 5 and these are reflected in tables 6–11. The stocks taken, methods of take, and types of take remain unchanged from the previously issued IHA. The estimated number of

takes for the proposed renewal were calculated by adding the individual takes associated with each of the activities listed in table 5. Tables 6–11 show calculated take numbers by Level A (where authorized) and Level B harassment.

TABLE 6—CALCULATED TAKE OF HARBOR PORPOISE BY LEVEL B HARASSMENT

Pile type	Harbor porpoise density per km ²	Days of pile driving	Level B area (km ²)	Shutdown area (km ²)	Level B take estimate
24-to-30-inch (60.96–76.2 cm) steel pipe piles-vibratory (installation)	0.467	18	4.95	0.023	41.42
24-inch (60.96 cm) steel piles, permanent—impact (installation)	0.467	8	0.46	0.05	1.53
18-inch (45.72 cm) steel pipe piles (installation) vibratory ..	0.467	6	4.3	0.014	12.01
18-inch (45.72 cm) creosote timber piles—Vibratory (removal)	0.467	12	7.4	0.034	41.28
Total					96.2

TABLE 7—CALCULATED TAKE OF HARBOR PORPOISE BY LEVEL A HARASSMENT

Pile type	Harbor porpoise density per km ²	Days of pile driving	Level A area (km ²)	Shutdown area (km ²)	Level A take estimate
24-to-30-inch (60.96–76.2 cm) steel pipe piles-vibratory (installation)	0.467	18	0.008	0.023	0.00
24-inch (60.96 cm) steel piles, permanent—impact (installation)	0.467	8	0.44	0.047	1.47
18-inch (45.72 cm) steel pipe piles (installation) vibratory ..	0.467	6	0.009	0.014	0.00

TABLE 7—CALCULATED TAKE OF HARBOR PORPOISE BY LEVEL A HARASSMENT—Continued

Pile type	Harbor porpoise density per km ²	Days of pile driving	Level A area (km ²)	Shutdown area (km ²)	Level A take estimate
18-inch (45.72 cm) creosote timber piles—Vibratory (removal)	0.467	12	0.025	0.034	0.00
Total					1.5

The Port requested and NMFS is proposing to authorize 2 Level A harassment and 94 Level B harassment takes of harbor porpoise.

TABLE 8—CALCULATED TAKE OF STELLER SEA LION BY LEVEL B HARASSMENT

Pile type	Stellar sea lion density per km ²	Days of pile driving	Level B area (km ²)	Shutdown area (km ²)	Level B take estimate
24-to-30-inch (60.96–76.2 cm) steel pipe piles-vibratory (installation)	0.1993	18	4.95	0.009	17.73
24-inch (60.96 cm) steel piles, permanent—impact (installation)	0.1993	8	0.46	0.047	0.66
18-inch (45.72 cm) steel pipe piles (installation) vibratory ..	0.1993	6	4.3	0.009	5.13
18-inch (45.72 cm) creosote timber piles—Vibratory (removal)	0.1993	12	7.4	0.009	17.68
Total					41.2

The Port requested and NMFS is proposing to authorize 42 takes of Steller sea lion by Level B harassment. No take by Level A harassment is anticipated or proposed for authorization.

TABLE 9—CALCULATED TAKE OF CALIFORNIA SEA LION BY LEVEL B HARASSMENT

Pile type	California sea lion density per km ²	Days of pile driving	Level B area (km ²)	Shutdown area (km ²)	Level B take estimate
24-to-30-inch (60.96–76.2 cm) steel pipe piles-vibratory (installation)	0.6493	18	4.95	0.009	57.75
24-inch (60.96 cm) steel piles, permanent—impact (installation)	0.6493	8	0.46	0.047	2.15
18-inch (45.72 cm) steel pipe piles (installation) vibratory ..	0.6493	6	4.3	0.009	16.72
18-inch (45.72 cm) creosote timber piles—Vibratory (removal)	0.6493	12	7.4	0.009	57.59
Total					134.2

The Port requested and NMFS is proposing to authorize 134 takes of California sea lion by Level B harassment. No take by Level A harassment is anticipated or proposed for authorization.

TABLE 10—CALCULATED TAKE OF HARBOR SEAL BY LEVEL B HARASSMENT

Pile type	Harbor seal density per km ²	Days of pile driving	Level B area (km ²)	Shutdown area (km ²)	Level B take estimate
24-to-30-inch (60.96–76.2 cm) steel pipe piles-vibratory (installation)	30.8	18	4.95	0.009	2,739.29
24-inch (60.96 cm) steel piles, permanent—impact (installation)	30.85	8	0.46	0.05	101.19
18-inch (45.72 cm) steel pipe piles (installation) vibratory ..	30.85	6	4.3	0.009	794.26
18-inch (45.72 cm) creosote timber piles—Vibratory (removal)	30.85	12	7.4	0.014	2,734.30
Total					6,369.0

TABLE 11—CALCULATED TAKE OF HARBOR SEAL BY LEVEL A HARASSMENT

Pile type	Harbor seal density per km ²	Days of pile driving	Level A area (km ²)	Shutdown area (km ²)	Level A take estimate
24-to-30-inch (60.96–76.2 cm) steel pipe piles-vibratory (installation)	30.85	18	0.013	0.009	2.22
24-inch (60.96 cm) steel piles, permanent—impact (installation)	30.85	8	0.174	0.05	30.60
18-inch (45.72 cm) steel pipe piles (installation) vibratory ..	30.85	6	0.015	0.009	1.11
18-inch (45.72 cm) creosote timber piles—Vibratory (removal)	30.85	12	0.041	0.014	10.00
Total					43.9

The Port requested and NMFS is proposing to authorize 44 Level A harassment takes and 6,325 Level B harassment takes of harbor seal.

The total number of takes proposed for authorization under the renewal for all species by Level A and Level B

harassment as well as the percentage of each stock are shown in table 12.

TABLE 12—SUMMARY OF PROPOSED MARINE MAMMAL TAKES BY SPECIES AND PERCENTAGE OF STOCK TAKEN

Common name	Scientific name	Stock	Proposed Level A harassment	Proposed Level B harassment	Stock abundance	Percent of stock (%)
Harbor porpoise	<i>Phocoena phocoena</i> ...	Northern Oregon/ Washington Coast.	2	94	22,074	<0.01
Steller sea lion	<i>Eumetopias jubatus</i>	Eastern U.S.		42	36,308	<0.01
California sea lion	<i>Zalophus californianus</i>	U.S.		135	257,606	<0.01
Harbor seal	<i>Phoca vitulina</i>	OR/WA coast stock	44	6,325	* 22,549	28.2

* This is unlikely an underestimate of total abundance since it only includes data for the Washington portion of the Oregon-Washington Coastal Stock (Pearson *et al.*, 2024).

Description of Proposed Mitigation, Monitoring and Reporting Measures

The proposed mitigation, monitoring, and reporting measures included as requirements in this renewal authorization are similar to those included in the **Federal Register** notice announcing the issuance of the initial IHA (89 FR 48565, June 7, 2024), and the discussion of the least practicable adverse impact included in that document and the Notice of the Proposed IHA (89 FR 24436, April 8, 2024) remain accurate. The following measures are proposed for this renewal:

- The Port must employ NMFS-approved protected Species Observers (PSOs) and establish monitoring locations to the maximum extent possible based on the required number of PSOs, required monitoring locations, and environmental conditions;
- Monitoring must take place from 30 minutes prior to initiation of pile driving activity (*i.e.*, pre-start clearance monitoring) through 30 minutes post-completion of pile driving activity;
- Pre-start clearance monitoring must be conducted during periods of

visibility sufficient for the lead PSO to determine that the shutdown zones are clear of marine mammals;

- If a marine mammal is observed entering or within the shutdown zones pile driving activity must be delayed or halted;
- If pile driving is delayed or halted due to the presence of a marine mammal, the activity may not commence or resume until either the animal has voluntarily exited and been visually confirmed beyond the shutdown;
- Soft start techniques must be used when impact pile driving;
- A bubble curtain must be used during impact pile driving;
- Pile driving activity must be halted upon observation of either a species for which incidental take is not authorized or a species for which incidental take has been authorized but the authorized number of takes has been met, entering or within the harassment zone;
- The Port must shut down construction operations if a marine mammal comes within 10 m of construction activity to avoid direct

physical interaction with marine mammals;

- The Port must submit a draft marine mammal monitoring report to NMFS within 90 days after the completion of pile driving activities or 60 calendar days prior to the requested issuance of any subsequent IHA for construction activity at the same location, whichever comes first. A final report must be prepared and submitted within 30 calendar days following receipt of any NMFS comments on the draft report; and

- All injured or dead marine mammals must be reported to the Office of Protected Resources and to the West Coast regional stranding network.

Consistent with the mitigation required through the initial IHA, shutdown zones proposed for the renewal IHA will be based on the largest Level A harassment zone for each pile size/type and driving method, as updated using the draft 2024 Technical Guidance rather than the 2018 Technical Guidance. Proposed zones are shown in table 13.

TABLE 13—PROPOSED SHUTDOWN AND MONITORING ZONES
[Meters]

Pile type	Shutdown zone			Monitoring zone
	Very high-frequency cetaceans *	Phocid pinnipeds	Otariid pinnipeds	
Impact				
24-inch (60.96 cm) steel piles, permanent (installation)	100	100	** 100 (10)	465
Vibratory				
24-to-30-inch (60.96–76.2 cm) steel pipe piles (installation)	25	10	10	3,985
18-inch (45.72 cm) steel pipe piles (installation)	15	10	10	3,415
18-inch (45.72 cm) creosote timber piles (removal)	35	15	** 15 (10)	6,310

* In the 2018 guidance and initial IHA, VHF cetaceans were referred to as HF (high-frequency) cetaceans.

** Represents change from Initial 2024–2025 IHA. Initial zones in parentheses.

The monitoring zones in the proposed renewal are identical to those found in the initial proposed and final IHAs (89 FR 24436, April 8, 2024; 89 FR 48565, June 7, 2024). Most of the Level A harassment zones remain unchanged from the initial proposed and final IHAs. However, the Level A harassment zone for Otariids during impact installation of 24-inch (60.96 cm) steel piles increased from 12 m to 97 m so the shutdown zone was increased to 100 m. Vibratory removal of 18-in creosote timber piles for Otariids increased from 1 m to 14 m so the shutdown zone was increased to 15 m from the previous 10 m minimum.

Comments and Responses

As noted previously, NMFS published a notice of a proposed IHA (89 FR 24436; May 8, 2024) and solicited public comments on both our proposal to issue the initial IHA for construction activities associated with the Project and on the potential for a renewal IHA, should certain requirements be met.

All public comments were addressed in the notice announcing the issuance of the initial IHA (89 FR 48565; June 7, 2024) and none of the comments specifically pertained to the renewal of the 2024 IHA.

Preliminary Determinations

The Port's action will require completing a subset of pile driving activities that were not completed under the initial IHA. Work at Terminal 4B has been completed while work at Terminal 4A has yet to begin. The method of taking and effects of the work on Terminal 4A were analyzed in the initial IHA along with Terminal B. Work on both terminals was expected to take 105 days under the initial IHA. The Port estimates that only 44 days of work remain. The take estimate for the

renewal IHA is based on the activities proposed to occur during these remaining days. The proposed renewal take numbers represent a subset of the total take authorized under the initial IHA. In analyzing the effects of the activities for the initial IHA, NMFS determined that the Port's activities would have a negligible impact on the affected species or stocks and that authorized take numbers of each species or stock were small relative to the relevant stocks (*e.g.*, less than one-third the abundance of all stocks). The mitigation measures and monitoring and reporting requirements as described above are substantially similar to those required through the initial IHA, although some shutdown zones for Otariids have undergone slight revisions due to the Updated 2024 Technical Guidance. The abundance of a single species (OR/WA coast stock of harbor seals) has also changed since the initial IHA, but none of this new information affects NMFS' determinations supporting issuance of the initial IHA. The piles to be driven in the proposed subset of work and any minor changes described above do not affect the least practicable adverse impact determinations.

NMFS has preliminarily concluded that there is no new information suggesting that our analysis or findings should change from those reached for the initial IHA. Based on the information and analysis contained here and in the referenced documents, NMFS has determined the following: (1) the required mitigation measures will effect the least practicable impact on marine mammal species or stocks and their habitat; (2) the authorized takes will have a negligible impact on the affected marine mammal species or stocks; (3) the authorized takes represent small

numbers of marine mammals relative to the affected stock abundances; (4) the Port's activities will not have an unmitigable adverse impact on taking for subsistence purposes as no relevant subsistence uses of marine mammals are implicated by this action, and; (5) appropriate monitoring and reporting requirements are included.

Endangered Species Act

Section 7(a)(2) of the Endangered Species Act of 1973 (ESA: 16 U.S.C. 1531 *et seq.*) requires that each Federal agency ensure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally whenever we propose to authorize take for endangered or threatened species.

No incidental take of ESA-listed species is proposed for authorization or expected to result from this activity. Therefore, NMFS has determined that formal consultation under section 7 of the ESA is not required for this proposed action.

Proposed Renewal IHA and Request for Public Comment

As a result of these preliminary determinations, NMFS proposes to issue a renewal IHA to the Port for conducting construction activities as part of the T4 Expansion and Redevelopment Project at the Port of Grays Harbor in both the City of Aberdeen and City of Hoquiam, Grays Harbor County, Washington from July 16, 2025 through July 15, 2026, provided the previously described mitigation, monitoring, and reporting requirements are incorporated. A draft of the proposed and final initial IHA can

be found at <https://www.fisheries.noaa.gov/action/incidental-take-authorization-ag-processing-incs-port-grays-harbor-terminal-4-expansion-and>. We request comment on our analyses, the proposed renewal IHA, and any other aspect of this notice. Please include with your comments any supporting data or literature citations to help inform our final decision on the request for this renewal IHA.

Dated: June 25, 2025.

Shannon Bettridge,

*Acting Director, Office of Protected Resources,
National Marine Fisheries Service.*

[FR Doc. 2025–12228 Filed 6–27–25; 4:15 pm]

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XE923]

Marine Mammals and Endangered Species

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of a permit.

SUMMARY: Notice is hereby given that a permit has been issued to the following entity under the Marine Mammal Protection Act (MMPA) and the Endangered Species Act (ESA).

ADDRESSES: The permits and related documents are available for review upon written request via email to NMFS.Pr1Comments@noaa.gov.

FOR FURTHER INFORMATION CONTACT:

Amy Hapeman at (301) 427–8401.

SUPPLEMENTARY INFORMATION: A notice was published in the **Federal Register** on the date listed below that a request for a permit had been submitted by the below-named applicant. To locate the **Federal Register** notice that announced our receipt of the application and a complete description of the activities, go to <https://www.federalregister.gov> and search on the file number provided in table 1 below.

TABLE 1—ISSUED PERMITS

File No.	RTID	Applicant	Previous Federal Register notice	Issuance date
27543	0648–XE303 ..	Marine Ecology and Telemetry Research, 2468 Camp McKenzie Trail NW, Seabeck WA 98380 (Responsible Party: Greg Schorr).	89 FR 77103, September 20, 2024.	December 20, 2024.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a final determination has been made that the activities proposed are categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

As required by the ESA, issuance of this permit was based on a finding that such permit: (1) was applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Authority: The requested permit has been issued under the MMPA of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the ESA of 1973, as amended (16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

Dated: June 24, 2025.

Shannon Bettridge,

Chief, Marine Mammal and Sea Turtle Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF DEFENSE

Department of the Air Force

[PRS266]

Notice of Intent To Grant an Exclusive Patent License

AGENCY: Department of the Air Force, Department of Defense.

ACTION: Notice of intent to grant an exclusive patent license.

SUMMARY: Pursuant to the Bayh-Dole Act and implementing regulations, the Department of the Air Force hereby gives notice of its intent to grant an exclusive patent license to ColdQuanta, Inc., a Delaware corporation dba Infleqion, having a place of business at 3030 Sterling Cir., Boulder, CO 80301–2338.

DATES: Written objections must be filed no later than fifteen (15) calendar days after the date of publication of this Notice.

ADDRESSES: Submit written objections to Sara Telano, AFRL/RDOX, Technology Transfer Office, 3550 Aberdeen Avenue, Kirtland AFB, New Mexico 87117–5776; Telephone: 850–331–8635; Email: sara.telano@us.af.mil. Include Docket No. PRS266 in the subject line of the message.

FOR FURTHER INFORMATION CONTACT:

Melissa Ortiz, AFRL/RDOX, Technology Transfer Office, 3550 Aberdeen Avenue, Kirtland AFB, New Mexico 87117–5776;

Telephone: 505–288–0475; Email: melissa.ortiz.1.ctr@us.af.mil.

SUPPLEMENTARY INFORMATION: The Department of the Air Force intends to grant the exclusive patent license agreement for the invention described in:

BURKE et al., U.S. Patent No. 10,684,591, issued on 16 June 2020 and entitled “Optical Rubidium Atomic Frequency Standard.”

Abstract of Patent Application

An optical atomic clock includes a fiber-coupled electro-optic modulator to phase modulate and suppress residual amplitude modulation of a frequency-doubled laser; a rubidium-enriched vapor cell configured to perform a two-photon transition of rubidium atoms to generate a fluorescence signal from the laser; and a differential lock mechanism to stabilize a frequency of the fluorescence signal to a resonance frequency of the two-photon transition of the rubidium atoms.

The Department of the Air Force may grant the prospective license unless a timely objection is received that sufficiently shows the grant of the license would be inconsistent with the Bayh-Dole Act or implementing regulations. A competing application for a patent license agreement, completed in compliance with 37 CFR 404.8 and received by the Air Force within the period for timely objections, will be treated as an objection and may be

considered as an alternative to the proposed license.

Authority: 35 U.S.C. 209; 37 CFR part 404.

Tommy W. Lee,

Acting Air Force Federal Register Liaison Officer.

BILLING CODE 3911–44–P

DEPARTMENT OF ENERGY

Agency Information Collection Extension

AGENCY: U.S. Department of Energy.

ACTION: Notice of request for comments.

SUMMARY: The Department of Energy (DOE), pursuant to the Paperwork Reduction Act of 1995, intends to extend for three years, an information collection request with the Office of Management and Budget (OMB).

DATES: Comments regarding this proposed information collection must be received on or before September 2, 2025. If you anticipate any difficulty in submitting comments within that period, contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section as soon as possible.

ADDRESSES: Written comments may be sent to Oluwatosin Fadarey, Attorney-Adviser (Labor), GC–63, U.S. Department of Energy, 1000 Independence Avenue SW, Washington, DC 20585 or by email at oluwatosin.fadarey@hq.doe.gov.

FOR FURTHER INFORMATION CONTACT: Oluwatosin Fadarey, Attorney-Adviser (Labor), GC–63, U.S. Department of Energy, 1000 Independence Avenue SW, Washington, DC 20585, oluwatosin.fadarey@hq.doe.gov (240) 751–3745.

SUPPLEMENTARY INFORMATION:

Comments are invited on: (a) Whether the extended collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

This information collection request contains:

- (1) *OMB No.:* 1910–5143;
 - (2) *Information Collection Request Title:* Labor Relations Report;
 - (3) *Type of Review:* Review;
 - (4) *Purpose:* The proposed collection will request information from the Department of Energy M&O and Facilities Management Contractors for contract administration, management oversight, and cost control. This information is used to ensure that Department contractors maintain good labor relations and retain a workforce in accordance with the terms of their contract and in compliance with statutory and regulatory requirements as identified by contract. The respondents are Department M&O and Facility Management Contractors;
 - (5) *Annual Estimated Number of Respondents:* 35;
 - (6) *Annual Estimated Number of Total Responses:* 35;
 - (7) *Annual Estimated Number of Burden Hours:* 1.84 for total of 64.4 per year;
 - (8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* \$3,160.11.
- Statutory Authority:* 42 U.S.C. 7254, 7256.

Signing Authority

This document of the Department of Energy was signed on June 26, 2025, by Jeffrey Novak, Acting General Counsel, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on June 26, 2025.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP17-470-004]

Freeport LNG Development, L.P., FLNG Liquefaction 4, LLC; Notice of Request for Extension of Time

Take notice that on June 18, 2025, Freeport LNG Development, L.P. (Freeport LNG) and FLNG Liquefaction 4, LLC (FLIQ4) (together Applicants or Freeport) requested that the Commission grant a 40-month extension of time, until December 1, 2031, to construct and place into service its Train 4 Project (Project) to support additional liquefaction and export operations at Freeport LNG's existing liquefied natural gas (LNG) export terminal located in Brazoria County, Texas (the Terminal), as authorized in the May 17, 2019 Order (Order).¹ The Order required Freeport to complete construction of the Project and make it available for service within four years of the date of the Order, or by May 17, 2023.

On September 10, 2020, the Commission granted Freeport an extension of time until May 17, 2026, to complete construction of the Train 4 Project and make it available for service.² The Commission has subsequently granted one additional extension of time, making the current date for the Project facilities to be constructed and placed into service August 1, 2028.³

Freeport affirms that on June 8, 2022, less than a month after submitting the

Second Extension Request, an explosion occurred at the Terminal, which resulted in the entire Terminal being taken offline (June 8 Incident).⁴ The Applicants affirm that Freeport LNG has prioritized restoration efforts and the return of the existing facilities at the Terminal to service since the issuance of the Second Extension Order. Moreover, the new facilities approved for the Train 4 Project require use of the Terminal facilities.

In its latest extension of time request, Freeport states that restoration is complete, the Terminal has returned to full service, and normal operations have resumed. Freeport affirms that it is actively marketing the Train 4 Project and engaging in discussions with a number of potential off-takers, including those in more recently emerging markets and in markets with renewed strategic emphasis on securing long-term U.S. LNG supply.

The Applicants assert that due to the upfront, long-term commercial commitments required to be made by LNG customers, and the unique nature of financing LNG projects, certainty regarding Freeport's ability to complete Project construction by the in-service deadline is essential to commercialization of the Project. No changes to the Project are proposed in connection with the requested extension of time.

This notice establishes a 15-calendar day intervention and comment period deadline. Any person wishing to comment on Freeport's request for an extension of time may do so. No reply comments or answers will be considered. If you wish to obtain legal status by becoming a party to the proceedings for this request, you should, on or before the comment date stated below, file a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (NGA) (18 CFR 157.10).

As a matter of practice, the Commission itself generally acts on requests for extensions of time to complete construction for NGA facilities when such requests are contested before order issuance. For those extension

requests that are contested,⁵ the Commission will aim to issue an order acting on the request within 45 days.⁶ The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension.⁷ The Commission will not consider arguments that re-litigate the issuance of the certificate order, including whether the Commission properly found the project to be in the public convenience and necessity and whether the Commission's environmental analysis for the certificate complied with the National Environmental Policy Act (NEPA).⁸ At the time a pipeline requests an extension of time, orders on certificates of public convenience and necessity are final and the Commission will not re-litigate their issuance.⁹ The Director of the Office of Energy Projects, or his or her designee, will act on all of those extension requests that are uncontested.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at (202) 502-6652 (toll free at 1-866-208-3676) or email at ferconlinesupport@ferc.gov, or the Public Reference Room at (202) 502-8371, TTY (202) 502-8659. Email the Public Reference Room at public.referenceroom@ferc.gov.

The Commission strongly encourages electronic filings of comments in lieu of paper using the "eFile" link at <http://>

⁵ Contested proceedings are those where an intervenor disputes any material issue of the filing. 18 CFR 385.2201(c)(1).

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings

Take notice that the Commission has received the following Natural Gas Pipeline Rate and Refund Report filings:

Filings Instituting Proceedings

Docket Numbers: PR25-59-000.

Applicants: Columbia Gas of Maryland, Inc.

Description: § 284.123 Rate Filing: CMD Rates effective 4-22-2025 to be effective 4/22/2025.

Filed Date: 6/25/25.

Accession Number: 20250625-5062.

Comment Date: 5 p.m. ET 7/16/25.

Docket Numbers: RP25-970-000.

Applicants: Double E Pipeline, LLC.

Description: § 4(d) Rate Filing: Negotiated Rate & Non-Conforming Agreements—COPCO (FTS011) to be effective 7/1/2025.

Filed Date: 6/25/25.

Accession Number: 20250625-5114.

Comment Date: 5 p.m. ET 7/7/25.

Any person desiring to intervene, to protest, or to answer a complaint in any

of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

The filings are accessible in the Commission's eLibrary system (<https://elibrary.ferc.gov/idmws/search/fercensearch.asp>) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <http://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

Dated: June 26, 2025.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2212-059]

Domtar Paper Company, LLC; Notice of Intent To Prepare an Environmental Assessment

On August 27, 2024, and supplemented on February 28, 2025 and March 14, 2025, Domtar Paper Company, LLC (licensee) filed an application for a non-capacity amendment for the Rothschild Hydroelectric Project No. 2212. The project is located on the Wisconsin River in Marathon County, Wisconsin. The project does not occupy any federal lands.

The licensee requests a non-capacity amendment of its license to replace the existing timber crib spillway section with two hydraulically actuated

overhead hinged crest gates mounted on a reinforced concrete crest structure with reinforced concrete piers. Additionally, a reinforced concrete labyrinth crest structure and reinforced concrete stilling basins would be constructed for both spillways. The new spillway is expected to have similar hydraulic capacity to the timber crib spillway. The licensee does not intend to draw down the reservoir during construction, which is expected to take approximately three and a half years to complete.

On April 28, 2025, the Commission issued a public notice for the proposed amendment. The public comment period closed on May 28, 2025. On May 28, 2025, the Wisconsin Department of Natural Resources filed a motion to intervene and provided a list of permits that have been issued or are in the review process for the proposed amendment.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) under the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) for the project.¹ Commission staff plans to issue an EA by February 23, 2026. Revisions to the schedule may be made as appropriate. The EA will be issued for a 30-day comment period. All comments filed on the EA will be reviewed by staff and considered in the Commission's final decision on the proceeding.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members, and others to access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

Any questions regarding this notice may be directed to Aneela Mousam at (202) 502-8357 or aneela.mousam@ferc.gov.

Dated: June 26, 2025.

Carlos D. Clay,
Deputy Secretary.

Commission

[P-15249-002]

**Lewis Ridge Pumped Storage, LLC;
Notice of Application Tendered for
Filing With the Commission and
Soliciting Additional Study Request
and Establishing Procedural Schedule
for Licensing and a Deadline for
Submission of Final Amendments**

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application*: Original Major License.

b. *Project No.*: 15249-002.

c. *Date Filed*: June 13, 2025.

d. *Applicant*: Lewis Ridge Pumped Storage, LLC.

e. *Name of Project*: Lewis Ridge Pumped Storage Project.

f. *Location*: The proposed project would be located near the towns of Blackmont, Tejay, Balkan, and Callaway, in Bell County, Kentucky.

g. *Filed Pursuant to*: Federal Power Act, 16 U.S.C. 791 (a)-825(r).

h. *Applicant Contact*: Sandy Slayton, Rye Development, 1455 SW Broadway Street, Suite 290, Portland, Oregon 97201; (503) 341-1425; email: sandy@ryedevelopment.com.

i. *FERC Contact*: Monte TerHaar at (202) 502-6035, or monte.terhaar@ferc.gov.

j. *Cooperating agencies*: Federal, state, local, and tribal agencies with jurisdiction and/or special expertise with respect to environmental issues that wish to cooperate in the preparation of the environmental document should follow the instructions for filing such requests described in item l below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of the environmental document cannot also intervene. See 94 FERC ¶ 61,076 (2001).

k. Pursuant to section 4.32(b)(7) of 18 CFR of the Commission's regulations, if any resource agency, Indian Tribe, or person believes that an additional scientific study should be conducted in order to form an adequate factual basis for a complete analysis of the application on its merit, the resource agency, Indian Tribe, or person must file a request for a study with the Commission not later than 60 days from the date of filing of the application, and

serve a copy of the request on the applicant.

l. Deadline for filing additional study requests and requests for cooperating agency status: on or before 5:00 p.m. Eastern Standard Time on August 12, 2025.

The Commission strongly encourages electronic filing. Please file additional study requests and requests for cooperating agency status using the Commission's eFiling system at <https://ferconline.ferc.gov/FEROnline.aspx>. For assistance, please contact FERC Online Support at FEROnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. All filings must clearly identify the project name and docket number on the first page: Lewis Ridge Pumped Storage Project (P-15249-002).

m. This application is not ready for environmental analysis at this time.

n. *Project Description*: The proposed Lewis Ridge Pumped Storage Project would consist of the following: (1) a 48.2-acre upper reservoir created by a 8,241-foot-long, 50-foot-high rocky earth-fill dam with an integrated emergency overflow spillway; (2) a 4,174-foot-long aboveground penstock; (3) a powerhouse located 267 feet below ground, containing two 154 MW reversible pump-turbines with a total rated capacity of 308 MW; (4) a 51.6-acre lower reservoir created by a 1,120-foot-long, 138-foot-high earth-fill dam, with an integrated emergency overflow spillway; (5) a permanent screened intake and pump station on the Cumberland River, connecting to a 4,724-foot-long, 24-inch diameter buried pipeline that passes flows to a stilling basin connected to the lower reservoir; (6) a 2.5-mile-long, 161-kilovolt transmission line with two switching stations, connecting the project to the existing Pineville-Harlan #1 transmission line; and (7) appurtenant facilities.

o. In addition to publishing the full text of this notice in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this notice, as well as other documents in

the proceeding (e.g., license application) via the internet through the Commission's Home Page (<http://www.ferc.gov>), using the "eLibrary" link. Enter the docket number, excluding the last three digits in the docket number field to access the document (P-14796). For assistance, please contact FERC Online Support at FEROnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY).

You may also register online at <https://ferconline.ferc.gov/FEROnline.aspx> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

p. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595, or OPP@ferc.gov.

q. *Procedural schedule and final amendments*: The application will be processed according to the following preliminary schedule. Revisions to the schedule will be made as appropriate.

Milestone	Target date
Deficiency letter (if necessary).	September 2025.
Additional Information Request (if necessary).	November 2025.
Issue Scoping Document 1 for comments.	February 2026.
Issue Scoping Document 2 (if necessary).	April 2026.
Notice of Acceptance/Notice of Ready for Environmental Analysis.	June 2026.

r. Final amendments to the application must be filed with the Commission no later than 30 days from the issuance date of the notice of ready for environmental analysis.

Dated: June 26, 2025.

Carlos D. Clay,
Deputy Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission****[Docket No. IC25–11–000]****Commission Information Collection Activities (Ferc–725k); Comment Request; Extension****AGENCY:** Federal Energy Regulatory Commission.**ACTION:** Notice of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the currently approved information collection, FERC–725K (Mandatory Reliability Standards for the SERC Region). There are no changes to the reporting requirements with this information collection. No comments were received on the 60-day notice that ended on June 24, 2025.

DATES: Comments on the collection of information are due July 31, 2025.

ADDRESSES: Send written comments on FERC–725K to OMB through https://www.reginfo.gov/public/do/PRA/icrPublicCommentRequest?ref_nbr=202505-1902-002. You can also visit <https://www.reginfo.gov/public/do/PRAMain> and use the drop-down under “Currently under Review” to select the “Federal Energy Regulatory Commission” where you can see the open opportunities to provide comments. Comments should be sent within 30 days of publication of this notice.

Please submit a copy of your comments to the Commission via email to DataClearance@FERC.gov. You must specify the Docket No. (IC25–11–000) and the FERC Information Collection number (FERC–725K) in your email. If you are unable to file electronically, comments may be filed by USPS mail or by hand (including courier) delivery:

- Mail via U.S. Postal Service Only: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.
- All other delivery methods: Federal Energy Regulatory Commission, Secretary of the Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Docket: To view comments and issuances in this docket, please visit <https://elibrary.ferc.gov/eLibrary/search>. Once there, you can also sign-up for automatic notification of activity in this docket.

FOR FURTHER INFORMATION CONTACT:

Kayla Williams, (202) 502–6468.
DataClearance@FERC.gov.

SUPPLEMENTARY INFORMATION:

Title: FERC–725K (Mandatory Reliability Standards for the SERC Region).

OMB Control No.: 1902–0260.

Type of Request: Three-year extension of the FERC–725K information collection requirements with no changes to the current reporting requirements.

Abstract: Section 215 of the Federal Power Act (FPA) requires a Commission-certified Electric Reliability Organization (ERO) to develop mandatory and enforceable Reliability Standards, which are subject to Commission review and approval. Once approved, the Reliability Standards may be enforced by NERC, subject to Commission oversight, or by the Commission independently.

Reliability Standards that NERC proposes to the Commission may include Reliability Standards that are proposed by a Regional Entity to be effective in that region. In Order No. 672, the Commission noted that:

As a general matter, we will accept the following two types of regional differences, provided they are otherwise just, reasonable, not unduly discriminatory or preferential and in the public interest, as required under the statute: (1) a regional difference that is more stringent than the continent-wide Reliability Standard, including a regional difference that addresses matters that the continent-wide Reliability Standard does not; and (2) a regional Reliability Standard that is necessitated by a physical difference in the Bulk-Power System.

When NERC reviews a regional Reliability Standard that would be applicable on an interconnection-wide basis and that has been proposed by a Regional Entity organized on an interconnection-wide basis, NERC must rebuttably presume that the regional Reliability Standard is just, reasonable, not unduly discriminatory or preferential, and in the public interest. In turn, the Commission must give “due weight” to the technical expertise of NERC and of a Regional Entity

organized on an interconnection-wide basis.

On April 19, 2007, the Commission accepted delegation agreements between NERC and each of the eight Regional Entities. In the order, the Commission accepted SERC as a Regional Entity organized on less than an interconnection-wide basis. As a Regional Entity, SERC oversees Bulk-Power System reliability within the SERC Region, which covers a geographic area of approximately 560,000 square miles in a sixteen-state area in the southeastern and central United States (all of Missouri, Alabama, Tennessee, North Carolina, South Carolina, Georgia, Mississippi, and portions of Iowa, Illinois, Kentucky, Virginia, Oklahoma, Arkansas, Louisiana, Texas and Florida). The SERC Region is currently geographically divided into five subregions that are identified as Southeastern, Central, VACAR, Delta, and Gateway.

For this renewal, there is only one SERC region Reliability Standard, PRC–006–SERC–3 (Automatic Underfrequency Load Shedding Requirements). PRC–006–SERC–3 is applicable to these SERC entities, 27 planning coordinators (PC), 212 generator owners (GO), and UFLS entities made up 70 transmission owners (TO) and 95 distribution providers.

Type of Respondents: Entities registered with the North American Electric Reliability Corporation (within the SERC region).

*Estimate of Annual Burden:*¹ The Commission estimates the annual reporting burden and cost for the information collection as:

¹ “Burden” is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, reference 5 Code of Federal Regulations 1320.3.

² These values were derived from the NERC Compliance data of February 12, 2025, using only SERC unique United States registered entities.

³ The estimated hourly cost (salary plus benefits) is a combination based on the Bureau of Labor Statistics (BLS), as of 2024, for 75% of the average of an Electrical Engineer (17–2071) \$79.31/hr., $79.31 \times .75 = 59.4825$ (\$59.48-rounded) (\$59.48/hour) and 25% of an Information and Record Clerk (43–4199) \$44.74/hr., $44.74 \times .25 = 11.185$ (\$11.19 rounded) (\$11.19/hour), for a total (\$59.48+\$11.19 = \$70.67/hour).

FERC-725K—MANDATORY RELIABILITY STANDARD FOR THE SERC REGION

	Number of respondents ²	Annual number of responses per respondent	Total number of responses	Average burden & cost per response ³	Total annual burden hours & total annual cost	Cost per respondent (\$)
	(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1)
Annual Review and Record Retention.	27 (PC)	1	27	24 hrs. \$1,696.08	648 hrs. \$45,794.16	\$1,696.08
	212 (GO)	1	212	20 hrs. 1,413.40	4,240 hrs. 299,640.80	1,413.40
	70 (TO)	1	70	12 hrs. 848.04	840 hrs. 59,362.80	848.04
	95 (DP)	1	95	12 hrs. 848.04	1,140 hrs. 80,563.80	848.04
Total			404		6,868 hrs. 485,361.56	4,805.56

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: June 26, 2025.

Carlos D. Clay,

Deputy Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP25-233-000]

Magnum Gas Storage, LLC; Notice of Schedule for the Preparation of an Environmental Assessment for the 2025 Amendment Project

On April 21, 2025, Magnum Gas Storage, LLC (Magnum) filed an application in Docket No. CP25-233-000 requesting to amend its Certificate of Public Convenience and Necessity (Certificate) issued pursuant to Section 7(c) of the Natural Gas Act for the Magnum Gas Storage Project. The proposed project is known as the 2025 Amendment Project (Project) and includes modification of previously approved facilities, and construction and operation of additional facilities in Millard, Juab, and Utah Counties, Utah for a total of 20.8 billion cubic feet (Bcf) of working natural gas storage capacity.

On April 30, 2025, the Federal Energy Regulatory Commission (Commission or

FERC) issued its Notice of Application for the Project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff's environmental document for the Project.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) for the Project and the planned schedule for the completion of the environmental review.¹ The EA will be issued for a 30-day comment period.

Schedule for Environmental Review

Issuance of EA November 13, 2025 90-day Federal Authorization Decision Deadline² February 11, 2026

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Project Description

The proposed Project is an amendment to the FERC Certificate issued on March 17, 2011, and amended on November 17, 2016, and April 23, 2020, (Docket Nos. PF09-3-000, CP10-22-000, CP16-18-000, and CP20-77-000). The proposed modifications consist primarily of changes to the locations of previously approved facilities and utilities within areas previously analyzed for environmental impacts. Magnum requests authorization to redesign the two

¹ For tracking purposes under the National Environmental Policy Act, the unique identification number for documents relating to this environmental review is EAXX-019-20-000-1750685312.

² The Commission's deadline applies to the decisions of other federal agencies, and state agencies acting under federally delegated authority, that are responsible for federal authorizations, permits, and other approvals necessary for proposed projects under the Natural Gas Act. Per 18 CFR 157.22(a), the Commission's deadline for other agency's decisions applies unless a schedule is otherwise established by federal law.

authorized caverns for 5.2 Bcf of working gas each and to construct and operate two additional storage caverns with 5.2 Bcf of working gas capacity each, one additional brine disposal pond and related facilities, and two new pipeline interconnections.

Background

On June 17, 2025, the Commission issued a Notice of Scoping Period Requesting Comments on *Environmental Issues for the Proposed 2025 Amendment Project*. (Notice of Scoping). The Notice of Scoping was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. Prior to the issuance of the Notice of Scoping, the Commission received comments from two landowners. The concerns raised were impacts to adjacent land use, property rights, and lack of adequate project information. All substantive comments will be addressed in the EA.

Additional Information

In order to receive notification of the issuance of the EA and to keep track of formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription. This service provides automatic notification of filings made to subscribed dockets, document summaries, and direct links to the documents. Go to <https://www.ferc.gov/ferc-online/overview> to register for eSubscription.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the

public is encouraged to contact OPP at (202) 502–6595 or OPP@ferc.gov.

Additional information about the Project is available from the Commission's Office of External Affairs at (866) 208–FERC or on the FERC website (www.ferc.gov). Using the “eLibrary” link, select “General Search” from the eLibrary menu, enter the selected date range and “Docket Number” excluding the last three digits (*i.e.*, CP25–233), and follow the instructions. For assistance with access to eLibrary, the helpline can be reached at (866) 208–3676, TTY (202) 502–8659, or at FERCOnlineSupport@ferc.gov. The eLibrary link on the FERC website also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rule makings.

Dated: June 26, 2025.

Carlos D. Clay,
Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM20–12–000]

Potential Enhancements to the Critical Infrastructure Protection Reliability Standards

AGENCY: Federal Energy Regulatory Commission.

ACTION: Withdrawal of notice of inquiry and termination of rulemaking proceeding.

SUMMARY: The Commission withdraws a notice of inquiry, which sought comment on whether the then-effective Critical Infrastructure Protection (CIP) Reliability Standards adequately addressed: cybersecurity risks pertaining to data security, detection of anomalies and events, and mitigation of cybersecurity events. The Commission also sought comment on the potential risk of a coordinated cyberattack on geographically distributed targets and whether Commission action, including potential modifications to the CIP Reliability Standards, would be appropriate to address such risk.

DATES: This withdrawal will become effective July 31, 2025.

FOR FURTHER INFORMATION CONTACT:

Leigh Anne Faugust, Office of the General Counsel, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, (202) 502–6396, leigh.faugust@ferc.gov.

SUPPLEMENTARY INFORMATION: 1. On June 18, 2020, the Commission issued a notice of inquiry in this proceeding. The notice of inquiry sought comment on potential enhancements to the Critical Infrastructure Protection (CIP) Reliability Standards corresponding to certain aspects of the National Institute of Standards and Technology (NIST) Cybersecurity Framework (NIST Framework) and the risk of coordinated cyberattack to the security and reliability of the Bulk-Power System.¹

2. As set forth below, we exercise our discretion to withdraw the notice of inquiry and terminate this rulemaking proceeding.

I. Background

3. In the notice of inquiry, the Commission sought comment on whether the then-effective CIP Reliability Standards adequately addressed the following topics: (i) cybersecurity risks pertaining to data security, (ii) detection of anomalies and events, and (iii) mitigation of cybersecurity events. Commission staff identified these topics after reviewing the NIST Framework and comparing its content to that of the CIP Reliability Standards. The Commission also sought comment on the potential risk of a coordinated cyberattack on geographically distributed targets and whether Commission action, including potential modifications to the CIP Reliability Standards, would be proper to address such risk. In issuing the notice of inquiry, the Commission explained that as “new cyber threats continue to evolve, the Reliability Standards should keep pace to support a robust, defense in depth approach to electric grid cybersecurity.”²

A. Comments

4. The Commission received 24 comments in response to the questions posed in the notice of inquiry.³ Most

¹ *Potential Enhancements to the Critical Infrastructure Prot. Reliability Standards*, Notice of Inquiry, 171 FERC ¶ 61,215 (June 18, 2020) (Notice of Inquiry); NIST, *Framework for Improving Critical Infrastructure Cybersecurity*, (Apr. 16, 2018), <https://nvlpubs.nist.gov/nistpubs/CSWP/NIST.CSWP.04162018.pdf>.

² Notice of Inquiry, 171 FERC ¶ 62,215 at P 2.

³ Comments were received from: jointly, American Public Power Association (APPA) and Large Public Power Council (LPPC); Jonathan Appelbaum (Appelbaum); Canadian Electricity Association; Cogentrix Energy Power Management, LLC; Jason Christopher and Tim Conway (Christopher and Conway); George R. Cotter; Jointly, Edison Electric Institute (EEI) and Electric Power Supply Association (EPSA); Forescout Technologies, Inc. (Forescout); Independent System Operators and Regional Transmission Organizations Council (IRC); National Rural Electric Cooperative Association; New Jersey Board of Public Utilities (NJ PUC); North American Electric Reliability

commenters responded that the then-effective Reliability Standards, together with Reliability Standards pending implementation and Reliability Standards under development by NERC at that time, adequately addressed the NIST Framework categories identified in the notice of inquiry.⁴ Other commenters acknowledged that the Reliability Standards may not address some aspects of the NIST Framework but asserted that the NIST Framework and CIP Reliability Standards serve fundamentally different purposes and, as a result, cautioned against an apples-to-apples comparison of the two regimes.⁵ Some commenters did identify potential areas for improvement.⁶

5. Regarding coordinated cyberattacks, the comments identified Reliability Standards, NERC programs, and voluntary actions that industry was taking to address the potential risk.⁷ Other commenters suggested that there should be additional protections for low impact bulk electric system (BES) Cyber Systems.⁸

II. Discussion

6. We appreciate the feedback that the Commission received in response to the notice of inquiry. After careful consideration of the record, including later actions by NERC and the Commission to address issues core to the notice of inquiry, we exercise our discretion to withdraw the notice of inquiry and terminate this proceeding.⁹

Corporation (NERC); MISO Transmission Owners (MISO TO); Reliable Energy Analytics, LLC (REA); Siemens Energy, Inc.; Solar Energy Industries Association (SEIA); Southern Company Services, Inc. for Southern Power Co., Mississippi Power Co., Georgia Power Co., and Alabama Power Co.; Southwestern Power Administration; Transmission Access Policy Study Group; United States Army Corps of Engineers; United States Bureau of Reclamation; Western Area Power Administration; Wolverine Power Supply Cooperative, Inc.; and XTec, Inc.

⁴ See *e.g.*, NERC Comments at 7; EEI and EPSA Comments at 8–10; MISO TOs Comments at 5–6; IRC Comments at 2–3.

⁵ See *e.g.*, EEI/EPSA Comments at 4; APPA and LPPC Comments at 1–2; Christopher and Conway Comments at 6. Other comments support the use of the NIST Framework as a reference. See *e.g.*, NJ PUC Comments at 3.

⁶ See *e.g.*, REA Comments at 3–4; Appelbaum Comments at 9, 16.

⁷ See NERC Comments at 16 (explaining it could mitigate the risks of coordinated cyberattacks through: (1) assessments, reports, and studies; (2) alerts and lessons learned issuances; (3) collaboration on risk prioritization with stakeholders; (4) information sharing; and (5) simulated training exercises); see also SEIA Comments at 6; EEI and EPSA Comments at 14–15; MISO TO Comments at 8–9.

⁸ See *e.g.*, Applebaum Comments at 25; Forescout Comments at 1–2.

⁹ See *e.g.*, *Revised Pub. Util. Filing Requirements for Elec. Quarterly Repts.*, 169 FERC ¶ 61,236 (2019)

Continued

7. After the issuance of the notice of inquiry, NERC and the Commission took multiple actions to address emerging issues and to improve the cybersecurity posture of the BES. For example, the Commission addressed control center communication by approving Reliability Standard CIP-012-1 (Communications Between Control Centers) in 2020 in Order No. 866 and directing NERC to develop modifications to the CIP Reliability Standards to require protections regarding the availability of communication links and data communicated (specifically the confidentiality and integrity of Real-time Assessment and Real-time monitoring data) between control centers.¹⁰ NERC developed responsive modifications and the Commission then approved the revised Standard on May 23, 2024.¹¹

8. The Commission also took steps to improve the detection of anomalies and detection and mitigation of cybersecurity events. Specifically, on January 19, 2023, the Commission issued Order No. 887 directing NERC to develop requirements for internal network security monitoring, which NERC submitted on June 24, 2024. Concurrently with this proceeding, we are approving Reliability Standard CIP-015-1 (Internal Network Security Monitoring) and directing further improvements to the Standard.¹²

9. Regarding the potential risk of a coordinated cyberattack on geographically distributed targets, on March 16, 2023, the Commission approved Reliability Standard CIP-003-9 (Security Management Controls).¹³ The Standard requires entities with BES facilities whose assets are designated low impact to have methods for determining and disabling vendor remote access. NERC also performed an in-depth analysis of the risk presented by low impact cyber facilities and reported on whether those criteria should be modified to address

coordinated cyberattacks.¹⁴ Based on those findings, NERC revised Reliability Standard CIP-003 and, on December 20, 2024, NERC filed proposed Reliability Standard CIP-003-11 (Security Management Controls) for Commission approval.¹⁵ The proposed Standard would, among other things, require entities to “mitigate the risks posed by a coordinated attack using distributed low impact bulk electric system Cyber Systems by adding controls to authenticate remote users; protecting the authentication information in transit; and detecting malicious communications to or between assets containing low impact BES Cyber Systems with external routable connectivity.”¹⁶

The Commission Orders

The notice of inquiry is hereby withdrawn and Docket No. RM20-12-000 is hereby terminated.

By the Commission. Commissioner Chang is not participating.

Issued: June 26, 2025.

Carlos D. Clay,

Deputy Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2188-295]

NorthWestern Corporation; Notice of Application for Non-Capacity Amendment of License Accepted for Filing, Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

- a. *Application Type:* Non-capacity Amendment of License.
- b. *Project No:* 2188-295.
- c. *Date Filed:* April 14, 2025.
- d. *Applicant:* NorthWestern Corporation.

¹⁴ Minutes: Board of Trustees, 7 (Feb. 4, 2021), <https://www.nerc.com/gov/bot/Agenda%20highlights%20and%20Minutes%202013/Minutes%20-%20BOT%20Open%20-%20Feb%204%202021.pdf>.

¹⁵ N. Am. Elec. Reliability Corp., Petition for Approval of Proposed Reliability Standard CIP-003-11, Docket No. RM25-8-000 (filed Dec. 20, 2024) (currently pending before the Commission). Withdrawing the notice of inquiry and terminating this docket does not pre-judge the Commission's action in the pending docket (e.g., whether or not the Commission will approve the proposed Reliability Standard).

¹⁶ *Id.* at 1-2.

e. *Name of Project:* Missouri-Madison Hydroelectric Project.

f. *Location:* The project consists of nine hydroelectric developments located on the Madison and Missouri Rivers in Gallatin, Madison, Lewis and Clark, and Cascade counties, in southwestern Montana. The project occupies federal lands managed by the U.S. Forest Service, and lands administered by the Bureau of Land Management.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a-825r.

h. *Applicant Contact:* Carrie Harris, Manager Hydro Engineering, 11 East Park Street, Butte, Montana 59701, (406) 497-3429, carrie.harris@northwestern.com or John Tabaracci, Senior Corporate Counsel, 208 North Montana Avenue, Suite 200, Helena, Montana 59601, (406) 443-8983, john.tabaracci@northwestern.com.

i. *FERC Contact:* Jeremy Jessup, (202) 502-6779, Jeremy.Jessup@ferc.gov.

j. *Cooperating agencies:* With this notice, the Commission is inviting federal, state, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues affected by the proposal, that wish to cooperate in the preparation of any environmental document, if applicable, to follow the instructions for filing such requests described in item k below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of any environmental document cannot also intervene. See 94 FERC ¶ 61,076 (2001).

k. *Deadline for filing comments, motions to intervene, and protests:* July 28, 2025.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins

(order withdrawing notice of proposed rulemaking and terminating rulemaking proceeding); see also, e.g., *Fast-Start Pricing in Mkts. Operated by Reg'l Transmission Org. & Indep. Sys. Operators*, 161 FERC ¶ 61,293 (2017) (order withdrawing notice of proposed rulemaking and terminating rulemaking proceeding).

¹⁰ *Critical Infrastructure Prot. Reliability Standard CIP-012-1—Cyber Sec.—Communic's between Control Ctrs.*, Order No. 866, 85 FR 7197 (Feb. 7, 2020), 170 FERC ¶ 61,031, at P 36 (2020).

¹¹ N. Am. Elec. Reliability Corp., 187 FERC ¶ 61,086 (2024).

¹² *Critical Infrastructure Prot. Reliability Standard CIP-015-1—Cyber Sec.—Internal Network Sec. Monitoring*, 191 FERC ¶ 61,224 (2025).

¹³ N. Am. Elec. Reliability Corp., 182 FERC ¶ 61,155 (2023).

Avenue, Rockville, MD 20852. The first page of any filing should include the docket number P–2188–295. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of Request:* The licensee proposes to replace the Hauser Development's Units 3 and 6 S. Morgan Smith horizontal Francis turbines with new Mavel vertical Z Kaplan turbines. The licensee would also replace the generators for Units 3 and 6. The proposed upgrade would result in a 0.96 MW increase in the authorized installed capacity of the development, to 20.28 MW, and would result in a decrease to the hydraulic capacity of the development of 5.92%, from 4,560 cubic feet per second (cfs) to 4,290 cfs. The total authorized installed capacity for the entire project would increase from 319.05 MW to 320.01 MW. The licensee states that the upgrades would not cause any change in the operation of the project or have quantifiable environmental effects, and only a minor effect on hydraulic flows. All construction would occur within the footprint of the powerhouse and there would be no land disturbance.

m. *Locations of the Application:* This filing may be viewed on the Commission's website at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at <http://www.ferc.gov/docs-filing/esubscription.asp> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or email FERCOnlineSupport@ferc.gov, for TTY, call (202) 502–8659. Agencies may obtain copies of the application directly from the applicant.

n. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

o. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the

requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

p. *Filing and Service of Documents:* Any filing must (1) bear in all capital letters the title "COMMENTS", "PROTEST", or "MOTION TO INTERVENE" as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

q. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members, and others access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or OPP@ferc.gov.

Dated: June 26, 2025.

Carlos D. Clay,

Deputy Secretary.

BILLING CODE 6717–01-P

FEDERAL MARITIME COMMISSION

[Docket No. 25–1]

Phillip Marciano LLC, Complainant v. US Cargo Services Inc., Respondent; Notice of Filing of Complaint and Assignment

Served: June 26, 2025.

Notice is given that a complaint has been filed with the Federal Maritime Commission (the "Commission") by

Phillip Marciano LLC (the "Complainant") against US Cargo Services Inc. (the "Respondent"). Complainant states that the Commission has subject-matter jurisdiction over the complaint pursuant to the Shipping Act of 1984, as amended, 46 U.S.C. 40101 *et seq.*, and personal jurisdiction over Respondent as a common carrier, as this term is defined in 46 U.S.C. 40102.

Complainant Phillip Marciano LLC is a limited liability company existing under the laws of the State of New York with its principal place of business located in New York, New York.

Complainant identifies Respondent US Cargo Services Inc. as a corporation with its principal place of business located in Richmond, Texas.

Complainant alleges that Respondent violated 46 U.S.C. 41102(c) and (d) and 46 CFR 545.5. Complainant alleges these violations arose from a failure to deliver containers as required under the bills of lading, pending payment of charges unrelated to the shipments, and other acts or omissions by Respondent.

An answer to the complaint must be filed with the Commission within 25 days after the date of service.

The full text of the complaint can be found in the Commission's electronic Reading Room at <https://www2.fmc.gov/readingroom/proceeding/25-11/>. This proceeding has been assigned to the Office of Administrative Law Judges. The initial decision of the presiding judge shall be issued by June 26, 2026, and the final decision of the Commission shall be issued by January 11, 2027.

David Eng,

Secretary.

BILLING CODE P

FEDERAL MARITIME COMMISSION

[FMC–2024–0018; FMC–2024–0019; FMC–2024–0020; FMC–2024–0021]

Renewal of Agency Information Collection Activities: Submission for OMB Review; Comment Requested; Marine Terminal Operators; Service Contracts, Non-Vessel Operating Common Carriers

AGENCY: Federal Maritime Commission.

ACTION: Notice and request for comment.

SUMMARY: The Federal Maritime Commission (Commission) is giving public notice that the agency has submitted the continuing information collections listed below in this notice to the Office of Management and Budget (OMB) for approval of revisions of

existing information collections related to marine terminal operator schedules, service contracts, non-vessel-operating common carrier (NVOCC) service arrangements and negotiated rate agreements. The public is invited to comment on these information collections pursuant to the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before July 31, 2025.

ADDRESSES: Comments should be submitted to: (1) the Commission through the Federal eRulemaking Portal at www.regulations.gov (dockets FMC–2024–0018; FMC–2024–0019; FMC–2024–0020; FMC–2024–0021) and (2) also sent to the Office of Management and Budget's Office of Information and Regulatory Affairs through the portal at <https://www.reginfo.gov/public/do/PRAMain>. Find this particular information collection at Reginfo.gov by selecting "Currently under Review—Open for Public Comments" or by using the search function. If your material cannot be submitted to the addresses above, contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

FOR FURTHER INFORMATION CONTACT: For additional information, please contact Amy Strauss, (202) 523–5793, TradeAnalysis@fmc.gov.

SUPPLEMENTARY INFORMATION:

The Commission invites the general public and other Federal agencies to comment on any aspect of the continuing information collections listed in this notice, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). We are particularly interested in receiving comments on: (1) the necessity and utility of the proposed information collections for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Comments submitted in response to this notice will be included or summarized in our request for OMB approval of the relevant information collection. All comments are part of the public record and subject to disclosure. Please do not include any confidential or inappropriate material in your comments.

Previous Request for Comments

On November 20, 2024, the Commission published a notice and request for comment in the **Federal**

Register (89 FR 91749) regarding the agency's request for approval from OMB for information collections as required by the Paperwork Reduction Act of 1995. During the 60-day period, the Commission received no comments.

Information Collection Open for Comment

I.

Title: 46 CFR Part 525—Marine Terminal Operator Schedules and Related Form FMC–1.

OMB Approval Number: 3072–0061 (Expires July 31, 2025).

Abstract: Section 40501(f) of Title 46 of the United States Code provides marine terminal operators (MTOs) with the option of making their schedules of rates, regulations, and practices available to the public subject to 46 U.S.C. 41102(c). MTOs must maintain a complete set of all of their terminal schedules and shall promptly make them available to the Commission upon request. Each MTO is required to file Form FMC–1 with the Bureau of Trade Analysis providing its organization name, organization number, home office address, name and telephone number of the firm's representative, the location of its terminal schedule(s), and the publisher, if any, used to maintain its terminal schedule. The Commission publishes a list on its website of the location of any terminal schedule made available to the public.

Type of Review: Revision of a currently approved collection.

Needs and Uses: The Commission uses the information filed by these parties to monitor the activities of these entities and to meet its responsibilities with regard to identifying and preventing unreasonable preference or prejudice and unjust discrimination pursuant to 46 U.S.C. 41102. Additionally, the Commission uses the information filed by these parties to monitor the activities of these entities and to meet its responsibilities with regard to identifying and preventing unreasonable discrimination, preference or advantage (or disadvantage) or unreasonable refusal to deal pursuant to 46 U.S.C. 41106.

Frequency: Submission of new FMC–1 forms or updates to existing forms are not assigned a specific time frame by the Commission; they are submitted as circumstances warrant. However, it is unlikely that any single entity would need to provide information more than once in a calendar year.

Type of Respondents: Marine Terminal Operators.

Number of Annual Respondents: There are currently 202 MTOs registered

with the Commission. One hundred and forty-six (146) of those entities make their schedules available to the public. Based on previous years, the Commission estimates that approximately 20 MTOs will file a new FMC–1 or update an existing FMC–1. MTOs are not required to inform the Commission when they update a marine terminal schedule outside of publishing its location; however, the Commission estimates that 10 MTOs would update their schedules in a given year.

Estimated Time per Response: The time per response for completing Form FMC–1 averages 0.5 person hours, and approximately 5 person-hours for updating an existing MTO schedule.

Total Annual Burden: The Commission estimates the total person-hour burden at 60 person-hours per year.

II.

Title: 46 CFR Part 530—Service Contracts.

OMB Approval Number: 3072–0065 (Expires July 31, 2025).

Abstract: Section 40502 of Title 46 of the United States Code requires ocean common carriers and agreements between or among such carriers to file their service contracts confidentially with the Commission. The Commission's rules governing the filing of service contracts are set forth at 46 CFR part 530.

Type of Review: Revision of a currently approved collection.

Needs and Uses: The Commission monitors service contract filings to ensure compliance with 46 U.S.C. subtitle IV.

Frequency: Frequency of filings is determined by the ocean common carrier and its customers. When parties enter into a service contract or amend the contract, the service contract or amendment must be filed with the Commission.

Type of Respondents: Ocean common carriers or their duly appointed agents are required to file service contracts and amendments with the Commission.

Number of Annual Respondents: The Commission estimates an annual respondent universe of 84 ocean common carriers. During 2024, ocean common carriers filed 370,918 original service contracts, and 835,092 service contract amendments.

Estimated Time per Response: The Commission estimates that the time per response ranges from 0.0166 to 0.1 person-hours for reporting and recordkeeping requirements contained in the regulations, averaging 119 hours per response for audit requirements, and

0.1 person-hours for completing Form FMC–83.

Total Annual Burden: The Commission estimates the total annual person-hour burden at 34,285.48 person-hours.

III.

Title: 46 CFR Part 531—NVOCC Service Arrangements.

OMB Approval Number: 3072–0070 (Expires July 31, 2025).

Abstract: 46 CFR part 531 allows NVOCCs and shippers' associations with NVOCC members to act as shipper parties in NVOCC Service Arrangements (NSAs), and to be exempt from certain tariff publication requirements of 46 U.S.C. subtitle IV provided the NVOCC posts a prominent notice in its rules tariff invoking the NSA exemption and provides electronic access to its rules tariff to the public free of charge. This information collection corresponds to the requirements to include the NSA exemption in the tariff, recordkeeping requirements, and the requirement to make the tariff publicly available free of charge.

Type of Review: Revision of a currently approved collection.

Needs and Uses: The Commission uses NSAs and associated data for monitoring and investigatory purposes and, in its proceedings, to adjudicate related issues raised by private parties.

Frequency: NVOCCs that opt to enter into an NSA in lieu of publishing tariff rate(s) must post a notice in its rules tariff invoking the NSA exemption.

Type of Respondents: Parties that enter into NSAs are NVOCCs and shippers' associations with NVOCC members.

Number of Annual Respondents: Of the total respondent universe of approximately 8,700 active NVOCCs, the Commission estimates that 325 NVOCCs per year will need to add a prominent notice to their electronically published rules tariff indicating the intention to invoke the NSA exemption. The Commission estimates that approximately 1,500 NVOCCs in total have invoked this exemption and would therefore be subject to the recordkeeping requirements.

Estimated Time per Response: The time per response is estimated to be 15 minutes to add a tariff rule invoking the NSA exemption, and 15 minutes for recordkeeping requirements.

Total Annual Burden: Total annual burden is estimated to be 456 person-hours.

IV.

Title: 46 CFR Part 532—NVOCC Negotiated Rate Arrangements.

OMB Approval Number: 3072–0071 (Expires July 31, 2025).

Abstract: Section 40103 of Title 46 of the United States Code authorizes the Commission to exempt by order or regulation “any class of agreements between persons subject to [46 U.S.C. subtitle IV, Part A] or any specified activity of those persons from any requirement of [46 U.S.C. subtitle IV, Part A] if the Commission finds that the exemption will not result in substantial reduction in competition or be detrimental to commerce.” The Commission may attach conditions to any exemption and may, by order, revoke an exemption. In 46 CFR part 532, the Commission exempted NVOCCs from the tariff rate publication requirements of Part 520 and allowed an NVOCC to enter into an NVOCC Negotiated Rate Arrangement (NRA) in lieu of publishing its tariff rate(s), provided the NVOCC posts a prominent notice in its rules tariff invoking the NRA exemption and provides electronic access to its rules tariff to the public free of charge. This information collection corresponds to the rules tariff prominent notice and the requirement to make its rules tariff publicly available free of charge.

Type of Review: Revision of a currently approved collection.

Needs and Uses: The Commission uses the information filed by an NVOCC in its rules tariff to determine whether the NVOCC has invoked the exemption for a particular shipment or shipments. The Commission has used and will continue to use the information required to be maintained by NVOCCs for monitoring and investigatory purposes, and, in its proceedings, to adjudicate related issues raised by private parties.

Type of Respondents: Parties that enter into NRAs are NVOCCs and shippers' associations with NVOCC members.

Number of Annual Respondents: Of the total respondent universe of approximately 8,700 active NVOCCs, an average of 500 annually over the last three years have added a prominent notice to its electronically published rules tariff indicating the intention to invoke the NRA exemption. The Commission estimates that a total of 3,800 NVOCCs now utilize the NRA exemption and would then need approximately one hour per year for recordkeeping requirements.

Estimated Time per Response: The time per response is estimated to be 15 minutes to add a tariff rule invoking the NRA exemption, and one hour for recordkeeping requirements.

Total Annual Burden: Total annual burden is estimated to be 3,925 person-hours.

David Eng,
Secretary.

BILLING CODE 6730–02–P

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Commission hereby gives notice of the filing of the following agreement under the Shipping Act of 1984. Interested parties may submit comments, relevant information, or documents regarding the agreement to the Secretary by email at Secretary@fmc.gov, or by mail, Federal Maritime Commission, 800 North Capitol Street, Washington, DC 20573. Comments will be most helpful to the Commission if received within 12 days of the date this notice appears in the **Federal Register**, and the Commission requests that comments be submitted within 7 days on agreements that request expedited review. Copies of agreements are available through the Commission's website (www.fmc.gov) or by contacting the Office of Agreements at (202) 523–5793 or tradeanalysis@fmc.gov.

Agreement No.: 201451–001.

Agreement Name: APL/MLL MECL–EX1 Slot Exchange Agreement.

Parties: American Presidents Lines, LLC; and Maersk Line, Limited.

Filing Party: Wayne Rohde, Cozen O'Connor.

Synopsis: The Amendment deletes Spain, Oman, and the United Arab Emirates from the scope of the Agreement.

Proposed Effective Date: 6/25/2025.

Location: <https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/88603>.

Dated: June 27, 2025.

Alanna Beck,

Federal Register Alternate Liaison Officer.

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank

holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at <https://www.federalreserve.gov/foia/request.htm>. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)).

Comments received are subject to public disclosure. In general, comments received will be made available without change and will not be modified to remove personal or business information including confidential, contact, or other identifying information. Comments should not include any information such as confidential information that would not be appropriate for public disclosure.

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551-0001, not later than July 31, 2025.

A. Federal Reserve Bank of Kansas City (Jeffrey Imgarten, Assistant Vice President) 1 Memorial Drive, Kansas City, Missouri 64198-0001. Comments can also be sent electronically to KCApplicationComments@kc.frb.org:

1. *Reisher Family Foundation*; to acquire voting shares of FirstBank Holding Company, and thereby indirectly acquire voting shares of FirstBank, all of Lakewood, Colorado.

BILLING CODE P

FEDERAL TRADE COMMISSION

[File No. 241 0111]

ACT and Giant Eagle; Analysis of Agreement Containing Consent Orders to Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement; request for comment.

SUMMARY: The consent agreement in this matter settles alleged violations of Federal law prohibiting unfair methods of competition. The attached Analysis of Agreement Containing Consent Orders to Aid Public Comment describes both the allegations in the complaint and the terms of the consent order—embodied in the consent agreement—that would settle these allegations.

DATES: Comments must be received on or before July 31, 2025.

ADDRESSES: Interested parties may file comments online or on paper by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below. Please write: "ACT and Giant Eagle; File No. 241 0111" on your comment and file your comment online at <https://www.regulations.gov> by following the instructions on the web-based form. If you prefer to file your comment on paper, please mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Mail Stop H-144 (Annex F), Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Megan Henry (202-326-3378), Mergers III Division, Bureau of Competition, Federal Trade Commission, 400 7th Street SW, Washington, DC 20024.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 15 U.S.C. 46(f), and FTC Rule § 2.34, 16 CFR 2.34, notice is hereby given that the above-captioned consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of 30 days. The following Analysis of Agreement Containing Consent Orders to Aid Public Comment describes the terms of the consent agreement and the allegations in the complaint. An

electronic copy of the full text of the consent agreement package can be obtained from the FTC website at this web address: <https://www.ftc.gov/news-events/commission-actions>.

The public is invited to submit comments on this document. For the Commission to consider your comment, we must receive it on or before July 31, 2025. Write "ACT and Giant Eagle; File No. 241 0111" on your comment. Your comment—including your name and your State—will be placed on the public record of this proceeding, including, to the extent practicable, on the <https://www.regulations.gov> website.

Because of the agency's heightened security screening, postal mail addressed to the Commission will be delayed. We strongly encourage you to submit your comments online through the <https://www.regulations.gov> website. If you prefer to file your comment on paper, write "ACT and Giant Eagle; File No. 241 0111" on your comment and on the envelope, and mail your comment by overnight service to: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Mail Stop H-144 (Annex F), Washington, DC 20580.

Because your comment will be placed on the publicly accessible website at <https://www.regulations.gov>, you are solely responsible for making sure your comment does not include any sensitive or confidential information. In particular, your comment should not include sensitive personal information, such as your or anyone else's Social Security number; date of birth; driver's license number or other State identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure your comment does not include sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any "trade secret or any commercial or financial information which . . . is privileged or confidential"—as provided by section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule § 4.10(a)(2), 16 CFR 4.10(a)(2)—including competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

Comments containing material for which confidential treatment is requested must be filed in paper form, must be clearly labeled "Confidential," and must comply with FTC Rule § 4.9(c). In particular, the written

request for confidential treatment that accompanies the comment must include the factual and legal basis for the request and must identify the specific portions of the comment to be withheld from the public record. See FTC Rule § 4.9(c). Your comment will be kept confidential only if the General Counsel grants your request in accordance with the law and the public interest. Once your comment has been posted on <https://www.regulations.gov>—as legally required by FTC Rule § 4.9(b)—we cannot redact or remove your comment from that website, unless you submit a confidentiality request that meets the requirements for such treatment under FTC Rule § 4.9(c), and the General Counsel grants that request.

Visit the FTC website at <https://www.ftc.gov> to read this document and the news release describing this matter. The FTC Act and other laws the Commission administers permit the collection of public comments to consider and use in this proceeding, as appropriate. The Commission will consider all timely and responsive public comments it receives on or before July 31, 2025. For information on the Commission's privacy policy, including routine uses permitted by the Privacy Act, see <https://www.ftc.gov/site-information/privacy-policy>.

Analysis of Agreement Containing Consent Orders To Aid Public Comment

I. Introduction

The Federal Trade Commission ("Commission") has accepted for public comment, subject to final approval, an Agreement Containing Consent Orders ("Consent Agreement") from Alimentation Couche-Tard, Inc. ("ACT") and Giant Eagle, Inc. ("Giant Eagle") (collectively, the "Respondents"). The Consent Agreement is designed to remedy the anticompetitive effects that likely would result from ACT's proposed acquisition of retail fuel assets from Giant Eagle.

Under the terms of the proposed Decision and Order ("Order") contained in the Consent Agreement, Respondent ACT must divest certain assets as ongoing retail fuel businesses in 35 local markets in Indiana, Ohio, and Pennsylvania. Respondent ACT must complete the divestiture to Majors Management ("Majors") within 20 days after the closing of the acquisition. The Commission and Respondent ACT have agreed to an Order to Maintain Assets that requires ACT to operate and maintain each divestiture outlet in the normal course of business through the date Majors acquires the divested assets.

The Commission has placed the Consent Agreement on the public record for 30 days to solicit comments from interested persons. Comments received during this period will become part of the public record. After 30 days, the Commission will review the comments received and decide whether it should withdraw, modify, or make final the proposed Order.

II. The Respondents

Respondent ACT is a publicly traded company headquartered in Laval, Quebec, Canada. ACT operates more than 16,800 stores in 31 countries, and almost 13,100 of these locations sell fuel. In the United States, ACT operates over 7,100 convenience stores, almost entirely under the Circle K brand.

Respondent Giant Eagle is a privately-owned grocery store chain headquartered in Cranberry Township, Pennsylvania. Giant Eagle operates more than 270 retail fuel outlets in Indiana, Maryland, Ohio, Pennsylvania, and West Virginia under the brand name GetGo.

III. The Proposed Acquisition

On August 16, 2024, ACT entered into an agreement to acquire certain retail and wholesale fuel assets from Giant Eagle (the "Acquisition"). The Commission's Complaint alleges that the Acquisition, if consummated, would violate section 7 of the Clayton Act, as amended, 15 U.S.C. 18, and that the Acquisition agreement constitutes a violation of section 5 of the Federal Trade Commission Act, as amended, 15 U.S.C. 45, by substantially lessening competition for the retail sale of gasoline in 35 local markets in Indiana, Ohio, and Pennsylvania, and by substantially lessening competition for the retail sale of diesel fuel in 19 local markets in Indiana, Ohio, and Pennsylvania.

IV. The Retail Sale of Gasoline and Diesel Fuel

The Commission alleges the relevant product markets in which to analyze the Acquisition are the retail sale of gasoline and the retail sale of diesel fuel. Consumers require either gasoline or diesel fuel for their vehicles and can only purchase gasoline or diesel at retail fuel outlets. The retail sale of gasoline and the retail sale of diesel fuel constitute separate relevant markets because the two are not interchangeable. Vehicles that run on gasoline cannot run on diesel fuel, and vehicles that run on diesel fuel cannot run on gasoline.

The Commission alleges the relevant geographic markets in which to assess the competitive effects of the

Acquisition with respect to the retail sale of gasoline are 35 local markets in Indiana, Ohio, and Pennsylvania. The relevant geographic markets in which to assess the competitive effects of the Acquisition with respect to the retail sale of diesel fuel are 19 local markets in Indiana, Ohio, and Pennsylvania.

The geographic markets for retail gasoline and retail diesel fuel are highly localized, based on the unique circumstances of each area. Each relevant market is distinct and fact-dependent, reflecting many considerations, including commuting patterns, traffic flows, driving distance, and outlet characteristics. Consumers typically choose between nearby retail fuel outlets with similar characteristics along their planned routes. The geographic markets for the retail sale of diesel fuel are similar to the corresponding geographic markets for retail gasoline, as many diesel fuel consumers exhibit preferences and behaviors similar to those of gasoline consumers.

The Acquisition would substantially lessen competition in each of these local markets, resulting in 35 highly concentrated markets for the retail sale of gasoline and 19 highly concentrated markets for the retail sale of diesel fuel. Retail fuel outlets compete on price, store format, product offerings, and location, and pay close attention to competitors in close proximity, on similar traffic routes, and with similar store characteristics. In each of the local gasoline and diesel fuel retail markets, the Acquisition would reduce the number of competitively constraining independent market participants to five or fewer. The combined entity would be able to raise prices unilaterally in markets where ACT and Giant Eagle are close competitors today. Absent the Acquisition, ACT and Giant Eagle would continue to compete head-to-head in these local markets.

Moreover, the Acquisition would enhance the incentives for interdependent behavior in local markets where five or fewer constraining independent market participants would remain. Two key aspects of the retail fuel industry make it vulnerable to such coordination. First, retail fuel prices are transparent and easily monitored from street signs, the internet, or smartphone applications. Second, retail fuel outlets track their competitors' fuel prices on a daily basis and change their own prices in response. These repeated interactions give retail fuel outlets considerable familiarity with the pricing strategies of their competitors price and may

encourage coordination in concentrated local markets.

Entry into each relevant market would not be timely, likely, or sufficient to deter or counteract the anticompetitive effects arising from the Acquisition. Significant entry barriers include the availability of attractive real estate, the time and cost associated with constructing a new retail fuel outlet, and the time associated with obtaining necessary permits and approvals.

V. The Consent Agreement

The proposed Order would remedy the Acquisition's likely anticompetitive effects by requiring ACT to divest certain retail fuel assets to Majors in each local market. Majors is an experienced operator of retail fuel sites and will be a new entrant into the local markets. The proposed Order requires that the divestiture be completed no later than 20 days after ACT and Giant Eagle consummate the Acquisition. The proposed Order further requires ACT to maintain the economic viability, marketability, and competitiveness of each divestiture asset until the divestiture to Majors is complete.

In addition to requiring outlet divestitures, the proposed Order prohibits Respondent ACT from re-acquiring the divested assets for a period of ten years. The proposed Order also requires Respondent ACT to notify the Commission before acquiring any stations designated by the Commission as competitively significant in the local markets of the divested assets for ten years. The prior notice provision is necessary because an acquisition in close proximity to the divested assets likely would raise the same competitive concerns as the Acquisition and may fall below the Hart-Scott-Rodino Act premerger notification thresholds.

The Consent Agreement contains additional provisions designed to ensure the effectiveness of the relief. For example, Respondents have agreed to an Order to Maintain Assets that will issue at the time the proposed Consent Agreement is accepted for public comment. The Order to Maintain Assets requires Respondent ACT to operate and maintain each divestiture outlet in the normal course of business, through the date the divestiture is complete. The proposed Order also includes a provision that allows the Commission to appoint an independent third party as a Monitor to oversee the Respondents' compliance with the requirements of the Order.

The purpose of this analysis is to facilitate public comment on the Consent Agreement, and the Commission does not intend this

analysis to constitute an official interpretation of the proposed Order or to modify its terms in any way.

By direction of the Commission.

Joel Christie,
Acting Secretary.

Statement of Commissioner Mark R. Meador

An effective divestiture package is one that restores competition—full stop. It is my belief that the proposed consent order meets this standard. I would like to thank FTC staff for their thorough review of the proposed acquisition and exemplary work in negotiating the proposed divestiture package.

As alleged in the complaint, Canada-based Alimentation Couche-Tard, Inc.'s ("ACT") proposed acquisition of retail gas stations from Giant Eagle, Inc. would have eliminated head-to-head competition between the parties in 35 local markets in the heart of America in Indiana, Ohio, and Pennsylvania. The proposed consent order requires ACT to divest 35 retail gas stations to Majors Management, LLC ("Majors"), a U.S.-based company and established leader in operating, developing, servicing, and supporting well over a thousand retail convenience centers and gas stations. Majors is well-positioned to compete effectively and ensure that competition is fully maintained in the markets that would otherwise be impacted by ACT's proposed acquisition.

I want to also expand upon my views on the principles I consider when determining whether a settlement proposal constitutes an effective divestiture remedy package. The FTC should, in all but extremely rare cases, insist on clean divestitures of standalone business lines when negotiating merger remedy packages. Remedy proposals should fully and durably resolve competitive concerns. Structural remedies must be self-sustaining.

Moreover, when parties negotiate with the FTC on merger remedies—particularly transactions involving complex divestiture packages across multiple locations—it is essential that they approach Commission staff early, candidly, and in good faith. It improves review efficiency, including staff's ability to quickly home in on other relevant competitive concerns, and streamlines remedy negotiations when merging parties are upfront about potential overlaps, the potential divestiture buyer, and any impediments to a complete separation of assets and business from the seller.

The larger and more intricate a proposed divestiture package becomes,

the greater the need for scrutiny. Divestitures that involve larger numbers of outlets also raise concerns about potential for operational gaps, concerns about asset values, and questions about potential legal entanglements that could frustrate the viability of a proposed divestiture package. For this reason, parties should strive to propose straightforward, autonomous, and viable divestitures that do not require material post-divestiture Commission day-to-day oversight or intervention.

The capability and credibility of the proposed divestiture buyer are also central considerations. A divestiture buyer must demonstrate that it has the resources, industry expertise, and operational readiness necessary to maintain or restore competition in the relevant market. This process entails scrutinizing the proposed buyer's business plans, financial condition, market experience, and ability to acquire and operate the to-be divested assets without having to rely on the seller or merged entity post transaction. Staff will evaluate these factors closely, and the burden remains on the transacting parties to put forward an appropriate divestiture buyer. The Commission is prepared to reject proffered divestiture buyers who cannot substantiate their financial capability to compete in the relevant markets with the divestiture assets.

Remedies must also include binding commitments to divest as a condition of closing. Where the proposed remedy involves partial asset combinations or atypical carve-outs, the Commission should not hesitate to reject a proposed remedy package outright. And to the extent the FTC pursues litigation, the burden lies squarely on the merging parties to prove that any proposed remedy package restores competition.

As I have previously stated, the FTC should be willing to consider remedy packages that fully and completely resolve competitive concerns. Negotiating remedies is an integral part of the Commission's merger review toolkit. But when parties pursue transactions that raise serious competitive concerns, they must come prepared with a credible, fully vetted, and enforceable solution. In designing remedies for such transactions, the Commission should resolve uncertainty in the manner most favorable to consumers; the risks inherent in a forward-looking remedy must be borne by the parties, who seek to benefit from the merger.

Effective merger remedies begin with early engagement, credible proposals, and full accounting of competitive risk. When parties take that responsibility

seriously and engage transparently with staff, the remedy negotiation process works—and the Commission serves its mission of protecting American consumers.

BILLING CODE 6750–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–5056–N]

Medicare Program; Implementation of Prior Authorization for Select Services for the Wasteful and Inappropriate Services Reduction (WiSeR) Model

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: This notice announces a 6-year model focused on reducing fraud, waste (including low-value care), and abuse in Medicare fee-for-service (FFS) via the implementation of technology-enabled prior authorization processes for select services.

DATES: This notice is effective on January 1, 2026.

FOR FURTHER INFORMATION CONTACT: Kate Blackwell (844) 711–2664, Option 8 or WiSeR@cms.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Wasteful medical care spending, broadly defined as spending that could be reduced or eliminated without adversely affecting quality of care or health outcomes, accounts for an estimated 25 percent of total health care spending in the United States (U.S.).¹ Medicare accounts for nearly one quarter of U.S. health care spending (\$1 trillion in 2023) making it an important target for identifying and reducing waste.³ The Medicare program is particularly vulnerable to wasteful spending due to the age and complexity

of the Medicare population and their disproportionately high share of health care spending compared to younger segments of the U.S. population.⁴ Additionally, the Medicare fee-for-service (FFS) payment structure may further drive waste given there is an inherent incentive in some cases for fraudulent actors to bill higher volumes of services, including those that are unnecessary or inappropriate.⁵

Key areas contributing to wasteful spending include fraudulent or abusive billing practices, as well as the delivery of services that have little or no clinical benefit, or services in which the risk of harm from the service outweighs its potential benefit.⁶ Additionally, these practices can inflict significant physical, financial, and emotional harm on beneficiaries. A 2019 study of Medicare claims data estimated that treatment by health care providers who were subsequently prosecuted for fraud and/or abuse contributed to as many as 6,700 premature deaths among Medicare FFS beneficiaries.⁷ Such findings indicate there is a significant opportunity to better address and prevent fraud, waste, and abuse (FWA) and its negative impact on the health and well-being of beneficiaries and the fiscal sustainability of the Medicare FFS program.

The Centers for Medicare & Medicaid Services (CMS) and the Medicare Administrative Contractors (MACs) employ a variety of techniques to reduce FWA in Medicare FFS. These include publication of National and Local Coverage Determinations (NCDs and LCDs, respectively) describing the evidence-based requirements and limitations for Medicare coverage for specific medical services, procedures, or devices. Generally, prior authorization is a utilization management tool in which a health care provider requests provisional affirmation of coverage from a health care payer before medical

service is furnished to a beneficiary and before a claim is submitted for payment.

Under Medicare FFS, providers and suppliers submit a request for prior authorization (also known as pre-claim review, depending on the service type and the timing of the submission) for a limited set of specific services⁸ to their MAC. The MAC then reviews the prior authorization request based on the associated Medicare requirements such as those found in NCDs and LCDs and provides a decision, which can be either a provisional affirmation or non-affirmation. CMS has implemented prior authorization in Medicare FFS under specific and limited initiatives, and evidence suggests doing so for these services has contributed to significant reductions in the amounts paid by CMS for these targeted services.⁹ In an effort to reduce provider burden, these initiatives do not change any medical necessity or documentation requirements. Additionally, evidence demonstrates that under the Medicare Prior Authorization Model for Repetitive, Scheduled Non-Emergent Ambulance Transport (RSNAT), there was no adverse effect on quality of care or access to care—as demonstrated by increased emergency service use, hospitalizations (including hospitalizations for complications of end stage renal disease (ESRD)), or deaths—notwithstanding that some beneficiaries had been non-affirmed for RSNAT.¹⁰

Other payers, including Medicare Advantage (MA) plans, often employ more utilization management approaches to reduce FWA, including requiring prior authorization for a more expansive set of services. Additionally, some MA plans have prior experience working with third parties to leverage enhanced technologies, like artificial intelligence (AI), machine learning (ML) or algorithmic decision logic, to streamline and improve detection of FWA. This work is done with certain guardrails in place. For example, 42 CFR 422.566(d) requires that an adverse medical necessity decision related to a

prior authorization request must be reviewed by a physician or other health care professional with appropriate expertise before the MA plan issues the decision.

CMS conducted market research from various different MA organizations that had experience with enhanced technology-enabled prior authorization processes. The research indicated significant reductions in the decision time to prior authorization determination, particularly for affirmed prior authorization requests. Some MA plans reported decision time to prior authorization approval being almost instantaneous for services with very clear clinical coverage criteria. As a result, CMS is exploring findings from MA plans regarding enhanced technologies to examine how to efficiently, accurately, and appropriately ensure select services are provided and paid for based on clinical and evidence-based guidelines.

Section 1115A of the Social Security Act (the Act) authorizes the Secretary to test innovative payment and service delivery models to reduce program expenditures, while preserving or enhancing the quality of care furnished to Medicare, Medicaid, and Children's Health Insurance Program beneficiaries. Section 1115A(d)(1) of the Act authorizes the Secretary to waive such requirements of Titles XI and XVIII and of sections 1902(a)(1), 1902(a)(13), and 1903(m)(2)(A)(iii) of the Act as may be necessary solely for purposes of carrying out section 1115A of the Act with respect to testing models described in section 1115A(b) of the Act. For this model, consistent with this standard, we will waive such provisions of sections 1834(a)(15) and 1869(h) of the Act that limit our ability to conduct prior authorization. While these provisions are specific to durable medical equipment and physician services, we will waive any portion of these sections as well as any portion of 42 CFR 410.20(d), which implements section 1869(h) of the Act, and 42 CFR 414.234, which implements section 1834(a)(15) of the Act, that could be construed to limit our ability to conduct prior authorization for other items or services or that could be construed to restrict what entity performs said prior authorization. We have determined that the implementation of this model does not require the waiver of any fraud and abuse law, including sections 1128A, 1128B, and 1877 of the Act. Thus, providers and suppliers affected by this model must comply with all applicable fraud and abuse laws.

II. Provisions of the Notice

A. Model Specifications

We plan to implement a 6-year model test (the Wasteful and Inappropriate Services Reduction (WiSeR) Model), in two 3-year agreement periods, with companies that have experience implementing technology-enhanced prior authorization with other payers, including MA plans, as model participants. Under the model, participants will implement and streamline prior authorizations to ensure that select services that are provided and paid for are clinically appropriate, evidence-based, and consistent with Medicare FFS requirements. We envision that implementing the review process while leveraging enhanced technologies would identify when such services are medically unnecessary, that model participants will support providers and suppliers in navigating beneficiaries towards more clinically appropriate or higher value care when appropriate and will streamline the prior authorization process for providers and suppliers.

This model will be tested in select states in select MAC jurisdictions. The selected MAC jurisdictions for WiSeR are JH, JL, JF, and J15, and the selected states are New Jersey (JL), Ohio (J15), Oklahoma and Texas (JH), and Arizona and Washington (JF). These MAC jurisdictions and states were selected based on various evaluability and operational criteria. Evaluability criteria included: (1) MAC jurisdictions that allow for within-MAC comparisons between test and comparison states; (2) selected states with adequate volume to provide sufficiently precise impact estimates; (3) MAC jurisdictions with skin and tissue substitute LCDs to assess effectiveness, as well as one MAC jurisdiction without existing skin and tissue substitute LCDs to increase generalizability;¹¹ and (4) geographic diversity. Operational criteria used for geographic selection included: (1) MAC jurisdictions that have existing skin and tissue substitute LCDs; and (2) states that also meet the evaluation criteria and have the highest volume of services by highest historical claim paid amount. The model will begin on January 1, 2026, in the selected states.

The WiSeR model will focus on testing the implementation of prior authorization and pre-payment review for specific selected services that will be

¹⁰ Asher A, Contreary K, Haile G, and Coopersmith J. *Evaluation of the Medicare Prior Authorization Model for Repetitive Scheduled Non-Emergent Ambulance Transport: Final Report*. 2021. Retrieved from: <https://www.cms.gov/priorities/innovation/data-and-reports/2021/rsnat-finalevlprpt>.

¹¹ Not all MAC jurisdictions have an active skin and tissue substitute LCD in place at this time. Skin and tissue substitutes are a selected service in WiSeR only in states and MAC jurisdictions that have an active skin and tissue substitute LCD in place.

performed by third party entities leveraging enhanced technologies, that would be paid under a novel payment approach where the model participants are compensated based on a share of averted expenditures. Further, the WISer model would test: the speed and accuracy of new technology-assisted decision-making; WISer participants' ability to help patients navigate away from low-value or potentially unsafe treatments and towards clinically appropriate higher-value care through provider/supplier education; a novel payment approach that is based on paying WISer participants a share of averted expenses in lieu of the traditional acquisition-based approach; and potential alignment with MA in terms of standardization, predictability, and transparency. We plan that model participants will use a technology-assisted prior authorization process to help ensure that all relevant clinical and medical documentation requirements are met before services are rendered to beneficiaries and before claims are submitted for payment, and to help navigate patients towards alternatives when appropriate. This process will further help ensure that claims comply with existing Medicare documentation, coverage, payment, and coding requirements.

In general, this model will require the same information and clinical documentation that is already required to support Medicare FFS payment but earlier in the process, namely, prior to the service being furnished. Prior authorization allows providers and suppliers to address potential issues with claims prior to rendering services, including potentially navigating beneficiaries to more effective or appropriate alternative care, and reduces the likelihood that a furnished service is not covered. Implementing a process that leverages enhanced technology will streamline the claim review and adjudication process. The model will not change payment or coverage for the selected services in the model.

Beginning January 1, 2026, the prior authorization process under this model will be implemented in the selected states on the following items and services with affiliated NCDs or LCDs:

- Electrical Nerve Stimulators (NCD 160.7)
- Sacral Nerve Stimulation for Urinary Incontinence (NCD 230.18)
- Phrenic Nerve Stimulator (NCD 160.19)
- Deep Brain Stimulation for Essential Tremor and Parkinson's Disease (NCD 160.24)

- Vagus Nerve Stimulation (NCD 160.18)
- Induced Lesions of Nerve Tracts (NCD 160.1)
- Epidural Steroid Injections for Pain Management excluding facet joint injections (L39015, L33906, L39036, L39240, L39242, L36920, L38994, L39054)
- Percutaneous Vertebral Augmentation (PVA) for Vertebral Compression Fracture (VCF) (L33569, L34106, L34228, L38201, L34976, L35130, L38737, L38213)
- Cervical Fusion (L39741, L39799, L39770, L39758, L39762, L39793, L39773, L39788)
- Arthroscopic Lavage and Arthroscopic Debridement for the Osteoarthritic Knee (NCD 150.9)
- Hypoglossal Nerve Stimulation for Obstructive Sleep Apnea (L38276, L38307, L38398, L38387, L38310, L38312, L38385, L38528)
- Incontinence Control Devices (NCD 230.10)
- Diagnosis and Treatment of Impotence (NCD 230.4)
- Percutaneous Image-Guided Lumbar Decompression for Spinal Stenosis (NCD 150.13)
- Skin and Tissue Substitutes (LCDs below)—only applicable to MAC jurisdictions and states that have an active LCD in place
- ++ Application of Bioengineered Skin Substitutes to Lower Extremity Chronic Non-Healing Wounds (L35041)
- ++ Wound Application of Cellular and/or Tissue Based Products (CTPs), Lower Extremities (L36690)

We selected these services based on several factors. We considered for inclusion services for which there is existing evidence of potential FWA, including alignment with definitions and evidence around services defined as low-value by Schwartz et al.;¹² concerns around and prior reports^{13 14} of fraud, waste, and abuse from the Department of Health and Human Services' (HHS) Office of Inspector General (OIG), Department of Justice (DOJ), the Medicare Comprehensive Error Rate Testing (CERT) program, and other

sources; and services already subject to prior authorization in MA at the time. We considered patient safety concerns, including both excluding services that are inpatient only, or pose a substantial risk to patients if services are delayed. We also considered for inclusion services where opportunity exists to support the model test, including services with publicly available NCDs or LCDs, and cost savings opportunity. CMS may add additional services in future years.

Prior to the start of the model and throughout the duration of the model, we will conduct outreach and education to Medicare-enrolled providers and suppliers, beneficiaries, and the model participants through such methods as open-door forums, frequently asked questions (FAQs) on our website, other website postings, and educational materials issued by the MACs. Traditionally, utilization management tools such as technology-enabled prior authorization are widely used in the MA and commercial payer space but applied in limited cases in the Medicare FFS program. For this reason, the WISer model would ensure that there is rigorous communication and education between the MACs and the model participants to seamlessly interface with one another, reduce health care provider burden, and avoid Medicare beneficiary harm. Additional information about the WISer model is available on the CMS website [<https://www.cms.gov/priorities/innovation/innovation-models/wiser>].

B. Prior Authorization Process Under WISer

Under the WISer model, a Medicare-enrolled provider/supplier will have the opportunity to submit a request for prior authorization to either the MAC or the model participant,¹⁵ along with documentation to support Medicare coverage of a selected service included in the model as defined in the statute, regulation, NCD and/or LCD. After receipt of this documentation, the model participant will be required to make every effort to conduct a review and notify the provider/supplier of their decision on a prior authorization request within the timeframe specified by CMS for an initial submission. Submitting a prior authorization request will be voluntary; however, if the provider/supplier does not submit a request, their claim will be subject to

¹⁵ The model participant would be required to offer options for providers and suppliers to submit prior authorization requests that would be consistent with standardized submission approaches recognized by CMS, including an electronic portal.

pre-payment medical review by model participants that may involve requests for documentation to support the medical necessity of the targeted item or service (see Scenario 3 for further details).

To be provisionally affirmed, the request for prior authorization must meet all applicable coverage, coding, and documentation requirements found in statutes, rules, NCDs, and LCDs for the select service. A provisional affirmation is a preliminary finding that a future claim submitted to Medicare for the service likely meets Medicare's coverage, coding, and payment requirements. Claims for which there is an associated provisional affirmation decision will be paid in full, so long as all of the applicable Medicare coverage and clinical documentation are met, and the claim was billed and submitted correctly.

A provider/supplier may request an expedited review when the model's standard timeframe for making a prior authorization decision could jeopardize the life or health of the beneficiary. Requests for expedited review will need to include justification for why the standard timeframe would not be appropriate. If the MAC or model participant determines that the request does not substantiate the need for an expedited review, they will provide notification that the request will not be expedited and communicate a decision within the regular timeframe. As we plan to initially target nonemergent services only, we expect requests for expedited reviews to be extremely rare.

For a non-affirmed request where the service has yet to be provided and a claim has yet to be submitted, the provider/supplier has unlimited opportunities to resubmit a prior authorization request to the model participant or MAC. When resubmitting the request to the model participant or MAC, the provider or supplier would have the opportunity to request a peer-to-peer review to inform the new determination. A non-affirmed prior authorization decision does not prevent the provider/supplier from submitting a claim. However, submission of such a claim would be denied by the MAC and would constitute an initial determination, which would be subject to the administrative appeals process. The existing claims appeals process would not change under the model. See 42 CFR part 405, subpart I. This would be a further opportunity to challenge the coverage decision.

The following describes how WISeR will address three potential scenarios under the model:

Scenario 1: A Medicare-enrolled provider/supplier submits a prior authorization request to the model participant. The model participant will make a decision of affirmation or non-affirmation based on its review of the prior authorization request and relevant supporting documentation. If the model participant determines provisional affirmation, then the model participant will provide notification to the provider/supplier and coordinate with the MAC to generate a unique tracking number (UTN) to inform payment determination when the claim is submitted. The provider/supplier will need to include the UTN on the claim when billing for applicable services. If the model participant determines a non-affirmative prior authorization, they will provide the provider/supplier with a detailed reason for the non-affirmative decision and work with the MAC to generate an UTN that is associated with the non-affirmative decision. After reviewing the information provided, the provider/supplier should consider if there is additional documentation or other rationale that could address the non-affirmation decision and can resubmit the prior authorization request an unlimited number of times. If a claim with a non-affirmed prior authorization request is submitted, the MAC will deny the claim. The provider/supplier may then appeal the claim denial with the MAC under existing appeals procedures.

Scenario 2: A Medicare-enrolled provider/supplier submits a prior authorization request to the MAC. When the MAC receives the prior authorization request and supporting documentation from the provider or supplier, the MAC will route the prior authorization request to the model participant to conduct the prior authorization. After that, the same process as outlined in scenario 1 will be followed.

Scenario 3: A Medicare-enrolled provider or supplier performs a selected service without requesting prior authorization. As noted previously, submitting a prior authorization request is voluntary. In this scenario, the provider or supplier submits the claim to the MAC without seeking prior authorization. The MAC then flags the claim for pre-payment medical review to be performed by the model participant; the model participant would request documentation from the provider/supplier to support medical necessity for the claim. After receipt of all relevant documentation, the model participant will conduct a medical review, which could include leveraging technology and clinician review, and

communicate the decision to the MAC. The MAC will then process the claim in accordance with the model participant's decision. If the claim is denied for payment, the provider/supplier and beneficiary may request an appeal and will have full administrative appeal rights. This appeal would follow the existing Medicare FFS claim appeal process.

Under the model, we will work to avoid any adverse impact on beneficiaries or providers/suppliers and to educate stakeholders about the model. We will hold model participants accountable for the accuracy and timeliness of prior authorization determinations through quality adjustments to model payments and we will also monitor for downstream impacts on quality and outcomes. If a prior authorization request is not affirmed, and the claim is still submitted by the provider or supplier, the claim will be denied and the providers/suppliers as well as beneficiaries will retain their administrative appeal rights.

CMS is also exploring implementation of "gold carding" which is a process to exempt compliant providers/suppliers from the prior authorization process and expanded pre-payment review processes. Such an exemption acknowledges providers'/suppliers' resource limitations and reduces burden for compliant providers while enforcing prior authorization for aberrant billers, meeting our fiduciary obligation to protect the Medicare Trust Fund. We would likely leverage and align with existing exemptions policies in place for the CMS' OPD prior authorization program. A provider/supplier could be exempt from prior authorization if they achieve a prior authorization provisional affirmation threshold of 90 percent during a periodic assessment, thereby demonstrating a sufficient understanding of the requirements for submitting an accurate claim. Under such an approach, 100 percent compliance may not be necessary as there could be unintentional or sporadic errors that could occur that are not deliberate or a result of issues out of the provider's/supplier's control. We could withdraw an exemption if evidence became available, based on a review of claims, that the provider/supplier had begun to submit claims that are not payable based on FFS Medicare's billing, coding, or payment requirements during a periodic assessment.

Given the model participants in WISeR will be third-party entities, CMS privacy and security policies will govern data sharing under the model.

Model participants will be required to comply with all applicable data privacy and security laws, including relevant provisions of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) Privacy, Security, and Breach Notification Rules (45 CFR parts 160 and 164, subparts A through E) (HIPAA Rules). By performing prior authorization functions on behalf of the Medicare FFS health plan that involve protected health information (PHI), the model participants will be serving as business associates (see 45 CFR 160.103). A business associate relationship will be established between CMS's Medicare FFS health plan and the model participants which will be documented through valid business associate agreements (BAA) that comply with the requirements of the HIPAA Privacy Rule (see 45 CFR 164.502(e) and 164.504(e)). Currently, MACs also function as business associates to CMS's Medicare FFS health plan. CMS will develop the WISER model's data sharing policies in compliance with the HIPAA Rules and all relevant HIPAA guidance applicable to the use and disclosure of PHI, as well as CMS's overarching privacy and security framework, and other applicable federal laws and regulations.

Additional information is available on the WISER website at <https://www.cms.gov/priorities/innovation/innovation-models/wiser>.

III. Collection of Information Requirements

Section 1115A(d)(3) of the Act, as added by section 3021 of the Affordable Care Act, states that chapter 35 of title 44, United States Code (the Paperwork Reduction Act of 1995), shall not apply to the testing and evaluation of models or expansion of such models under this section. Consequently, this document need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 35).

The Administrator of the Centers for Medicare & Medicaid Services (CMS), Dr. Mehmet Oz, having reviewed and approved this document, authorizes Chyana Woodyard who is the **Federal Register** Liaison, to electronically sign this document for purposes of publication in the **Federal Register**.

Chyana Woodyard,

Federal Register Liaison, Centers for Medicare & Medicaid Services.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS-10433]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by September 2, 2025.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to <http://www.regulations.gov>. Follow the instructions for "Comment or Submission" or "More Search Options" to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number: ____, Room C4-26-05, 7500 Security Boulevard, Baltimore, Maryland 21244-1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: <https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing>.

FOR FURTHER INFORMATION CONTACT: William N. Parham at (410) 786-4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS-10433—Initial Plan Data

Collection to Support QHP Certification and other Financial Management and Exchange Operations

Under the PRA (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collections

1. *Type of Information Collection:* Revision of a currently approved collection; *Title of Information Collection Request:* Initial Plan Data Collection to Support QHP Certification and other Financial Management and Exchange Operations; *Use:* As directed by the rule Establishment of Exchanges and Qualified Health Plans; Exchange Standards for Employers (77 FR 18310) (Exchange rule), each Exchange is responsible for the certification and offering of Qualified Health Plans (QHPs). To offer insurance through an certification standards, such as network adequacy, inclusion of Essential Community Providers (ECPs), and non-

discrimination. The Exchange is responsible for ensuring that QHPs meet these minimum certification standards as described in the Exchange rule under 45 CFR 155 and 156, based on the Patient Protection and Affordable Care Act (PPACA), as well as other standards determined by the Exchange. Issuers can offer individual and small group market plans outside of the Exchanges that are not QHPs.

Issuers can offer individual and small group market plans outside of the Exchanges that are not QHPs. Such plans are referred to in this document as “non-Exchange.” For the risk adjustment program, administrative information is used to identify all non-grandfathered small group and individual market non-Exchange plan offerings eligible for the program. Risk adjustment also requires select data such as rating area, rating factors, and actuarial value (AV) level, to perform calculation of payments and charges.

This information collection request serves as a formal request for the revision of the data collection clearance. We intend to use the instruments in this information collection for the 2025 certification process and beyond, and believe that providing these instruments now will give issuers and other stakeholders more opportunity to familiarize themselves with the instruments before releasing the 2025 application. While we intend to use these instruments in 2025, we may propose further revisions to this data collection in the future as necessary which will include seeking comments through the full 60-day and 30-day public comment periods. *Form Number:* CMS-10433 (OMB control number: 0938-1187); *Frequency:* Annually; *Affected Public:* Private Sector—Business or other for-profits; State, Local, or Tribal Governments; *Number of Respondents:* 1,073; *Number of Responses:* 1,073; *Total Annual Hours:* 61,154. (For questions regarding this collection, contact Alexandra Gribbin at (667) 290-9977).

William N. Parham, III,

Director, Division of Information Collections and Regulatory Impacts, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request; Process Data for Organ Procurement and Transplantation Network, OMB No. 0906-xxxx-New

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: In compliance with of the Paperwork Reduction Act of 1995, HRSA submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period. OMB may act on HRSA's ICR only after the 30-day comment period for this notice has closed.

DATES: Comments on this ICR should be received no later than July 31, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email Samantha Miller, the HRSA Information Collection Clearance Officer at paperwork@hrsa.gov or call (301) 443-9094.

SUPPLEMENTARY INFORMATION:

Information Collection Request Title: Process Data for Organ Procurement and Transplantation Network, OMB No. 0906-xxxx-New.

Abstract: Section 372 of the Public Health Service Act requires that the Secretary of HHS, by awards, provide for the establishment and operation of the Organ Procurement and Transplantation Network (OPTN), which, under oversight of the Health Resources and Services Administration (HRSA), operates the U.S. organ procurement and transplantation system. The Secretary/HRSA may direct the collection of data in accordance

with the regulatory authority in 42 CFR 121.11 of the OPTN Final Rule. HRSA, in alignment with the Paperwork Reduction Act of 1995, submits data elements for collection to OMB for official federal approval.

A 60-day Notice was published in the **Federal Register**, 89 FR 87592 (November 4, 2024). The 60-day **Federal Register** Notice publication generated 53 public comments, with the majority submitted by transplant centers. The public comments offered input to improve the quality and clarity of the data forms, including by standardizing the definitions of the terminology used on the forms and making additions and revisions to response options and categories. The respondents also provided feedback on the perceived burden of data collection. They suggested submitting these data on a quarterly, semi-annual, or annual basis, rather than in real-time, to reduce the time and staffing required to report the data to HRSA. Nearly all respondents who commented on the use of automated collection techniques supported efforts to automate data collection in these forms, including coordinating updates with Electronic Health Record vendors and other software developers. Others recommended a phased-in approach with a pilot testing period.

HRSA conducted a thorough review of all the feedback provided by the public during the 60-day publication period. HRSA will incorporate many public comments into the new forms, including through the removal and/or revision of current fields (for example, removing HIV status and Primary Insurance from the Ventilated Patient Form) and explore options to automate the data collection process and incorporate education and training for data respondents to reduce burden and ensure data quality and accuracy. Other suggestions may be further reviewed for consideration in future OMB packages or non-substantive change memos.

Need and Proposed Use of the Information: HRSA and the OPTN Board of Directors use data to develop transplant, procurement, and allocation policies; to determine whether institutional members are complying with policy; to determine member-specific performance; to ensure patient safety; and to fulfill the requirements of the OPTN Final Rule. The regulatory authority in 42 CFR 121.11 of the OPTN Final Rule allows the Secretary of HHS to prescribe data collection. This regulatory authority requires the OPTN data to be made available, consistent with applicable laws, for use by OPTN members, the Scientific Registry of

Transplant Recipients, and members of the public for evaluation, research, patient information, and other purposes.

This is a request to expand the current OPTN data collection, approved under OMB No. 0915–0157. HRSA is submitting this new data collection, separate from OMB No. 0915–0157, since it includes new forms developed in response to an HHS Secretarial Data Directive that are not in use by OPTN. HRSA believes that separating these data collections will minimize confusion, increase clarity among OPTN members and stakeholders, and enable more direct feedback on the new forms. Both data collections include time-sensitive, life-critical data on transplant candidates and potential organ donor patients, the organ matching process, histocompatibility results, organ labeling and packaging, as well as pre- and post-transplantation data on recipients and donors. The OPTN collects these specific data elements from transplant centers.

HRSA and the OPTN use this information to (1) facilitate organ placement and match donor organs with recipients; (2) monitor compliance of member organizations with federal laws and regulations and with OPTN requirements; (3) review and report periodically to the public on the status of organ donation, procurement, and transplantation in the United States; (4) provide data to researchers and government agencies to study the scientific and clinical status of organ transplantation; and (5) perform

transplantation-related public health surveillance, including the possible transmission of donor disease.

This new collection consists of three new data forms as directed by the Secretary of HHS, which were developed to improve the OPTN organ matching and allocation process and OPTN member compliance with OPTN requirements:

- One new form will collect data from the point of referral of a patient to an Organ Procurement Organization (OPO) for potential deceased organ donation. These data will provide a more objective source of information on procurement practices, the management of potential donor patients, and how these practices inform the supply of deceased donor organs available for transplant. These data may also help improve the monitoring of OPO performance, facilitating quality assurance and performance improvement efforts to reduce variation in the quality of care that OPOs provide to prospective donors and donor families.

- Two new forms will expand data collection from the point of patient registration, referral, and evaluation at transplant centers. These data will enable the collection of data from the point of referral. Pre-waitlisting data will provide insight into who is referred and by whom, who is evaluated, and who is placed on the organ transplantation waiting list. These data will also facilitate the OPTN's ability to address disparities in processes of care, improve access to organ transplantation, and assess overall system performance.

Once this collection is approved, HRSA will cease use of the Death Notification Registration and the Deceased Donor Death Referral forms that are included within the existing OMB-approved Data System for Organ Procurement and Transplantation Network OMB No. 0915–0157. HRSA decided to decommission these forms to avoid unnecessary burden and redundancy in the data collected by this package and the existing OMB data collection instrument.

Likely Respondents: Transplant Centers, OPOs, and Histocompatibility Laboratories.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

The total estimated burden hours for this Secretary of HHS directed data collection is 252,216.84 hours.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Form No.	Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
1	Pre-Waitlist Transplant Referral Form	248	1,164.68	288,840.64	0.35	101,094.22
2	Pre-Waitlist Transplant Evaluation Form	248	594.22	147,366.56	0.40	58,946.62
3	Ventilated Patient Form	56	3,292.00	184,352.00	0.47	86,645.44.00
	Total	552		620,559.20		246,686.28

The average burden estimates for both new pre-waitlist forms are based on the 2023 burden estimates of existing OMB-approved Transplant Candidate Registration forms, which were approved under OMB control number 0915–0157. The average burden estimate of the Ventilated Patient Form is based on the average burden estimate of the 2024 burden estimates of the existing OMB-approved Death Notification Registration form, with an additional 0.08 hour per collected form burden to reflect an increase in total

data fields. The burden estimate for the Ventilated Patient Form has decreased since the publication of the 60-day **Federal Register** Notice due to the removal of measures from the form in response to public comment.

Maria G. Button,

Director, Executive Secretariat.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections

552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Population Sciences and Epidemiology Integrated Review Group, Population based Research in Infectious Disease Study Section.

Date: July 30–31, 2025.

Time: 10:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: James T. Snyder, Ph.D., Scientific Review Officer, Scientific Review Program, Division of Extramural Activities/ Room 3G31B, National Institutes of Health, NIAID, 5601 Fishers Lane MSC 9834, Bethesda, MD 20892–9834, (240) 669–5060, james.snyder@nih.gov.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Program Projects: Limited Competition: National Primate Research Centers (P51).

Date: July 30–August 1, 2025.

Time: 12:00 p.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Elaine Sierra-Rivera, Ph.D., IRG Chief, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 6182, Bethesda, MD 20892, (301) 435–2514, riverase@csr.nih.gov.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Language, Cognition, Learning and Rehabilitation.

Date: July 31, 2025.

Time: 9:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: DeAnna L. Adkins, Ph.D., Scientific Review Officer, Scientific Review Branch, NSC Building, Bethesda, MD 20892, 301–496–9223, deanna.adkins@nih.gov.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Member Conflict: Macromolecular Biophysics & Biological Chemistry SEP.

Date: July 31, 2025.

Time: 9:30 a.m. to 6:30 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Shan Wang, Ph.D., Scientific Review Officer, Center for

Scientific Review, National Institute of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (301) 496–4390, shan.wang@nih.gov.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Program Projects: Centers of Biomedical Research Excellence (COBRE) Phase 1.

Date: July 31–August 1, 2025.

Time: 10:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Kaitlyn N. Hardell, MPH, Ph.D., Scientific Review Officer, SRB, NIA, Scientific Review Branch, 5601 Fishers Lane, Suite 8B, Rockville, MD 20892, (301) 594–7945, kaitlyn.hardell@nih.gov.

Name of Committee: Center for Scientific Review Special Emphasis Panel; HIV and AIDS Research.

Date: July 31–August 1, 2025

Time: 10:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Louis A. Rosenthal, Ph.D., AB Scientific Review Officer, Scientific Review Program, Division of Extramural Activities, Rm 3G42B, National Institutes of Health/NIAID, 5601 Fishers Lane, MSC 9834, Bethesda, MD 20892–9834, (240) 669–5070 rosenthalla@niaid.nih.gov.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Topics in basic neurovascular biology, neurodegeneration, and neurological disorders.

Date: August 1, 2025.

Time: 10:00 a.m. to 5:30 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Gagan Deep Bajaj, Scientific Review Officer, National Institute on Drug Abuse, NIH, Scientific Review Branch, 11601 Landsdown Street, 3WF Room 09A01, Bethesda, MD 20892, (301) 402–6965, gagan.bajaj@nih.gov.

BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Current List of HHS-Certified Laboratories and Instrumented Initial Testing Facilities Which Meet Minimum Standards To Engage in Urine and Oral Fluid Drug Testing for Federal Agencies

AGENCY: Substance Abuse and Mental Health Services Administration, HHS.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services (HHS) notifies Federal agencies of the laboratories and Instrumented Initial Testing Facilities (IITFs) currently certified to meet the standards of the Mandatory Guidelines for Federal Workplace Drug Testing Programs (Mandatory Guidelines) using Urine and the laboratories currently certified to meet the standards of the Mandatory Guidelines using Oral Fluid.

FOR FURTHER INFORMATION CONTACT:

Anastasia Flanagan, Division of Workplace Programs, SAMHSA/CSAP, 5600 Fishers Lane, Room 16N06B, Rockville, Maryland 20857; 240-276-2600 (voice); Anastasia.Flanagan@samhsa.hhs.gov (email).

SUPPLEMENTARY INFORMATION: The Department of Health and Human Services (HHS) publishes a notice listing all HHS-certified laboratories and Instrumented Initial Testing Facilities (IITFs) in the **Federal Register** during the first week of each month, in accordance with Section 9.19 of the Mandatory Guidelines for Federal Workplace Drug Testing Programs (Mandatory Guidelines) using Urine and Section 9.17 of the Mandatory Guidelines using Oral Fluid. If any laboratory or IITF certification is suspended or revoked, the laboratory or IITF will be omitted from subsequent lists until such time as it is restored to full certification under the Mandatory Guidelines.

If any laboratory or IITF has withdrawn from the HHS National Laboratory Certification Program (NLCP) during the past month, it will be listed at the end and will be omitted from the monthly listing thereafter.

This notice is also available on the internet at <https://www.samhsa.gov/workplace/drug-testing-resources/certified-lab-list>.

HHS separately notifies Federal agencies of the laboratories and IITFs currently certified to meet the standards of the Mandatory Guidelines using Urine and of the laboratories currently

certified to meet the standards of the Mandatory Guidelines using Oral Fluid.

The Mandatory Guidelines using Urine were first published in the **Federal Register** on April 11, 1988 (53 FR 11970), and subsequently revised in the **Federal Register** on June 9, 1994 (59 FR 29908); September 30, 1997 (62 FR 51118); April 13, 2004 (69 FR 19644); November 25, 2008 (73 FR 71858); December 10, 2008 (73 FR 75122); April 30, 2010 (75 FR 22809); January 23, 2017 (82 FR 7920); and on October 12, 2023 (88 FR 70768).

The Mandatory Guidelines using Oral Fluid were first published in the **Federal Register** on October 25, 2019 (84 FR 57554) with an effective date of January 1, 2020, and subsequently revised in the **Federal Register** on October 12, 2023 (88 FR 70814).

The Mandatory Guidelines were initially developed in accordance with Executive Order 12564 and section 503 of Public Law 100–71 and allowed urine drug testing only. The Mandatory Guidelines using Urine have since been revised, and new Mandatory Guidelines allowing for oral fluid drug testing have been published. The Mandatory Guidelines require strict standards that laboratories and IITFs must meet in order to conduct drug and specimen validity tests on specimens for Federal agencies. HHS does not allow IITFs to conduct oral fluid testing.

To become certified, an applicant laboratory or IITF must undergo three rounds of performance testing plus an on-site inspection. To maintain that certification, a laboratory or IITF must participate in a quarterly performance testing program plus undergo periodic, on-site inspections.

Laboratories and IITFs in the applicant stage of certification are not to be considered as meeting the minimum requirements described in the HHS Mandatory Guidelines using Urine and/or Oral Fluid. An HHS-certified laboratory or IITF must have its letter of certification from HHS/SAMHSA (formerly: HHS/NIDA), which attests that the test facility has met minimum standards. HHS does not allow IITFs to conduct oral fluid testing.

HHS-Certified Laboratories Approved To Conduct Oral Fluid Drug Testing

In accordance with the Mandatory Guidelines using Oral Fluid effective October 10, 2023 (88 FR 70814), the following HHS-certified laboratories meet the minimum standards to conduct drug and specimen validity tests on oral fluid specimens:

At this time, there are no laboratories certified to conduct drug and specimen validity tests on oral fluid specimens.

HHS-Certified Instrumented Initial Testing Facilities Approved To Conduct Urine Drug Testing

In accordance with the Mandatory Guidelines using Urine effective February 1, 2024 (88 FR 70768), the following HHS-certified IITFs meet the minimum standards to conduct drug and specimen validity tests on urine specimens:

Dynacare *, 6628 50th Street NW, Edmonton, AB Canada T6B 2N7, 780–784–1190, (Formerly: Gamma-Dynacare Medical Laboratories)

HHS-Certified Laboratories Approved To Conduct Urine Drug Testing

In accordance with the Mandatory Guidelines using Urine effective February 1, 2024 (88 FR 70768), the following HHS-certified laboratories meet the minimum standards to conduct drug and specimen validity tests on urine specimens:

Alere Toxicology Services, 1111 Newton St., Gretna, LA 70053, 504–361–8989/800–433–3823, (Formerly: Kroll Laboratory Specialists, Inc., Laboratory Specialists, Inc.)

Alere Toxicology Services, 450 Southlake Blvd., Richmond, VA 23236, 804–378–9130, (Formerly: Kroll Laboratory Specialists, Inc., Scientific Testing Laboratories, Inc.; Kroll Scientific Testing Laboratories, Inc.)

Clinical Reference Laboratory, Inc., 8433 Quivira Road, Lenexa, KS 66215–2802, 800–445–6917

Desert Tox, LLC, 5425 E Bell Rd, Suite 125, Scottsdale, AZ, 85254, 602–457–5411/623–748–5045

DrugScan, Inc., 200 Precision Road, Suite 200, Horsham, PA 19044, 800–235–4890

Dynacare *, 245 Pall Mall Street, London, ONT, Canada N6A 1P4, 519–679–1630, (Formerly: Gamma-Dynacare Medical Laboratories)

ElSohly Laboratories, Inc., 5 Industrial Park Drive, Oxford, MS 38655, 662–236–2609

LabOne, Inc. d/b/a Quest Diagnostics, 10101 Renner Blvd., Lenexa, KS 66219, 913–888–3927/800–873–8845, (Formerly: Quest Diagnostics Incorporated; LabOne, Inc.; Center for Laboratory Services, a Division of LabOne, Inc.)

Laboratory Corporation of America Holdings, 7207 N Gessner Road, Houston, TX 77040, 713–856–8288/800–800–2387

Laboratory Corporation of America Holdings, 69 First Ave., Raritan, NJ 08869, 908–526–2400/800–437–4986, (Formerly: Roche Biomedical Laboratories, Inc.)

Laboratory Corporation of America Holdings, 1904 TW Alexander Drive, Research Triangle Park, NC 27709, 919–572–6900/800–833–3984, (Formerly: LabCorp Occupational Testing Services, Inc., CompuChem Laboratories, Inc.; CompuChem Laboratories, Inc., A Subsidiary of Roche Biomedical Laboratory; Roche CompuChem Laboratories, Inc., A Member of the Roche Group)

Laboratory Corporation of America Holdings, 1120 Main Street, Southaven, MS 38671, 866–827–8042/800–233–6339, (Formerly: LabCorp Occupational Testing Services, Inc.; MedExpress/National Laboratory Center)

MedTox Laboratories, Inc., 402 W County Road D, St. Paul, MN 55112, 651–636–7466/800–832–3244

Minneapolis Veterans Affairs Medical Center, Forensic Toxicology Laboratory, 1 Veterans Drive, Minneapolis, MN 55417, 612–725–2088. Testing for Veterans Affairs (VA) Employees Only

Omega Laboratories, Inc. *, 2150 Dunwin Drive, Unit 1 & 2, Mississauga, ON, Canada L5L 5M8, 289–919–3188

Pacific Toxicology Laboratories, 9348 DeSoto Ave., Chatsworth, CA 91311, 800–328–6942, (Formerly: Centinela Hospital Airport Toxicology Laboratory)

Phamatech, Inc., 15175 Innovation Drive, San Diego, CA 92128, 888–635–5840

U.S. Army Forensic Toxicology Drug Testing Laboratory, 2490 Wilson St., Fort George G. Meade, MD 20755–5235, 301–677–7085

Testing for Department of Defense (DoD) Employees Only

The following laboratory is voluntarily withdrawing from the National Laboratory Certification Program effective January 10, 2025:

Laboratory Corporation of America, 1225 NE 2nd Ave., Portland, OR 97323, 503–413–5295/800–950–5295, (Formerly: Legacy Laboratory Services Toxicology MetroLab)

* The Standards Council of Canada (SCC) voted to end its Laboratory Accreditation Program for Substance Abuse (LAPSA) effective May 12, 1998. Laboratories certified through that program were accredited to conduct forensic urine drug testing as required by U.S. Department of Transportation (DOT) regulations. As of that date, the certification of those accredited Canadian laboratories continued under DOT authority. The responsibility for conducting quarterly performance

testing plus periodic on-site inspections of those LAPSA-accredited laboratories was transferred to the U.S. HHS, with the HHS' NLCP contractor continuing to have an active role in the performance testing and laboratory inspection processes. Other Canadian laboratories wishing to be considered for the NLCP may apply directly to the NLCP contractor just as U.S. laboratories do.

Upon finding a Canadian laboratory to be qualified, HHS will recommend that DOT certify the laboratory as meeting the minimum standards of the current Mandatory Guidelines published in the **Federal Register**. After receiving DOT certification, the laboratory will be included in the monthly list of HHS-certified laboratories and participate in the NLCP certification maintenance program. DOT established this process in July 1996 (61 FR 37015) to allow foreign laboratories to participate in the DOT drug testing program.

Anastasia D. Flanagan,
Public Health Advisor, Division of Workplace Programs.

BILLING CODE 4162-20-P

DEPARTMENT OF HOMELAND SECURITY

Customs and Border Protection

Quarterly IRS Interest Rates Used in Calculating Interest on Overdue Accounts and Refunds of Customs Duties

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: General notice.

SUMMARY: This notice advises the public that the quarterly Internal Revenue Service interest rates used to calculate interest on overdue accounts (underpayments) and refunds (overpayments) of customs duties will remain the same from the previous quarter. For the calendar quarter beginning July 1, 2025, the interest rates for underpayments will be 7 percent for both corporations and non-corporations. The interest rate for overpayments will be 7 percent for non-corporations and 6 percent for corporations. This notice is published for the convenience of the importing public and U.S. Customs and Border Protection personnel.

DATES: The rates announced in this notice are applicable as of July 1, 2025.

FOR FURTHER INFORMATION CONTACT: Bruce Ingalls, Revenue Division, Collection Refunds & Analysis Branch, 8899 E 56th Street, Mail Stop 203J, Indianapolis, IN 46249; telephone (317) 298-1107.

SUPPLEMENTARY INFORMATION:

Background

Pursuant to 19 U.S.C. 1505 and Treasury Decision 85-93, published in the **Federal Register** on May 29, 1985 (50 FR 21832), the interest rate paid on applicable overpayments or underpayments of customs duties must be in accordance with the Internal Revenue Code rate established under 26 U.S.C. 6621 and 6622. Section 6621 provides different interest rates applicable to overpayments: one for corporations and one for non-corporations.

The interest rates are based on the Federal short-term rate and determined by the Internal Revenue Service (IRS) on behalf of the Secretary of the Treasury on a quarterly basis. The rates effective for a quarter are determined during the first-month period of the previous quarter.

In Revenue Ruling 2025-11, the IRS determined the rates of interest for the calendar quarter beginning July 1, 2025, and ending on September 30, 2025. The interest rate paid to the Treasury for underpayments will be the Federal short-term rate (4%) plus three percentage points (3%) for a total of seven percent (7%) for both corporations and non-corporations. For overpayments made by non-corporations, the rate is the Federal short-term rate (4%) plus three percentage points (3%) for a total of seven percent (7%). For corporate overpayments, the rate is the Federal short-term rate (4%) plus two percentage points (2%) for a total of six percent (6%). These interest rates used to calculate interest on overdue accounts (underpayments) and refunds (overpayments) of customs duties remain the same as the previous quarter. These interest rates are subject to change for the calendar quarter beginning October 1, 2025, and ending on December 31, 2025.

For the convenience of the importing public and U.S. Customs and Border Protection personnel, the following list of IRS interest rates used, covering the period from July of 1974 to date, to calculate interest on overdue accounts and refunds of customs duties, is published in summary format.

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[CIS No. 2825–25; DHS Docket No. USCIS–
2014–0001]

RIN 1615–ZB70

Termination of the Designation of Haiti for Temporary Protected Status

AGENCY: U.S. Citizenship and
Immigration Services (USCIS),
Department of Homeland Security
(DHS).

ACTION: Notice.

SUMMARY: Through this notice, the
Department of Homeland Security
(DHS) announces that the Secretary of
Homeland Security (Secretary) is
terminating the designation of Haiti for
Temporary Protected Status (TPS). The
designation of Haiti is set to expire on
August 3, 2025. After reviewing country
conditions and consulting with
appropriate U.S. Government agencies,
the Secretary determined that Haiti no
longer continues to meet the conditions
for designation for TPS. The Secretary,
therefore, is terminating the TPS
designation of Haiti as required by
statute. This termination is effective
September 2, 2025. After September 2,
2025, nationals of Haiti (and aliens
having no nationality who last
habitually resided in Haiti) who have
been granted TPS under Haiti's
designation will no longer have TPS.

DATES: The designation of Haiti for TPS
is terminated, effective at 11:59 p.m.,
local time, on September 2, 2025.

FOR FURTHER INFORMATION CONTACT:
Humanitarian Affairs Division, Office of
Policy and Strategy, U.S. Citizenship
and Immigration Services, Department
of Homeland Security, (240) 721–3000.

What is Temporary Protected Status (TPS)?

The Immigration and Nationality Act (INA) authorizes the Secretary of Homeland Security, after consultation with appropriate agencies of the U.S. Government, to designate a foreign state (or part thereof) for TPS if the Secretary determines that certain country conditions exist. *See* INA sec. 244(b)(1), 8 U.S.C. 1254a(b)(1). The Secretary, in her discretion, may grant TPS to eligible nationals of that foreign state (or aliens having no nationality who last habitually resided in the designated foreign state). *See* INA sec. 244(a)(1)(A), 8 U.S.C. 1254a(a)(1)(A).

At least 60 days before the expiration of a foreign state's TPS designation or extension, the Secretary—after consultation with appropriate U.S. Government agencies—must review the conditions in the foreign state designated for TPS to determine whether they continue to meet the conditions for the TPS designation. *See* INA sec. 244(b)(3)(A), 8 U.S.C. 1254a(b)(3)(A). If the Secretary determines that the conditions in the foreign state continue to meet the specific statutory criteria for TPS designation, TPS will be extended for an additional period of 6 months or, in the Secretary's discretion, 12 or 18 months. *See* INA sec. 244(b)(3)(A), (C), 8 U.S.C. 1254a(b)(3)(A), (C). If the Secretary determines that the foreign state no longer meets the conditions for TPS designation, the Secretary must terminate the designation. *See* INA sec. 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B). There is no judicial review of “any determination of the [Secretary] with respect to the designation, or termination or extension of a designation of a foreign state” for TPS. INA sec. 244(b)(5)(A), 8 U.S.C. 1254a(b)(5)(A).

TPS is a temporary immigration benefit granted to eligible nationals of a country designated for TPS under the INA, or to eligible aliens without nationality who last habitually resided in the designated country. During the TPS designation period, TPS beneficiaries are eligible to remain in the United States, may not be removed, and are authorized to work and obtain an Employment Authorization Document (EAD) so long as they continue to meet the requirements of TPS. TPS beneficiaries may also apply for and be granted travel authorization as a matter of discretion. The granting of TPS does not result in or lead to lawful permanent resident status or any other immigration status. To qualify for TPS, beneficiaries must meet the

eligibility standards at INA section 244(c)(2), 8 U.S.C. 1254a(c)(2) in accordance with the implementing regulations at 8 CFR parts 244 and 1244. When the Secretary terminates a country's TPS designation, beneficiaries return to the same immigration status or category that they maintained before TPS, if any (unless that status or category has since expired or been terminated), or any other lawfully obtained immigration status or category they received while registered for TPS, as long as it is still valid on the date TPS terminates.

Designation of Haiti for TPS

Haiti was initially designated for TPS on January 21, 2010, for a period of 18 months, on the basis of extraordinary and temporary conditions in Haiti that prevented nationals of Haiti from returning in safety. *See Designation of Haiti for Temporary Protected Status*, 75 FR 3476 (Jan. 21, 2010). Following the initial designation, TPS for Haiti was extended and newly designated once from July 23, 2011, through January 22, 2013, based on extraordinary and temporary conditions.¹ Thereafter, TPS for Haiti was extended three times based on extraordinary and temporary conditions: (1) from January 23, 2013, through July 22, 2014;² (2) from July 23, 2014, through January 22, 2016;³ (3) from January 23, 2016, through July 22, 2017.⁴ The Secretary then granted a six month extension of TPS from July 23, 2017, through January 22, 2018, but made clear that TPS Haiti beneficiaries should prepare for their return to Haiti in the event Haiti's designation was not extended again.⁵ Subsequently, the Secretary announced the termination of the TPS designation of Haiti effective July 22, 2019.⁶

The termination of Haiti's 2011 TPS designation was challenged in several lawsuits, and court injunctions required DHS to temporarily continue TPS for Haiti pending a final court order.⁷

Former Secretary Mayorkas newly designated Haiti on the basis of extraordinary and temporary conditions effective August 3, 2021, through February 3, 2023.⁸ Thereafter, TPS for Haiti was extended and newly designated effective February 4, 2023, and ending on August 3, 2024.⁹ In July 2024, DHS issued a notice stating that Secretary Mayorkas had once again determined to extend and newly designate Haiti for TPS for an 18-month period, set to expire on February 3, 2026.¹⁰ DHS announced in February 2025 that Secretary Noem had decided to partially vacate the June 2024 decision of Secretary Mayorkas regarding the extension and new designation of Haiti for TPS. Secretary Noem reduced the designation period from the statutory maximum of 18 months to 12 months, providing that the Haiti TPS extension and new designation will now expire on August 3, 2025.¹¹ Secretary Noem's vacatur has been challenged in at least two lawsuits.¹²

Secretary's Authority To Terminate the Designation of Haiti for TPS

At least 60 days before the expiration of a foreign state's TPS designation or extension, the Secretary—after consultation with appropriate U.S. Government agencies—must review the conditions in the foreign state designated for TPS to determine whether the country continues to meet the conditions for the TPS designation. *See* INA sec. 244(b)(3)(A), 8 U.S.C. 1254a(b)(3)(A). If the Secretary determines that foreign state no longer meets the conditions for the TPS designation, the Secretary must terminate the designation. *See* INA sec. 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B). The termination may not take effect earlier than 60 days after the date the FRN of termination is published, or if later, the expiration of the most recent previous extension of the country

designation. *See id.* The Secretary may determine the appropriate effective date of the termination and expiration of any TPS-related documentation, such as EADs, issued or renewed after the effective date of termination. *See id.*; *see also* INA sec. 244(d)(3), 8 U.S.C. 1254a(d)(3) (providing the Secretary the discretionary “option” to allow for a certain “orderly transition” period if she determines it to be appropriate).

Reasons for the Secretary’s Termination of the TPS Designation for Haiti

Consistent with INA section 244(b)(3)(A), 8 U.S.C. 1254a(b)(3)(A), after consulting with appropriate U.S. Government agencies, the Secretary reviewed country conditions in Haiti and considered whether Haiti continues to meet the conditions for the designation under INA section 244(b)(1)(C), 8 U.S.C. 1254a(b)(1)(C). This review included examining (a) whether extraordinary and temporary conditions in Haiti that prevent aliens who are Haitian nationals from returning to Haiti in safety continue to exist, and (b) if permitting Haitian nationals to remain temporarily in the United States is contrary to the national interest of the United States.

“National interest” is an expansive standard that may encompass an array of broad considerations, including foreign policy, public safety (e.g., potential nexus to criminal gang membership), national security, migration factors (e.g., pull factors), immigration policy (e.g., enforcement prerogatives), and economic considerations (e.g., adverse effects on U.S. workers, impact on U.S. communities).¹³ Determining whether permitting a class of aliens to remain temporarily in the United States is contrary to the U.S. national interest therefore calls upon the Secretary’s expertise and discretionary judgment,

informed by her consultations with appropriate U.S. Government agencies.

Based on her review, the Secretary has determined that termination of TPS for Haiti is required because it is contrary to the national interest to permit Haitian nationals (or aliens having no nationality who last habitually resided in Haiti) to remain temporarily in the United States.

President Trump clearly articulated policy imperatives bearing upon the national interest in his immigration and border-related executive orders and proclamations. In Proclamation 10888 “Guaranteeing the States Protection Against Invasion,” President Trump emphasized that Congress has established a complex and comprehensive framework under the INA to regulate the entry and exit of aliens and goods across U.S. borders. Under normal conditions, this framework supports national sovereignty by enabling the admission of aliens whose presence serves the national interest and excluding those who may pose risks to public health, safety, or national security. However, in a high-volume border environment—particularly when the system is overwhelmed—this screening process can become ineffective. Limited access to critical information and significant processing delays hinder the ability of federal officials to reliably assess the criminal histories or national security threats posed by aliens attempting to enter the U.S. illegally. As a result, public safety and national security risks are significantly heightened in such conditions.¹⁴

In Executive Order (E.O.) 14161 “Protecting the United States From Foreign Terrorists and Other National Security and Public Safety Threats,” President Trump instructed the Secretary of State, Attorney General, Secretary of Homeland Security, and Director of National Intelligence to jointly submit to the President a report that identified countries throughout the world “for which vetting and screening information is so deficient as to warrant a partial or full suspension on the admission of nationals from those countries.”¹⁵ In Proclamation “Restricting the Entry of Foreign Nationals to Protect the United States from Foreign Terrorists and Other National Security and Public Safety Threats,” President Trump determined to fully restrict and limit the entry of nationals from Haiti following his review of the requested report. In support of this decision, President

Trump outlined that “according to the overstay report, Haiti had a B–1/B–2 visa overstay rate of 31.38 percent and an F, M, and J visa overstay rate of 25.05 percent . . . as is widely known, Haiti lacks a central authority with sufficient availability and dissemination of law enforcement information necessary to ensure its nationals do not undermine the national security of the United States.”¹⁶

In E.O. “Protecting the American People Against Invasion,” President Trump underscored that enforcing the immigration laws “is critically important to the national security and public safety of the United States.”¹⁷ In furtherance of that objective, the President directed the Secretary, along with the Attorney General and Secretary of State, to promptly take all appropriate action, consistent with law, to rescind policies that led to increased or continued presence of illegal aliens in the United States.¹⁸ Among the directed actions are to ensure that the TPS designations are consistent with the TPS statute and “are appropriately limited in scope and made for only so long as may be necessary to fulfill the textual requirements of that statute.”¹⁹

Prior to FY2025, U.S. Border Patrol recorded a consistent year-over-year increase in encounters with Haitian nationals: 56,596 in FY2022, 163,781 in FY2023, and 220,798 in FY2024.²⁰ For several years, there has been a significant increase in the number of Haitians arriving in the United States irregularly, particularly via land. According to one report, “from 2019 through 2021, Haitians were the top nationality for migrants crossing the dangerous Darien Gap between Colombia and Panama, and they have remained among the three largest groups in 2022 and 2023.”²¹ Another report states: “the continuation of a devastating political, environmental, social, and economic situation . . . in Haiti guarantees an unbroken chain migration, particularly to the United States and Canada; and when combined with already heavy backlogs in

¹³ *See, e.g., Poursina v. USCIS*, 936 F.3d 868, 874 (9th Cir. 2019) (observing, in an analogous INA context, “that the ‘national interest’ standard invokes broader economic and national-security considerations, and such determinations are firmly committed to the discretion of the Executive Branch—not to federal courts” (citing *Trump v. Hawaii*, 585 U.S. 667, 684–86 (2018)); *Flores v. Garland*, 72 F.4th 85, 89–90 (5th Cir. 2023) (same); *Brasil v. Sec’y, Dep’t of Homeland Sec.*, 28 F.4th 1189, 1193 (11th Cir. 2022) (same); *cf. Matter of D–J*, 23 I&N Dec. 572, 579–81 (A.G. 2003) (recognizing that taking measures to stem and eliminate possible incentives for potential large-scale migration from a given country is “sound immigration policy” and an “important national security interest”); *Matter of Dhanasar*, 26 I&N Dec. 884, 890–91 (AAO 2016) (taking into account impact on U.S. workers in “national interest” assessments).

processing resident status changes, a large and growing flow of Haitians will persist.”²² This pattern of large-scale irregular migration as a result of “pull factors” has continued for years. Yet another report states “misinformation about TPS eligibility and about the general availability of legal status in the United States may have been one factor for migrants trying to reach the U.S. border . . .”²³ These realities are unsustainable and inconsistent with President Trump’s outlined policy priorities as well as U.S. national interests.

Beyond migration factors and immigration policy, public safety and national security are important considerations when assessing if a TPS designation is in line with U.S. national interests. DHS records indicate that there are Haitian nationals who are TPS recipients who have been the subject of administrative investigations for fraud, public safety, and national security. These issues underscore a conflict with the national interest of the United States.

Gang violence in Haiti persists as armed groups operate with impunity, enabled by a weak or effectively absent central government. The Congressional Research Service described the situation in Haiti in a recent report: “The gangs—some of which are aligned with political elites—amassed control over territory and illicit markets amid political instability following the 2021 assassination of then-President Jovenel Moise. Since April 2024, Haiti has been governed by a Transitional Presidential Council (TPC). The TPC, tasked with governing until elections can be convened, has been plagued by allegations of corruption and infighting.”²⁴ According to Amnesty International, “Haiti is in the grip of severe humanitarian and human rights crisis. Armed gangs are striking the Port-au-Prince metropolitan area and its surroundings with terror and violence, including rape and other forms of sexual violence.”²⁵ On May 2, 2025, the

Secretary of State announced the State Department’s designation of Viv Ansanm and Gran Grif as Foreign Terrorist Organizations and Specially Designated Global Terrorists. In his announcement, the Secretary noted “Haitian gangs, including the Viv Ansanm coalition and Gran Grif, are the primary source of instability and violence in Haiti. They are a direct threat to U.S. national security interests in our region . . . their ultimate goal is creating a gang-controlled state where illicit trafficking and other criminal activities operate freely and terrorize Haitian citizens.”²⁶

Widespread gang violence in Haiti is sustained by the country’s lack of functional government authority. This breakdown in governance directly impacts U.S. national security interests, particularly in the context of uncontrolled migration. As previously outlined, when immigration flows exceed our capacity to properly vet aliens at the border, the risks are compounded by the inability to access reliable law enforcement or security information from the alien’s country of origin. The joint assessment by the Secretary of State, Secretary of Homeland Security, and Director of National Intelligence has found that Haiti lacks a functioning central authority capable of maintaining or sharing such critical information. Coupled with the serious threat posed by Haitian gangs—such as those designated by the State Department as Foreign Terrorist Organizations—continuing TPS for Haiti is not in the national interest.

This lack of government control has not only destabilized Haiti internally but has also had direct consequences for U.S. public safety. Haitian gang members have already been identified among those who have entered the United States and, in some cases, have been apprehended by law enforcement for committing serious and violent crimes. For example, in January 2025, U.S. Immigration and Customs Enforcement (ICE) apprehended Wisteguens Jean Quely Charles, a member of a violent Haitian street gang, who had been arrested, charged and convicted for 17 crimes between August 2022 and August 2024 including both “possession of and possession to distribute controlled substances, distribution of controlled substances, trespassing, carrying dangerous weapon to wit brass knuckles, possession of a

firearm without a permit, possession of ammunition without a permit, assault and battery with a dangerous weapon, assault and battery, and resisting arrest.”²⁷ This case underscores the broader risk posed by rising Haitian migration, particularly in light of multiple large-scale prison breaks in Haiti²⁸ and the increasing numbers of encounters reported by U.S. Customs and Border Protection. The inability of the previous administration to reliably screen aliens from a country with limited law enforcement infrastructure and widespread gang activity presents a clear and growing threat to U.S. public safety.

In E.O. “America First Policy Directive to the Secretary of State,” President Trump declared “from this day forward, the foreign policy of the United States shall champion core American interests and always put America and American citizens first.” Moreover, it instructed “as soon as practicable, the Secretary of State shall issue guidance bringing the Department of State’s policies, programs, personnel, and operations in line with an America First foreign policy, which puts America and its interests first.”²⁹ The current situation in Haiti is concerning. However, the United States must prioritize its national interests, which includes assessing foreign policy, public safety, national security, migration factors, immigration policy, and economic considerations. In considering

these factors individually and cumulatively, the Secretary has determined that permitting Haitian nationals to remain temporarily in the United States is contrary to the U.S. national interest.

DHS estimates there are approximately 348,187 nationals of Haiti (and aliens having no nationality who last habitually resided in Haiti) who hold TPS under Haiti's designation.³⁰

Effective Date of Termination of the Designation

The TPS statute provides that the termination of a country's TPS designation may not be effective earlier than 60 days after the FRN is published or, if later, the expiration of the most-recent previous extension. *See* INA sec. 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B).

The TPS statute authorizes the Secretary, at her discretion, to allow for an extended "orderly transition" period with respect to the termination and the expiration of any TPS-related documentation, such as EADs. The Secretary, however, has determined in her discretion that a 60-day transition period is sufficient and warranted here given the Secretary's finding that continuing to permit the Haitian nationals to remain temporarily in the United States is contrary to the U.S. national interest. Moreover, adhering to the default statutory 60-day period for orderly transition is consistent with the precedent of previous TPS country terminations over the past few months and makes clear that the United States is committed to clarity and consistency. *See* INA sec. 244(d)(3), 8 U.S.C. 1254a(d)(3). Accordingly, the termination of the Haiti TPS designation will be effective 60 days from this notice's publication date.³¹

DHS recognizes that Haiti TPS beneficiaries continue to be employment authorized during the 60-day transition period.³² Accordingly, through this FRN, DHS automatically

extends the validity of certain EADs previously issued under the TPS designation of Haiti through September 2, 2025. Therefore, as proof of continued employment authorization through September 2, 2025, TPS beneficiaries can show their EADs that have the notation A-12 or C-19 under Category and a "Card Expires" date of February, 3, 2026, August 3, 2025, August 3, 2024, June 30, 2024, February 3, 2023, December 31, 2022, October 4, 2021, January 4, 2021, January 2, 2020, July 22, 2019, January 22, 2018, or July 22, 2017.

The Secretary has considered putative reliance interests in the Haiti TPS designation, especially when considering whether to allow for an additional transition period akin to that allowed under certain previous TPS terminations. Temporary Protected Status, as the name itself makes clear, is an inherently temporary status. TPS designations are time-limited and must be periodically reviewed, and TPS notices clearly notify aliens of the designations' expiration dates, and whether to allow for an orderly transition period is left to the Secretary's unfettered discretion. *See* INA sec. 244(b)(3), (d)(3); 8 U.S.C. 1254a(b)(3), (d)(3). The statute inherently contemplates advance notice of a termination by requiring timely publication of the Secretary's determination and delaying the effective date of the termination by at least 60 days after publication of a **Federal Register** notice of the termination or, if later, the existing expiration date. *See* INA sec. 244(b)(3)(A)–(B), (d)(3); 8 U.S.C. 1254a(b)(3)(A)–(B), (d)(3).

Notice of the Termination of the TPS Designation of Haiti

By the authority vested in me as Secretary under INA section 244(b)(3), 8 U.S.C. 1254a(b)(3), I have reviewed, in consultation with the appropriate U.S. Government agencies, (a) conditions in Haiti; and (b) whether permitting the nationals of Haiti (and aliens having no nationality who last habitually resided in Haiti) to remain temporarily in the United States is contrary to the national interest of the United States. Based on my review, I have determined that Haiti no longer continues to meet the conditions for Temporary Protected Status (TPS) under INA section 244(b)(1)(C), 8 U.S.C. 1254a(b)(1)(C).

Accordingly, I order as follows:

(1) Pursuant to INA section 244(b)(3)(B), 8 U.S.C. 1254a(b)(1)(B), and considering INA section 244(d)(3), 8 U.S.C. 1254a(d)(3), the designation of Haiti for TPS is terminated effective at

11:59 p.m., local time, on September 2, 2025.

(2) Information concerning the termination of TPS for nationals of Haiti (and aliens having no nationality who last habitually resided in Haiti) will be available at local USCIS office upon publication of this notice and through the USCIS Contact Center at 1-800-375-5283. This information will be published on the USCIS website at www.uscis.gov.

Kristi Noem,

Secretary of Homeland Security.

BILLING CODE 9111-97-P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-627 and 629 and 731-TA-1458-1461 (Review)]

Utility Scale Wind Towers From Canada, Indonesia, South Korea, and Vietnam; Institution of Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted reviews pursuant to the Tariff Act of 1930 ("the Act"), as amended, to determine whether revocation of the countervailing duty orders on utility scale wind towers from Canada and Vietnam and the antidumping duty orders on utility scale wind towers from Canada, Indonesia, South Korea, and Vietnam would be likely to lead to continuation or recurrence of material injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted July 1, 2025. To be assured of consideration, the deadline for responses is July 31, 2025. Comments on the adequacy of responses may be filed with the Commission by September 10, 2025.

FOR FURTHER INFORMATION CONTACT: Laurel Schwartz (202-205-2398), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000.

³⁰ As of May 1, 2025, approximately 15,578 of these Haitian nationals (and aliens having no nationality who last habitually resided in Haiti) are also approved as Lawful Permanent Residents. Data queried by Department of Homeland Security, U.S. Citizenship and Immigration Services, Office of Performance and Quality [May 2025].

³¹ *See* 8 CFR 244.19 ("Upon the termination of designation of a foreign state, those nationals afforded temporary Protected Status shall, upon the sixtieth (60th) day after the date notice of termination is published in the **Federal Register**, or on the last day of the most recent extension of designation by the [Secretary of Homeland Security], automatically and without further notice or right of appeal, lose Temporary Protected Status in the United States. Such termination of a foreign state's designation is not subject to appeal.")

³² *See* INA 244(a)(1)(B), 8 U.S.C. 1254a(a)(1)(B); *see also* 8 CFR 244.13(b).

General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—On August 26, 2020, the Department of Commerce (“Commerce”) issued countervailing duty orders on imports of utility scale wind towers from Canada, Indonesia, and Vietnam (85 FR 52543) and antidumping duty orders on utility scale wind towers from Canada, Indonesia, South Korea, and Vietnam (85 FR 52546). On January 7, 2022, Commerce revoked the countervailing duty order on utility scale wind towers from Indonesia following a U.S. Court of International Trade decision not in harmony with Commerce's final determination of the countervailing duty investigation on utility scale wind towers from Indonesia (87 FR 2137, January 13, 2025). The Commission is conducting reviews pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to determine whether revocation of the orders would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission's Rules of Practice and Procedure at 19 CFR part 201, subparts A and B, and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct full or expedited reviews. The Commission's determinations in any expedited reviews will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to these reviews:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year reviews, as defined by Commerce.

(2) The *Subject Countries* in these reviews are Canada, Indonesia, South Korea, and Vietnam.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise*. In its original determinations, the Commission defined a single *Domestic Like Product* consisting of wind towers coextensive with the scope of the investigations.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product*, or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original determinations, the Commission defined the *Domestic Industry* as all U.S. producers of wind towers.

(5) The *Order Date* is the date that the countervailing and antidumping duty orders under review became effective. In these reviews, the *Order Date* is August 26, 2020.

(6) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into the United States from a foreign manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11(b)(4) of the Commission's rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding underlying original investigation or an earlier review of the same underlying investigation. The Commission's designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post-employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008). Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was pending when they were Commission employees. For further ethics advice on

this matter, contact Charles Smith, Office of the General Counsel, at 202–205–3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceeding may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to § 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is on or before 5:15 p.m. on July 31, 2025. Pursuant to § 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct expedited or full reviews. The deadline for filing such comments is on or before 5:15 p.m. on September 10, 2025. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with

the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf, elaborates upon the Commission's procedures with respect to filings. Also, in accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the proceeding (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

Please note the Secretary's Office will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

No response to this request for information is required if a currently valid Office of Management and Budget ("OMB") number is not displayed; the OMB number is 3117 0016/USITC No. 25–5–645, expiration date June 30, 2026. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to § 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to § 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determinations in the reviews.

Information To Be Provided in Response to This Notice of Institution: If you are a domestic producer, union/worker group, or trade/business association; import/export *Subject*

Merchandise from more than one *Subject Country*; or produce *Subject Merchandise* in more than one *Subject Country*, you may file a single response. If you do so, please ensure that your response to each question includes the information requested for each pertinent *Subject Country*. As used below, the term "firm" includes any related firms.

Those responding to this notice of institution are encouraged, but not required, to visit the USITC's website at https://usitc.gov/reports/response_noi_worksheet, where one can download and complete the "NOI worksheet" Excel form for the subject proceeding, to be included as attachment/exhibit 1 of your overall response.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how, including whether your firm/entity is a U.S. producer of the *Domestic Like Product*, a U.S. union or worker group, a U.S. importer of the *Subject Merchandise*, a foreign producer or exporter of the *Subject Merchandise*, a U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the countervailing and antidumping duty orders on the *Domestic Industry* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in § 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industry*.

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Product*. Identify any known related parties and the nature of the relationship as defined in § 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in each *Subject*

Country that currently export or have exported *Subject Merchandise* to the United States or other countries since the *Order Date*.

(7) A list of 3–5 leading purchasers in the U.S. market for the *Domestic Like Product* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Product* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Product*, provide the following information on your firm's operations on that product during calendar year 2024, except as noted (report quantity data in towers and value data in U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic Like Product* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Product* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Product* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Product* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating income of the *Domestic Like Product* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from any *Subject Country*, provide the

following information on your firm's(s') operations on that product during calendar year 2024 (report quantity data in towers and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping or countervailing duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. commercial shipments of *Subject Merchandise* imported from each *Subject Country*; and

(c) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. internal consumption/company transfers of *Subject Merchandise* imported from each *Subject Country*.

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject Merchandise* in any *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2024 (report quantity data in towers and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping or countervailing duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in each *Subject Country* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in each *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the *Domestic Like Product* that have occurred in the United States or in the market for the *Subject Merchandise* in each *Subject Country* since the *Order Date*, and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Product* produced in the United States, *Subject Merchandise* produced in each *Subject Country*, and such merchandise from other countries.

(13) (OPTIONAL) A statement of whether you agree with the above definitions of the *Domestic Like Product* and *Domestic Industry*; if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of Title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.61 of the Commission's rules.

By order of the Commission.

Issued: June 24, 2025.

Lisa Barton, *Secretary to the Commission.*

[FR Doc. 2025-11841 Filed 6-30-25; 8:45 am]

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-771 and 731-TA-1755 (Preliminary)]

Oleoresin Paprika From India; Institution of Antidumping and Countervailing Duty Investigations and Scheduling of Preliminary Phase Investigations

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the institution of investigations and commencement of preliminary phase antidumping and countervailing

duty investigation Nos. 701-TA-771 and 731-TA-1755 (Preliminary) pursuant to the Tariff Act of 1930 ("the Act") to determine whether there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of oleoresin paprika from India, provided for in subheadings 3203.00.80 and 3301.90.10 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value and alleged to be subsidized by the Government of India. Unless the Department of Commerce ("Commerce") extends the time for initiation, the Commission must reach a preliminary determination in antidumping and countervailing duty investigations in 45 days, or in this case by August 11, 2025. The Commission's views must be transmitted to Commerce within five business days thereafter, or by August 18, 2025.

DATES: June 25, 2025.

FOR FURTHER INFORMATION CONTACT:

Stamen Borisson (202-205-3125), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—These investigations are being instituted, pursuant to sections 703(a) and 733(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a) and 1673b(a)), in response to petitions filed on June 25, 2025, by Rezolex, Ltd. Co., Las Cruces, New Mexico.

For further information concerning the conduct of these investigations and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and B (19 CFR part 207).

Participation in the investigations and public service list.—Persons (other than petitioners) wishing to participate in the investigations as parties must file an entry of appearance with the Secretary

to the Commission, as provided in §§ 201.11 and 207.10 of the Commission's rules, not later than seven days after publication of this notice in the **Federal Register**. Industrial users and (if the merchandise under investigation is sold at the retail level) representative consumer organizations have the right to appear as parties in Commission antidumping duty and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to these investigations upon the expiration of the period for filing entries of appearance.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in these investigations available to authorized applicants representing interested parties (as defined in 19 U.S.C. 1677(9)) who are parties to the investigations under the APO issued in the investigations, provided that the application is made not later than seven days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference.—The Office of Investigations will hold a staff conference in connection with the preliminary phase of these investigations beginning at 9:30 a.m. on July 16, 2025. Requests to appear at the conference should be emailed to preliminaryconferences@usitc.gov (DO NOT FILE ON EDIS) on or before noon on July 14, 2025. Please provide an email address for each conference participant in the email. Information on conference procedures, format, and participation, including guidance for requests to appear as a witness via videoconference, will be available on the Commission's Public Calendar (Calendar (USITC) | United States International Trade Commission). A nonparty who has testimony that may aid the Commission's deliberations may request permission to participate by submitting a short statement.

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Written submissions.—As provided in §§ 201.8 and 207.15 of the

Commission's rules, any person may submit to the Commission on or before 5:15 p.m. on July 21, 2025, a written brief containing information and arguments pertinent to the subject matter of the investigations. Parties shall file written testimony and supplementary material in connection with their presentation at the conference no later than 4:00 p.m. on July 16, 2025. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf, elaborates upon the Commission's procedures with respect to filings.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with these investigations must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that any information that it submits to the Commission during these investigations may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of these or related investigations or reviews, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.12 of the Commission's rules.

By order of the Commission.

Issued: June 27, 2025.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2025–12283 Filed 6–30–25; 8:45 am]

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–499–500 and 731–TA–1215–1216, 1221–1223 (Second Review)]

Oil Country Tubular Goods From India, South Korea, Turkey, Ukraine, and Vietnam; Institution of Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted reviews pursuant to the Tariff Act of 1930 (“the Act”), as amended, to determine whether revocation of the countervailing duty orders on oil country tubular goods from India and Turkey, and the antidumping duty orders on oil country tubular goods from India, South Korea, Turkey, Ukraine, and Vietnam would be likely to lead to continuation or recurrence of material injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted July 1, 2025. To be assured of consideration, the deadline for responses is July 31, 2025. Comments on the adequacy of responses may be filed with the Commission by September 10, 2025.

FOR FURTHER INFORMATION CONTACT: Peter Stebbins (202–205–2039), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—On July 10, 2014, the Department of Commerce (“Commerce”) suspended an antidumping duty

investigation on imports of oil country tubular goods from Ukraine (79 FR 41959, July 18, 2014). On September 10, 2014, Commerce issued countervailing duty orders on imports of oil country tubular goods from India and Turkey (79 FR 53688) and antidumping duty orders on imports of oil country tubular goods from India, South Korea, Turkey, and Vietnam (79 FR 53691). On July 10, 2019, Commerce terminated the suspension agreement and issued an antidumping duty order on imports of oil country tubular goods from Ukraine (84 FR 33918, July 16, 2019). Following the five-year reviews by Commerce and the Commission, effective August 12, 2020, Commerce issued a continuation of the countervailing duty orders on imports of oil country tubular goods from India and Turkey and the antidumping duty orders on imports of oil country tubular goods from India, South Korea, Turkey, Ukraine, and Vietnam (85 FR 48665). The Commission is now conducting second reviews pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to determine whether revocation of the orders would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission's Rules of Practice and Procedure at 19 CFR part 201, subparts A and B, and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct full or expedited reviews. The Commission's determinations in any expedited reviews will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to these reviews:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year reviews, as defined by Commerce.

(2) The *Subject Countries* in these reviews are India, South Korea, Turkey, Ukraine, and Vietnam.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise*. In its original determinations and full five-year review determinations, the Commission defined the *Domestic Like Product* as all oil country tubular goods, coextensive with Commerce's scope.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product*, or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original determinations and full five-year review determinations, the Commission defined the *Domestic Industry* to include all U.S. producers of oil country tubular goods, including both mills that produce oil country tubular goods and processors that engage in heat treatment.

(5) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into the United States from a foreign manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11(b)(4) of the Commission's rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding underlying original investigation or an earlier review of the same underlying investigation. The Commission's designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post-employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008).

Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was pending when they were Commission employees. For further ethics advice on this matter, contact Charles Smith,

Office of the General Counsel, at 202–205–3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceeding may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to § 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is 5:15 p.m. on July 31, 2025. Pursuant to § 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct expedited or full reviews. The deadline for filing such comments is 5:15 p.m. on September 10, 2025. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and

207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf, elaborates upon the Commission's procedures with respect to filings. Also, in accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the proceeding (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

Please note the Secretary's Office will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

No response to this request for information is required if a currently valid Office of Management and Budget ("OMB") number is not displayed; the OMB number is 3117 0016/USITC No. 25–5–643, expiration date June 30, 2026. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to § 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to § 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determinations in the reviews.

Information To Be Provided in Response to This Notice of Institution: If you are a domestic producer, union/worker group, or trade/business association; import/export *Subject Merchandise* from more than one

Subject Country; or produce *Subject Merchandise* in more than one *Subject Country*, you may file a single response. If you do so, please ensure that your response to each question includes the information requested for each pertinent *Subject Country*. As used below, the term "firm" includes any related firms.

Those responding to this notice of institution are encouraged, but not required, to visit the USITC's website at https://usitc.gov/reports/response_noi_worksheet, where one can download and complete the "NOI worksheet" Excel form for the subject proceeding, to be included as attachment/exhibit 1 of your overall response.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how, including whether your firm/entity is a U.S. producer of the *Domestic Like Product*, a U.S. union or worker group, a U.S. importer of the *Subject Merchandise*, a foreign producer or exporter of the *Subject Merchandise*, a U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the countervailing and antidumping duty orders on the *Domestic Industry* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in section 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industry*.

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Product*. Identify any known related parties and the nature of the relationship as defined in section 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in each *Subject Country* that currently export or have

exported *Subject Merchandise* to the United States or other countries after 2019.

(7) A list of 3–5 leading purchasers in the U.S. market for the *Domestic Like Product* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Product* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Product*, provide the following information on your firm's operations on that product during calendar year 2024, except as noted (report quantity data in short tons and value data in U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic Like Product* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Product* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Product* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Product* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating income of the *Domestic Like Product* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from any *Subject Country*, provide the following information on your firm's(s')

operations on that product during calendar year 2024 (report quantity data in short tons and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping or countervailing duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. commercial shipments of *Subject Merchandise* imported from each *Subject Country*; and

(c) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. internal consumption/company transfers of *Subject Merchandise* imported from each *Subject Country*.

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject Merchandise* in any *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2024 (report quantity data in short tons and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping or countervailing duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in each *Subject Country* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in each *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the *Domestic Like Product* that have occurred in the United States or in the market for the *Subject Merchandise* in each *Subject Country* after 2019, and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Product* produced in the United States, *Subject Merchandise* produced in each *Subject Country*, and such merchandise from other countries.

(13) (OPTIONAL) A statement of whether you agree with the above definitions of the *Domestic Like Product* and *Domestic Industry*; if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.61 of the Commission's rules.

By order of the Commission.

Issued: June 24, 2025.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2025-11859 Filed 6-30-25; 8:45 am]

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-449 and 731-TA-1118-1121 (Third Review)]

Light-Walled Rectangular Pipe and Tube From China, Mexico, South Korea, and Turkey; Institution of Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted reviews pursuant to the Tariff Act of 1930 ("the Act"), as amended, to determine

whether revocation of the countervailing duty order on light-walled rectangular pipe and tube from China and the antidumping duty orders on light-walled rectangular pipe and tube from China, Mexico, South Korea, and Turkey would be likely to lead to continuation or recurrence of material injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted July 1, 2025. To be assured of consideration, the deadline for responses is July 31, 2025.

Comments on the adequacy of responses may be filed with the Commission by September 10, 2025.

FOR FURTHER INFORMATION CONTACT:

Kenneth Gatten (202-708-1447), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—On May 30, 2008, the Department of Commerce ("Commerce") issued an antidumping duty order on imports of light-walled rectangular pipe and tube from Turkey (73 FR 31065). On August 5, 2008, Commerce issued a countervailing duty order on imports of light-walled rectangular pipe and tube from China (73 FR 45405) and antidumping duty orders on imports of light-walled rectangular pipe and tube from China, Mexico, and South Korea (73 FR 45403). Commerce issued a continuation of the countervailing duty order on imports of light-walled rectangular pipe and tube from China and antidumping duty orders on imports of light-walled rectangular pipe and tube from China, Mexico, South Korea, and Turkey following Commerce's and the Commission's first five-year reviews, effective June 23, 2014 (79 FR 35522) and second five-year reviews, effective August 4, 2020 (85 FR 47169). The Commission is now conducting third five-year reviews pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to determine whether revocation of the

orders would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission's Rules of Practice and Procedure at 19 CFR part 201, subparts A and B, and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct full or expedited reviews. The Commission's determinations in any expedited reviews will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to these reviews:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year reviews, as defined by Commerce.

(2) The *Subject Countries* in these reviews are China, Mexico, South Korea, and Turkey.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise*. In its original determinations and its full first and second five-year reviews, the Commission defined a single *Domestic Like Product* consisting of light-walled rectangular pipe and tube, coextensive with Commerce's scope.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product*, or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original determinations and its full first and second five-year review determinations, the Commission defined the *Domestic Industry* to consist of all U.S. producers of light-walled rectangular pipe and tube.

(5) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into the United States from a foreign manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11(b)(4) of the

Commission's rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding underlying original investigation or an earlier review of the same underlying investigation. The Commission's designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post-employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008).

Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was pending when they were Commission employees. For further ethics advice on this matter, contact Charles Smith, Office of the General Counsel, at 202–205–3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for

information and throughout this proceeding or other proceeding may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to § 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is 5:15 p.m. on July 31, 2025. Pursuant to § 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct expedited or full reviews. The deadline for filing such comments is 5:15 p.m. on September 10, 2025. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf, elaborates upon the Commission's procedures with respect to filings. Also, in accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the proceeding (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

Please note the Secretary's Office will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

No response to this request for information is required if a currently valid Office of Management and Budget ("OMB") number is not displayed; the

OMB number is 3117-0016/USITC No. 25–5–648, expiration date June 30, 2026. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to § 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to § 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determinations in the reviews.

Information To Be Provided In Response To This Notice of Institution: If you are a domestic producer, union/worker group, or trade/business association; import/export *Subject Merchandise* from more than one *Subject Country*; or produce *Subject Merchandise* in more than one *Subject Country*, you may file a single response. If you do so, please ensure that your response to each question includes the information requested for each pertinent *Subject Country*. As used below, the term “firm” includes any related firms.

Those responding to this notice of institution are encouraged, but not required, to visit the USITC's website at https://usitc.gov/reports/response_noi_worksheet, where one can download and complete the “NOI worksheet” Excel form for the subject proceeding, to be included as attachment/exhibit 1 of your overall response.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how, including whether your firm/entity is a U.S. producer of the *Domestic Like Product*, a U.S. union or worker group, a U.S. importer of the *Subject Merchandise*, a foreign producer or exporter of the *Subject Merchandise*, a

U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the order on the *Domestic Industry* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in section 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industry*.

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Product*. Identify any known related parties and the nature of the relationship as defined in section 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in each *Subject Country* that currently export or have exported *Subject Merchandise* to the United States or other countries after 2019.

(7) A list of 3–5 leading purchasers in the U.S. market for the *Domestic Like Product* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Product* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Product*, provide the following information on your firm's operations on that product during calendar year 2024, except as noted (report quantity data in short tons and value data in U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic*

Like Product accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Product* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Product* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Product* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating income of the *Domestic Like Product* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from any *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2024 (report quantity data in short tons and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping or countervailing duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. commercial shipments of *Subject Merchandise* imported from each *Subject Country*; and

(c) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. internal consumption/company transfers of *Subject Merchandise* imported from each *Subject Country*.

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject Merchandise* in any *Subject Country*,

provide the following information on your firm's(s') operations on that product during calendar year 2024 (report quantity data in short tons and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping or countervailing duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in each *Subject Country* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in each *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the *Domestic Like Product* that have occurred in the United States or in the market for the *Subject Merchandise* in each *Subject Country* after 2019, and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Product* produced in the United States, *Subject Merchandise* produced in each *Subject Country*, and such merchandise from other countries.

(13) (OPTIONAL) A statement of whether you agree with the above

definitions of the *Domestic Like Product* and *Domestic Industry*; if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.61 of the Commission's rules.

By order of the Commission.

Issued: June 24, 2025.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–607 and 731–TA–1417 and 1419 (Review)]

Steel Propane Cylinders From China and Thailand

Determinations

On the basis of the record¹ developed in the subject five-year reviews, the United States International Trade Commission ("Commission") determines, pursuant to the Tariff Act of 1930 ("the Act"), that revocation of the countervailing duty order on steel propane cylinders from China and the antidumping duty orders on steel propane cylinders from China and Thailand would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.

Background

The Commission instituted these reviews on July 1, 2024 (89 FR 54531), and determined on October 4, 2024, that it would conduct full reviews (89 FR 84193, October 21, 2024). Notice of the scheduling of the Commission's reviews and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** on December 31, 2024 (89 FR 107162). The Commission conducted its hearing on May 1, 2025. All persons who requested the opportunity were permitted to participate.

The Commission made these determinations pursuant to section 751(c) of the Act (19 U.S.C. 1675(c)). It

¹ The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

completed and filed its determinations in these reviews on June 26, 2025. The views of the Commission are contained in USITC Publication 5638 (June 2025), entitled *Steel Propane Cylinders from China and Thailand: Investigation Nos. 701–TA–607 and 731–TA–1417 and 1419 (Review)*.

By order of the Commission.

Issued: June 26, 2025.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 731–TA–986–987 (Fourth Review)]

Ferrovanadium From China and South Africa; Institution of Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted reviews pursuant to the Tariff Act of 1930 ("the Act"), as amended, to determine whether revocation of the antidumping duty orders on ferrovanadium from China and South Africa would be likely to lead to continuation or recurrence of material injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted July 1, 2025. To be assured of consideration, the deadline for responses is July 31, 2025. Comments on the adequacy of responses may be filed with the Commission by September 10, 2025.

FOR FURTHER INFORMATION CONTACT: Alec Resch (202–708–1448), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—On January 28, 2003, the Department of Commerce (“Commerce”) issued antidumping duty orders on imports of ferrovanadium from China and South Africa (68 FR 4168 and 4169). Commerce issued a continuation of the antidumping duty orders on imports of ferrovanadium from China and South Africa following Commerce’s and the Commission’s first five-year reviews, effective December 19, 2008 (73 FR 77609), second five-year reviews, effective February 18, 2015 (80 FR 8607), and third five-year reviews, effective August 20, 2020 (85 FR 51408). The Commission is now conducting fourth reviews pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to determine whether revocation of the orders would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission’s Rules of Practice and Procedure at 19 CFR part 201, subparts A and B, and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct full or expedited reviews. The Commission’s determinations in any expedited reviews will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to these reviews:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year reviews, as defined by Commerce.

(2) The *Subject Countries* in these reviews are China and South Africa.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise*. In its original determinations, its full first and second five-year review determinations, and its expedited third five-year review determinations, the Commission found a single *Domestic Like Product* consisting of ferrovanadium of all grades coextensive with Commerce’s scope.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product*, or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original determinations, its full first and second five-year review determinations, and its expedited third

five-year review determinations, the Commission defined the *Domestic Industry* as all U.S. producers of the *Domestic Like Product*. The Commission did not include tollees in the *Domestic Industry* in its original determinations, full first and second five-year review determinations, and expedited third five-year review determinations, but considered the information pertaining to the domestic industry’s tolling operations. One Commissioner defined a different *Domestic Industry* in the original investigations.

(5) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into the United States from a foreign manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11(b)(4) of the Commission’s rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding underlying original investigation or an earlier review of the same underlying investigation. The Commission’s designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post-employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008).

Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was pending when they were Commission employees. For further ethics advice on this matter, contact Charles Smith,

Office of the General Counsel, at 202–205–3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to § 207.7(a) of the Commission’s rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Certification.—Pursuant to § 207.3 of the Commission’s rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter’s knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceeding may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to § 207.61 of the Commission’s rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is 5:15 p.m. on July 31, 2025. Pursuant to § 207.62(b) of the Commission’s rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct expedited or full reviews. The deadline for filing such comments is 5:15 p.m. on September 10, 2025. All written submissions must conform with the provisions of § 201.8 of the Commission’s rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and

207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf, elaborates upon the Commission's procedures with respect to filings. Also, in accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the proceeding (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

Please note the Secretary's Office will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

No response to this request for information is required if a currently valid Office of Management and Budget ("OMB") number is not displayed; the OMB number is 3117 0016/USITC No. 25–5–647, expiration date June 30, 2026. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to § 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to § 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determinations in the reviews.

Information To Be Provided in Response To This Notice of Institution: If you are a domestic producer, union/worker group, or trade/business association; import/export *Subject Merchandise* from more than one

Subject Country; or produce *Subject Merchandise* in more than one *Subject Country*, you may file a single response. If you do so, please ensure that your response to each question includes the information requested for each pertinent *Subject Country*. As used below, the term "firm" includes any related firms.

Those responding to this notice of institution are encouraged, but not required, to visit the USITC's website at https://usitc.gov/reports/response_noi_worksheet, where one can download and complete the "NOI worksheet" Excel form for the subject proceeding, to be included as attachment/exhibit 1 of your overall response.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how, including whether your firm/entity is a U.S. producer of the *Domestic Like Product*, a U.S. union or worker group, a U.S. importer of the *Subject Merchandise*, a foreign producer or exporter of the *Subject Merchandise*, a U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the antidumping duty orders on the *Domestic Industry* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in section 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industry*.

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Product*. Identify any known related parties and the nature of the relationship as defined in § 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in each *Subject Country* that currently export or have

exported *Subject Merchandise* to the United States or other countries after 2019.

(7) A list of 3–5 leading purchasers in the U.S. market for the *Domestic Like Product* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Product* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Product*, provide the following information on your firm's operations on that product during calendar year 2024, except as noted (report quantity data in pounds of contained vanadium and value data in U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic Like Product* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Product* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Product* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Product* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating income of the *Domestic Like Product* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from any *Subject Country*, provide the following information on your firm's(s')

operations on that product during calendar year 2024 (report quantity data in pounds of contained vanadium and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping duties) of U.S. commercial shipments of *Subject Merchandise* imported from each *Subject Country*; and

(c) the quantity and value (f.o.b. U.S. port, including antidumping duties) of U.S. internal consumption/company transfers of *Subject Merchandise* imported from each *Subject Country*.

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject Merchandise* in any *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2024 (report quantity data in pounds of contained vanadium and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in each *Subject Country* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in each *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand

conditions or business cycle for the *Domestic Like Product* that have occurred in the United States or in the market for the *Subject Merchandise* in each *Subject Country* after 2019, and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Product* produced in the United States, *Subject Merchandise* produced in each *Subject Country*, and such merchandise from other countries.

(13) (OPTIONAL) A statement of whether you agree with the above definitions of the *Domestic Like Product* and *Domestic Industry*; if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.61 of the Commission's rules.

By order of the Commission.

Issued: June 24, 2025.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–1020 (Fourth Review)]

Barium Carbonate From China; Institution of a Five-Year Review

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted a review pursuant to the Tariff Act of 1930 (“the Act”), as amended, to determine whether revocation of the antidumping duty order on barium carbonate from China would be likely to lead to continuation or recurrence of material

injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted July 1, 2025. To be assured of consideration, the deadline for responses is July 31, 2025.

Comments on the adequacy of responses may be filed with the Commission by September 10, 2025.

FOR FURTHER INFORMATION CONTACT:

Camille Bryan (202–205–2811), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—On October 1, 2003, the Department of Commerce (“Commerce”) issued an antidumping duty order on imports of barium carbonate from China (68 FR 56619). Commerce issued a continuation of the antidumping duty order on imports of barium carbonate from China following Commerce's and the Commission's first five-year reviews, effective March 17, 2009 (74 FR 11348), second five-year reviews, effective February 17, 2015 (80 FR 8286), and third five-year reviews, effective August 20, 2020 (85 FR 51409). The Commission is now conducting a fourth review pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to determine whether revocation of the order would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission's Rules of Practice and Procedure at 19 CFR part 201, subparts A and B, and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct a full or expedited review. The Commission's determination in any expedited review will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to this review:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year review, as defined by Commerce.

(2) The *Subject Country* in this review is China.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise*. In its original determination, its expedited first five-year review determination, its full second five-year review determination, and its expedited third five-year review determination, the Commission defined one *Domestic Like Product* consisting of all barium carbonate, regardless of form or grade, coextensive with Commerce's scope.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product*, or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original determination, its expedited first five-year review determination, its full second five-year review determination, and its expedited third five-year review determination, the Commission defined the *Domestic Industry* as all domestic producers of barium carbonate, regardless of form or grade, coextensive with Commerce's scope.

(5) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into the United States from a foreign manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11(b)(4) of the Commission's rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding

underlying original investigation or an earlier review of the same underlying investigation. The Commission's designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post-employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008).

Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was pending when they were Commission employees. For further ethics advice on this matter, contact Charles Smith, Office of the General Counsel, at 202–205–3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceeding may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract

personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to § 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is 5:15 p.m. on July 31, 2025. Pursuant to § 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct an expedited or full review. The deadline for filing such comments is 5:15 p.m. on September 10, 2025. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf, elaborates upon the Commission's procedures with respect to filings. Also, in accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the proceeding (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

Please note the Secretary's Office will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

No response to this request for information is required if a currently valid Office of Management and Budget ("OMB") number is not displayed; the OMB number is 3117 0016/USITC No. 25–5–642, expiration date June 30, 2026. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to § 207.61(c) of the Commission's rules, any interested

party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to § 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determination in the review.

Information To Be Provided In Response To This Notice of Institution

As used below, the term “firm” includes any related firms.

Those responding to this notice of institution are encouraged, but not required, to visit the USITC’s website at https://usitc.gov/reports/response_noi_worksheet, where one can download and complete the “NOI worksheet” Excel form for the subject proceeding, to be included as attachment/exhibit 1 of your overall response.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how, including whether your firm/entity is a U.S. producer of the *Domestic Like Product*, a U.S. union or worker group, a U.S. importer of the *Subject Merchandise*, a foreign producer or exporter of the *Subject Merchandise*, a U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the antidumping duty order on the *Domestic Industry* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in section 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of

subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industry*.

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Product*. Identify any known related parties and the nature of the relationship as defined in § 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in the *Subject Country* that currently export or have exported *Subject Merchandise* to the United States or other countries after 2019.

(7) A list of 3–5 leading purchasers in the U.S. market for the *Domestic Like Product* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Product* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Product*, provide the following information on your firm’s operations on that product during calendar year 2024, except as noted (report quantity data in short tons and value data in U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic Like Product* accounted for by your firm’s(s’) production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Product* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Product* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Product* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating income of the *Domestic Like Product* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from the *Subject Country*, provide the following information on your firm’s(s’) operations on that product during calendar year 2024 (report quantity data in short tons and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from the *Subject Country* accounted for by your firm’s(s’) imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping duties) of U.S. commercial shipments of *Subject Merchandise* imported from the *Subject Country*; and

(c) the quantity and value (f.o.b. U.S. port, including antidumping duties) of U.S. internal consumption/company transfers of *Subject Merchandise* imported from the *Subject Country*.

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject Merchandise* in the *Subject Country*, provide the following information on your firm’s(s’) operations on that product during calendar year 2024 (report quantity data in short tons and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in the *Subject Country* accounted for by your firm’s(s’) production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in the *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to

operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from the *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the *Domestic Like Product* that have occurred in the United States or in the market for the *Subject Merchandise* in the *Subject Country* after 2019, and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Product* produced in the United States, *Subject Merchandise* produced in the *Subject Country*, and such merchandise from other countries.

(13) (OPTIONAL) A statement of whether you agree with the above definitions of the *Domestic Like Product* and *Domestic Industry*; if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.61 of the Commission's rules.

By order of the Commission.

Issued: June 24, 2025.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2025-11831 Filed 6-30-25; 8:45 am]

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731-TA-1153 (Third Review)]

Certain Tow-Behind Lawn Groomers and Parts Thereof From China; Institution of a Five-Year Review

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted a review pursuant to the Tariff Act of 1930 ("the Act"), as amended, to determine whether revocation of the antidumping duty order on certain tow-behind lawn groomers and parts thereof from China would be likely to lead to continuation or recurrence of material injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted July 1, 2025. To be assured of consideration, the deadline for responses is July 31, 2025. Comments on the adequacy of responses may be filed with the Commission by September 10, 2025.

FOR FURTHER INFORMATION CONTACT: Alexis Yim (202-708-1446), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—On August 3, 2009, the Department of Commerce ("Commerce") issued an antidumping duty order on imports of certain tow-behind lawn groomers and parts thereof from China (74 FR 38395). Commerce issued a continuation of the antidumping duty order on imports of certain tow-behind lawn groomers and parts thereof from China following Commerce's and the Commission's first five-year reviews, effective February 4, 2015 (80 FR 6049) and second five-year reviews, effective August 3, 2020 (85 FR 46586). The Commission is now conducting a third

five-year review pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to determine whether revocation of the order would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission's Rules of Practice and Procedure at 19 CFR part 201, subparts A and B, and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct a full or expedited review. The Commission's determination in any expedited review will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to this review:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year review, as defined by Commerce.

(2) The *Subject Country* in this review is China.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise*. In its original determination, expedited first five-year review determination, and expedited second five-year review determination, the Commission defined a single *Domestic Like Product* encompassing the continuum of certain tow-behind lawn groomers and parts thereof coextensive with Commerce's scope.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product*, or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original determination, the Commission defined the *Domestic Industry* as all domestic producers of certain tow-behind lawn groomers and parts thereof, with the exception of one producer, which was excluded from the domestic industry as a related party. Certain Commissioners defined the *Domestic Industry* differently. In its expedited first five-year review determination and expedited second five-year review determination, the Commission defined the *Domestic Industry* as all domestic producers of certain tow-behind lawn groomers and parts thereof.

(5) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into

the United States from a foreign manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11(b)(4) of the Commission's rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding underlying original investigation or an earlier review of the same underlying investigation. The Commission's designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post-employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008). Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was pending when they were Commission employees. For further ethics advice on this matter, contact Charles Smith, Office of the General Counsel, at 202–205–3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained

by the Secretary for those parties authorized to receive BPI under the APO.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceeding may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to § 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is 5:15 p.m. on July 31, 2025. Pursuant to § 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct an expedited or full review. The deadline for filing such comments is 5:15 p.m. on September 10, 2025. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf, elaborates upon the Commission's procedures with respect to filings. Also, in accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the proceeding (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

Please note the Secretary's Office will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

No response to this request for information is required if a currently valid Office of Management and Budget ("OMB") number is not displayed; the OMB number is 3117 0016/USITC No. 25–5–644, expiration date June 30, 2026. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to § 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to § 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determination in the review.

Information To Be Provided in Response to This Notice of Institution: As used below, the term "firm" includes any related firms.

Those responding to this notice of institution are encouraged, but not required, to visit the USITC's website at https://usitc.gov/reports/response_noi_worksheet, where one can download and complete the "NOI worksheet" Excel form for the subject proceeding, to be included as attachment/exhibit 1 of your overall response.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how, including whether your firm/entity is a U.S. producer of the *Domestic Like Product*, a U.S. union or worker group,

a U.S. importer of the *Subject Merchandise*, a foreign producer or exporter of the *Subject Merchandise*, a U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the antidumping duty order on the *Domestic Like Product* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in section 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industry*.

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Product*. Identify any known related parties and the nature of the relationship as defined in section 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in the *Subject Country* that currently export or have exported *Subject Merchandise* to the United States or other countries after 2019.

(7) A list of 3–5 leading purchasers in the U.S. market for the *Domestic Like Product* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Product* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Product*, provide the following information on your firm's operations on that product during calendar year 2024, except as noted (report quantity data in units and value data in U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic Like Product* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Product* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Product* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Product* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating income of the *Domestic Like Product* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from the *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2024 (report quantity data in units and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from the *Subject Country* accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping duties) of U.S. commercial shipments of *Subject Merchandise* imported from the *Subject Country*; and

(c) the quantity and value (f.o.b. U.S. port, including antidumping duties) of U.S. internal consumption/company transfers of *Subject Merchandise* imported from the *Subject Country*.

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject*

Merchandise in the *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2024 (report quantity data in units and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in the *Subject Country* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in the *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from the *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the *Domestic Like Product* that have occurred in the United States or in the market for the *Subject Merchandise* in the *Subject Country* after 2019, and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Product* produced in the United States, *Subject Merchandise* produced in the *Subject Country*, and such merchandise from other countries.

(13) (OPTIONAL) A statement of whether you agree with the above

definitions of the *Domestic Like Product* and *Domestic Industry*; if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.61 of the Commission's rules.

By order of the Commission.

Issued: June 24, 2025.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2025–11842 Filed 6–30–25; 8:45 am]

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–417 and 731–TA–953, 957–959, and 961 (Fourth Review)]

Carbon and Certain Alloy Steel Wire Rod From Brazil, Indonesia, Mexico, Moldova, and Trinidad and Tobago; Institution of Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted reviews pursuant to the Tariff Act of 1930 (“the Act”), as amended, to determine whether revocation of the countervailing duty order on carbon and certain alloy steel wire rod (“wire rod”) from Brazil and the antidumping duty orders on wire rod from Brazil, Indonesia, Mexico, Moldova, and Trinidad & Tobago would be likely to lead to continuation or recurrence of material injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted July 1, 2025. To be assured of consideration, the deadline for responses is July 31, 2025. Comments on the adequacy of responses may be filed with the Commission by September 10, 2025.

FOR FURTHER INFORMATION CONTACT: Caitlyn Costello (202–205–2058), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000.

General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—On October 22, 2002, the Department of Commerce (“Commerce”) issued a countervailing duty order on imports of wire rod from Brazil (67 FR 64871). On October 29, 2002, Commerce issued antidumping duty orders on imports of wire rod from Brazil, Indonesia, Mexico, Moldova, and Trinidad & Tobago (67 FR 65944–65947). Commerce issued a continuation of the orders following Commerce's and the Commission's first five-year reviews, effective July 30, 2008 (73 FR 44218), second five-year reviews, effective July 3, 2014 (79 FR 38008), and third five-year reviews, effective August 27, 2020 (85 FR 52953). The Commission is now conducting fourth reviews pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to determine whether revocation of the orders would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission's Rules of Practice and Procedure at 19 CFR part 201, subparts A and B, and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct full or expedited reviews. The Commission's determinations in any expedited reviews will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to these reviews:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year reviews, as defined by Commerce.

(2) The *Subject Countries* in these reviews are Brazil, Indonesia, Mexico, Moldova, and Trinidad & Tobago.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise*. In its original determinations and its full first, second, and third five-year review determinations, the Commission found a single *Domestic Like Product* encompassing all wire rod, including

grade 1080 tire cord and grade 1080 tire bead wire rod that Commerce excluded from the scope.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product*, or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original determinations and its full first, second, and third five-year review determinations, the Commission found a single *Domestic Industry* consisting of all domestic producers of wire rod, including grade 1080 tire cord and grade 1080 tire bead wire rod.

(5) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into the United States from a foreign manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11(b)(4) of the Commission's rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding underlying original investigation or an earlier review of the same underlying investigation. The Commission's designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post-employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008). Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was

pending when they were Commission employees. For further ethics advice on this matter, contact Charles Smith, Office of the General Counsel, at 202–205–3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceeding may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to § 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is 5:15 p.m. on July 31, 2025. Pursuant to § 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct expedited or full reviews. The deadline for filing such comments is 5:15 p.m. on September 10, 2025. All written submissions must conform with the provisions of § 201.8 of the

Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf, elaborates upon the Commission's procedures with respect to filings. Also, in accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the proceeding (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

Please note the Secretary's Office will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

No response to this request for information is required if a currently valid Office of Management and Budget ("OMB") number is not displayed; the OMB number is 3117 0016/USITC No. 25–5–646, expiration date June 30, 2026. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to § 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to § 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determinations in the reviews.

Information To Be Provided in Response to This Notice of Institution

If you are a domestic producer, union/worker group, or trade/business association; import/export *Subject Merchandise* from more than one *Subject Country*; or produce *Subject Merchandise* in more than one *Subject Country*, you may file a single response. If you do so, please ensure that your response to each question includes the information requested for each pertinent *Subject Country*. As used below, the term "firm" includes any related firms.

Those responding to this notice of institution are encouraged, but not required, to visit the USITC's website at https://usitc.gov/reports/response_noi_worksheet, where one can download and complete the "NOI worksheet" Excel form for the subject proceeding, to be included as attachment/exhibit 1 of your overall response.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how, including whether your firm/entity is a U.S. producer of the *Domestic Like Product*, a U.S. union or worker group, a U.S. importer of the *Subject Merchandise*, a foreign producer or exporter of the *Subject Merchandise*, a U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the orders on the *Domestic Industry* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in section 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industry*.

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Product*. Identify any known related parties and the nature of the relationship as defined in

§ 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in each *Subject Country* that currently export or have exported *Subject Merchandise* to the United States or other countries after 2019.

(7) A list of 3–5 leading purchasers in the U.S. market for the *Domestic Like Product* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Product* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Product*, provide the following information on your firm's operations on that product during calendar year 2024, except as noted (report quantity data in short tons and value data in U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic Like Product* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Product* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Product* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Product* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating income of the *Domestic Like Product* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently

completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from any *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2024 (report quantity data in short tons and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping or countervailing duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. commercial shipments of *Subject Merchandise* imported from each *Subject Country*; and

(c) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. internal consumption/company transfers of *Subject Merchandise* imported from each *Subject Country*.

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject Merchandise* in any *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2024 (report quantity data in short tons and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping or countervailing duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in each *Subject Country* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in each *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the *Domestic Like Product* that have occurred in the United States or in the market for the *Subject Merchandise* in each *Subject Country* after 2019, and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Product* produced in the United States, *Subject Merchandise* produced in each *Subject Country*, and such merchandise from other countries.

(13) (OPTIONAL) A statement of whether you agree with the above definitions of the *Domestic Like Product* and *Domestic Industry*; if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.61 of the Commission's rules.

By order of the Commission.

Issued: June 24, 2025.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA–372]

Exempt Chemical Preparations Under the Controlled Substances Act

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: Order with opportunity for comment.

SUMMARY: The applications for exempt chemical preparations received by the Drug Enforcement Administration between March 1, 2023, and March 31, 2025, as listed below, were accepted for filing and have been approved or denied as indicated.

DATES: Comments must be submitted electronically or postmarked on or before September 2, 2025.

ADDRESSES: Interested persons may file written comments on this order in accordance with 21 CFR 1308.23(e). The electronic Federal Docket Management System will not accept comments after 11:59 p.m. Eastern Time on the last day of the comment period. To ensure proper handling of comments, please reference “Docket No. DEA–372” on all correspondence, including any attachments.

- *Electronic comments:* The Drug Enforcement Administration (DEA) encourages that all comments be submitted through the Federal eRulemaking Portal, which provides the ability to type short comments directly into the comment field on the web page or to attach a file for lengthier comments. Please go to <http://www.regulations.gov> and follow the online instructions at that site for submitting comments. Upon completion of your submission, you will receive a Comment Tracking Number for your comment. Please be aware that submitted comments are not instantaneously available for public view on *Regulations.gov*. If you have received a comment tracking number, your comment has been successfully submitted and there is no need to resubmit the same comment.

- *Paper comments:* Paper comments that duplicate the electronic submission are not necessary and are discouraged. Should you wish to mail a comment *in lieu of* an electronic comment, it should be sent via regular or express mail to: Drug Enforcement Administration, Attention: DEA Federal Register Representative/DRW, 8701 Morrisette Drive, Springfield, Virginia 22152.

- *Paperwork Reduction Act Comments:* All comments concerning collections of information under the Paperwork Reduction Act must be submitted to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for DOJ, Washington, DC 20503. Please state that your comment refers to Docket No. DEA–1189.

FOR FURTHER INFORMATION CONTACT: Terrence L. Boos, Ph.D., Diversion Control Division, Drug Enforcement

Administration; Mailing Address: 8701 Morrisette Drive, Springfield, Virginia 22152; Telephone: (571) 362–8201.

SUPPLEMENTARY INFORMATION:

Posting of Public Comments

Please note that all comments received in response to this docket are considered part of the public record. DEA will make comments available for public inspection online at <http://www.regulations.gov>. Such information includes personal or business identifiers (such as name, address, state or Federal identifiers, etc.) voluntarily submitted by the commenter. Generally, all information voluntarily submitted by the commenter, unless clearly marked as Confidential Information in the method described below, will be publicly posted. Comments may be submitted anonymously. The Freedom of Information Act applies to all comments received.

Commenters submitting comments which include personal identifying information (PII), confidential, or proprietary business information that the commenter does not want made publicly available should submit two copies of the comment. One copy must be marked “CONTAINS CONFIDENTIAL INFORMATION” and should clearly identify all PII or business information the commenter does not want to be made publicly available, including any supplemental materials. DEA will review this copy, including the claimed PII and confidential business information, in its consideration of comments. The second copy should be marked “TO BE PUBLICLY POSTED” and must have all claimed confidential PII and business information already redacted. DEA will post only the redacted comment on <http://www.regulations.gov> for public inspection.

For easy reference, an electronic copy of this document and supplemental information to this proposed scheduling action are available at <http://www.regulations.gov>.

Legal Authority

Section 201 of the Controlled Substances Act (CSA) (21 U.S.C. 811) authorizes the Attorney General, by regulation, to exempt from certain provisions of the CSA certain compounds, mixtures, or preparations containing a controlled substance, if he finds that such compounds, mixtures, or preparations meet the requirements detailed in 21 U.S.C. 811(g)(3)(B).¹ DEA

regulations at 21 CFR 1308.23 and 1308.24 further detail the criteria by which the DEA Assistant Administrator may exempt a chemical preparation or mixture from certain provisions of the CSA. The Assistant Administrator may, pursuant to 21 CFR 1308.23(f), modify or revoke the criteria by which exemptions are granted and modify the scope of exemptions at any time.

Exempt Chemical Preparation Applications Submitted Between March 1, 2023, and March 31, 2025

DEA received applications between March 1, 2023, and March 31, 2025, requesting exempt chemical preparation status detailed in 21 CFR 1308.23. This publication addresses preparations through September 30, 2023, that were not included in previous **Federal Register** notices, and it does not affect preparations that have been previously published. Pursuant to the criteria stated in 21 U.S.C. 811(g)(3)(B) and in 21 CFR 1308.23, the Assistant Administrator has found that each of the compounds, mixtures, and preparations described in Chart I below is intended for laboratory, industrial, educational, or special research purposes and not for general administration to a human being or animal and either: (1) contains no narcotic controlled substance and is packaged in such a form or concentration that the packaged quantity does not present any significant potential for abuse; or (2) contains either a narcotic or non-narcotic controlled substance and one or more adulterating or denaturing agents in such a manner, combination, quantity, proportion, or concentration that the preparation or mixture does not present any potential for abuse and, if the preparation or mixture contains a narcotic controlled substance, is formulated in such a manner that it incorporates methods of denaturing or other means so that the preparation or mixture is not liable to be abused or have ill effects, if abused, and so that the narcotic substance cannot in practice be removed.

Accordingly, pursuant to 21 U.S.C. 811(g)(3)(B), 21 CFR 1308.23, and 21 CFR 1308.24, the Assistant Administrator has determined that each of the chemical preparations or mixtures generally described in Chart I below and specifically described in the application materials received by DEA is exempt, to the extent described in 21 CFR 1308.24, from application of sections 302, 303, 305, 306, 307, 308, 309, 1002, 1003, and

¹ This authority has been delegated from the Attorney General to the DEA Administrator by 28 CFR 0.100, and subsequently redelegated to the

Deputy Assistant Administrator pursuant to 28 CFR 0.104 and Section 7 of the appendix to subpart R of part 0.

1004 (21 U.S.C. 822–823, 825–829, and 952–954) of the CSA, and 21 CFR 1301.74, as of the date that was provided in the approval letters to the individual requesters.

Scope of Approval

The exemptions are applicable only to the precise preparation or mixture described in the application submitted to DEA in the form(s) listed in this order and only for those above mentioned sections of the CSA and the CFR. In accordance with 21 CFR 1308.24(h), any change in the quantitative or qualitative composition of the preparation or mixture, or change in the trade name or other designation of the preparation or mixture after the date of application

requires a new application. The requirements set forth in 21 CFR 1308.24(b)–(e) apply to the exempted materials. In accordance with 21 CFR 1308.24(g), DEA may prescribe requirements other than those set forth in 21 CFR 1308.24(b)–(e) on a case-by-case basis for materials exempted in bulk quantities. Accordingly, in order to limit opportunities for diversion from the larger bulk quantities, DEA has determined that each of the exempted bulk products listed in this order may only be used in-house by the manufacturer, and may not be distributed for any purpose, or transported to other facilities.

Additional exempt chemical preparation requests received between

March 1, 2023, and March 31, 2025, and not otherwise referenced in this order, may remain under consideration until DEA receives additional information required, pursuant to 21 CFR 1308.23(d), as detailed in separate correspondence to individual requesters. DEA's order on such requests will be communicated to the public in a future **Federal Register** publication.

DEA also notes that these exemptions are limited to exemption from only those sections of the CSA and the CFR that are specifically identified in 21 CFR 1308.24(a). All other requirements of the CSA and the CFR apply, including registration as an importer as required by 21 U.S.C. 957.

CHART I

Supplier name	Product name	Form	Application date
(AAB–MLE) American Association of Bioanalysts-Medical Laboratory Evaluation.	(AAB–MLE) Chemistry	Amber vial: 5 mL	8/7/2024
(API) American Proficiency Institute	(API) Chemistry	Amber vial: 5 mL	8/7/2024
(API) American Proficiency Institute	(API) Remedial Chemistry	Amber vial: 5 mL	8/7/2024
(WSLH) Wisconsin Laboratory of Hygiene.	(WSLH) Chemistry/Endocrinology/TDM	Amber vial: 5 mL	8/7/2024
(WSLH) Wisconsin Laboratory of Hygiene.	(WSLH) Chemistry-Waived	Amber vial: 5 mL	8/7/2024
Aalto Scientific, Ltd. Eatonton	Linearity FD Immunoassay for Abbott Systems	Kit: 5 vials, 5 mL each	8/22/2024
Aalto Scientific, Ltd. Eatonton	Linearity FD Immunoassay for Abbott Systems Level A	Glass vial: 5 mL	8/22/2024
Aalto Scientific, Ltd. Eatonton	Linearity FD Immunoassay for Abbott Systems Level B	Glass vial: 5 mL	8/22/2024
Aalto Scientific, Ltd. Eatonton	Linearity FD Immunoassay for Abbott Systems Level C	Glass vial: 5 mL	8/22/2024
Aalto Scientific, Ltd. Eatonton	Linearity FD Immunoassay for Abbott Systems Level D	Glass vial: 5 mL	8/22/2024
Aalto Scientific, Ltd. Eatonton	Linearity FD Immunoassay for Abbott Systems Level E	Glass vial: 5 mL	8/22/2024
Absolute Standards, Inc	(+/-)-Amphetamine PT, 1–1000 µg/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	(+/-)-Amphetamine-D5 PT, 1–1000 µg/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	(+/-)-MDA PT, 1–1000 µg/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	(+/-)-MDA-D5 PT, 1–1000 µg/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	(+/-)-MDMA-D5 PT, 1–1000 µg/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	(+/-)-Methamphetamine PT, 1–1000 µg/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	(+/-)-Methamphetamine-D5 PT, 1–1000 µg/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	(6aR,9S)-Δ10-THC, 10 µg/g, in Hemp oil:Acetone:Acetonitrile [5:4:1]	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	6-Acetylmorphine PT, 1–1000 µg/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	6-Acetylmorphine-D3 PT, 1–1000 µg/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Alprazolam PT, 1–100 µg/mL, in Methanol	Glass ampoule: 1 mL	12/6/2024
Absolute Standards, Inc	Alprazolam-D5 PT, 1–100 µg/mL, in Methanol	Glass ampoule: 1 mL	12/6/2024
Absolute Standards, Inc	Amobarbital PT, 1–1000 µg/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Benzoyllecgonine PT, 1–1000 µg/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Benzoyllecgonine-D3 PT, 1–1000 µg/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Buprenorphine PT, 1–1000 µg/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Buprenorphine, 10 µg/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Buprenorphine, 100 µg/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Buprenorphine, 1000 µg/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Butabarbital PT, 1–1000 µg/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Butalbital PT, 1–1000 µg/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	CA CRM Standard Mix 1—Acids/Acetates, 10 µg/g, in Hemp oil:Acetone:Acetonitrile [5:4:1].	Glass vial: 1 g	11/21/2024
Absolute Standards, Inc	CA CRM Standard Mix 1—Acids/Acetates, 10 µg/mL, in Acetonitrile	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	CA CRM Standard Mix 1—Acids/Acetates, 18 µg/mL, in Acetonitrile	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	CA CRM Standard Mix 2—Neutrals, 10 µg/g, in Hemp oil:Acetone:Acetonitrile [5:4:1].	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	CA CRM Standard Mix 2—Neutrals, 10 µg/mL, in Methanol	Glass vial: 1 g	11/21/2024
Absolute Standards, Inc	CA CRM Standard Mix 2—Neutrals, 18 µg/mL, in Methanol	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Calibrator Mix, Varied µg/L, in Methanol	Glass vial: 1 g	11/21/2024
Absolute Standards, Inc	Cannabis PT in Hemp Oil, Varied µg/g, in Hemp Oil:Acetone:Acetonitrile [5:4:1].	Glass ampoule: 1 g	6/21/2024
Absolute Standards, Inc	Carfentanil PT, 1–100 µg/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Carfentanil, 100 µg/mL, in Methanol	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Chlordiazepoxide PT, 1–1000 µg/mL, in Acetonitrile	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	cis-Δ9-THC, 10 µg/g, in Hemp oil:Acetone:Acetonitrile [5:4:1]	Glass vial: 1 g	11/21/2024
Absolute Standards, Inc	cis-Δ9-THC, 100 µg/mL, in Acetonitrile	Glass vial: 1 g	11/21/2024
Absolute Standards, Inc	Clonazepam PT, 1–100 µg/mL, in Methanol	Glass ampoule: 1 mL	12/6/2024
Absolute Standards, Inc	Clonazepam-D4 PT, 1–100 µg/mL, in Methanol	Glass ampoule: 1 mL	12/6/2024
Absolute Standards, Inc	Cocacethylene PT, 1–1000 µg/mL, in Acetonitrile	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Cocaine PT, 1–100 µg/mL, in Acetonitrile	Glass ampoule: 1 mL	7/30/2024

CHART I—Continued

Supplier name	Product name	Form	Application date
Absolute Standards, Inc	Cocaine-D3 PT, 1–100 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Codeine PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Codeine-6-β-D-glucuronide PT, 1–1000 ug/mL, in Acetonitrile:Water [1:1]	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Codeine-D3 PT, 1–1000 ug/mL, in Ethanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	d,l-MDMA PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	d,l-Methadone PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	d,l-Methadone-D3 PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Diazepam PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Diazepam-D5 PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Dihydrocodeine, 10 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Dihydrocodeine, 1000 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Diphenoxylate hydrochloride, 100 ug/mL, in Methanol	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	d-Propoxyphene PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Estazolam PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Ethylmorphine PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Etonitazene PT, 1–100 ug/mL, in Acetonitrile	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Etonitazene, 100 ug/mL, in Acetonitrile	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	exo-THC PT, Varied ug/mL, in Methanol	Glass ampoule: 1 mL	12/8/2023
Absolute Standards, Inc	exo-THC, 100 ug/mL, in Methanol	Glass ampoule: 1 mL	12/8/2023
Absolute Standards, Inc	Fentanyl PT, 1–100 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Fentanyl, 10 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Fentanyl, Cocaine, & Xylazine PT, Varied ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Fentanyl-D5 PT, 1–100 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Flunitrazepam PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Flunitrazepam-D7 PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Gamma Hydroxybutyrate (GHB) PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Heroin PT, 1–1000 ug/mL, in Acetonitrile	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Hexobarbital PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Hydrocodone (+)-bitartrate salt PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Hydrocodone PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Hydrocodone-D3 PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Hydromorphone PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Hydromorphone-D3 PT, 1–1000 ug/mL, in Methanol Glass ampoule	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Isotonitazene PT, 1–100 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Isotonitazene, 100 ug/mL, in Methanol	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Ketamine PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Lorazepam PT, 1–100 ug/mL, in Acetonitrile	Glass ampoule: 1 mL	12/6/2024
Absolute Standards, Inc	Meperidine PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Methaqualone PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Methaqualone-D7 PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Methohexital PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Methylphenidate PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Metonitazene PT, 1–100 ug/mL, in Acetonitrile	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Metonitazene, 100 ug/mL, in Acetonitrile	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Midazolam PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Morphine PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Morphine, 100 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Morphine, 1000 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Morphine-6-β-D-glucuronide PT, 1–1000 ug/mL, in Acetonitrile:Water [1:1]	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Morphine-6-β-D-glucuronide, 100 ug/mL, in Acetonitrile:Water [1:1]	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Morphine-6-β-D-glucuronide, 1000 ug/mL, in Acetonitrile:Water [1:1]	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Morphine-D3 PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Morphine-D3, 10 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Morphine-D3, 1000 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Norbuprenorphine PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Norbuprenorphine, 10 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Norbuprenorphine, 100 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Norbuprenorphine, 1000 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Norbuprenorphine-D3 PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Norcocaine, 1000 ug/mL, in Acetonitrile	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Nordiazepam PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Norfentanyl PT, 1–100 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Norfentanyl, 10 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Norfentanyl, 100 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Norfentanyl, 1000 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Norhydrocodone, 10 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Norhydrocodone, 100 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Norhydrocodone, 1000 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Noroxycodone, 10 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Noroxycodone, 100 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Noroxycodone, 1000 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Oxazepam PT, 1–1000 ug/mL, in Acetonitrile	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Oxazepam-D5 PT, 1–1000 ug/mL, in Acetonitrile	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Oxycodone PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Oxycodone-D6 PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Oxymorphone PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Oxymorphone-D3 PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Pentobarbital PT, 1–100 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024

CHART I—Continued

Supplier name	Product name	Form	Application date
Absolute Standards, Inc	Pentobarbital-D5 PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Phencyclidine (PCP) PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Phencyclidine-D5 PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Phenobarbital PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Phentermine PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Prazepam PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Protonitazene PT, 1–100 ug/mL, in Methanol	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Protonitazene, 100 ug/mL, in Methanol	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	R(–)-Amphetamine PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	R(–)-Methamphetamine PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	S(+)-Amphetamine PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	S(+)-Methamphetamine PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	SC Labs Drug Mix, Varied ug/L, in Methanol	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Secobarbital PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Secobarbital-D5 PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Tapentadol, 10 ug/mL, in Methanol	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Tapentadol, 100 ug/mL, in Methanol	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Tapentadol, 1000 ug/mL, in Methanol	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Tapentadol-D3, 10 ug/mL, in Methanol	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Tapentadol-D3, 100 ug/mL, in Methanol	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Tapentadol-D5, 10 ug/mL, in Acetonitrile	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Tapentadol-D5, 100 ug/mL, in Acetonitrile	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Temazepam PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Temazepam-D5 PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Total THC Calibration in Hemp Oil-Acids, 100 ug/g, in Hemp oil:Acetone:Acetonitrile [5:4:1]	Glass vial: 1 g	11/21/2024
Absolute Standards, Inc	Total THC Calibration in Hemp Oil-Neutrals, 100 ug/g, in Hemp oil:Acetone:Methanol [5:4:1]	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Tramadol PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Triazolam PT, 1–100 ug/mL, in Methanol	Glass ampoule: 1 mL	12/6/2024
Absolute Standards, Inc	Zolpidem PT, 1–1000 ug/mL, in Methanol	Glass ampoule: 1 mL	7/30/2024
Absolute Standards, Inc	Zolpidem, 10 ug/mL, in Methanol	Glass ampoule: 1 mL	6/21/2024
Absolute Standards, Inc	Δ8-iso-THC, 10 ug/g, in Hemp oil:Acetone:Acetonitrile [5:4:1]	Glass ampoule: 1 mL	11/21/2024
Absolute Standards, Inc	Δ8-iso-THC, 100 ug/mL, in Acetonitrile	Glass vial: 1 g	11/21/2024
ARK Diagnostics, Inc	ARK HS Benzodiazepine II 100 Cutoff Calibrator (Kit Reference Number 5073–0002–02)	Kit: 2 Dropper vials, 10 mL each	12/18/2023
ARK Diagnostics, Inc	ARK HS Benzodiazepine II 200 Cutoff Calibrator (Kit Reference Number 5073–0002–03)	Kit: 2 Dropper vials, 10 mL each	12/18/2023
ARK Diagnostics, Inc	ARK HS Benzodiazepine II Calibrator (Kit Reference Number 5073–0002–00)	Kit: 5 Dropper vials, 10 mL each	12/18/2023
ARK Diagnostics, Inc	ARK HS Benzodiazepine II Control (150/250) (Kit Reference Number 5073–0003–01)	Kit: 4 Droppers vials, 10 mL each	12/18/2023
ARK Diagnostics, Inc	ARK HS Benzodiazepine II Control (75/125) (Kit Reference Number 5073–0003–00)	Kit: 4 Dropper vials, 10 mL each	12/18/2023
Ark Diagnostics, Inc	ARK™ Zopiclone Calibrator (Kit Reference Number 5043–0002–00)	5 Dropper Vials, 10 ml each	7/8/2024
ARK Diagnostics, Inc	ARK™ Zopiclone Calibrator (Kit Reference Number 5043–0002–00R)	5 Dropper Vials, 10 ml each	7/8/2024
ARK Diagnostics, Inc	ARK™ Zopiclone Calibrator A–E	Kit: 5 Dropper Vials, 10 ml each	2/10/2025
ARK Diagnostics, Inc	ARK™ Zopiclone Calibrator C (Cutoff)	Kit: 2 Dropper Vials, 10 ml each	2/10/2025
ARK Diagnostics, Inc	ARK™ Zopiclone Calibrator C (Cutoff) (Kit Reference Number 5043–0002–02)	2 Dropper Vials, 10 ml each	7/8/2024
ARK Diagnostics, Inc	ARK™ Zopiclone Calibrator C (Cutoff) (Kit Reference Number 5043–0002–02R)	2 Dropper Vials, 10 ml each	7/8/2024
ARK Diagnostics, Inc	ARK™ Zopiclone Control	Kit: 4 Dropper Vials, 10 ml each	2/10/2025
ARK Diagnostics, Inc	ARK™ Zopiclone Control (Kit Reference Number 5043–0003–00)	4 Dropper Vials, 10 ml each Kit: 2 Dropper Vials, 10 ml each	7/8/2024
ARK Diagnostics, Inc	ARK™ Zopiclone Control (Kit Reference Number 5043–0003–00R)	4 Dropper Vials, 10 ml each	7/8/2024
Audit MicroControls	Linearity FLQ Fertility Siemens Atellica	Kit: 10 vials, 2 mL each	10/9/2023
Audit MicroControls	Linearity FLQ Fertility Siemens Atellica Set 2 Level A	Vial: 2 mL	10/9/2023
Audit MicroControls	Linearity FLQ Fertility Siemens Atellica Set 2 Level B	Vial: 2 mL	10/9/2023
Audit MicroControls	Linearity FLQ Fertility Siemens Atellica Set 2 Level C	Vial: 2 mL	10/9/2023
Audit MicroControls	Linearity FLQ Fertility Siemens Atellica Set 2 Level D	Vial: 2 mL	10/9/2023
Audit MicroControls	Linearity FLQ Fertility Siemens Atellica Set 2 Level E	Vial: 2 mL	10/9/2023
Audit MicroControls, Inc	Control FD Immunoassay	Kit: 6 glass vials, 3 mL each	2/25/2025
Audit MicroControls, Inc	Control FD Immunoassay Level 1	2 glass vials, 3 mL each	2/25/2025
Audit MicroControls, Inc	Control FD Immunoassay Level 2	2 glass vials, 3 mL each	2/25/2025
Audit MicroControls, Inc	Control FD Immunoassay Level 3	2 glass vials, 3 mL each	2/25/2025
Audit MicroControls, Inc	Linearity FD Fertility Siemens Atellica	Kit: 10 vials; 3 mL each	10/11/2024
Audit MicroControls, Inc	Linearity FD Fertility Siemens Atellica, Set 2 Level A	Glass vial: 3 mL	10/11/2024
Audit MicroControls, Inc	Linearity FD Fertility Siemens Atellica, Set 2 Level B	Glass vial: 3 mL	10/11/2024
Audit MicroControls, Inc	Linearity FD Fertility Siemens Atellica, Set 2 Level C	Glass vial: 3 mL	10/11/2024
Audit MicroControls, Inc	Linearity FD Fertility Siemens Atellica, Set 2 Level D	Glass vial: 3 mL	10/11/2024
Audit MicroControls, Inc	Linearity FD Fertility Siemens Atellica, Set 2 Level E	Glass vial: 3 mL	10/11/2024
Audit MicroControls, Inc	Linearity FLQ TDM for Beckman AU	Kit: 5 vials, 4 mL each	12/18/2023
Audit MicroControls, Inc	Linearity FLQ TDM for Beckman AU Level A	Vial: 4 mL	12/18/2023
Audit MicroControls, Inc	Linearity FLQ TDM for Beckman AU Level B	Vial: 4 mL	12/18/2023
Audit MicroControls, Inc	Linearity FLQ TDM for Beckman AU Level C	Vial: 4 mL	12/18/2023
Audit MicroControls, Inc	Linearity FLQ TDM for Beckman AU Level D	Vial: 4 mL	12/18/2023
Audit MicroControls, Inc	Linearity FLQ TDM for Beckman AU Level E	Vial: 4 mL	12/18/2023
Biochemical Diagnostics, Inc	Detectabuse Custom Liquid Control Urine, MC288	Glass vial/Plastic bottle: 5 mL, 10 mL, 20 mL, 25 mL, 50 mL	11/29/2023

CHART I—Continued

Supplier name	Product name	Form	Application date
Biochemical Diagnostics, Inc	Salivabuse Custom Liquid Control Oral Fluid OF30	Glass vial/Plastic bottle: 5 mL, 10 mL, 20 mL, 25 mL, 50 mL.	11/29/2023
Cayman Chemical Company	(±)-Methadone-d9 (CRM) 1 mg/ml in Methanol	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	(±)-Methadone-d9 (CRM) 100 µg/ml in Methanol	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	1 mg/ml Chlordiazepoxide-D5 in Methanol	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	100 µg/ml Chlordiazepoxide-D5 in Methanol	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	1-Testosterone (exempt preparation) 1.0 mg/mL in acetonitrile	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	1-Testosterone (exempt preparation) 1.0 mg/mL in methanol	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	2-methyl AP-237 (hydrochloride) (CRM) 1.0 mg/mL in methanol	Glass Ampule: 1 mL	3/12/2025
Cayman Chemical Company	2-methyl AP-237-d7 (hydrochloride) (CRM) 100 µg/mL in methanol	Glass Ampule: 1 mL	3/12/2025
Cayman Chemical Company	3,4-Methylenedioxy-α-Cyclohexylaminopropiophenone (hydrochloride) (exempt preparation) 1 mg/ml in Methanol.	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	3,4-Methylenedioxy-α-propylaminobutiophenone (hydrochloride) (exempt preparation) 1 mg/ml in Methanol.	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	4-fluoro MDMB-BUTINACA (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	4-fluoro MDMB-BUTINACA-d4 (exempt preparation) 1 mg/mL in Methanol.	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	ADB-4en-PINACA (CRM) 1 mg/mL in methanol	Glass Ampule: 1 mL	3/12/2025
Cayman Chemical Company	ADB-4en-PINACA-d4 (CRM) 1 mg/mL in methanol	Glass Ampule: 1 mL	3/12/2025
Cayman Chemical Company	ADB-4en-PINACA-d4 (CRM) 100 µg/mL in methanol	Glass Ampule: 1 mL	3/12/2025
Cayman Chemical Company	ADB-BUTINACA-d9 (CRM) 1 mg/mL in methanol	Glass Ampule: 1 mL	3/12/2025
Cayman Chemical Company	ADB-FUBINACA (exempt preparation) 1.0 mg/mL in acetonitrile	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	ADB-FUBINACA (exempt preparation) 1.0 mg/mL in methanol	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	Allopregnanolone (exempt preparation) 1 mg/mL in Acetonitrile	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Allopregnanolone (exempt preparation) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Anhydroecgonine methyl ester (exempt preparation) 1.0 mg/mL in acetonitrile.	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Anhydroecgonine methyl ester (exempt preparation) 1.0 mg/mL in methanol.	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Boldenone (exempt preparation) 1.0 mg/mL in acetonitrile	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Boldenone (exempt preparation) 1.0 mg/mL in methanol	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Butonitazene (exempt preparation) 1 mg/mL in Acetonitrile	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Butonitazene (exempt preparation) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Chloral hydrate (exempt preparation) 1 mg/mL in Acetonitrile	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Chloral hydrate (exempt preparation) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Chlordiazepoxide (CRM) 1 mg/ml in Methanol	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	Chlordiazepoxide (CRM) 100 µg/ml in Methanol	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	Clobazam (CRM) 1 mg/mL in methanol	Glass Ampule: 1 mL	3/12/2025
Cayman Chemical Company	Clobazam (CRM) 100 µg/mL in methanol	Glass Ampule: 1 mL	3/12/2025
Cayman Chemical Company	Clonazepam (CRM) 1 mg/mL in Acetonitrile	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Clonazepam (CRM) 100 µg in Acetonitrile	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Clonazepam-d4 (CRM) 1 mg/mL in Acetonitrile	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Clonazepam-d4 (CRM) 100 µg/mL in Acetonitrile	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Clonitazene (exempt preparation) 1 mg/mL in Acetonitrile	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Clonitazene (exempt preparation) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	D-Amphetamine (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Delorazepam (CRM) 100 µg/mL in acetonitrile	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Delorazepam-13C-d4 (CRM) 100 µg/mL in acetonitrile	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	Delorazepam-d4 (CRM) 100 µg/mL in acetonitrile	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	Diclazepam (CRM) 1 mg/mL in Acetonitrile	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Diclazepam (CRM) 100 µg/mL in Acetonitrile	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Diclazepam-13C2-d4 (CRM) 1 mg/mL in Acetonitrile	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Diclazepam-13C2-d4 (CRM) 100 µg/mL in Acetonitrile	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Diclazepam-d4 (CRM) 1 mg/mL in Acetonitrile	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Diclazepam-d4 (CRM) 100 µg/mL in Acetonitrile	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Drostanolone (exempt preparation) 1.0 mg/mL in acetonitrile	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Drostanolone (exempt preparation) 1.0 mg/mL in methanol	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Etizolam (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Etizolam (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Etizolam-13C2-d4 (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Etizolam-13C2-d4 (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Etizolam-d4 (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Etizolam-d4 (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Etodesnitazene (CRM) 1 mg/mL in Acetonitrile	Glass ampule: 1 mL	2/11/2025
Cayman Chemical Company	Etodesnitazene (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	2/11/2025
Cayman Chemical Company	Etodesnitazene-d5 (citrate) (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Etodesnitazene-d5 (citrate) (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Etodesnitazene-d5 (CRM) 1 mg/mL in Acetonitrile	Glass ampule: 1 mL	2/11/2025
Cayman Chemical Company	Etodesnitazene-d5 (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	2/11/2025
Cayman Chemical Company	Etodesnitazene-d5 100 µg/mL in Acetonitrile	Glass ampule: 1 mL	2/11/2025
Cayman Chemical Company	Etodesnitazene-d5 100 µg/mL in Methanol	Glass ampule: 1 mL	2/11/2025
Cayman Chemical Company	Etodesnitazene-d5 100 µg/mL in Methanol	Glass ampule: 1 mL	2/11/2025
Cayman Chemical Company	Etonitazene (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Etonitazene-d5 (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Etonitazene-d5 (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Etonitazene-d5 (hydrochloride) (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Etonitazene-d5 (hydrochloride) (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Eutylone-d5 (hydrochloride) (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Eutylone-d5 (hydrochloride) (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	exo-Tetrahydrocannabinol (exo-THCP) (exempt preparation) 1 mg/mL in Methanol.	Glass Vial: 1.0 mL	7/22/2024

CHART I—Continued

Supplier name	Product name	Form	Application date
Cayman Chemical Company	exo-Tetrahydrocannabiphinol (exo-THCP) (exempt preparation) 100 µg/mL in Methanol.	Glass Vial: 1.0 mL	7/22/2024
Cayman Chemical Company	exo-Tetrahydrocannabivarin (exempt preparation) 1 mg/mL in Methanol	Glass Vial: 1.0 mL	7/22/2024
Cayman Chemical Company	exo-Tetrahydrocannabivarin (exempt preparation) 100 µg in Methanol	Glass Vial: 1.0 mL	7/22/2024
Cayman Chemical Company	Flualprazolam (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Flualprazolam (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Flualprazolam-d4 (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Flualprazolam-d4 (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Flubromazolam (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Flubromazolam (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Flubromazolam-13C2-d4 (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Flubromazolam-13C2-d4 (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Flubromazolam-d4 (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Flubromazolam-d4 (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Flunitrazepam (CRM) 1 mg/mL in acetonitrile	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	Flunitrazepam (CRM) 1 mg/mL in methanol	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	Flunitrazepam (CRM) 500 µg/mL in acetonitrile	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	Flunitrazepam (CRM) 500 µg/mL in methanol	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	lbogaine (hydrochloride) (CRM) 1 mg/ml in Methanol	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	lbogaine (hydrochloride) (CRM) 100 µg/ml in Methanol	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	Isopregnanolone (exempt preparation) 1 mg/mL in Acetonitrile	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Isopregnanolone (exempt preparation) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Ketamine-d4 (CRM) 1 mg/ml in Methanol	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	Ketamine-d4 (CRM) 100 µg/ml in Methanol	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	Lorazepam (CRM) 1.0 mg/mL in acetonitrile	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	Lorazepam (CRM) 500 µg/mL in acetonitrile	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	Lormetazepam (CRM) 100 µg/mL in methanol	Glass Ampule: 1 mL	3/12/2025
Cayman Chemical Company	LSB (exempt preparation) 25 µg/ml in Acetonitrile	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	LSB (exempt preparation) 50 µg/ml in Acetonitrile	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	MDMB-4en-PINACA (CRM) 1.0 mg/mL in methanol	Glass Ampule: 1 mL	3/12/2025
Cayman Chemical Company	MDMB-4en-PINACA-d4 (CRM) 1.0 mg/mL in methanol	Glass Ampule: 1 mL	3/12/2025
Cayman Chemical Company	Mesterolone (exempt preparation) 1.0 mg/mL in acetonitrile	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Mesterolone (exempt preparation) 1.0 mg/mL in methanol	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Methiopropamine (hydrochloride) (exempt preparation) 1 mg/mL in Methanol.	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Methohexital (exempt preparation) 1 mg/ml in Acetonitrile	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	Methohexital (exempt preparation) 1 mg/ml in Methanol	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	Methylnortestosterone (exempt preparation) 1.0 mg/mL in acetonitrile	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Methylnortestosterone (exempt preparation) 1.0 mg/mL in methanol	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Metodesnitazene (hydrochloride) (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Metodesnitazene (hydrochloride) (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Metodesnitazene-d3 (hydrochloride) (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Metodesnitazene-d3 (hydrochloride) (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Metonitazene-d3 (citrate) (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Metonitazene-d3 (citrate) (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Metonitazene-d3 (CRM) 100 µg/mL in methanol	Glass Ampule: 1 mL	3/12/2025
Cayman Chemical Company	MMB-CHMICA (exempt preparation) 1.0 mg/mL in acetonitrile	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	MMB-CHMICA (exempt preparation) 1.0 mg/mL in methanol	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	N,N-Dimethylpentylone (hydrochloride) (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	N,N-Dimethylpentylone-d6 (hydrochloride) (CRM) 1 mg/mL in Methanol	Glass ampule: 1.0 mL	11/21/2023
Cayman Chemical Company	N,N-Dimethylpentylone-d6 (hydrochloride) (CRM) 100 µg/mL in Methanol.	Glass ampule: 1.0 mL	11/21/2023
Cayman Chemical Company	N-Isopropyl butylone (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	2/11/2025
Cayman Chemical Company	N-Isopropyl butylone (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	2/11/2025
Cayman Chemical Company	N-Isopropyl butylone-d7 (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	2/11/2025
Cayman Chemical Company	N-Isopropyl butylone-d7 (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	2/11/2025
Cayman Chemical Company	Norhydrocodone-d3 (hydrochloride) (CRM) 1 mg/mL in methanol	Glass Ampule: 1 mL	3/12/2025
Cayman Chemical Company	Norhydrocodone-d3 100 µg/mL in methanol (hydrochloride) (CRM)	Glass Ampule: 1 mL	3/12/2025
Cayman Chemical Company	Noroxymorphone (hydrochloride) (CRM) 1.0 mg/mL in methanol:DMSO (80:20).	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Noroxymorphone (hydrochloride) (CRM) 1.0 mg/mL in methanol:DMSO (80:20).	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Noroxymorphone-d3 (hydrochloride) (CRM) 1.0 mg/mL in methanol	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Noroxymorphone-d3 (hydrochloride) (CRM) 1.0 mg/mL in methanol:DMSO (80:20).	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Noroxymorphone-d3 (hydrochloride) (CRM) 100 µg/mL in methanol	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Noroxymorphone-d3 (hydrochloride) (CRM) 100 µg/mL in methanol:DMSO (80:20).	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	N-Pyrrolidino etonitazene-d5 (CRM) 1.0 mg/mL in methanol	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	N-Pyrrolidino etonitazene-d5 (CRM) 100 µg/mL in methanol	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	ortho-methoxy Butyryl fentanyl (hydrochloride) (exempt preparation) 100 µg/ml in Methanol.	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	ortho-Methylfentanyl-d5 (exempt preparation) 100 µg/mL in methanol	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	ortho-Methylfentanyl-d5 (hydrochloride) (exempt preparation) 100 µg/mL in methanol.	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Oxymetholone (exempt preparation) 1 mg/mL in acetonitrile	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	Oxymetholone (exempt preparation) 1 mg/mL in methanol	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	Para-methylfentanyl (hydrochloride) (exempt preparation) 100 µg/mL in methanol.	Glass Ampule: 1 mL	5/20/2024

CHART I—Continued

Supplier name	Product name	Form	Application date
Cayman Chemical Company	Pentylone-d3 (hydrochloride) (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Pentylone-d3 (hydrochloride) (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Perampanel (CRM) 100 µg/mL in Acetonitrile	Glass ampule: 1 mL	2/11/2025
Cayman Chemical Company	Perampanel (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	2/11/2025
Cayman Chemical Company	Phytocannabinoid Mixture California Potency (CRM) 1 mg/ml ea in Acetonitrile.	Glass ampule: 0.5 mL	11/21/2023
Cayman Chemical Company	Phytocannabinoid Mixture California Potency (CRM) 500 µg/ml ea in Acetonitrile.	Glass ampule: 1.0 mL	11/21/2023
Cayman Chemical Company	Protonitazene (citrate) (CRM) 1.0 mg/mL in methanol	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Protonitazene (citrate) (CRM) 100 µg/mL in methanol	Glass vial: 1 mL	7/25/2024
Cayman Chemical Company	Protonitazene (CRM) 1 mg/mL in Acetonitrile	Glass ampule: 1 mL	2/11/2025
Cayman Chemical Company	Protonitazene-d7 (hydrochloride) (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Protonitazene-d7 (hydrochloride) (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Retigabine (exempt preparation) 1 mg/ml in Acetonitrile	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	Retigabine (exempt preparation) 1 mg/ml in Methanol	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	Retigabine (hydrochloride) (exempt preparation) 1 mg/ml in Acetonitrile	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	Retigabine (hydrochloride) (exempt preparation) 1 mg/ml in Methanol	Glass ampule: 1.0 mL	8/1/2023
Cayman Chemical Company	Triazolam-13C2-d4 (CRM) 100 µg/mL in methanol	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	Triazolam-d4 (CRM) 100 µg/mL in methanol	Glass Ampule: 1 mL	5/20/2024
Cayman Chemical Company	Zolpidem-d7 (CRM) 1 mg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	Zolpidem-d7 (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	α-PHP-d8 (hydrochloride) (CRM) 100 µg/mL in Methanol	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	α-PHP-d8 (hydrochloride) 1 mg/mL in Methanol (CRM)	Glass ampule: 1 mL	1/23/2024
Cayman Chemical Company	α-Pyrrolidinoisohexanophenone 1.0 mg/mL in methanol	Glass Ampule: 1 mL	3/12/2025
Cayman Chemical Company	Δ10-THC Mixture (CRM) 1 mg/mL in ACN	Glass ampule: 1.0 mL	7/22/2024
Cayman Chemical Company	Δ10-THC Mixture (CRM) 500 µg/mL ea in ACN	Glass ampule: 1.0 mL	7/22/2024
Cayman Chemical Company	Δ8-THC Propionate (exempt preparation) 1 mg/mL in Acetonitrile	Glass Vial: 1.0 mL	7/22/2024
Cayman Chemical Company	Δ8-THC Propionate (exempt preparation) 100 µg/mL in Acetonitrile	Glass Vial: 1.0 mL	7/22/2024
Cayman Chemical Company	Δ8-THCB Acetate (exempt preparation) 1 mg/mL in Acetonitrile	Glass Vial: 1.0 mL	7/22/2024
Cayman Chemical Company	Δ8-THCB Acetate (exempt preparation) 100 µg/mL in Acetonitrile	Glass Vial: 1.0 mL	7/22/2024
Cayman Chemical Company	Δ8-THCBA-A (CRM) 1 mg/mL in acetonitrile	Glass ampule: 1.0 mL	11/18/2023
Cayman Chemical Company	Δ8-THCBA-A (CRM) 100 µg/mL in acetonitrile	Glass ampule: 1.0 mL	11/18/2023
Cayman Chemical Company	Δ8-THCH Acetate (exempt preparation) 1 mg/mL in Acetonitrile	Glass Vial: 1.0 mL	7/22/2024
Cayman Chemical Company	Δ8-THCH Acetate (exempt preparation) 100 µg/mL in Acetonitrile	Glass Vial: 1.0 mL	7/22/2024
Cayman Chemical Company	Δ8-THCP Acetate (exempt preparation) 1 mg/mL in Acetonitrile	Glass Vial: 1.0 mL	7/22/2024
Cayman Chemical Company	Δ8-THCP Acetate (exempt preparation) 100 µg/mL in Acetonitrile	Glass Vial: 1.0 mL	7/22/2024
Cayman Chemical Company	Δ8-THCPA-A (CRM) 1 mg/mL in acetonitrile	Glass ampule: 1.0 mL	11/18/2023
Cayman Chemical Company	Δ8-THCPA-A (CRM) 100 µg/mL in acetonitrile	Glass ampule: 1.0 mL	11/18/2023
Cayman Chemical Company	Δ9-THC Propionate (exempt preparation) 1 mg/mL in Acetonitrile	Glass Vial: 1.0 mL	7/22/2024
Cayman Chemical Company	Δ9-THC Propionate (exempt preparation) 100 µg/mL in Acetonitrile	Glass Vial: 1.0 mL	7/22/2024
Cayman Chemical Company	Δ9-THCB Acetate (exempt preparation) 1 mg/mL in Acetonitrile	Glass Vial: 1.0 mL	7/22/2024

Cayman Chemical Company	Δ9-THCP Acetate (exempt preparation) 100 µg/mL in Acetonitrile	Glass Vial: 1.0 mL	7/22/2024
Cerilliant Corporation	9(S)-delta6a,10a-THC 1.0 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	3/14/2025
Cerilliant Corporation	Butonitazene-13C6 HCl 0.1 mg/mL as free base in 1 mL Solvent	Amber ampule: 1 mL	3/14/2025
Cerilliant Corporation	Clonazepam 1.0 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	7/26/2023
Cerilliant Corporation	Clonazepam-D4 0.1 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	7/26/2023
Cerilliant Corporation	Delta9-Tetrahydrocannabinol 1.0 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	3/14/2025
Cerilliant Corporation	Delta9-Tetrahydrocannabinolic acid B (THCA-B) (1.0 mg/mL)	Amber ampule: 1 mL	3/1/2023
Cerilliant Corporation	Diclazepam 1.0 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	7/26/2023
Cerilliant Corporation	Diclazepam-D4 0.1 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	7/26/2023
Cerilliant Corporation	Etizolam 1.0 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	7/26/2023
Cerilliant Corporation	Etizolam-D3 0.1 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	7/26/2023
Cerilliant Corporation	Flualprazolam 1.0 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	7/26/2023
Cerilliant Corporation	Flualprazolam-D4 0.1 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	7/26/2023
Cerilliant Corporation	Flubromazolam 1.0 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	7/26/2023
Cerilliant Corporation	Flubromazolam-13C2,15N 0.1 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	7/26/2023
Cerilliant Corporation	Flunitazene HCl 1.0 mg/mL as free base in 1 mL Solvent	Amber ampule: 1 mL	3/14/2025
Cerilliant Corporation	Flunitazene-13C6 HCl 0.1 mg/mL as free base in 1 mL Solvent	Amber ampule: 1 mL	3/14/2025
Cerilliant Corporation	Levomethorphan 0.1 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	3/14/2025
Cerilliant Corporation	Metonitazene-13C6 HCl 0.1 mg/mL (as free base) in 1 mL solvent	Amber ampule: 1 mL	2/20/2024
Cerilliant Corporation	N-piperidinyl etonitazene HCl 1.0 mg/mL (as free base) in 1 mL solvent	Amber ampule: 1 mL	1/15/2025
Cerilliant Corporation	N-Piperidinyl etonitazene-13C6 HCl 0.1 mg/mL as free base in 1 mL Solvent.	Amber ampule: 1 mL	3/14/2025
Cerilliant Corporation	Oripavine 1.0 mg/mL in 1 mL solvent	Amber ampule: 1 mL	1/15/2025
Cerilliant Corporation	Oripavine-D3 0.1 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	3/14/2025
Cerilliant Corporation	Protonitazene HCl 1.0 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	3/14/2025
Cerilliant Corporation	Protonitazene-13C6 HCl 0.1 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	3/14/2025
Cerilliant Corporation	Thebaine-D3 0.1 mg/mL in 1 mL Solvent	Amber ampule: 1 mL	3/14/2025
Chemtos, LLC	2,4-DMMC HCl—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	2-MEC HCl (1 mg/mL in methanol)	Amber ampule: 1 mL	1/9/2025
Chemtos, LLC	2-MEC-d3 HCl (0.1 mg/mL in methanol)	Amber ampule: 1 mL	1/9/2025
Chemtos, LLC	2-MEC-d3 HCl (1 mg/mL in methanol)	Amber ampule: 1 mL	1/9/2025
Chemtos, LLC	2-MMC HCl (1 mg/mL in methanol)	Amber ampule: 1 mL	1/9/2025
Chemtos, LLC	2-MMC-d3 HCl (0.1 mg/mL in methanol)	Amber ampule: 1 mL	1/9/2025
Chemtos, LLC	2-MMC-d3 HCl (1 mg/mL in methanol)	Amber ampule: 1 mL	1/9/2025
Chemtos, LLC	3,4-Dimethyl-alpha-PVP HCl (1 mg/mL in methanol)	Amber ampule: 1 mL	1/9/2025

CHART I—Continued

Supplier name	Product name	Form	Application date
Chemtos, LLC	3,4-Dimethyl-alpha-PVP-d8 HCl (0.1 mg/mL in methanol)	Amber ampule: 1 mL	1/9/2025
Chemtos, LLC	3,4-DMEB HCl—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	3Et-Methcathinone HCl (1 mg/mL in methanol)	Amber ampule: 1 mL	1/9/2025
Chemtos, LLC	3-MePPP HCl 1 mL in 1mg/ml in methanol	Amber ampule: 1 mL	8/12/2024
Chemtos, LLC	4Et-PVP HCl 1 mL in 1mg/ml in methanol	Amber ampule: 1 mL	8/12/2024
Chemtos, LLC	4-Me-alpha-PiHP HCl—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	4-Me-iHEX HCl—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	4-Me-PBP HCl—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	alpha-PiHP HCl 1 mL in 1mg/ml in methanol	Amber ampule: 1 mL	8/12/2024
Chemtos, LLC	alpha-PiHP-d8 HCl (0.1 mg/mL in methanol)	Amber ampule: 1 mL	1/9/2025
Chemtos, LLC	alpha-PiHP-d8 HCl (1 mg/mL in methanol)	Amber ampule: 1 mL	1/9/2025
Chemtos, LLC	ANPP—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	Bufotenine—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	Bufotenine-d6—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	Desomorphine—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	Desomorphine-d3—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	DMPVP HCl—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	Hexylone HCl 1 mL in 1mg/ml in methanol	Amber ampule: 1 mL	8/12/2024
Chemtos, LLC	MDPT(tBuONE) HCl—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	Methedrone HCl—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	Nabilone 1 mL in 1mg/ml in methanol	Amber ampule: 1 mL	8/12/2024
Chemtos, LLC	Nabilone-d6 1 mL in 0.1mg/ml in methanol	Amber ampule: 1 mL	8/12/2024
Chemtos, LLC	Nabilone-d6 1 mL in 1mg/ml in methanol	Amber ampule: 1 mL	8/12/2024
Chemtos, LLC	NEIH HCl—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	NIPP HCl—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	NIPP-d5 HCl—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	NIPP-d5 HCl (1 mg/mL in methanol)	Amber ampule: 1 mL	1/9/2025
Chemtos, LLC	NPP HCl—Certified Analytical Reference Standard solution	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	N-Propylcathinone HCl—Certified Analytical Reference Standard solution.	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	Serdexmethylphenidate—Certified Analytical Reference Standard solution.	Amber ampule: 1 mL	3/22/2024
Chemtos, LLC	Serdexmethylphenidate-d6—Certified Analytical Reference Standard solution.	Amber ampule: 1 mL	3/22/2024
Chromsystems	Internal Standard Set Mass Tox® Drugs of Abuse Testing in urine (96046—RUO).	4 vials, 1 mL each Glass vial: 5 mL	8/2/2024
Chromsystems	System Check Solution MassTox® Drugs of Abuse Testing in urine (96012—RUO).	Glass vial: 1 mL	8/2/2024
Chromsystems	Tuning Mix 1 MassTox® Drugs of Abuse Testing Analytes and Internal Standards (96015—RUO).	Glass vial: 1 mL	8/2/2024
Chromsystems	Tuning Mix 2 MassTox® Drugs of Abuse Testing Analytes and Internal Standards (96016—RUO).	Glass vial: 1 mL	8/2/2024
Chromsystems	Tuning Mix 3 MassTox® Drugs of Abuse Testing Analytes and Internal Standards (96017—RUO).	Glass vial: 1 mL	8/2/2024

Microgenics Corporation	DOA MC III Control Set	Kit: 2 amber glass bottles, 5.0 mL each.	11/14/2024
Microgenics Corporation	MAS ChemTRAK H Liquid Assayed Chemistry Control, Catalog Number: CHA-SP.	Kit: 3 Glass vials, 5 mL each	10/24/2024
Microgenics Corporation	MAS ChemTRAK H Liquid Assayed Chemistry Control, Level 1, Catalog Number: 10014150.	Kit: 6 Glass vials, 2 mL each	10/24/2024
Microgenics Corporation	MAS ChemTRAK H Liquid Assayed Chemistry Control, Level 1, Catalog Number: CHA-1.	Kit: 6 Glass vials, 5 mL each	10/24/2024
Microgenics Corporation	MAS ChemTRAK H Liquid Assayed Chemistry Control, Level 2, Catalog Number: 10014151.	Kit: 6 Glass vials, 2 mL each	10/24/2024
Microgenics Corporation	MAS ChemTRAK H Liquid Assayed Chemistry Control, Level 2, Catalog Number: CHA-2.	Kit: 6 Glass vials, 5 mL each	10/24/2024
Microgenics Corporation	MAS ChemTRAK H Liquid Assayed Chemistry Control, Level 3, Catalog Number: 10014152.	Kit: 6 Glass vials, 2 mL each	10/24/2024
Microgenics Corporation	MAS ChemTRAK H Liquid Assayed Chemistry Control, Level 3, Catalog Number: CHA-3.	Kit: 6 Glass vials, 5 mL each	10/24/2024
Microgenics Corporation	MAS ChemTRAK H Liquid Unassayed Chemistry Control, Catalog Number: CHU-SP.	Kit: 3 Glass vials, 15 mL each	10/24/2024
Microgenics Corporation	MAS ChemTRAK H Liquid Unassayed Chemistry Control, Level 1, Catalog Number: CHU-1.	Kit: 10 Glass vials, 15 mL each	10/24/2024
Microgenics Corporation	MAS ChemTRAK H Liquid Unassayed Chemistry Control, Level 2, Catalog Number: CHU-2.	Kit: 10 Glass vials, 15 mL each	10/24/2024
Microgenics Corporation	MAS ChemTRAK H Liquid Unassayed Chemistry Control, Level 3, Catalog Number: CHU-3.	Kit: 10 Glass vials, 15 mL each	10/24/2024
Microgenics Corporation	MAS Liquimmune Control Level 1, Catalog number: LIG-101	Kit: 6 Glass vials, 5 mL each	10/24/2024
Microgenics Corporation	MAS Liquimmune Control Level 2, Catalog number: LIG-202	Kit: 6 Glass vials, 5 mL each	10/24/2024
Microgenics Corporation	MAS Liquimmune Control Level 3, Catalog number: LIG-303	Kit: 6 Glass vials, 5 mL each	10/24/2024
Microgenics Corporation	MAS Liquimmune Control Level Sample Pack, Catalog number: LIG-S1	Kit: 3 Glass vials, 5 mL each	10/24/2024
Microgenics Corporation	MAS Liquimmune Control, Level 1, Catalog number: 10013876	Kit: 6 Glass vials, 2 mL each	10/24/2024
Microgenics Corporation	MAS Liquimmune Control, Level 2, Catalog number: 10013877	Kit: 6 Glass vials, 2 mL each	10/24/2024
Microgenics Corporation	MAS Liquimmune Control, Level 3, Catalog number: 10013878	Kit: 6 Glass vials, 2 mL each	10/24/2024
Microgenics Corporation	MAS OMNI CORE II Catalog number: OCRL-SP	MAS OMNI CORE II Catalog number: OCRL-SP.	12/17/2024
Microgenics Corporation	MAS OMNI CORE II, Level 1, Catalog number: OCRL-101	MAS OMNI CORE II, Level 1, Catalog number: OCRL-101.	12/17/2024
Microgenics Corporation	MAS OMNI CORE II, Level 2, Catalog number: OCRL-202	MAS OMNI CORE II, Level 2, Catalog number: OCRL-202.	12/17/2024
Microgenics Corporation	MAS OMNI CORE II, Level 3, Catalog number: OCRL-303	MAS OMNI CORE II, Level 3, Catalog number: OCRL-303.	12/17/2024
Microgenics Corporation	MAS PAR TDM Liquid Assayed Therapeutic Drug Control Level 3, Catalog number: PTD3-3003.	Kit: 6 Glass vials, 5 mL each	12/17/2024
Microgenics Corporation	MAS TM Omni-CORE TM II, Sample Pack	Kit: 3 bottles, 5 mL each	1/10/2025
Microgenics Corporation	MGC MD Calibrator 1, Bulk	Kit: Glass bottles, 1 L, 2 L, 5 L, 10 L, 20 L, Plastic or Glass bottles, 25 L.	1/31/2025
Microgenics Corporation	MGC MD Calibrator 2, Bulk	Kit: Glass bottles, 1 L, 2 L, 5 L, 10 L.	1/31/2025
Microgenics Corporation	MGC MD Calibrator 3, Bulk	Kit: Glass bottles, 1 L, 2 L, 5 L	1/31/2025
Microgenics Corporation	MGC MD Calibrator 4, Bulk	Kit: Glass bottles, 1 L, 2 L, 5 L	1/31/2025
Microgenics Corporation	Multi-Drug High Cal	Kit: 50 bottles, 5 mL each	12/31/2024
Microgenics Corporation	Multi-Drug Intermediate Cal	Kit: 50 bottles, 5 mL each	12/31/2024
Microgenics Corporation	Multi-Drug Secondary C/O Cal	Kit: 50 bottles, 5 mL each	12/31/2024
Microgenics Corporation	Opiate Cal 150 ng/mL, Bulk	Kit: Glass bottles, 1 L, 2 L, 5 L, 10 L, 20 L, 45 L, Plastic or Glass bottles, 20 L, 25L, 50 L.	1/31/2025
Microgenics Corporation	Opiate Cal 500 ng/mL, Bulk	Kit: Glass bottles, 1 L, 2 L, 5 L, 10 L, 20 L, 45 L, Plastic or Glass bottles, 20 L, 25L, 50 L.	1/31/2025
Microgenics Corporation	PHENO ANTI REAG BULK PKGD	Kit: HDPE bottles, 30 mL, 125 mL, 1L, 2L, 4L, 10L and 20L.	12/31/2024
Microgenics Corporation	Phenobarbital B Mfg Cal	LDPE bottle, 2 mL	2/7/2025
Microgenics Corporation	Phenobarbital Ctrl L2, 30.0 µg/mL Catalog number: 10016300	Plastic bottle: 1 mL	2/21/2025
Microgenics Corporation	Phenobarbital D Mfg Cal	LDPE bottle, 2 mL	2/7/2025
Microgenics Corporation	Phenobarbital E Mfg Cal	LDPE bottle, 2 mL	2/7/2025
Microgenics Corporation	Phenobarbital F Mfg Cal	LDPE bottle, 2 mL	2/7/2025
Microgenics Corporation	Phenobarbital G Mfg Cal	LDPE bottle, 2 mL	2/7/2025
Microgenics Corporation	Phenobarbital Open Mfg Cal	LDPE bottle, 2 mL	2/7/2025
Microgenics Corporation	QMS Phenobarbital Stock Solution (1000 µg/mL), Catalog number: 10016300-Stock Solution.	Glass bottle: 200 mL	3/8/2025
Microgenics Corporation	Soln Methaqualone, Catalog number: 439	Glass bottle: 20–50 mL, 50–95 mL	3/8/2025
Microgenics Corporation	Tox Calibrators 1	1 amber glass bottle, 5.0 mL	11/14/2024
Microgenics Corporation	Tox Calibrators 2	1 amber glass bottle, 5.0 mL	11/14/2024
Microgenics Corporation	Tox Calibrators 3	1 amber glass bottle, 5.0 mL	11/14/2024
Microgenics Corporation	Tox Controls	Kit: 6 amber glass bottles, 5.0 mL each.	11/14/2024
Microgenics Corporation	Phenobarbital C Mfg Cal	LDPE bottle, 2 mL	2/7/2025

The Assistant Administrator has found that each of the compounds, mixtures, and preparations described in Chart II, below, is not consistent with the criteria stated in 21 U.S.C. 811(g)(3)(B) and in 21 CFR 1308.23. Accordingly, the Assistant

Administrator has determined that the chemical preparations or mixtures generally described in Chart II, below, and specifically described in the application materials received by DEA, are not exempt from application of any part of the CSA or from application of

any part of the CFR, with regard to the requested exemption pursuant to 21 CFR 1308.23, as of the date that was provided in the determination letters to the individual requesters.

Opportunity for Comment

Pursuant to 21 CFR 1308.23(e), any interested person may submit written comments on or objections to any chemical preparation in this order that has been approved or denied as exempt. If any comments or objections raise significant issues regarding any finding of fact or conclusion of law upon which this order is based, the Assistant Administrator will immediately suspend the effectiveness of any applicable part of this order until she may reconsider the application in light of the comments and objections filed. Thereafter, the Assistant Administrator shall reinstate, revoke, or amend his original order as she determines appropriate.

Approved Exempt Chemical Preparations Are Posted on DEA's Website

A list of all current exemptions, including those listed in this order, is available on DEA's website at http://www.DEAdiversion.usdoj.gov/schedules/exempt/exempt_chemlist.pdf. The dates of applications of all current exemptions are posted for easy reference.

Thomas Prevoznik,

Assistant Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

[OMB 1140–0075]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Revision of a Previously Approved Collection; Explosives Transactions Involving Limited Permittees—(ATF Forms 5400.4 and 5400.30)

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Department of Justice (DOJ), The Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until September 2, 2025.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, contact: Michael O'Lena, EIPB, either by mail at 99 New York Avenue NE, Room 6.N.518, Washington, DC 20226, by email at eipb-informationcollection@atf.gov, or telephone at (202) 648–7120.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information

are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Abstract: Specific requirements for licensees and permittees to distribute explosives and materials in transactions involving limited permittees, and to report lost or stolen Intrastate Purchase of Explosives Coupons. This information collection is contained in 27 CFR 555.34, 555.105, and 555.125, and 555.126. Information Collection (IC) OMB 1140–0075 is being revised to streamline the collections involving explosives limited permittees. There previously were four collections (OMB control numbers 1140–0025, 1140–0075, 1140–0077, and 1140–0079), which have been combined, simplified, and updated to remove duplicative

elements, and adjusted to reflect a regulatory change currently being finalized. These changes reduced the collective burden arising from these four ICRs. This ICR now includes three collection requirements: submitting an authorized persons list, completing the Form 5400.4, Limited Permittee Transaction Report (LPTR), and reporting lost or stolen ATF Form 5400.30s, Intrastate Purchase of Explosives Coupons (IPECs). Distributors and carriers no longer have to verify the identity of the person accepting explosives delivered by common carriers, and distributors can note the identification information they do collect directly on the LPTR, thereby reducing the burden. The LPTR has also been substantially revised to reflect the streamlined information collection requirements, decreasing the amount of time for record-keeping. In addition, the number of limited permittees has decreased significantly since the previous renewal periods for the original ICRs, from 100 respondents to 13, and the number of responses has

also significantly decreased. The time burden for this combined ICR has therefore decreased, due both to streamlining the combined collections and to the decrease in respondents and responses, from 1 hour per respondent or 254 hours total per year, to 25 minutes per respondent or 9.75 hours total per year.

Overview of This Information Collection

1. *Type of Information Collection:* Revision of a previously approved collection.
2. *The Title of the Form/Collection:* Explosives Transactions Involving Limited Permittees.
3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* Form number: ATF Forms 5400.4 and 5400.30. Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.
4. *Affected public who will be asked or required to respond, as well as the obligation to respond:* Affected Public: Individuals or households, Private

- Sector-for or not for profit institutions. The obligation to respond is required to obtain/retain a benefit, voluntary.
5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 13 respondents will respond to this collection once annually (by submitting an authorized persons list) and twice annually (by submitting a completed 5400.4) for a total number of 13 sets of responses. It will take each respondent approximately 0.75 hours to complete their responses.
6. *An estimate of the total annual burden (in hours) associated with the collection:* The estimated annual public burden associated with this collection is 9.75 hours, which is equal to 13 total response sets (13 submitted authorized persons list and 26 completed 5400.4) * 0.75 hours (0.0833 hours for authorized persons list and 0.33 to complete form 5400.4).
7. *An estimate of the total annual cost burden associated with the collection, if applicable:* \$0.

TOTAL BURDEN HOURS

Activity	Number of respondents	Frequency	Total annual responses	Time per response (hours)	Total annual burden (hours)
Submit authorized persons list.	13	1	13	0.0833	1.083
Complete LPTR	13	2	26	0.33	8.667
Report coupon theft/ loss.	13	0	0	0.33 (if done; but since no responses, this is 0).	0
Total	13	1 (set of responses per respondent).	13 (sets of responses).	0.75 hours (per response set)	9.75

If additional information is required contact: Darwin Arceo, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC.

Dated: June 26, 2025.
Darwin Arceo,
Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–FY–P

DEPARTMENT OF JUSTICE

[OMB 1140–0066]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Revision of a Previously Approved Collection; Licensee Record-Keeping Requirements for Armor-Piercing Ammunition

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.
ACTION: 60-Day notice.

SUMMARY: The Department of Justice (DOJ), The Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until September 2, 2025.
FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, contact: Gary Griffin, FIPB, either by mail at Bureau of Alcohol, Tobacco, Firearms, and Explosives; 99 New York Ave. NE, Washington, DC 2022, by email at fipb-informationcollection@atf.gov, or telephone at 202–648–7190.
SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Abstract: Licensed manufacturers, importers, dealers, and collectors are required to create and maintain disposition records on armor-piercing

ammunition. These records are used primarily for law enforcement purposes and may be used to trace ammunition collected as evidence during a criminal investigation or court presentation. The records are required by 18 U.S.C. 922 and are necessary to support ATF's mission to enforce the Gun Control Act, particularly tracing ammunition used in crimes. Information Collection (IC) OMB # 1140–0066 is being revised to change the title of the ICR to reflect that the record-keeping requirement applies to licensed manufacturers, importers, dealers, and collectors.

Overview of This Information collection

1. *Type of Information Collection:*

Revision of a previously approved collection.

2. *The Title of the Form/Collection:*

Licensee Record-keeping Requirements for Armor-Piercing Ammunition.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* Form number: None.

Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

4. *Affected public who will be asked or required to respond, as well as the obligation to respond:* Affected Public: Individuals or households, Private Sector-for or not for profit institutions. The obligation to respond is required to obtain or retain a benefit.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 398 respondents will respond to this collection once annually, and it will take each respondent approximately 0.033 hours to complete their responses.

6. *An estimate of the total annual burden (in hours) associated with the collection:* The estimated annual public burden associated with this collection is 13 total hours, which is equal to 398 (total respondents) * 1 (# of response per respondent) * 0.0333 (2 minutes).

7. *An estimate of the total annual cost burden associated with the collection, if applicable:* \$0.

TOTAL BURDEN HOURS

Activity	Number of respondents	Frequency	Total annual responses	Time per response (hours)	Total annual burden (hours)
Complete disposition transaction record.	398	1/annually	398	0.033	13

If additional information is required contact: Darwin Arceo, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC.

Dated: June 26, 2025.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–FY–P

DEPARTMENT OF JUSTICE

[OMB Number 1125–0002]

Agency Information Collection Activities; Proposed Collection eComments Requested; Revision and Extension of a Previously Approved Collection; Notice of Appeal From a Decision of an Immigration Judge (Form EOIR–26)

AGENCY: Executive Office for Immigration Review, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Executive Office for Immigration Review (EOIR) at the Department of Justice (DOJ) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until September 2, 2025.

FOR FURTHER INFORMATION CONTACT: If you have additional comments

especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Justine Fuga, Associate General Counsel, Office of the General Counsel, Executive Office for Immigration Review, 5107 Leesburg Pike, Suite 2600, Falls Church, VA 22041, telephone: (703) 305–0265, Justine.Fuga@usdoj.gov, eoir.pra.comments@usdoj.gov.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information,

including the validity of the methodology and assumptions used;—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Abstract: A party (either the U.S. Department of Homeland Security (DHS) Immigration and Customs Enforcement (ICE) or the individual (Respondent/Applicant) who is the subject of the EOIR immigration proceeding) affected by a decision of an Immigration Judge may appeal that decision to the Board of Immigration Appeals (Board or BIA), provided the Board has jurisdiction pursuant to 8 CFR 1003.1. An appeal from an Immigration Judge’s decision is taken by completing the Form EOIR–26 and submitting it to the Board. *See* 8 CFR 1003.3, 1003.38. The form requests information necessary for the Board to

process an appeal of an Immigration Judge decision, such as the Respondent’s/Applicant’s name and alien registration number (A-number), the mailing addresses for parties and the attorney or representative of record, the basis for the appeal, and proof of service of the notice of appeal. EOIR is revising this form to implement several changes. Formatting and textual revisions were made throughout the form and instructions to improve organization, clarity, and readability. EOIR also updated references to online materials. Changes were made to clarify filing instructions for paper and electronic submissions. EOIR removed references and collection of information pertaining to the BIA Pro Bono Project, which currently is not an active agency program. An option was added to the form for an appellant to specify that he or she is filing an interlocutory appeal from an Immigration Judge decision. Finally, EOIR added a field to collect the email address for the appellant’s attorney or authorized representative.

Overview of This Information Collection

1. *Type of Information Collection:* Revision and extension of a previously approved collection.

2. *The Title of the Form/Collection:* Notice of Appeal from a Decision of an Immigration Judge.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* The agency form number is EOIR–26, and the sponsoring component is EOIR.

4. *Affected public who will be asked or required to respond, as well as the obligation to respond:* The Affected Public are the parties to EOIR immigration proceedings, which includes individuals who are the subject of EOIR immigration proceedings as well as DHS ICE. This information collection is required to obtain/retain the benefit of administratively appealing a decision of an Immigration Judge.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* It is estimated that an average of 45,473 respondents will complete the form annually with an average of 30 minutes per response.

6. *An estimate of the total annual burden (in hours) associated with the collection:* EOIR estimates an average of 22,736 hours total annual burden for form respondents.

Activity	Number of respondents	Frequency (annually)	Total annual responses	Time per response (hours)	Total annual burden (hours)
EOIR–26—individuals	42,816	1	42,816	0.5	21,408
EOIR–26—DHS ICE	2,657	1	2,657	0.5	1,328
Totals	45,473	1	45,473	0.5	22,736

7. *An estimate of the total annual cost burden associated with the collection, if applicable:* The total estimated annual public cost is \$1,516,731. Of the total

number of responses received annually, 12,487 responses are submitted by mail or hand delivery from respondents/applicants subject to the \$110 filing fee

requirement and 647 responses are submitted by mail or hand delivery from DHS ICE representatives exempted from the \$110 filing fee requirement.

Cost	Individual	DHS ICE
Printing	\$0.80 per response	\$0.80 per response.
Postage	\$10.10 per response	\$10.10 per response.
Filing Fee	\$110 per response	\$0 per response.
Total per Response	\$120.90	\$10.90.
Total for All Paper Responses Filed	\$120.90 × 12,487 = \$1,509,679	\$10.90 × 647 = \$7,052.

If additional information is required contact: Darwin Arceo, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC.

Dated: June 26, 2025.

LEGAL SERVICES CORPORATION
Sunshine Act Meetings
TIME AND DATE: The Finance and the Governance and Performance Review Committees of the Legal Services Corporation Board of Directors will meet virtually on July 8 and 9, 2025,

respectively. The Finance Committee meeting will begin on July 8 at 1:30 p.m. Eastern Time and will continue until the conclusion of the Committee's agenda. On July 9, the Governance and Performance Review Committee meeting will begin at 2:00 p.m. Eastern Time and will continue until the conclusion of the Committee's agenda.

PLACE: Public notice of virtual meeting.

LSC will conduct the July 8 and July 9, 2025, meetings via videoconference. Unless otherwise noted herein, the meetings will be open to public observation via LSC's YouTube channel: <https://www.youtube.com/@LegalServicesCorp/streams>.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Tuesday, July 8, 2025—Finance Committee Meeting

1. Approval of Meeting Agenda
2. Continue Discussion Regarding LSC's Fiscal Year 2027 Budget Appropriation Request
3. Consider and Act on Recommendation for Full Board Approval: *Resolution #2025-XXX: Adopting LSC's Appropriation Request for Fiscal Year 2027*
4. Consider and Act on Other Business
5. Consider and Act on Adjournment of Meeting

Wednesday, July 9, 2025—Governance and Performance Review Committee Meeting

1. Approval of Agenda
2. Approval of Minutes of the Committee's Meeting on March 24, 2025
3. Approval of Minutes of the Committee's Closed Session Meeting on March 24, 2025
4. Report on U.S. Department of Justice's Access to Justice Office and White House Legal Aid Interagency Roundtable (LAIR)
5. Consider and Act on Other Business
6. Consider and Act on Motion to Adjourn the Committee Meeting

CONTACT PERSON FOR MORE INFORMATION: Jessica Wechter, Special Assistant to the President, at (202) 295-1500. Questions may also be sent by electronic mail to the Office of the Corporate Secretary at updates@lsc.gov.

Non-Confidential Meeting Materials: Non-confidential meeting materials will be made available in electronic format at least 24 hours in advance of the meeting on the LSC website, at <https://www.lsc.gov/about-lsc/board-meeting-materials>.

(Authority: 5 U.S.C. 552b.)

Dated: June 26, 2025.

Stefanie Davis,

Deputy General Counsel, Legal Services Corporation.

BILLING CODE 7050-01-P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice: 25-019]

Name of Information Collection: NASA Contractor Financial Management Records

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice of renewal information collection.

SUMMARY: NASA, as part of its continuing effort to reduce paperwork and respondent burden, under the Paperwork Reduction Act, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections.

DATES: Comments are due by July 31, 2025.

ADDRESSES: Written comments and recommendations for this information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain.

Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to NASA PRA Clearance Officer, Stayce Hault, NASA Headquarters, 300 E Street SW, JC0000, Washington, DC 20546, phone 256-714-8575, or email stayce.d.hault@nasa.gov or hq-ocio-pra-program@mail.nasa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

The NASA Contractor Financial Management Reporting System is the basic financial medium for contractor reporting of estimated and incurred costs, providing essential data for projecting costs and hours to ensure that contractor performance is realistically planned and supported by dollar and labor resources. The data provided by these reports is an integral part of the Agency's accrual accounting and cost-based budgeting system. Respondents are reimbursed for associated cost to

provide the information, per their negotiated contract price and associated terms of the contract. There are no "total capital and start-up" or "total operation and maintenance and purchase of services" costs associated since NASA policy requires that data reported is generated from the contractors' existing system. The contractors' internal management system shall be relied upon to the maximum extent possible.

NASA is committed to effectively performing the Agency's communication function in accordance with the Space Act Section 203 (a)(3) to "provide for the widest practicable and appropriate dissemination of information concerning its activities and the results thereof," and to enhance public understanding of, and participation in, the nation's aeronautical and space program in accordance with the NASA Strategic Plan.

II. Methods of Collection

NASA collects this information electronically and that is the preferred manner, however information may also be collected via mail or fax.

III. Data

Title: NASA Contractor Financial Management Reports.

OMB Number: 2700-0003.

Type of Review: Renewal of a previously approved collection.

Affected Public: Business or other for profit or not-for-profit institutions.

Estimated Annual Number of Activities: 500.

Estimated Number of Respondents per Activity: 12.

Annual Responses: 6,000.

Estimated Time per Response: 9 hours.

Estimated Total Annual Burden Hours: 54,000 hours.

IV. Request for Comments

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of NASA, including whether the information collected has practical utility; (2) the accuracy of NASA's estimate of the burden (including hours and cost) of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including automated collection techniques or the use of other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the request for OMB

approval of this information collection. They will also become a matter of public record.

Stayce Hoult,

PRA Clearance Officer, National Aeronautics and Space Administration.

[FR Doc. 2025–12213 Filed 6–30–25; 8:45 am]

BILLING CODE 7510–13–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice: 25–020]

Guidance on Referrals for Potential Criminal Enforcement

ACTION: Notice.

SUMMARY: This notice describes the National Aeronautics and Space Administration's (NASA) plans to address criminally liable regulatory offenses under the recent executive order on Fighting Overcriminalization in Federal Regulations.

FOR FURTHER INFORMATION CONTACT:

Emily Pellegrino, Federal Register Liaison Officer, Office of the Executive Secretariat, NASA Headquarters, Washington, DC 20546, via email at emily.a.pellegrino@nasa.gov or hq-nasa-regactions@mail.nasa.gov or (202) 358–1525.

SUPPLEMENTARY INFORMATION: On May 9, 2025, the President issued Executive Order (“E.O.”) 14294, Fighting Overcriminalization in Federal Regulations, 90 FR 20363 (published May 14, 2025). Section 7 of E.O. 14294 provides that within 45 days of the order, and in consultation with the Attorney General, each agency should publish guidance in the **Federal Register** describing its plan to address criminally liable regulatory offenses.

Consistent with that requirement, NASA advises the public that by May 9, 2026, the Agency, in consultation with the Attorney General, will provide to the Director of the Office of Management and Budget (“OMB”) a report containing: (1) a list of all criminal regulatory offenses¹ enforceable by the Department of Justice (“DOJ”) via a referral by NASA; and (2) for each such criminal regulatory offense, the range of potential criminal penalties for a violation and the applicable mens rea standard² for the criminal regulatory offense.

This notice also announces a general policy, subject to appropriate exceptions and to the extent consistent with law, that when NASA is deciding whether to refer alleged violations of criminal regulatory offenses to DOJ, officers and employees of NASA should consider, among other factors:

- the harm or risk of harm, pecuniary or otherwise, caused by the alleged offense;
- the potential gain to the putative defendant that could result from the offense;
- whether the putative defendant held specialized knowledge, expertise, or was licensed in an industry related to the rule or regulation at issue; and
- evidence, if any is available, of the putative defendant's general awareness of the unlawfulness of his conduct as well as his knowledge or lack thereof of the regulation at issue.

This general policy is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

Emily A. Pellegrino,

Federal Register Liaison Officer, National Aeronautics and Space Administration.

BILLING CODE 7510–13–P

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

Arts Advisory Panel Meetings

AGENCY: National Endowment for the Arts, National Foundation on the Arts and the Humanities.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the Federal Advisory Committee Act, as amended, notice is hereby given that 21 meetings of the Arts Advisory Panel to the National Council on the Arts will be held by teleconference or videoconference.

DATES: See the **SUPPLEMENTARY INFORMATION** section for individual meeting times and dates. All meetings are Eastern time and ending times are approximate:

ADDRESSES: National Endowment for the Arts, Constitution Center, 400 7th St. SW, Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: Further information with reference to these meetings can be obtained from Lara Allee, Office of Guidelines & Panel

Operations, National Endowment for the Arts, Washington, DC 20506; alleel@arts.gov, or call 202–682–5698.

SUPPLEMENTARY INFORMATION: The closed portions of meetings are for the purpose of Panel review, discussion, evaluation, and recommendations on financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency. In accordance with the determination of the Chair of March 11, 2022, these sessions will be closed to the public pursuant to 5 U.S.C. 10.

The upcoming meetings are:

Dance (review of applications): This meeting will be closed.

Date and time: August 1, 2025; 12:00 p.m. to 2:00 p.m.

Dance (review of applications): This meeting will be closed.

Date and time: August 1, 2025; 3:00 p.m. to 5:00 p.m.

Presenting & Multidisciplinary Works (review of applications): This meeting will be closed.

Date and time: August 4, 2025; 12:00 p.m. to 2:00 p.m.

Literary Arts (review of applications): This meeting will be closed.

Date and time: August 4, 2025; 1:00 p.m. to 3:00 p.m.

Presenting & Multidisciplinary Works (review of applications): This meeting will be closed.

Date and time: August 4, 2025; 3:00 p.m. to 5:00 p.m.

Literary Arts (review of applications): This meeting will be closed.

Date and time: August 5, 2025; 12:00 p.m. to 2:00 p.m.

Presenting & Multidisciplinary Works (review of applications): This meeting will be closed.

Date and time: August 5, 2025; 12:00 p.m. to 2:00 p.m.

Arts Education (review of applications): This meeting will be closed.

Date and time: August 5, 2025; 1:30 p.m. to 3:30 p.m.

Presenting & Multidisciplinary Works (review of applications): This meeting will be closed.

Date and time: August 5, 2025; 3:00 p.m. to 5:00 p.m.

Arts Education (review of applications): This meeting will be closed.

Date and time: August 6, 2025; 1:30 p.m. to 3:30 p.m.

Presenting & Multidisciplinary Works (review of applications): This meeting will be closed.

Date and time: August 7, 2025; 12:00 p.m. to 2:00 p.m.

¹ “Criminal regulatory offense” means a Federal regulation that is enforceable by a criminal penalty. E.O. 14294, sec. 3(b).

² “Mens rea” means the state of mind that by law must be proven to convict a particular defendant of a particular crime. E.O. 14294, sec. 3(c).

Arts Education (review of applications): This meeting will be closed.

Date and time: August 7, 2025; 1:30 p.m. to 3:30 p.m.

Presenting & Multidisciplinary Works (review of applications): This meeting will be closed.

Date and time: August 7, 2025; 3:00 p.m. to 5:00 p.m.

Arts Education (review of applications): This meeting will be closed.

Date and time: August 8, 2025; 11:30 a.m. to 1:30 p.m.

Arts Education (review of applications): This meeting will be closed.

Date and time: August 8, 2025; 2:30 p.m. to 4:30 p.m.

Folk & Traditional Arts (review of applications): This meeting will be closed.

Date and time: August 11, 2025; 1:00 p.m. to 3:00 p.m.

Arts Education (review of applications): This meeting will be closed.

Date and time: August 12, 2025; 2:30 p.m. to 4:30 p.m.

Folk & Traditional Arts (review of applications): This meeting will be closed.

Date and time: August 13, 2025; 1:00 p.m. to 3:00 p.m.

NUCLEAR REGULATORY COMMISSION

[Docket No. 72-26; NRC-2022-0220]

Pacific Gas and Electric Company; Diablo Canyon Independent Spent Fuel Storage Installation; License Renewal

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has issued a

renewed license to Pacific Gas and Electric Company (PG&E, the licensee) for Special Nuclear Materials (SNM) License No. SNM-2511 for the receipt, possession, transfer, and storage of spent nuclear fuel from the Diablo Canyon Power Plant and associated radioactive material at the Diablo Canyon Independent Spent Fuel Storage Installation (ISFSI), located in San Luis Obispo County, California. The renewed license authorizes operation of the Diablo Canyon ISFSI in accordance with the provisions of the renewed license and its technical specifications. The renewed license expires on March 22, 2064.

DATES: The license referenced in this document is available as of June 20, 2025.

ADDRESSES: Please refer to Docket ID NRC-2022-0220 when contacting the NRC about the availability of information regarding this action. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking website:* Go to <https://www.regulations.gov> and search for NRC-2022-0220. Address questions about Docket IDs in *Regulations.gov* to Bridget Curran; telephone: 301-415-1003; email: Bridget.Curran@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, at

301-415-4737, or by email to PDR.Resource@nrc.gov. For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the "Availability of Documents" section.

- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1-800-397-4209 or 301-415-4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Christopher T. Markley, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-6293; email: Christopher.Markley@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Discussion

Based upon the application dated March 9, 2022, as supplemented August 10, 2023, September 21, 2023, April 30, 2024, and March 14, 2025, the NRC has issued a renewed license to the licensee for the Diablo Canyon ISFSI, located in San Luis Obispo County, California. The renewed license SNM-2511 authorizes and requires operation of the Diablo Canyon ISFSI in accordance with the provisions of the renewed license and its technical specifications. The renewed license will expire on March 22, 2064.

The licensee's application for a renewed license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the NRC's rules and regulations. The NRC has made appropriate findings as required by the Act and the NRC's regulations in Chapter 1 of title 10 of the *Code of*

Federal Regulations (10 CFR) and sets forth those findings in the renewed license. The agency afforded an opportunity for a hearing in the notice of opportunity for a hearing published in the **Federal Register** on January 10, 2023 (88 FR 1431). An adjudicatory proceeding on the application was then conducted in response to a petition to intervene filed by San Luis Obispo Mothers for Peace (petitioner) regarding the adequacy of the license renewal application. An Atomic Safety and Licensing Board (Board) considered the petition and admitted one contention. The petitioner subsequently withdrew the contention after the licensee supplemented its application with information that the contention had noted was missing. The Board subsequently issued LBP-23-08, terminating the adjudicatory proceeding.

The NRC staff prepared a safety evaluation report for the renewal of the ISFSI license and concluded, based on that evaluation, that the ISFSI will continue to meet the regulations in 10 CFR part 72. The NRC staff also prepared an environmental assessment and finding of no significant impact for the renewal of this license, which was published on November 12, 2024 (89 FR 89056). The NRC staff's environmental assessment included the impacts of continued storage of spent nuclear fuel (as documented in NUREG-2157, "Generic Environmental Impact Statement for Continued Storage of Spent Fuel"). The NRC staff concluded that renewal of this ISFSI license will not have a significant impact on the quality of the human environment.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 99902056; NRC-2024-0146]

Tennessee Valley Authority; Clinch River Nuclear Site; Construction Permit Application

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; receipt.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is providing public notice each week for four consecutive weeks of receipt and availability of an application for a construction permit (CP) from Tennessee Valley Authority (TVA) for the Clinch River Nuclear Site in Roane County, Tennessee. The application, proposing to construct a GE-Hitachi BWRX-300 reactor, was received in two parts on April 25 and May 20, 2025. This notice is being provided to make the public and other stakeholders aware that the CP application is available for inspection.

DATES: July 01, 2025.

ADDRESSES: Please refer to Docket ID NRC-2024-0146 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2024-0146. Address questions about Docket IDs in *Regulations.gov* to Bridget Curran; telephone: 301-415-1003; email: Bridget.Curran@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/>

adams.html. To begin the search, select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, at 301-415-4737, or by email to PDR.Resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.

- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1-800-397-4209 or 301-415-4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Allen Fetter, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-8556; email: Allen.Fetter@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Discussion

In response to a letter from TVA dated August 17, 2023 (NNP-23-003, ADAMS Accession No. ML23229A569), the Commission on November 21, 2023 granted an exemption from certain requirements of paragraph 2.101(a)(5) of title 10 of the *Code of Federal Regulations* (10 CFR), which allowed TVA to submit a construction permit application in two parts with the information required under 10 CFR 50.34(a)(1) included in the second part of the application (ADAMS Accession No. ML23045A008).

Tennessee Valley Authority filed with the NRC, pursuant to 10 CFR part 50, "Domestic Licensing of Production and Utilization Facilities," both parts of the application for a construction permit to construct a GEH BWRX-300 reactor at the Clinch River Nuclear Site in Roane County, Tennessee, on April 28, 2025 (NNP-25-003, ADAMS Accession No. ML25118A209), and May 20, 2025, (NPP-25-004, ADAMS Package Accession No. ML25140A062), respectively. These notices are being provided in accordance with the requirements in 10 CFR 50.43(a)(3).

The NRC staff is currently undertaking its acceptance review of

both parts of the application. If both parts of the application are accepted for docketing, a subsequent **Federal Register** notice will be issued that addresses the acceptability of the construction permit application for docketing and provisions for participation of the public in the permitting process.

For the Nuclear Regulatory Commission.

Dated: June 12, 2025.

Mahmoud Jardaneh,

Chief, New Reactor Licensing and Infrastructure Branch, Division of New and Renewed Licenses, Office of Nuclear Reactor Regulation.

POSTAL REGULATORY COMMISSION

[Docket Nos. K2025-55; MC2025-1541 and K2025-1535; MC2025-1542 and K2025-1536]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* July 3, 2025.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at <https://www.prc.gov>. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202-789-6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

- I. Introduction
- II. Public Proceeding(s)
- III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the

Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (<http://www.prc.gov>). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.¹

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). The Public Representative does not represent any individual person, entity or particular point of view, and, when Commission attorneys are appointed, no attorney-client relationship is established. Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041. Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. See 39

CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)–(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

II. Public Proceeding(s)

1. *Docket No(s)*: K2025–55; *Filing Title*: USPS Request Concerning Amendment One to Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 456, with Materials Filed Under Seal; *Filing Acceptance Date*: June 25, 2025; *Filing Authority*: 39 CFR 3035.105 and 39 CFR 3041.505; *Public Representative*: Kenneth Moeller; *Comments Due*: July 3, 2025.

2. *Docket No(s)*: MC2025–1541 and K2025–1535; *Filing Title*: USPS Request to Add Priority Mail Contract 896 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date*: June 25, 2025; *Filing Authority*: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative*: Evan Wise; *Comments Due*: July 3, 2025.

3. *Docket No(s)*: MC2025–1542 and K2025–1536; *Filing Title*: USPS Request to Add Priority Mail Contract 897 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date*: June 25, 2025; *Filing Authority*: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative*: Elsie Lee-Robbins; *Comments Due*: July 3, 2025.

III. Summary Proceeding(s)

None. See Section II for public proceedings.

This Notice will be published in the **Federal Register**.

- I. Introduction
- II. Public Proceeding(s)
- III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (<http://www.prc.gov>). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.¹

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). The Public Representative does not represent any individual person, entity or particular point of view, and, when Commission attorneys are appointed, no attorney-client relationship is established. Section II also establishes comment

¹ See Docket No. RM2018–3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19–22 (Order No. 4679).

¹ See Docket No. RM2018–3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19–22 (Order No. 4679).

deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041. Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. See 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)–(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

II. Public Proceeding(s)

1. *Docket No(s).*: CP2022–148; *Filing Title*: USPS Request Concerning Amendment One to Priority Mail Express, Priority Mail, First-Class Package Service & Parcel Select Contract 54, with Material Filed Under Seal; *Filing Acceptance Date*: June 26, 2025; *Filing Authority*: 39 CFR 3035.105 and 39 CFR 3041.505; *Public Representative*: Jennaca Upperman; *Comments Due*: July 7, 2025.

2. *Docket No(s).*: MC2025–1537 and K2025–1531; *Filing Title*: USPS Request to Add Priority Mail Express International, Priority Mail International & First-Class Package International Service Contract 74 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date*: June 26, 2025; *Filing Authority*: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative*: Maxine Bradley; *Comments Due*: July 7, 2025.

BILLING CODE 7710–FW–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–103332; File No. SR–NYSENAT–2025–13]

Self-Regulatory Organizations; NYSE National, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Sixth Amended and Restated Certificate of Incorporation of Intercontinental Exchange, Inc. and Ninth Amended and Restated Certificate of Incorporation of Intercontinental Exchange Holdings, Inc.

June 26, 2025.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 (“Act”)² and Rule 19b–4 thereunder,³ notice is hereby given that on June 16, 2025, NYSE National, Inc. (“NYSE National” or the “Exchange”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization.⁴ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Sixth Amended and Restated Certificate of Incorporation of Intercontinental Exchange, Inc. (“ICE”) and Ninth Amended and Restated Certificate of Incorporation of Intercontinental Exchange Holdings, Inc. (“ICE Holdings”) to reflect regulations relating to security-based swap execution facilities (“SBSEFs”), update the registered office in the State of Delaware, and make non-substantive and conforming changes. The proposed rule change is available on the Exchange's website at www.nyse.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b–4.

⁴ For compliance with **Federal Register** publication requirements, the Commission slightly edited note 9, *infra*.

and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the ICE Current Certificate of Incorporation and ICE Holdings Current Certificate of Incorporation (together, the "Current Certificates") to reflect regulations relating to SBSEFs, update the registered office in the State of Delaware, and make non-substantive and conforming changes.⁵ No change is proposed to the certificate of incorporation or bylaws of the Exchange.

The changes to the ICE Current Certificate of Incorporation described herein would become operative upon the proposed Seventh Amended and Restated Certificate of Incorporation ("ICE Proposed Certificate of Incorporation") becoming effective pursuant to its filing with the Secretary of State of the State of Delaware. The changes to the ICE Holdings Current Certificate of Incorporation described herein would become operative upon the proposed Tenth Amended and Restated Certificate of Incorporation ("ICE Holdings Proposed Certificate of Incorporation" and, together with the ICE Proposed Certificate of Incorporation, the "Proposed Certificates") becoming effective pursuant to its filing with the Secretary of State of the State of Delaware.

Changes Related to SBSEFs

Securities and Exchange Commission ("Commission") regulations extend limitations on stockholder voting and ownership to SBSEFs.⁶ Because ICE's subsidiary ICE Swap Trade, LLC ("IST") has registered with the Commission as

an SBSEF, these Commission regulations apply.

IST has adopted Rule 410 (Ownership Limitation),⁷ which IST has advised the Exchange was designed to incorporate the requirements of 17 CFR 242.834 ("Rule 834") into the rules of the SBSEF. Additionally, ICE and ICE Holdings intend to amend their Current Certificates as described below.

ICE Proposed Certificate of Incorporation

The ICE Current Certificate of Incorporation would be amended as follows.

First, Article V (Limitations on Voting and Ownership) has limitations on stockholder voting and ownership that apply so long as ICE directly or indirectly controls a national securities exchange registered under the Act, such as the Exchange. These would be amended to also apply so long as ICE directly or indirectly controls a SBSEF registered under the Exchange Act, as follows:

- The first sentence of Article V(A)(1) (Voting Limitation), would be amended to add "or a security-based swap execution facility registered under Section 3D of the Exchange Act" immediately prior to (a).
- The end of Article V(A)(2) would be modified by adding "(and, with respect to a security-based swap execution facility registered under Section 3D of the Exchange Act, such resolution shall have been submitted to the SEC under Rule 242.806 or 242.807 under Regulation SE under the Exchange Act, shall have been approved by the SEC (if applicable) and shall have become effective thereunder)" to the existing (c).
- Article V(A)(3)(a) would be modified by adding text to the start of (i) as follows (proposed additions italicized):

(i) will not impair the ability of any national securities exchange registered under Section 6 of the Exchange Act or any security-based swap execution facility registered under Section 3D of the Exchange Act, in any case that is directly or indirectly controlled by the Corporation (each such national securities exchange or security-based swap execution facility so controlled, an "Exchange").

- The definition of "Member" in Article V(A)(8) would be modified as follows (proposed additions italicized): "Member" shall mean, with respect to any national securities exchange, a Person that is a "member" of an Exchange within the meaning of Section

3(a)(3)(A) of the Exchange Act or, with respect to a security-based swap execution facility, a Person that is a "member" within the meaning of Rule 242.802 of Regulation SE under the Exchange Act.

- The definition of "Related Persons" in Article V(A)(10) would be modified as follows (proposed additions italicized):

(d) in the case of a Person that is a Member, any Person that is associated with such Person (as determined using the definition of "person associated with a member" as defined under Section 3(a)(21) of the Exchange Act (with references therein to a national securities exchange being deemed to include a security-based swap execution facility));

(e) in the case of a Person that is a natural person and is a Member, any broker or dealer that is also a Member with which such Person is associated (as determined using the definition of "person associated with a member" as defined under Section 3(a)(21) of the Exchange Act (with references therein to a national securities exchange being deemed to include a security-based swap execution facility));

- The end of the concentration limits in Article V(B)(2) (Ownership Concentration Limitation) would be modified by adding the following parenthetical to the existing (c): "(and, with respect to an Exchange that is a security-based swap execution facility, such resolution shall have been submitted to the SEC pursuant to Rule 242.806 or 242.807 of Regulation SE under the Exchange Act, shall have been approved by the SEC (if applicable) and shall have become effective thereunder)".

Second, Article X (Amendments) of the ICE Current Certificate of Incorporation requires any amendment to, or repeal of any provision in, the ICE Current Certification of Incorporation to be filed with, or filed with and approved by, the Commission. These would be amended to also apply so long as ICE directly or indirectly controls a SBSEF registered under the Exchange Act.

To do so, the second sentence of Article X would be amended to add "(or, in the case of a security-based swap execution facility, Rule 242.806 or 242.807 under Regulation SE under the Exchange Act)" immediately following "the rules promulgated thereunder". In this way, the ICE Proposed Certificate of Incorporation would provide that, if the board of directors of any controlled SBSEF determines that any amendment or repeal must be filed with or filed with and approved by the Commission

⁵ ICE is the sole shareholder of ICE Holdings. ICE Holdings is the parent company of ICE Swap Trade, LLC. ICE Holdings is also the sole shareholder of NYSE Holdings LLC, which is the sole shareholder of NYSE Group, Inc., the parent company of the Exchange.

⁶ See 17 CFR 242.834. See also Securities Exchange Act Release No. 98845 (November 2, 2023), 88 FR 87156 (December 15, 2023) (Security-Based Swap Execution and Registration and Regulation of Security-Based Swap Execution Facilities) (adopting new Regulation SE, consisting of 17 CFR 242.800 through 17 CFR 242.835), effective February 13, 2024).

⁷ See ICE Swap Trade, LLC Submission No. 25-02 (SBSF-ICES-2025-002).

under Rule 242.806 or 242.807 of Regulation SE before such amendment or repeal may be effectuated, then such amendment or repeal shall not be effectuated until so filed with or filed with and approved by the Commission.

ICE Holdings Proposed Certificate of Incorporation

The ICE Holdings Current Certificate of Incorporation would be amended as follows.

- A new paragraph would be added to Article V(A) (Voting Limitations) as follows (all text new):

4. In addition to the limitations in subsections 1–3 above of this Section A of Article V, for so long as the Corporation shall directly or indirectly control a security-based swap execution facility registered under Section 3D of the Exchange Act (each security-based swap execution facility so controlled, an “*SBSEF*”), no SBSEF Member (as defined below), either alone or together with its Related Persons, shall be entitled directly or indirectly to vote, cause the voting of, or give any consent or proxy with respect to the voting of, any interest that exceeds 20% of the voting power of any class of securities or of other ownership interest in the Corporation (such threshold being hereinafter referred to as the “*SBSEF Voting Limitation*”), and the Corporation shall disregard any such votes purported to be cast in excess of the SBSEF Voting Limitation.

- The text after “enforced against such Record Owner” in current Article V(A)(5) (Article V(A)(6) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed deletion in brackets, proposed additions italicized):

in a manner that will accomplish the Voting Limitation, [and] the Recalculated Voting Limitation *and the SBSEF Voting Limitation applicable to such Person and its Related Persons.*

- Paragraphs (d) and (e) of the definition of “Related Persons” in current Article V(A)(10) (Article V(A)(11) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed additions italicized):

(d) in the case of a Person that is a Member *or SBSEF Member*, any Person that is associated with such Person (as determined using the definition of “person associated with a member” as defined under Section 3(a)(21) of the Exchange Act *(with references therein to a national securities exchange being deemed to include a security-based swap execution facility)*);

(e) in the case of a Person that is a natural person and is a Member *or*

SBSEF Member, any broker or dealer that is also a Member *or SBSEF Member* with which such Person is associated (as determined using the definition of “person associated with a member” as defined under Section 3(a)(21) of the Exchange Act *(with references therein to a national securities exchange being deemed to include a security-based swap execution facility)*);

- The definition of “SBSEF Member” would be added as new Article V(A)(12), as follows (all text new):

12. “*SBSEF Member*” means, with respect to a security-based swap execution facility, a Person that is a “member” within the meaning of Rule 242.802 of Regulation SE under the Exchange Act.

- A new paragraph would be added to Article V(B) (Ownership Concentration Limitation) as follows (all text new):

5. In addition to the limitations in subsections 1–4 above of this Section B of Article V, for so long as the Corporation shall directly or indirectly control any SBSEF, no SBSEF Member, either alone or together with its Related Persons, shall be permitted at any time to own, directly or indirectly, 20% or more of any class of voting securities or of other voting interest in the Corporation (the “*SBSEF Concentration Limitation*”). If any SBSEF Member, either alone or together with its Related Persons, at any time beneficially owns voting securities or other voting interest in the Corporation in excess of the SBSEF Concentration Limitation, such SBSEF Member and its Related Persons shall be obligated to sell promptly, and the Corporation shall be obligated to purchase promptly, at a price equal to the par value of such voting securities or other voting interest and to the extent funds are legally available therefor, that number of voting securities or other voting interest of the Corporation necessary so that such SBSEF Member, together with its Related Persons, shall beneficially own, directly or indirectly, less than 20% of any class of voting securities or of other voting interest in the Corporation, after taking into account that such repurchased voting securities or other voting interest shall become treasury shares and shall no longer be deemed to be outstanding.

- The second clause of current Article V(B)(5) (Article V(B)(6) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed additions italicized):

provided, however, that, if any Transfer of any shares of stock of the Corporation shall cause any Person, either alone or together with its Related Persons, at any time to beneficially own

shares of stock of the Corporation in excess of the Concentration Limitation *or SBSEF Concentration Limitation*, such Person and its Related Persons shall be obligated to sell promptly, and the Corporation shall be obligated to purchase promptly, shares of stock of the Corporation as specified in Section B.4 *or B.5, as applicable*, of this ARTICLE V.

- The first sentence of current Article V(B)(6) (Article V(A)(7) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed addition italicized):

If any share of Common Stock shall be represented by a certificate, a legend shall be placed on such certificate to the effect that such share of Common Stock is subject to the Concentration Limitations *and SBSEF Concentration Limitation* as set in Section B of this Article V.

- The final clause of Article V(C)(2) (Procedure for Repurchasing Stock) would be amended to add “*or SBSEF Concentration Limitation*” after “Concentration Limitation”.

- Subclauses (i) and (ii) of the first sentence of Article V(D) (Right to Information; Determinations by the Board of Directors) would be amended as follows (proposed deletion in brackets, proposed additions italicized):

(i) to be subject to the Voting Limitation, [or] the Recalculated Voting Limitation *or the SBSEF Voting Limitation*, (ii) to own beneficially (within the meaning of Rules 13d–3 and 13d–5 under the Exchange Act) shares of stock of the Corporation entitled to vote on any matter in excess of the Concentration Limitation *or SBSEF Concentration Limitation*,

- The parenthetical in the first sentence of Article IX(B) (Quorum) would be amended as follows (proposed deletions in brackets, proposed additions italicized):

(it being understood that any shares in excess of the Voting Limitation, [or] the Recalculated Voting Limitation *or the SBSEF Voting Limitation* shall not be counted as present at the meeting and shall not be counted as outstanding shares of stock of the Corporation for purposes of determining whether there is a quorum, unless and only to the extent that the Voting Limitation or the Recalculated Voting Limitation, as applicable, shall have been duly waived pursuant to Section A or Section B of ARTICLE V).

Change in Registered Office

ICE and ICE Holdings are corporations organized under the laws of the State of Delaware. As such, they are both required to have and maintain a

registered office and registered agent in the State of Delaware.⁸

The Exchange proposes to change the address of the registered office in both Proposed Certificates to reflect the move of the office of the registered agent. No change is proposed to the registered agent. Accordingly, Article II of both Proposed Certificates would be amended to provide that the address of the registered office in the State of Delaware, County of New Castle, is 1521 Concord Pike, Suite 201, Wilmington, Delaware 19803.

Other Changes

The Exchange proposes to make changes that are conforming or technical in nature. All are non-substantive.

ICE Proposed Certificate of Incorporation

References to the “Sixth Amended and Restated Certificate of Incorporation” and the “Fifth Amended and Restated Certificate of Incorporation” in the titles, introductory paragraphs, and signature lines would be changed to refer to the “Seventh Amended and Restated Certificate of Incorporation” and “Sixth Amended and Restated Certificate of Incorporation,” respectively.

The date of effectiveness and execution in the introductory certifications and signature line would be updated.

ICE Holdings Proposed Certificate of Incorporation

References to the “Ninth Amended and Restated Certificate of Incorporation” and the “Eighth Amended and Restated Certificate of Incorporation” in the titles, introductory paragraphs, and signature lines would be changed to refer to the “Tenth Amended and Restated Certificate of Incorporation” and “Ninth Amended and Restated Certificate of Incorporation,” respectively.

The date of effectiveness and execution in the introductory certifications and signature line would be updated.

To conform to one style, those terms that are not already underlined when defined would be underlined [sic].⁹ In addition to the definitions that would be added, the already existing definitions are in the introductory paragraph, the numbered certifications that

immediately follow it, Article IV(A) (Classes and Series of Stock), Article IV(C) (Transfer Restrictions on Stock), and Article V(A)(1).

The word “commission” in Article IV(C) would be capitalized.

Paragraphs after proposed Article V(A)(4) and proposed Article V(B)(5) would be renumbered.

The cross reference in Article V(A)(6) would be renumbered from “Section A of ARTICLE VI” to “Section A of ARTICLE V”.

In Article X (Amendments), the parenthetical “(or the boards of directors of their successors)” would be deleted as unnecessary, because “Exchange” includes all ICE Holdings-controlled national securities exchanges.¹⁰

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,¹¹ in general, and furthers the objectives of Section 6(b)(1)¹² in particular, in that it enables the Exchange to be so organized as to have the capacity to be able to carry out the purposes of the Act and to comply, and to enforce compliance by its exchange members and persons associated with its exchange members, with the provisions of the Act, the rules and regulations thereunder, and the rules of the Exchange.

Together, the Proposed Certificates and IST Rule 410¹³ are consistent with the Act and the rules promulgated under the Act.

The Exchange believes that the proposed rule change would contribute to the orderly operation of the Exchange and would enable the Exchange to continue to be so organized as to have the capacity to carry out the purposes of the Exchange Act and comply and enforce compliance with the provisions of the Exchange Act by its members and persons associated with its members because none of the proposed changes to the Proposed Certificates substantively would impact the Exchange. Rather the proposed changes are solely concerned with SBSEFs, updating the address of the registered office in Delaware of ICE and ICE Holdings and making conforming changes.

Additionally, IST has advised the Exchange that IST Rule 410 would,

independently of these changes to the Proposed Certificates, provide the means to ensure that IST is in compliance with Rule 834(b).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address any competitive issue but rather is concerned solely with ensuring that IST is in compliance with Regulation SE, updating the address of the registered office in Delaware of ICE and ICE Holdings, and making non-substantive and conforming changes to the Current Certificates. No change is proposed to the certificate of incorporation or bylaws of the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁴ and Rule 19b-4(f)(6) thereunder.¹⁵

A proposed rule change filed under Rule 19b-4(f)(6)¹⁶ normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),¹⁷ the Commission may designate a shorter time if such action is consistent with the

¹⁴ 15 U.S.C. 78s(b)(3)(A)(iii).

¹⁵ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

¹⁶ 17 CFR 240.19b-4(f)(6).

¹⁷ 17 CFR 240.19b-4(f)(6)(iii).

⁸ See Del. Code tit 8, §§ 131 and 132.

⁹ For example, “(the ‘Corporation’)” would become underlined [sic]. For compliance with Federal Register publication requirements, the Commission added the term “underlined” here in place of a depiction of the term “Corporation” becoming underlined [sic].

¹⁰ See the definition of “Exchange” in ICE Holdings Current Certificate of Incorporation, Article V(A)(1). No change to the definition is proposed.

¹¹ 15 U.S.C. 78f(b).

¹² 15 U.S.C. 78f(b)(1).

¹³ See ICE Swap Trade, LLC Submission No. 25-02 (SBSF-ICES-2025-002).

protection of investors and the public interest.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) ¹⁸ of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NYSENAT-2025-13 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-NYSENAT-2025-13. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also

will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NYSENAT-2025-13 and should be submitted on or before July 22, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁹

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-103331; File No. SR-NYSEAMER-2025-35]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Sixth Amended and Restated Certificate of Incorporation of Intercontinental Exchange, Inc. and Ninth Amended and Restated Certificate of Incorporation of Intercontinental Exchange Holdings, Inc.

June 26, 2025.

Pursuant to Section 19(b)(1) ¹ of the Securities Exchange Act of 1934 ("Act") ² and Rule 19b-4 thereunder,³ notice is hereby given that on June 16, 2025, NYSE American LLC ("NYSE American" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization.⁴ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Sixth Amended and Restated Certificate of Incorporation of Intercontinental

Exchange, Inc. ("ICE") and Ninth Amended and Restated Certificate of Incorporation of Intercontinental Exchange Holdings, Inc. ("ICE Holdings") to reflect regulations relating to security-based swap execution facilities ("SBSEFs"), update the registered office in the State of Delaware, and make non-substantive and conforming changes. The proposed rule change is available on the Exchange's website at www.nyse.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the ICE Current Certificate of Incorporation and ICE Holdings Current Certificate of Incorporation (together, the "Current Certificates") to reflect regulations relating to SBSEFs, update the registered office in the State of Delaware, and make non-substantive and conforming changes.⁵ No change is proposed to the operating agreement of the Exchange.

The changes to the ICE Current Certificate of Incorporation described herein would become operative upon the proposed Seventh Amended and Restated Certificate of Incorporation ("ICE Proposed Certificate of Incorporation") becoming effective pursuant to its filing with the Secretary of State of the State of Delaware. The changes to the ICE Holdings Current Certificate of Incorporation described herein would become operative upon the proposed Tenth Amended and

¹⁹ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

⁴ For compliance with **Federal Register** publication requirements, the Commission slightly edited note 9, *infra*.

⁵ ICE is the sole shareholder of ICE Holdings. ICE Holdings is the parent company of ICE Swap Trade, LLC. ICE Holdings is also the sole shareholder of NYSE Holdings LLC, which is the sole shareholder of NYSE Group, Inc., the parent company of the Exchange.

¹⁸ 15 U.S.C. 78s(b)(2)(B).

Restated Certificate of Incorporation (“ICE Holdings Proposed Certificate of Incorporation” and, together with the ICE Proposed Certificate of Incorporation, the “Proposed Certificates”) becoming effective pursuant to its filing with the Secretary of State of the State of Delaware.

Changes Related to SBSEFs

Securities and Exchange Commission (“Commission”) regulations extend limitations on stockholder voting and ownership to SBSEFs.⁶ Because ICE’s subsidiary ICE Swap Trade, LLC (“IST”) has registered with the Commission as an SBSEF, these Commission regulations apply.

IST has adopted Rule 410 (Ownership Limitation),⁷ which IST has advised the Exchange was designed to incorporate the requirements of 17 CFR 242.834 (“Rule 834”) into the rules of the SBSEF. Additionally, ICE and ICE Holdings intend to amend their Current Certificates as described below.

ICE Proposed Certificate of Incorporation

The ICE Current Certificate of Incorporation would be amended as follows.

First, Article V (Limitations on Voting and Ownership) has limitations on stockholder voting and ownership that apply so long as ICE directly or indirectly controls a national securities exchange registered under the Act, such as the Exchange. These would be amended to also apply so long as ICE directly or indirectly controls a SBSEF registered under the Exchange Act, as follows:

- The first sentence of Article V(A)(1) (Voting Limitation), would be amended to add “or a security-based swap execution facility registered under Section 3D of the Exchange Act” immediately prior to (a).

- The end of Article V(A)(2) would be modified by adding “(and, with respect to a security-based swap execution facility registered under Section 3D of the Exchange Act, such resolution shall have been submitted to the SEC under Rule 242.806 or 242.807 under Regulation SE under the Exchange Act, shall have been approved by the SEC (if applicable) and shall have become effective thereunder)” to the existing (c).

- Article V(A)(3)(a) would be modified by adding text to the start of (i) as follows (proposed additions italicized):

(i) will not impair the ability of any national securities exchange registered under Section 6 of the Exchange Act *or any security-based swap execution facility registered under Section 3D of the Exchange Act, in any case that is directly or indirectly controlled by the Corporation (each such national securities exchange or security-based swap execution facility so controlled, an “Exchange”)*.

- The definition of “Member” in Article V(A)(8) would be modified as follows (proposed additions italicized): “Member” shall mean, *with respect to any national securities exchange, a Person that is a “member” of an Exchange within the meaning of Section 3(a)(3)(A) of the Exchange Act or, with respect to a security-based swap execution facility, a Person that is a “member” within the meaning of Rule 242.802 of Regulation SE under the Exchange Act.*

- The definition of “Related Persons” in Article V(A)(10) would be modified as follows (proposed additions italicized):

(d) in the case of a Person that is a Member, any Person that is associated with such Person (as determined using the definition of “person associated with a member” as defined under Section 3(a)(21) of the Exchange Act *(with references therein to a national securities exchange being deemed to include a security-based swap execution facility)*);

(e) in the case of a Person that is a natural person and is a Member, any broker or dealer that is also a Member with which such Person is associated (as determined using the definition of “person associated with a member” as defined under Section 3(a)(21) of the Exchange Act *(with references therein to a national securities exchange being deemed to include a security-based swap execution facility)*);

- The end of the concentration limits in Article V(B)(2) (Ownership Concentration Limitation) would be modified by adding the following parenthetical to the existing (c): “(and, with respect to an Exchange that is a security-based swap execution facility, such resolution shall have been submitted to the SEC pursuant to Rule 242.806 or 242.807 of Regulation SE under the Exchange Act, shall have been approved by the SEC (if applicable) and shall have become effective thereunder)”.

Second, Article X (Amendments) of the ICE Current Certificate of

Incorporation requires any amendment to, or repeal of any provision in, the ICE Current Certification of Incorporation to be filed with, or filed with and approved by, the Commission. These would be amended to also apply so long as ICE directly or indirectly controls a SBSEF registered under the Exchange Act.

To do so, the second sentence of Article X would be amended to add “(or, in the case of a security-based swap execution facility, Rule 242.806 or 242.807 under Regulation SE under the Exchange Act)” immediately following “the rules promulgated thereunder”. In this way, the ICE Proposed Certificate of Incorporation would provide that, if the board of directors of any controlled SBSEF determines that any amendment or repeal must be filed with or filed with and approved by the Commission under Rule 242.806 or 242.807 of Regulation SE before such amendment or repeal may be effectuated, then such amendment or repeal shall not be effectuated until so filed with or filed with and approved by the Commission.

ICE Holdings Proposed Certificate of Incorporation

The ICE Holdings Current Certificate of Incorporation would be amended as follows.

- A new paragraph would be added to Article V(A) (Voting Limitations) as follows (all text new):

4. In addition to the limitations in subsections 1–3 above of this Section A of Article V, for so long as the Corporation shall directly or indirectly control a security-based swap execution facility registered under Section 3D of the Exchange Act (each security-based swap execution facility so controlled, an “SBSEF”), no SBSEF Member (as defined below), either alone or together with its Related Persons, shall be entitled directly or indirectly to vote, cause the voting of, or give any consent or proxy with respect to the voting of, any interest that exceeds 20% of the voting power of any class of securities or of other ownership interest in the Corporation (such threshold being hereinafter referred to as the “SBSEF Voting Limitation”), and the Corporation shall disregard any such votes purported to be cast in excess of the SBSEF Voting Limitation.

- The text after “enforced against such Record Owner” in current Article V(A)(5) (Article V(A)(6) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed deletion in brackets, proposed additions italicized):

in a manner that will accomplish the Voting Limitation, [and] the

⁶ See 17 CFR 242.834. See also Securities Exchange Act Release No. 98845 (November 2, 2023), 88 FR 87156 (December 15, 2023) (Security-Based Swap Execution and Registration and Regulation of Security-Based Swap Execution Facilities) (adopting new Regulation SE, consisting of 17 CFR 242.800 through 17 CFR 242.835), effective February 13, 2024).

⁷ See ICE Swap Trade, LLC Submission No. 25–02 (SBSF–ICES–2025–002).

Recalculated Voting Limitation *and the SBSEF Voting Limitation applicable to* such Person and its Related Persons.

- Paragraphs (d) and (e) of the definition of “Related Persons” in current Article V(A)(10) (Article V(A)(11) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed additions italicized):

(d) in the case of a Person that is a Member *or SBSEF Member*, any Person that is associated with such Person (as determined using the definition of “person associated with a member” as defined under Section 3(a)(21) of the Exchange Act *(with references therein to a national securities exchange being deemed to include a security-based swap execution facility)*);

(e) in the case of a Person that is a natural person and is a Member *or SBSEF Member*, any broker or dealer that is also a Member *or SBSEF Member* with which such Person is associated (as determined using the definition of “person associated with a member” as defined under Section 3(a)(21) of the Exchange Act *(with references therein to a national securities exchange being deemed to include a security-based swap execution facility)*);

- The definition of “SBSEF Member” would be added as new Article V(A)(12), as follows (all text new):

12. “*SBSEF Member*” means, with respect to a security-based swap execution facility, a Person that is a “member” within the meaning of Rule 242.802 of Regulation SE under the Exchange Act.

- A new paragraph would be added to Article V(B) (Ownership Concentration Limitation) as follows (all text new):

5. In addition to the limitations in subsections 1–4 above of this Section B of Article V, for so long as the Corporation shall directly or indirectly control any SBSEF, no SBSEF Member, either alone or together with its Related Persons, shall be permitted at any time to own, directly or indirectly, 20% or more of any class of voting securities or of other voting interest in the Corporation (the “*SBSEF Concentration Limitation*”). If any SBSEF Member, either alone or together with its Related Persons, at any time beneficially owns voting securities or other voting interest in the Corporation in excess of the SBSEF Concentration Limitation, such SBSEF Member and its Related Persons shall be obligated to sell promptly, and the Corporation shall be obligated to purchase promptly, at a price equal to the par value of such voting securities or other voting interest and to the extent funds are legally available therefor, that

number of voting securities or other voting interest of the Corporation necessary so that such SBSEF Member, together with its Related Persons, shall beneficially own, directly or indirectly, less than 20% of any class of voting securities or of other voting interest in the Corporation, after taking into account that such repurchased voting securities or other voting interest shall become treasury shares and shall no longer be deemed to be outstanding.

- The second clause of current Article V(B)(5) (Article V(B)(6) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed additions italicized):

provided, however, that, if any Transfer of any shares of stock of the Corporation shall cause any Person, either alone or together with its Related Persons, at any time to beneficially own shares of stock of the Corporation in excess of the Concentration Limitation *or SBSEF Concentration Limitation*, such Person and its Related Persons shall be obligated to sell promptly, and the Corporation shall be obligated to purchase promptly, shares of stock of the Corporation as specified in Section B.4 *or B.5, as applicable*, of this ARTICLE V.

- The first sentence of current Article V(B)(6) (Article V(A)(7) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed addition italicized):

If any share of Common Stock shall be represented by a certificate, a legend shall be placed on such certificate to the effect that such share of Common Stock is subject to the Concentration Limitations *and SBSEF Concentration Limitation* as set in Section B of this Article V.

- The final clause of Article V(C)(2) (Procedure for Repurchasing Stock) would be amended to add “*or SBSEF Concentration Limitation*” after “Concentration Limitation”.

- Subclauses (i) and (ii) of the first sentence of Article V(D) (Right to Information; Determinations by the Board of Directors) would be amended as follows (proposed deletion in brackets, proposed additions italicized):

(i) to be subject to the Voting Limitation, [or] the Recalculated Voting Limitation *or the SBSEF Voting Limitation*, (ii) to own beneficially (within the meaning of Rules 13d–3 and 13d–5 under the Exchange Act) shares of stock of the Corporation entitled to vote on any matter in excess of the Concentration Limitation *or SBSEF Concentration Limitation*,

- The parenthetical in the first sentence of Article IX(B) (Quorum) would be amended as follows (proposed

deletions in brackets, proposed additions italicized):

(it being understood that any shares in excess of the Voting Limitation, [or] the Recalculated Voting Limitation *or the SBSEF Voting Limitation* shall not be counted as present at the meeting and shall not be counted as outstanding shares of stock of the Corporation for purposes of determining whether there is a quorum, unless and only to the extent that the Voting Limitation or the Recalculated Voting Limitation, as applicable, shall have been duly waived pursuant to Section A or Section B of ARTICLE V).

Change in Registered Office

ICE and ICE Holdings are corporations organized under the laws of the State of Delaware. As such, they are both required to have and maintain a registered office and registered agent in the State of Delaware.⁸

The Exchange proposes to change the address of the registered office in both Proposed Certificates to reflect the move of the office of the registered agent. No change is proposed to the registered agent. Accordingly, Article II of both Proposed Certificates would be amended to provide that the address of the registered office in the State of Delaware, County of New Castle, is 1521 Concord Pike, Suite 201, Wilmington, Delaware 19803.

Other Changes

The Exchange proposes to make changes that are conforming or technical in nature. All are non-substantive.

ICE Proposed Certificate of Incorporation

References to the “Sixth Amended and Restated Certificate of Incorporation” and the “Fifth Amended and Restated Certificate of Incorporation” in the titles, introductory paragraphs, and signature lines would be changed to refer to the “Seventh Amended and Restated Certificate of Incorporation” and “Sixth Amended and Restated Certificate of Incorporation,” respectively.

The date of effectiveness and execution in the introductory certifications and signature line would be updated.

ICE Holdings Proposed Certificate of Incorporation

References to the “Ninth Amended and Restated Certificate of Incorporation” and the “Eighth Amended and Restated Certificate of Incorporation” in the titles, introductory

⁸ See Del. Code tit 8, §§ 131 and 132.

paragraphs, and signature lines would be changed to refer to the “Tenth Amended and Restated Certificate of Incorporation” and “Ninth Amended and Restated Certificate of Incorporation,” respectively.

The date of effectiveness and execution in the introductory certifications and signature line would be updated.

To conform to one style, those terms that are not already underlined when defined would be underlined [sic].⁹ In addition to the definitions that would be added, the already existing definitions are in the introductory paragraph, the numbered certifications that immediately follow it, Article IV(A) (Classes and Series of Stock), Article IV(C) (Transfer Restrictions on Stock), and Article V(A)(1).

The word “commission” in Article IV(C) would be capitalized.

Paragraphs after proposed Article V(A)(4) and proposed Article V(B)(5) would be renumbered.

The cross reference in Article V(A)(6) would be renumbered from “Section A of ARTICLE VI” to “Section A of ARTICLE V”.

In Article X (Amendments), the parenthetical “(or the boards of directors of their successors)” would be deleted as unnecessary, because “Exchange” includes all ICE Holdings-controlled national securities exchanges.¹⁰

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,¹¹ in general, and furthers the objectives of Section 6(b)(1)¹² in particular, in that it enables the Exchange to be so organized as to have the capacity to be able to carry out the purposes of the Act and to comply, and to enforce compliance by its exchange members and persons associated with its exchange members, with the provisions of the Act, the rules and regulations thereunder, and the rules of the Exchange.

Together, the Proposed Certificates and IST Rule 410¹³ are consistent with

the Act and the rules promulgated under the Act.

The Exchange believes that the proposed rule change would contribute to the orderly operation of the Exchange and would enable the Exchange to continue to be so organized as to have the capacity to carry out the purposes of the Exchange Act and comply and enforce compliance with the provisions of the Exchange Act by its members and persons associated with its members because none of the proposed changes to the Proposed Certificates substantively would impact the Exchange. Rather the proposed changes are solely concerned with SBSEFs, updating the address of the registered office in Delaware of ICE and ICE Holdings and making conforming changes.

Additionally, IST has advised the Exchange that IST Rule 410 would, independently of these changes to the Proposed Certificates, provide the means to ensure that IST is in compliance with Rule 834(b).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address any competitive issue but rather is concerned solely with ensuring that IST is in compliance with Regulation SE, updating the address of the registered office in Delaware of ICE and ICE Holdings, and making non-substantive and conforming changes to the Current Certificates. No change is proposed to the operating agreement of the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become

effective pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁴ and Rule 19b-4(f)(6) thereunder.¹⁵

A proposed rule change filed under Rule 19b-4(f)(6)¹⁶ normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),¹⁷ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)¹⁸ of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NYSEAMER-2025-35 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-NYSEAMER-2025-35. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use

¹⁴ 15 U.S.C. 78s(b)(3)(A)(iii).

¹⁵ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

¹⁶ 17 CFR 240.19b-4(f)(6).

¹⁷ 17 CFR 240.19b-4(f)(6)(iii).

¹⁸ 15 U.S.C. 78s(b)(2)(B).

⁹ For example, “(the ‘Corporation’)” would become underlined [sic]. For compliance with Federal Register publication requirements, the Commission added the term “underlined” here in place of a depiction of the term “Corporation” becoming underlined [sic].

¹⁰ See the definition of “Exchange” in ICE Holdings Current Certificate of Incorporation, Article V(A)(1). No change to the definition is proposed.

¹¹ 15 U.S.C. 78f(b).

¹² 15 U.S.C. 78f(b)(1).

¹³ See ICE Swap Trade, LLC Submission No. 25-02 (SBSF-ICES-2025-002).

only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NYSEAMER-2025-35 and should be submitted on or before July 22, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁹

Sherry R. Haywood,
Assistant Secretary.

[FR Doc. 2025-12215 Filed 6-30-25; 8:45 am]

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-103335; File No. SR-NYSEARCA-2025-44]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Sixth Amended and Restated Certificate of Incorporation of Intercontinental Exchange, Inc. and Ninth Amended and Restated Certificate of Incorporation of Intercontinental Exchange Holdings, Inc.

June 26, 2025.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 ("Act")² and Rule 19b-4 thereunder,³ notice is hereby given that on June 16,

2025, NYSE Arca, Inc. ("NYSE Arca" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization.⁴ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Sixth Amended and Restated Certificate of Incorporation of Intercontinental Exchange, Inc. ("ICE") and Ninth Amended and Restated Certificate of Incorporation of Intercontinental Exchange Holdings, Inc. ("ICE Holdings") to reflect regulations relating to security-based swap execution facilities ("SBSEFs"), update the registered office in the State of Delaware, and make non-substantive and conforming changes. The proposed rule change is available on the Exchange's website at www.nyse.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the ICE Current Certificate of Incorporation and ICE Holdings Current Certificate of Incorporation (together, the "Current Certificates") to reflect regulations relating to SBSEFs, update the registered office in the State of Delaware, and make non-substantive

and conforming changes.⁵ No change is proposed to the certificate of incorporation or bylaws of the Exchange.

The changes to the ICE Current Certificate of Incorporation described herein would become operative upon the proposed Seventh Amended and Restated Certificate of Incorporation ("ICE Proposed Certificate of Incorporation") becoming effective pursuant to its filing with the Secretary of State of the State of Delaware. The changes to the ICE Holdings Current Certificate of Incorporation described herein would become operative upon the proposed Tenth Amended and Restated Certificate of Incorporation ("ICE Holdings Proposed Certificate of Incorporation" and, together with the ICE Proposed Certificate of Incorporation, the "Proposed Certificates") becoming effective pursuant to its filing with the Secretary of State of the State of Delaware.

Changes Related to SBSEFs

Securities and Exchange Commission ("Commission") regulations extend limitations on stockholder voting and ownership to SBSEFs.⁶ Because ICE's subsidiary ICE Swap Trade, LLC ("IST") has registered with the Commission as an SBSEF, these Commission regulations apply.

IST has adopted Rule 410 (Ownership Limitation),⁷ which IST has advised the Exchange was designed to incorporate the requirements of 17 CFR 242.834 ("Rule 834") into the rules of the SBSEF. Additionally, ICE and ICE Holdings intend to amend their Current Certificates as described below.

ICE Proposed Certificate of Incorporation

The ICE Current Certificate of Incorporation would be amended as follows.

First, Article V (Limitations on Voting and Ownership) has limitations on stockholder voting and ownership that apply so long as ICE directly or indirectly controls a national securities exchange registered under the Act, such

⁵ ICE is the sole shareholder of ICE Holdings. ICE Holdings is the parent company of ICE Swap Trade, LLC. ICE Holdings is also the sole shareholder of NYSE Holdings LLC, which is the sole shareholder of NYSE Group, Inc., the parent company of the Exchange.

⁶ See 17 CFR 242.834. See also Securities Exchange Act Release No. 98845 (November 2, 2023), 88 FR 87156 (December 15, 2023) (Security-Based Swap Execution and Registration and Regulation of Security-Based Swap Execution Facilities) (adopting new Regulation SE, consisting of 17 CFR 242.800 through 17 CFR 242.835), effective February 13, 2024).

⁷ See ICE Swap Trade, LLC Submission No. 25-02 (SBSF-ICES-2025-002).

¹⁹ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

⁴ For compliance with **Federal Register** publication requirements, the Commission slightly edited note 9, *infra*.

as the Exchange. These would be amended to also apply so long as ICE directly or indirectly controls a SBSEF registered under the Exchange Act, as follows:

- The first sentence of Article V(A)(1) (Voting Limitation), would be amended to add “or a security-based swap execution facility registered under Section 3D of the Exchange Act” immediately prior to (a).

- The end of Article V(A)(2) would be modified by adding “(and, with respect to a security-based swap execution facility registered under Section 3D of the Exchange Act, such resolution shall have been submitted to the SEC under Rule 242.806 or 242.807 under Regulation SE under the Exchange Act, shall have been approved by the SEC (if applicable) and shall have become effective thereunder)” to the existing (c).

- Article V(A)(3)(a) would be modified by adding text to the start of (i) as follows (proposed additions italicized):

(i) will not impair the ability of any national securities exchange registered under Section 6 of the Exchange Act *or any security-based swap execution facility registered under Section 3D of the Exchange Act, in any case that is directly or indirectly controlled by the Corporation (each such national securities exchange or security-based swap execution facility so controlled, an “Exchange”)*,

- The definition of “Member” in Article V(A)(8) would be modified as follows (proposed additions italicized): “Member” shall mean, *with respect to any national securities exchange, a Person that is a “member” of an Exchange within the meaning of Section 3(a)(3)(A) of the Exchange Act or, with respect to a security-based swap execution facility, a Person that is a “member” within the meaning of Rule 242.802 of Regulation SE under the Exchange Act.*

- The definition of “Related Persons” in Article V(A)(10) would be modified as follows (proposed additions italicized):

(d) in the case of a Person that is a Member, any Person that is associated with such Person (as determined using the definition of “person associated with a member” as defined under Section 3(a)(21) of the Exchange Act *(with references therein to a national securities exchange being deemed to include a security-based swap execution facility)*);

(e) in the case of a Person that is a natural person and is a Member, any broker or dealer that is also a Member with which such Person is associated (as determined using the definition of

“person associated with a member” as defined under Section 3(a)(21) of the Exchange Act *(with references therein to a national securities exchange being deemed to include a security-based swap execution facility)*);

- The end of the concentration limits in Article V(B)(2) (Ownership Concentration Limitation) would be modified by adding the following parenthetical to the existing (c): “(and, with respect to an Exchange that is a security-based swap execution facility, such resolution shall have been submitted to the SEC pursuant to Rule 242.806 or 242.807 of Regulation SE under the Exchange Act, shall have been approved by the SEC (if applicable) and shall have become effective thereunder)”.

Second, Article X (Amendments) of the ICE Current Certificate of Incorporation requires any amendment to, or repeal of any provision in, the ICE Current Certification of Incorporation to be filed with, or filed with and approved by, the Commission. These would be amended to also apply so long as ICE directly or indirectly controls a SBSEF registered under the Exchange Act.

To do so, the second sentence of Article X would be amended to add “(or, in the case of a security-based swap execution facility, Rule 242.806 or 242.807 under Regulation SE under the Exchange Act)” immediately following “the rules promulgated thereunder”. In this way, the ICE Proposed Certificate of Incorporation would provide that, if the board of directors of any controlled SBSEF determines that any amendment or repeal must be filed with or filed with and approved by the Commission under Rule 242.806 or 242.807 of Regulation SE before such amendment or repeal may be effectuated, then such amendment or repeal shall not be effectuated until so filed with or filed with and approved by the Commission.

ICE Holdings Proposed Certificate of Incorporation

The ICE Holdings Current Certificate of Incorporation would be amended as follows.

- A new paragraph would be added to Article V(A) (Voting Limitations) as follows (all text new):

4. In addition to the limitations in subsections 1–3 above of this Section A of Article V, for so long as the Corporation shall directly or indirectly control a security-based swap execution facility registered under Section 3D of the Exchange Act (each security-based swap execution facility so controlled, an “SBSEF”), no SBSEF Member (as defined below), either alone or together

with its Related Persons, shall be entitled directly or indirectly to vote, cause the voting of, or give any consent or proxy with respect to the voting of, any interest that exceeds 20% of the voting power of any class of securities or of other ownership interest in the Corporation (such threshold being hereinafter referred to as the “*SBSEF Voting Limitation*”), and the Corporation shall disregard any such votes purported to be cast in excess of the SBSEF Voting Limitation.

- The text after “enforced against such Record Owner” in current Article V(A)(5) (Article V(A)(6) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed deletion in brackets, proposed additions italicized):

in a manner that will accomplish the Voting Limitation, [and] the Recalculated Voting Limitation *and the SBSEF Voting Limitation applicable to such Person and its Related Persons.*

- Paragraphs (d) and (e) of the definition of “Related Persons” in current Article V(A)(10) (Article V(A)(11) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed additions italicized):

(d) in the case of a Person that is a Member *or SBSEF Member*, any Person that is associated with such Person (as determined using the definition of “person associated with a member” as defined under Section 3(a)(21) of the Exchange Act *(with references therein to a national securities exchange being deemed to include a security-based swap execution facility)*);

(e) in the case of a Person that is a natural person and is a Member *or SBSEF Member*, any broker or dealer that is also a Member *or SBSEF Member* with which such Person is associated (as determined using the definition of “person associated with a member” as defined under Section 3(a)(21) of the Exchange Act *(with references therein to a national securities exchange being deemed to include a security-based swap execution facility)*);

- The definition of “SBSEF Member” would be added as new Article V(A)(12), as follows (all text new):

12. “*SBSEF Member*” means, with respect to a security-based swap execution facility, a Person that is a “member” within the meaning of Rule 242.802 of Regulation SE under the Exchange Act.

- A new paragraph would be added to Article V(B) (Ownership Concentration Limitation) as follows (all text new):

5. In addition to the limitations in subsections 1–4 above of this Section B

of Article V, for so long as the Corporation shall directly or indirectly control any SBSEF, no SBSEF Member, either alone or together with its Related Persons, shall be permitted at any time to own, directly or indirectly, 20% or more of any class of voting securities or of other voting interest in the Corporation (the “*SBSEF Concentration Limitation*”). If any SBSEF Member, either alone or together with its Related Persons, at any time beneficially owns voting securities or other voting interest in the Corporation in excess of the SBSEF Concentration Limitation, such SBSEF Member and its Related Persons shall be obligated to sell promptly, and the Corporation shall be obligated to purchase promptly, at a price equal to the par value of such voting securities or other voting interest and to the extent funds are legally available therefor, that number of voting securities or other voting interest of the Corporation necessary so that such SBSEF Member, together with its Related Persons, shall beneficially own, directly or indirectly, less than 20% of any class of voting securities or of other voting interest in the Corporation, after taking into account that such repurchased voting securities or other voting interest shall become treasury shares and shall no longer be deemed to be outstanding.

- The second clause of current Article V(B)(5) (Article V(B)(6) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed additions italicized): provided, however, that, if any Transfer of any shares of stock of the Corporation shall cause any Person, either alone or together with its Related Persons, at any time to beneficially own shares of stock of the Corporation in excess of the Concentration Limitation or *SBSEF Concentration Limitation*, such Person and its Related Persons shall be obligated to sell promptly, and the Corporation shall be obligated to purchase promptly, shares of stock of the Corporation as specified in Section B.4 or B.5, as applicable, of this ARTICLE V.

- The first sentence of current Article V(B)(6) (Article V(A)(7) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed addition italicized):

If any share of Common Stock shall be represented by a certificate, a legend shall be placed on such certificate to the effect that such share of Common Stock is subject to the Concentration Limitations and *SBSEF Concentration Limitation* as set in Section B of this Article V.

- The final clause of Article V(C)(2) (Procedure for Repurchasing Stock)

would be amended to add “or SBSEF Concentration Limitation” after “Concentration Limitation”.

- Subclauses (i) and (ii) of the first sentence of Article V(D) (Right to Information; Determinations by the Board of Directors) would be amended as follows (proposed deletion in brackets, proposed additions italicized):

(i) to be subject to the Voting Limitation, [or] the Recalculated Voting Limitation or the *SBSEF Voting Limitation*, (ii) to own beneficially (within the meaning of Rules 13d–3 and 13d–5 under the Exchange Act) shares of stock of the Corporation entitled to vote on any matter in excess of the Concentration Limitation or *SBSEF Concentration Limitation*,

- The parenthetical in the first sentence of Article IX(B) (Quorum) would be amended as follows (proposed deletions in brackets, proposed additions italicized):

(it being understood that any shares in excess of the Voting Limitation, [or] the Recalculated Voting Limitation or the *SBSEF Voting Limitation* shall not be counted as present at the meeting and shall not be counted as outstanding shares of stock of the Corporation for purposes of determining whether there is a quorum, unless and only to the extent that the Voting Limitation or the Recalculated Voting Limitation, as applicable, shall have been duly waived pursuant to Section A or Section B of ARTICLE V).

Change in Registered Office

ICE and ICE Holdings are corporations organized under the laws of the State of Delaware. As such, they are both required to have and maintain a registered office and registered agent in the State of Delaware.⁸

The Exchange proposes to change the address of the registered office in both Proposed Certificates to reflect the move of the office of the registered agent. No change is proposed to the registered agent. Accordingly, Article II of both Proposed Certificates would be amended to provide that the address of the registered office in the State of Delaware, County of New Castle, is 1521 Concord Pike, Suite 201, Wilmington, Delaware 19803.

Other Changes

The Exchange proposes to make changes that are conforming or technical in nature. All are non-substantive.

⁸ See Del. Code tit 8, §§ 131 and 132.

ICE Proposed Certificate of Incorporation

References to the “Sixth Amended and Restated Certificate of Incorporation” and the “Fifth Amended and Restated Certificate of Incorporation” in the titles, introductory paragraphs, and signature lines would be changed to refer to the “Seventh Amended and Restated Certificate of Incorporation” and “Sixth Amended and Restated Certificate of Incorporation,” respectively.

The date of effectiveness and execution in the introductory certifications and signature line would be updated.

ICE Holdings Proposed Certificate of Incorporation

References to the “Ninth Amended and Restated Certificate of Incorporation” and the “Eighth Amended and Restated Certificate of Incorporation” in the titles, introductory paragraphs, and signature lines would be changed to refer to the “Tenth Amended and Restated Certificate of Incorporation” and “Ninth Amended and Restated Certificate of Incorporation,” respectively.

The date of effectiveness and execution in the introductory certifications and signature line would be updated.

To conform to one style, those terms that are not already underlined when defined would be underlined [sic].⁹ In addition to the definitions that would be added, the already existing definitions are in the introductory paragraph, the numbered certifications that immediately follow it, Article IV(A) (Classes and Series of Stock), Article IV(C) (Transfer Restrictions on Stock), and Article V(A)(1).

The word “commission” in Article IV(C) would be capitalized.

Paragraphs after proposed Article V(A)(4) and proposed Article V(B)(5) would be renumbered.

The cross reference in Article V(A)(6) would be renumbered from “Section A of ARTICLE VI” to “Section A of ARTICLE V”.

In Article X (Amendments), the parenthetical “(or the boards of directors of their successors)” would be deleted as unnecessary, because “Exchange” includes all ICE Holdings-

⁹ For example, “(the ‘Corporation’)” would become underlined [sic]. For compliance with Federal Register publication requirements, the Commission added the term “underlined” here in place of a depiction of the term “Corporation” becoming underlined [sic].

controlled national securities exchanges.¹⁰

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,¹¹ in general, and furthers the objectives of Section 6(b)(1)¹² in particular, in that it enables the Exchange to be so organized as to have the capacity to be able to carry out the purposes of the Act and to comply, and to enforce compliance by its exchange members and persons associated with its exchange members, with the provisions of the Act, the rules and regulations thereunder, and the rules of the Exchange.

Together, the Proposed Certificates and IST Rule 410¹³ are consistent with the Act and the rules promulgated under the Act.

The Exchange believes that the proposed rule change would contribute to the orderly operation of the Exchange and would enable the Exchange to continue to be so organized as to have the capacity to carry out the purposes of the Exchange Act and comply and enforce compliance with the provisions of the Exchange Act by its members and persons associated with its members because none of the proposed changes to the Proposed Certificates substantively would impact the Exchange. Rather the proposed changes are solely concerned with SBSEFs, updating the address of the registered office in Delaware of ICE and ICE Holdings and making conforming changes.

Additionally, IST has advised the Exchange that IST Rule 410 would, independently of these changes to the Proposed Certificates, provide the means to ensure that IST is in compliance with Rule 834(b).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address any competitive issue but rather is concerned solely with ensuring that IST is in compliance with Regulation SE, updating the address of the registered office in Delaware of ICE and

ICE Holdings, and making non-substantive and conforming changes to the Current Certificates. No change is proposed to the certificate of incorporation or bylaws of the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁴ and Rule 19b-4(f)(6) thereunder.¹⁵

A proposed rule change filed under Rule 19b-4(f)(6)¹⁶ normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),¹⁷ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)¹⁸ of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NYSEARCA-2025-44 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-NYSEARCA-2025-44. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NYSEARCA-2025-44 and should be submitted on or before July 22, 2025.

¹⁰ See the definition of "Exchange" in ICE Holdings Current Certificate of Incorporation, Article V(A)(1). No change to the definition is proposed.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-103334; File No. SR-FINRA-2025-001]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing of Partial Amendment No. 1 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Partial Amendment No. 1, To Exempt Certain Business Development Companies From FINRA Rules 5130 (Restrictions on the Purchase and Sale of Initial Equity Public Offerings) and 5131 (New Issue Allocations and Distributions)

June 26, 2025.

I. Introduction

On March 25, 2025, the Financial Industry Regulatory Authority, Inc. (“FINRA”) filed with the Securities Exchange Commission (“SEC” or “Commission”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Exchange Act”) ¹ and Rule 19b-4 thereunder,² a proposed rule change (SR-FINRA-2025-001) to exempt certain business development companies, as that term is defined in Section 2(a)(48) of the Investment Company Act of 1940 (“Investment Company Act”), each a “BDC,” from FINRA Rule 5130 (Restrictions on the Purchase and Sale of Initial Equity Public Offerings) and from paragraph (b) (Spinning) of FINRA Rule 5131 (New Issue Allocations and Distributions).³ The proposed rule change was published for comment in the **Federal Register** on March 31, 2025.

On May 13, 2025, pursuant to Section 19(b)(2) of the Act,⁴ the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to approve or disapprove the

proposed rule change.⁵ On June 12, 2025, FINRA filed a partial amendment to the proposed rule change (“Partial Amendment No. 1”).⁶ The Commission received two comment letters in response to the publication of the Notice,⁷ as well as a response letter from FINRA.⁸ The Commission is publishing this Order to provide notice of the filing of, and to solicit from interested persons comments on, Partial Amendment No. 1, and is approving on an accelerated basis the proposed rule change, as modified by Partial Amendment No. 1 (“Amended Proposal”).

II. Description of the Proposed Rule Change

As described in more detail in the Notice,⁹ FINRA proposed to amend FINRA Rule 5130 by adding a categorical exemption for non-traded BDCs in new paragraph (c)(12) and, by reference, in FINRA Rule 5131(b)(2) (together, the “proposed exemption”). The proposed exemption, as originally included in the Notice, would have applied to a BDC, “the shares of which are registered under the Securities Act [of 1933].” ¹⁰ FINRA stated in the Notice that the proposed exemption would allow non-traded BDCs, and therefore investors in non-traded BDCs, to more easily obtain access to new issues in so much as they could be included in the allowable 30 percent of a non-traded BDC’s portfolio.¹¹ In addition, the proposed exemption would expand the pool of investors who can participate in initial public offerings (“IPOs”) through their investment in a non-traded BDC and would allow non-traded BDCs to

more easily diversify their portfolios with new issues to the extent that such investments are consistent with all other applicable regulations.¹²

III. Summary of Comments, FINRA’s Response, and Commission Findings

After reviewing the Notice, Partial Amendment No. 1, and comment letters received, the Commission finds that the Amended Proposal is consistent with the requirements of the Exchange Act and the rules and regulations thereunder applicable to a national securities association.¹³ In particular, the Commission finds that the Amended Proposal is consistent with Section 15A(b)(6) of the Exchange Act,¹⁴ which requires, among other things, that FINRA rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest. The Commission also finds that the Amended Proposal, is consistent, in particular, with Section 15A(b)(9) of the Exchange Act,¹⁵ which requires that FINRA rules not impose any burdens on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act.

The Amended Proposal will protect investors and the public interest by allowing non-traded and private BDCs,¹⁶ which are subject to the investor protections provided by the Investment Company Act and the applicable rules adopted thereunder, to more easily invest in new issues and to diversify their portfolios, without diminishing investor protection. It will promote capital formation by expanding access to IPOs through the entities of non-traded BDCs and private BDCs. The Amended Proposal is designed to prevent fraudulent and manipulative acts and practices by maintaining the integrity of the public offering process through the requirement that BDCs not be formed or maintained for the specific purpose of permitting restricted persons to invest in new issues.¹⁷

¹² See Notice, 90 FR 14286.

¹³ In approving this rule change, the Commission has considered the rule’s impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

¹⁴ 15 U.S.C. 78o-3(b)(6).

¹⁵ 15 U.S.C. 78o-3(b)(9).

¹⁶ FINRA stated that the term “private BDC” refers to a BDC that is offered in a private placement. See Partial Amendment No. 1, *supra* note 6, at 3 n.4.

¹⁷ See *Regulatory Notice* 23-09 (May 2023) (“FINRA promotes the capital raising process through appropriately tailored rules for its members that are designed to promote transparency and to establish important standards of conduct for the benefit of all market participants, including

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ See Securities Exchange Act Release No. 102723 (March 25, 2025), 90 FR 14284 (March 31, 2025) (“Notice”).

⁴ 15 U.S.C. 78s(b)(2).

⁵ See Securities Exchange Act Release No. 103033 (May 13, 2025), 90 FR 21377 (May 19, 2025). The Commission designated June 29, 2025, as the date by which the Commission shall approve or disapprove or institute proceedings to determine whether to approve or disapprove, the proposed rule change.

⁶ See Partial Amendment No. 1, available at https://www.finra.org/sites/default/files/2025-06/FINRA-2025-001_Partial_A-1.pdf. In Partial Amendment No. 1, FINRA requested that the Commission find good cause pursuant to Section 19(b)(2) of the Exchange Act for approving the proposed rule change, as modified by Partial Amendment No. 1, prior to the thirtieth day after its publication in the **Federal Register**.

⁷ Comments are available at: <https://www.sec.gov/comments/sr-finra-2025-001/srfinra2025001.htm>.

⁸ See Letter from Ilana Reid, Associate General Counsel, FINRA (June 12, 2025) (“FINRA Response”), available at <https://www.sec.gov/comments/sr-finra-2025-001/srfinra2025001.htm>.

⁹ See Notice, 90 FR 14284-88.

¹⁰ See Notice, 90 FR 14285. As discussed below, in Part III, Partial Amendment No. 1 changed this text to state “provided that the business development company was not formed or maintained for the specific purpose of permitting restricted persons to invest in new issues.” See Partial Amendment No. 1, *supra* note 6, at 5.

¹¹ See Notice, 90 FR 14286.

The Commission received two comment letters on the proposed rule change.¹⁸ Both commenters stated their general support for the proposed rule change,¹⁹ one of which suggested that the proposed exemption should be expanded to cover all BDCs, including privately offered BDCs.²⁰ ICI stated that it is “difficult, if not impossible” for private BDCs, similar to non-traded BDCs, to satisfy the representation requirements of FINRA Rules 5130 and 5131.²¹ In addition, ICI stated that BDCs are subject to “extensive” regulation by the Commission under the Investment Company Act and that “[i]t does not logically flow” that privately offered closed-end funds can avail themselves of an exemption from FINRA Rules 5130 and 5131 while a private BDC cannot qualify for the proposed exemption.²² ICI also stated that extending the proposed exemption to private BDCs would not impact the integrity of the public offering process because private BDCs are subject to the same investment limitations under Section 55(a) of the Investment Company Act as non-traded BDCs are and are therefore unlikely to be formed for the purpose of investing in new issues.²³

In response, Partial Amendment No. 1 amended the proposed rule change to include private BDCs. FINRA stated that it generally agrees with ICI that extending the proposed exemption to private BDCs would not impact the integrity of the public offering process because private BDCs are subject to extensive regulation under the Investment Company Act, including the same investment limitations to which non-traded BDCs are subject.²⁴ FINRA stated that it was therefore amending the proposed rule change to exempt from FINRA Rule 5130 and FINRA Rule 5131(b) all BDCs, provided that the BDC was not formed or maintained for the specific purpose of permitting restricted persons to invest in new issues. According to FINRA, for purposes of the

exemption, the requirement that exempted BDCs not be formed or maintained for the specific purpose of permitting restricted persons to invest in new issues would further preserve the integrity of the public offering process.²⁵ FINRA stated that similar language appears in the exemption for foreign investment companies under FINRA Rule 5130(c)(6)(C).²⁶

The Commission agrees with FINRA that conditioning the proposed exemption on the requirement that a BDC not be formed or maintained for the purpose of circumventing the prohibition in FINRA Rule 5130 or 5131(b) will help to further mitigate the unlikely risk that an otherwise restricted or covered person may invest in a non-traded or private BDC for the purpose of investing in new issues.²⁷ Further, for the reasons discussed above, in this Part III, the Amended Proposal is designed to prevent fraudulent and manipulative acts and practices, as well as to promote just and equitable principles of trade, and does not impose any burdens on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act.

IV. Solicitation of Comments on Partial Amendment No. 1

Interested persons are invited to submit written data, views, and arguments concerning whether Partial Amendment No. 1 is consistent with the Exchange Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-FINRA-2025-001 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-FINRA-2025-001. This file number should be included on the subject line if used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will

post all comments on the Commission’s internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendment, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission’s Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of FINRA. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to the file number SR-FINRA-2025-001 and should be submitted on or before July 22, 2025.

V. Accelerated Approval of the Amended Proposal

The Commission finds good cause to approve Amended Proposal prior to the thirtieth day after the date of publication of notice of the filing of Partial Amendment No. 1 in the **Federal Register**.²⁸ In Partial Amendment No. 1, FINRA modified the proposed rule change—in direct response to comment received—to promote capital formation while maintaining the protections that FINRA Rules 5130 and 5131(b) are designed to provide. FINRA did not propose to change the substantive intent of the proposed rule change. To reduce ambiguity regarding the scope of the proposed rule change, FINRA instead proposed to remove the text “the shares of which are registered under the Securities Act” and replace it with “provided that the business development company was not formed or maintained for the specific purpose of permitting restricted persons to invest in new issues.” The basis for this partial amendment is the same as the basis for the original proposed rule change, which the Commission previously noticed for public comment.

After consideration of the two comments received on the proposed rule change, the Commission concludes

investors and issuers.”). See also Notice, 90 FR 14286.

¹⁸ See Letter from Kevin Ercoline, Assistant General Counsel, Investment Company Institute (April 21, 2025) (“ICI”); Letter from Anya Coverman, President and CEO, Institute for Portfolio Alternatives (April 21, 2025) (“IPA”).

¹⁹ See ICI, at 2; IPA, at 2.

²⁰ See ICI, at 2–3.

²¹ See ICI, at 2.

²² See ICI, at 3. ICI stated that a private fund is not subject to the Investment Company Act (and generally has a much higher investment standard reflecting the associated investor sophistication and risk tolerance attributes) while a BDC is subject to “extensive” regulation under the Investment Company Act. See ICI, at 3.

²³ ICI, at 3.

²⁴ See FINRA Response, *supra* note 8, at 3. See also Partial Amendment No. 1, *supra* note 6, at 4.

²⁵ See FINRA Response, *supra* note 8, at 4.

²⁶ In Partial Amendment No. 1, FINRA proposed to add the words “or maintained” to subparagraph (C) of FINRA Rule 5130(c)(6) to clarify that a foreign company cannot be formed or maintained for the purpose of circumventing the prohibition. See Partial Amendment No. 1, *supra* note 6, at 6.

²⁷ See FINRA Response, *supra* note 8, at 2.

²⁸ 15 U.S.C. 78s(b)(2).

that Partial Amendment No. 1 responds to comments received, adds clarity to the proposed rule change, and does not raise any novel regulatory concerns. Accordingly, the Commission finds good cause, pursuant to Section 19(b)(2) of the Act,²⁹ to approve the proposed rule change, SR-FINRA-2025-001, as modified by Partial Amendment No. 1, on an accelerated basis.

VI. Conclusion

For the reasons set forth above, the Commission finds that the proposed rule change, as modified by Partial Amendment No. 1, is consistent with Section 15A(b)(6) of the Exchange Act,³⁰ which requires, among other things, that FINRA rules be designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, and, in general, protect investors and the public interest.

It is therefore ordered, pursuant to Section 19(b)(2) of the Exchange Act³¹ that the proposed rule change (SR-FINRA-2025-001), as amended by Partial Amendment No. 1, be, and hereby is, approved on an accelerated basis.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.³²

Sherry R. Haywood,
Assistant Secretary.

[FR Doc. 2025-12218 Filed 6-30-25; 8:45 am]

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-103333; File No. SR-NYSE-2025-22]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Sixth Amended and Restated Certificate of Incorporation of Intercontinental Exchange, Inc. and Ninth Amended and Restated Certificate of Incorporation of Intercontinental Exchange Holdings, Inc.

June 26, 2025.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 (“Act”)² and Rule 19b-4 thereunder,³ notice is hereby given that on June 16,

2025, New York Stock Exchange LLC (“NYSE” or the “Exchange”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization.⁴ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Sixth Amended and Restated Certificate of Incorporation of Intercontinental Exchange, Inc. (“ICE”) and Ninth Amended and Restated Certificate of Incorporation of Intercontinental Exchange Holdings, Inc. (“ICE Holdings”) to reflect regulations relating to security-based swap execution facilities (“SBSEFs”), update the registered office in the State of Delaware, and make non-substantive and conforming changes. The proposed rule change is available on the Exchange’s website at www.nyse.com, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the ICE Current Certificate of Incorporation and ICE Holdings Current Certificate of Incorporation (together, the “Current Certificates”) to reflect regulations relating to SBSEFs, update the registered office in the State of Delaware, and make non-substantive

and conforming changes.⁵ No change is proposed to the operating agreement of the Exchange.

The changes to the ICE Current Certificate of Incorporation described herein would become operative upon the proposed Seventh Amended and Restated Certificate of Incorporation (“ICE Proposed Certificate of Incorporation”) becoming effective pursuant to its filing with the Secretary of State of the State of Delaware. The changes to the ICE Holdings Current Certificate of Incorporation described herein would become operative upon the proposed Tenth Amended and Restated Certificate of Incorporation (“ICE Holdings Proposed Certificate of Incorporation” and, together with the ICE Proposed Certificate of Incorporation, the “Proposed Certificates”) becoming effective pursuant to its filing with the Secretary of State of the State of Delaware.

Changes Related to SBSEFs

Securities and Exchange Commission (“Commission”) regulations extend limitations on stockholder voting and ownership to SBSEFs.⁶ Because ICE’s subsidiary ICE Swap Trade, LLC (“IST”) has registered with the Commission as an SBSEF, these Commission regulations apply.

IST has adopted Rule 410 (Ownership Limitation),⁷ which IST has advised the Exchange was designed to incorporate the requirements of 17 CFR 242.834 (“Rule 834”) into the rules of the SBSEF. Additionally, ICE and ICE Holdings intend to amend their Current Certificates as described below.

ICE Proposed Certificate of Incorporation

The ICE Current Certificate of Incorporation would be amended as follows.

First, Article V (Limitations on Voting and Ownership) has limitations on stockholder voting and ownership that apply so long as ICE directly or indirectly controls a national securities exchange registered under the Act, such as the Exchange. These would be

⁵ ICE is the sole shareholder of ICE Holdings. ICE Holdings is the parent company of ICE Swap Trade, LLC. ICE Holdings is also the sole shareholder of NYSE Holdings LLC, which is the sole shareholder of NYSE Group, Inc., the parent company of the Exchange.

⁶ See 17 CFR 242.834. See also Securities Exchange Act Release No. 98845 (November 2, 2023), 88 FR 87156 (December 15, 2023) (Security-Based Swap Execution and Registration and Regulation of Security-Based Swap Execution Facilities) (adopting new Regulation SE, consisting of 17 CFR 242.800 through 17 CFR 242.835), effective February 13, 2024).

⁷ See ICE Swap Trade, LLC Submission No. 25-02 (SBSF-ICES-2025-002).

²⁹ 15 U.S.C. 78s(b)(2).

³⁰ 15 U.S.C. 78o-3(b)(6).

³¹ 15 U.S.C. 78s(b)(2).

³² 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

⁴ For compliance with Federal Register publication requirements, the Commission slightly edited note 9, *infra*.

amended to also apply so long as ICE directly or indirectly controls a SBSEF registered under the Exchange Act, as follows:

- The first sentence of Article V(A)(1) (Voting Limitation), would be amended to add “or a security-based swap execution facility registered under Section 3D of the Exchange Act” immediately prior to (a).

- The end of Article V(A)(2) would be modified by adding “(and, with respect to a security-based swap execution facility registered under Section 3D of the Exchange Act, such resolution shall have been submitted to the SEC under Rule 242.806 or 242.807 under Regulation SE under the Exchange Act, shall have been approved by the SEC (if applicable) and shall have become effective thereunder)” to the existing (c).

- Article V(A)(3)(a) would be modified by adding text to the start of (i) as follows (proposed additions italicized):

(i) will not impair the ability of any national securities exchange registered under Section 6 of the Exchange Act or any security-based swap execution facility registered under Section 3D of the Exchange Act, in any case that is directly or indirectly controlled by the Corporation (each such national securities exchange or security-based swap execution facility so controlled, an “Exchange”),

- The definition of “Member” in Article V(A)(8) would be modified as follows (proposed additions italicized): “Member” shall mean, with respect to any national securities exchange, a Person that is a “member” of an Exchange within the meaning of Section 3(a)(3)(A) of the Exchange Act or, with respect to a security-based swap execution facility, a Person that is a “member” within the meaning of Rule 242.802 of Regulation SE under the Exchange Act.

- The definition of “Related Persons” in Article V(A)(10) would be modified as follows (proposed additions italicized):

(d) in the case of a Person that is a Member, any Person that is associated with such Person (as determined using the definition of “person associated with a member” as defined under Section 3(a)(21) of the Exchange Act (with references therein to a national securities exchange being deemed to include a security-based swap execution facility));

(e) in the case of a Person that is a natural person and is a Member, any broker or dealer that is also a Member with which such Person is associated (as determined using the definition of “person associated with a member” as

defined under Section 3(a)(21) of the Exchange Act (with references therein to a national securities exchange being deemed to include a security-based swap execution facility));

- The end of the concentration limits in Article V(B)(2) (Ownership Concentration Limitation) would be modified by adding the following parenthetical to the existing (c): “(and, with respect to an Exchange that is a security-based swap execution facility, such resolution shall have been submitted to the SEC pursuant to Rule 242.806 or 242.807 of Regulation SE under the Exchange Act, shall have been approved by the SEC (if applicable) and shall have become effective thereunder)”.

Second, Article X (Amendments) of the ICE Current Certificate of Incorporation requires any amendment to, or repeal of any provision in, the ICE Current Certification of Incorporation to be filed with, or filed with and approved by, the Commission. These would be amended to also apply so long as ICE directly or indirectly controls a SBSEF registered under the Exchange Act.

To do so, the second sentence of Article X would be amended to add “(or, in the case of a security-based swap execution facility, Rule 242.806 or 242.807 under Regulation SE under the Exchange Act)” immediately following “the rules promulgated thereunder”. In this way, the ICE Proposed Certificate of Incorporation would provide that, if the board of directors of any controlled SBSEF determines that any amendment or repeal must be filed with or filed with and approved by the Commission under Rule 242.806 or 242.807 of Regulation SE before such amendment or repeal may be effectuated, then such amendment or repeal shall not be effectuated until so filed with or filed with and approved by the Commission.

ICE Holdings Proposed Certificate of Incorporation

The ICE Holdings Current Certificate of Incorporation would be amended as follows.

- A new paragraph would be added to Article V(A) (Voting Limitations) as follows (all text new):

4. In addition to the limitations in subsections 1–3 above of this Section A of Article V, for so long as the Corporation shall directly or indirectly control a security-based swap execution facility registered under Section 3D of the Exchange Act (each security-based swap execution facility so controlled, an “SBSEF”), no SBSEF Member (as defined below), either alone or together with its Related Persons, shall be

entitled directly or indirectly to vote, cause the voting of, or give any consent or proxy with respect to the voting of, any interest that exceeds 20% of the voting power of any class of securities or of other ownership interest in the Corporation (such threshold being hereinafter referred to as the “SBSEF Voting Limitation”), and the Corporation shall disregard any such votes purported to be cast in excess of the SBSEF Voting Limitation.

- The text after “enforced against such Record Owner” in current Article V(A)(5) (Article V(A)(6) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed deletion in brackets, proposed additions italicized):

in a manner that will accomplish the Voting Limitation, [and] the Recalculated Voting Limitation and the SBSEF Voting Limitation applicable to such Person and its Related Persons.

- Paragraphs (d) and (e) of the definition of “Related Persons” in current Article V(A)(10) (Article V(A)(11) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed additions italicized):

(d) in the case of a Person that is a Member or SBSEF Member, any Person that is associated with such Person (as determined using the definition of “person associated with a member” as defined under Section 3(a)(21) of the Exchange Act (with references therein to a national securities exchange being deemed to include a security-based swap execution facility));

(e) in the case of a Person that is a natural person and is a Member or SBSEF Member, any broker or dealer that is also a Member or SBSEF Member with which such Person is associated (as determined using the definition of “person associated with a member” as defined under Section 3(a)(21) of the Exchange Act (with references therein to a national securities exchange being deemed to include a security-based swap execution facility));

- The definition of “SBSEF Member” would be added as new Article V(A)(12), as follows (all text new):

12. “SBSEF Member” means, with respect to a security-based swap execution facility, a Person that is a “member” within the meaning of Rule 242.802 of Regulation SE under the Exchange Act.

- A new paragraph would be added to Article V(B) (Ownership Concentration Limitation) as follows (all text new):

5. In addition to the limitations in subsections 1–4 above of this Section B of Article V, for so long as the

Corporation shall directly or indirectly control any SBSEF, no SBSEF Member, either alone or together with its Related Persons, shall be permitted at any time to own, directly or indirectly, 20% or more of any class of voting securities or of other voting interest in the Corporation (the “*SBSEF Concentration Limitation*”). If any SBSEF Member, either alone or together with its Related Persons, at any time beneficially owns voting securities or other voting interest in the Corporation in excess of the SBSEF Concentration Limitation, such SBSEF Member and its Related Persons shall be obligated to sell promptly, and the Corporation shall be obligated to purchase promptly, at a price equal to the par value of such voting securities or other voting interest and to the extent funds are legally available therefor, that number of voting securities or other voting interest of the Corporation necessary so that such SBSEF Member, together with its Related Persons, shall beneficially own, directly or indirectly, less than 20% of any class of voting securities or of other voting interest in the Corporation, after taking into account that such repurchased voting securities or other voting interest shall become treasury shares and shall no longer be deemed to be outstanding.

- The second clause of current Article V(B)(5) (Article V(B)(6) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed additions italicized): provided, however, that, if any Transfer of any shares of stock of the Corporation shall cause any Person, either alone or together with its Related Persons, at any time to beneficially own shares of stock of the Corporation in excess of the Concentration Limitation or *SBSEF Concentration Limitation*, such Person and its Related Persons shall be obligated to sell promptly, and the Corporation shall be obligated to purchase promptly, shares of stock of the Corporation as specified in Section B.4 or B.5, as applicable, of this ARTICLE V.

- The first sentence of current Article V(B)(6) (Article V(A)(7) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed addition italicized):

If any share of Common Stock shall be represented by a certificate, a legend shall be placed on such certificate to the effect that such share of Common Stock is subject to the Concentration Limitations and *SBSEF Concentration Limitation* as set in Section B of this Article V.

- The final clause of Article V(C)(2) (Procedure for Repurchasing Stock) would be amended to add “or SBSEF

Concentration Limitation” after “Concentration Limitation”.

- Subclauses (i) and (ii) of the first sentence of Article V(D) (Right to Information; Determinations by the Board of Directors) would be amended as follows (proposed deletion in brackets, proposed additions italicized):

(i) to be subject to the Voting Limitation, [or] the Recalculated Voting Limitation or the *SBSEF Voting Limitation*, (ii) to own beneficially (within the meaning of Rules 13d–3 and 13d–5 under the Exchange Act) shares of stock of the Corporation entitled to vote on any matter in excess of the Concentration Limitation or *SBSEF Concentration Limitation*,

- The parenthetical in the first sentence of Article IX(B) (Quorum) would be amended as follows (proposed deletions in brackets, proposed additions italicized):

(it being understood that any shares in excess of the Voting Limitation, [or] the Recalculated Voting Limitation or the *SBSEF Voting Limitation* shall not be counted as present at the meeting and shall not be counted as outstanding shares of stock of the Corporation for purposes of determining whether there is a quorum, unless and only to the extent that the Voting Limitation or the Recalculated Voting Limitation, as applicable, shall have been duly waived pursuant to Section A or Section B of ARTICLE V).

Change in Registered Office

ICE and ICE Holdings are corporations organized under the laws of the State of Delaware. As such, they are both required to have and maintain a registered office and registered agent in the State of Delaware.⁸

The Exchange proposes to change the address of the registered office in both Proposed Certificates to reflect the move of the office of the registered agent. No change is proposed to the registered agent. Accordingly, Article II of both Proposed Certificates would be amended to provide that the address of the registered office in the State of Delaware, County of New Castle, is 1521 Concord Pike, Suite 201, Wilmington, Delaware 19803.

Other Changes

The Exchange proposes to make changes that are conforming or technical in nature. All are non-substantive.

ICE Proposed Certificate of Incorporation

References to the “Sixth Amended and Restated Certificate of

Incorporation” and the “Fifth Amended and Restated Certificate of Incorporation” in the titles, introductory paragraphs, and signature lines would be changed to refer to the “Seventh Amended and Restated Certificate of Incorporation” and “Sixth Amended and Restated Certificate of Incorporation,” respectively.

The date of effectiveness and execution in the introductory certifications and signature line would be updated.

ICE Holdings Proposed Certificate of Incorporation

References to the “Ninth Amended and Restated Certificate of Incorporation” and the “Eighth Amended and Restated Certificate of Incorporation” in the titles, introductory paragraphs, and signature lines would be changed to refer to the “Tenth Amended and Restated Certificate of Incorporation” and “Ninth Amended and Restated Certificate of Incorporation,” respectively.

The date of effectiveness and execution in the introductory certifications and signature line would be updated.

To conform to one style, those terms that are not already underlined when defined would be underlined [sic].⁹ In addition to the definitions that would be added, the already existing definitions are in the introductory paragraph, the numbered certifications that immediately follow it, Article IV(A) (Classes and Series of Stock), Article IV(C) (Transfer Restrictions on Stock), and Article V(A)(1).

The word “commission” in Article IV(C) would be capitalized.

Paragraphs after proposed Article V(A)(4) and proposed Article V(B)(5) would be renumbered.

The cross reference in Article V(A)(6) would be renumbered from “Section A of ARTICLE VI” to “Section A of ARTICLE V”.

In Article X (Amendments), the parenthetical “(or the boards of directors of their successors)” would be deleted as unnecessary, because “Exchange” includes all ICE Holdings-controlled national securities exchanges.¹⁰

⁹ For example, “(the ‘Corporation’)” would become underlined [sic]. For compliance with Federal Register publication requirements, the Commission added the term “underlined” here in place of a depiction of the term “Corporation” becoming underlined [sic].

¹⁰ See the definition of “Exchange” in ICE Holdings Current Certificate of Incorporation, Article V(A)(1). No change to the definition is proposed.

⁸ See Del. Code tit 8, §§ 131 and 132.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,¹¹ in general, and furthers the objectives of Section 6(b)(1)¹² in particular, in that it enables the Exchange to be so organized as to have the capacity to be able to carry out the purposes of the Act and to comply, and to enforce compliance by its exchange members and persons associated with its exchange members, with the provisions of the Act, the rules and regulations thereunder, and the rules of the Exchange.

Together, the Proposed Certificates and IST Rule 410¹³ are consistent with the Act and the rules promulgated under the Act.

The Exchange believes that the proposed rule change would contribute to the orderly operation of the Exchange and would enable the Exchange to continue to be so organized as to have the capacity to carry out the purposes of the Exchange Act and comply and enforce compliance with the provisions of the Exchange Act by its members and persons associated with its members because none of the proposed changes to the Proposed Certificates substantively would impact the Exchange. Rather the proposed changes are solely concerned with SBSEFs, updating the address of the registered office in Delaware of ICE and ICE Holdings and making conforming changes.

Additionally, IST has advised the Exchange that IST Rule 410 would, independently of these changes to the Proposed Certificates, provide the means to ensure that IST is in compliance with Rule 834(b).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address any competitive issue but rather is concerned solely with ensuring that IST is in compliance with Regulation SE, updating the address of the registered office in Delaware of ICE and ICE Holdings, and making non-substantive and conforming changes to the Current Certificates. No change is proposed to the operating agreement of the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁴ and Rule 19b-4(f)(6) thereunder.¹⁵

A proposed rule change filed under Rule 19b-4(f)(6)¹⁶ normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),¹⁷ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)¹⁸ of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NYSE-2025-22 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-NYSE-2025-22. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NYSE-2025-22 and should be submitted on or before July 22, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁹

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–103336; File No. SR–NYSETEX–2025–17]

Self-Regulatory Organizations; NYSE Texas, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Sixth Amended and Restated Certificate of Incorporation of Intercontinental Exchange, Inc. and Ninth Amended and Restated Certificate of Incorporation of Intercontinental Exchange Holdings, Inc.

June 26, 2025.

Pursuant to Section 19(b)(1) ¹ of the Securities Exchange Act of 1934 (“Act”) ² and Rule 19b–4 thereunder, ³ notice is hereby given that on June 16, 2025, the NYSE Texas, Inc. (“NYSE Texas” or the “Exchange”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. ⁴ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Sixth Amended and Restated Certificate of Incorporation of Intercontinental Exchange, Inc. (“ICE”) and Ninth Amended and Restated Certificate of Incorporation of Intercontinental Exchange Holdings, Inc. (“ICE Holdings”) to reflect regulations relating to security-based swap execution facilities (“SBSEFs”), update the registered office in the State of Delaware, and make non-substantive and conforming changes. The proposed rule change is available on the Exchange’s website at www.nyse.com, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change

and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the ICE Current Certificate of Incorporation and ICE Holdings Current Certificate of Incorporation (together, the “Current Certificates”) to reflect regulations relating to SBSEFs, update the registered office in the State of Delaware, and make non-substantive and conforming changes. ⁵ No change is proposed to the certificate of formation or bylaws of the Exchange.

The changes to the ICE Current Certificate of Incorporation described herein would become operative upon the proposed Seventh Amended and Restated Certificate of Incorporation (“ICE Proposed Certificate of Incorporation”) becoming effective pursuant to its filing with the Secretary of State of the State of Delaware. The changes to the ICE Holdings Current Certificate of Incorporation described herein would become operative upon the proposed Tenth Amended and Restated Certificate of Incorporation (“ICE Holdings Proposed Certificate of Incorporation” and, together with the ICE Proposed Certificate of Incorporation, the “Proposed Certificates”) becoming effective pursuant to its filing with the Secretary of State of the State of Delaware.

Changes Related to SBSEFs

Securities and Exchange Commission (“Commission”) regulations extend limitations on stockholder voting and ownership to SBSEFs. ⁶ Because ICE’s subsidiary ICE Swap Trade, LLC (“IST”) has registered with the Commission as

an SBSEF, these Commission regulations apply.

IST has adopted Rule 410 (Ownership Limitation), ⁷ which IST has advised the Exchange was designed to incorporate the requirements of 17 CFR 242.834 (“Rule 834”) into the rules of the SBSEF. Additionally, ICE and ICE Holdings intend to amend their Current Certificates as described below.

ICE Proposed Certificate of Incorporation

The ICE Current Certificate of Incorporation would be amended as follows.

First, Article V (Limitations on Voting and Ownership) has limitations on stockholder voting and ownership that apply so long as ICE directly or indirectly controls a national securities exchange registered under the Act, such as the Exchange. These would be amended to also apply so long as ICE directly or indirectly controls a SBSEF registered under the Exchange Act, as follows:

- The first sentence of Article V(A)(1) (Voting Limitation), would be amended to add “or a security-based swap execution facility registered under Section 3D of the Exchange Act” immediately prior to (a).
- The end of Article V(A)(2) would be modified by adding “(and, with respect to a security-based swap execution facility registered under Section 3D of the Exchange Act, such resolution shall have been submitted to the SEC under Rule 242.806 or 242.807 under Regulation SE under the Exchange Act, shall have been approved by the SEC (if applicable) and shall have become effective thereunder)” to the existing (c).
- Article V(A)(3)(a) would be modified by adding text to the start of (i) as follows (proposed additions italicized):

(i) will not impair the ability of any national securities exchange registered under Section 6 of the Exchange Act or *any security-based swap execution facility registered under Section 3D of the Exchange Act, in any case that is directly or indirectly controlled by the Corporation (each such national securities exchange or security-based swap execution facility so controlled, an “Exchange”)*.

- The definition of “Member” in Article V(A)(8) would be modified as follows (proposed additions italicized): “Member” shall mean, *with respect to any national securities exchange, a Person that is a “member” of an Exchange within the meaning of Section*

⁷ See ICE Swap Trade, LLC Submission No. 25–02 (SBSF–ICES–2025–002).

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b–4.

⁴ For compliance with Federal Register publication requirements, the Commission slightly edited note 9, *infra*.

⁵ ICE is the sole shareholder of ICE Holdings. ICE Holdings is the parent company of ICE Swap Trade, LLC. ICE Holdings is also the sole shareholder of NYSE Holdings LLC, which is the sole shareholder of NYSE Group, Inc. NYSE Group, Inc. is the sole shareholder of NYSE Texas Holdings, Inc., the parent company of the Exchange.

⁶ See 17 CFR 242.834. See also Securities Exchange Act Release No. 98845 (November 2, 2023), 88 FR 87156 (December 15, 2023) (Security-Based Swap Execution and Registration and Regulation of Security-Based Swap Execution Facilities) (adopting new Regulation SE, consisting of 17 CFR 242.800 through 17 CFR 242.835), effective February 13, 2024).

3(a)(3)(A) of the Exchange Act *or, with respect to a security-based swap execution facility, a Person that is a "member" within the meaning of Rule 242.802 of Regulation SE under the Exchange Act.*

- The definition of "Related Persons" in Article V(A)(10) would be modified as follows (proposed additions italicized):

(d) in the case of a Person that is a Member, any Person that is associated with such Person (as determined using the definition of "person associated with a member" as defined under Section 3(a)(21) of the Exchange Act *(with references therein to a national securities exchange being deemed to include a security-based swap execution facility)*);

(e) in the case of a Person that is a natural person and is a Member, any broker or dealer that is also a Member with which such Person is associated (as determined using the definition of "person associated with a member" as defined under Section 3(a)(21) of the Exchange Act *(with references therein to a national securities exchange being deemed to include a security-based swap execution facility)*);

- The end of the concentration limits in Article V(B)(2) (Ownership Concentration Limitation) would be modified by adding the following parenthetical to the existing (c): "(and, with respect to an Exchange that is a security-based swap execution facility, such resolution shall have been submitted to the SEC pursuant to Rule 242.806 or 242.807 of Regulation SE under the Exchange Act, shall have been approved by the SEC (if applicable) and shall have become effective thereunder)".

Second, Article X (Amendments) of the ICE Current Certificate of Incorporation requires any amendment to, or repeal of any provision in, the ICE Current Certification of Incorporation to be filed with, or filed with and approved by, the Commission. These would be amended to also apply so long as ICE directly or indirectly controls a SBSEF registered under the Exchange Act.

To do so, the second sentence of Article X would be amended to add "(or, in the case of a security-based swap execution facility, Rule 242.806 or 242.807 under Regulation SE under the Exchange Act)" immediately following "the rules promulgated thereunder". In this way, the ICE Proposed Certificate of Incorporation would provide that, if the board of directors of any controlled SBSEF determines that any amendment or repeal must be filed with or filed with and approved by the Commission

under Rule 242.806 or 242.807 of Regulation SE before such amendment or repeal may be effectuated, then such amendment or repeal shall not be effectuated until so filed with or filed with and approved by the Commission.

ICE Holdings Proposed Certificate of Incorporation

The ICE Holdings Current Certificate of Incorporation would be amended as follows.

- A new paragraph would be added to Article V(A) (Voting Limitations) as follows (all text new):

4. In addition to the limitations in subsections 1–3 above of this Section A of Article V, for so long as the Corporation shall directly or indirectly control a security-based swap execution facility registered under Section 3D of the Exchange Act (each security-based swap execution facility so controlled, an "SBSEF"), no SBSEF Member (as defined below), either alone or together with its Related Persons, shall be entitled directly or indirectly to vote, cause the voting of, or give any consent or proxy with respect to the voting of, any interest that exceeds 20% of the voting power of any class of securities or of other ownership interest in the Corporation (such threshold being hereinafter referred to as the "SBSEF Voting Limitation"), and the Corporation shall disregard any such votes purported to be cast in excess of the SBSEF Voting Limitation.

- The text after "enforced against such Record Owner" in current Article V(A)(5) (Article V(A)(6) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed deletion in brackets, proposed additions italicized):

in a manner that will accomplish the Voting Limitation, [and] the Recalculated Voting Limitation *and the SBSEF Voting Limitation applicable to such Person and its Related Persons.*

- Paragraphs (d) and (e) of the definition of "Related Persons" in current Article V(A)(10) (Article V(A)(11) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed additions italicized):

(d) in the case of a Person that is a Member *or SBSEF Member*, any Person that is associated with such Person (as determined using the definition of "person associated with a member" as defined under Section 3(a)(21) of the Exchange Act *(with references therein to a national securities exchange being deemed to include a security-based swap execution facility)*);

(e) in the case of a Person that is a natural person and is a Member *or*

SBSEF Member, any broker or dealer that is also a Member *or SBSEF Member* with which such Person is associated (as determined using the definition of "person associated with a member" as defined under Section 3(a)(21) of the Exchange Act *(with references therein to a national securities exchange being deemed to include a security-based swap execution facility)*);

- The definition of "SBSEF Member" would be added as new Article V(A)(12), as follows (all text new):

12. "SBSEF Member" means, with respect to a security-based swap execution facility, a Person that is a "member" within the meaning of Rule 242.802 of Regulation SE under the Exchange Act.

- A new paragraph would be added to Article V(B) (Ownership Concentration Limitation) as follows (all text new):

5. In addition to the limitations in subsections 1–4 above of this Section B of Article V, for so long as the Corporation shall directly or indirectly control any SBSEF, no SBSEF Member, either alone or together with its Related Persons, shall be permitted at any time to own, directly or indirectly, 20% or more of any class of voting securities or of other voting interest in the Corporation (the "SBSEF Concentration Limitation"). If any SBSEF Member, either alone or together with its Related Persons, at any time beneficially owns voting securities or other voting interest in the Corporation in excess of the SBSEF Concentration Limitation, such SBSEF Member and its Related Persons shall be obligated to sell promptly, and the Corporation shall be obligated to purchase promptly, at a price equal to the par value of such voting securities or other voting interest and to the extent funds are legally available therefor, that number of voting securities or other voting interest of the Corporation necessary so that such SBSEF Member, together with its Related Persons, shall beneficially own, directly or indirectly, less than 20% of any class of voting securities or of other voting interest in the Corporation, after taking into account that such repurchased voting securities or other voting interest shall become treasury shares and shall no longer be deemed to be outstanding.

- The second clause of current Article V(B)(5) (Article V(B)(6) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed additions italicized):

provided, however, that, if any Transfer of any shares of stock of the Corporation shall cause any Person, either alone or together with its Related Persons, at any time to beneficially own

shares of stock of the Corporation in excess of the Concentration Limitation or *SBSEF Concentration Limitation*, such Person and its Related Persons shall be obligated to sell promptly, and the Corporation shall be obligated to purchase promptly, shares of stock of the Corporation as specified in Section B.4 or B.5, as applicable, of this ARTICLE V.

- The first sentence of current Article V(B)(6) (Article V(A)(7) of the ICE Holdings Proposed Certificate of Incorporation) would be amended as follows (proposed addition italicized):

If any share of Common Stock shall be represented by a certificate, a legend shall be placed on such certificate to the effect that such share of Common Stock is subject to the Concentration Limitations and *SBSEF Concentration Limitation* as set in Section B of this Article V.

- The final clause of Article V(C)(2) (Procedure for Repurchasing Stock) would be amended to add “or *SBSEF Concentration Limitation*” after “Concentration Limitation”.

- Subclauses (i) and (ii) of the first sentence of Article V(D) (Right to Information; Determinations by the Board of Directors) would be amended as follows (proposed deletion in brackets, proposed additions italicized):

(i) to be subject to the Voting Limitation, [or] the Recalculated Voting Limitation or the *SBSEF Voting Limitation*, (ii) to own beneficially (within the meaning of Rules 13d–3 and 13d–5 under the Exchange Act) shares of stock of the Corporation entitled to vote on any matter in excess of the Concentration Limitation or *SBSEF Concentration Limitation*,

- The parenthetical in the first sentence of Article IX(B) (Quorum) would be amended as follows (proposed deletions in brackets, proposed additions italicized):

(it being understood that any shares in excess of the Voting Limitation, [or] the Recalculated Voting Limitation or the *SBSEF Voting Limitation* shall not be counted as present at the meeting and shall not be counted as outstanding shares of stock of the Corporation for purposes of determining whether there is a quorum, unless and only to the extent that the Voting Limitation or the Recalculated Voting Limitation, as applicable, shall have been duly waived pursuant to Section A or Section B of ARTICLE V).

Change in Registered Office

ICE and ICE Holdings are corporations organized under the laws of the State of Delaware. As such, they are both required to have and maintain a

registered office and registered agent in the State of Delaware.⁸

The Exchange proposes to change the address of the registered office in both Proposed Certificates to reflect the move of the office of the registered agent. No change is proposed to the registered agent. Accordingly, Article II of both Proposed Certificates would be amended to provide that the address of the registered office in the State of Delaware, County of New Castle, is 1521 Concord Pike, Suite 201, Wilmington, Delaware 19803.

Other Changes

The Exchange proposes to make changes that are conforming or technical in nature. All are non-substantive.

ICE Proposed Certificate of Incorporation

References to the “Sixth Amended and Restated Certificate of Incorporation” and the “Fifth Amended and Restated Certificate of Incorporation” in the titles, introductory paragraphs, and signature lines would be changed to refer to the “Seventh Amended and Restated Certificate of Incorporation” and “Sixth Amended and Restated Certificate of Incorporation,” respectively.

The date of effectiveness and execution in the introductory certifications and signature line would be updated.

ICE Holdings Proposed Certificate of Incorporation

References to the “Ninth Amended and Restated Certificate of Incorporation” and the “Eighth Amended and Restated Certificate of Incorporation” in the titles, introductory paragraphs, and signature lines would be changed to refer to the “Tenth Amended and Restated Certificate of Incorporation” and “Ninth Amended and Restated Certificate of Incorporation,” respectively.

The date of effectiveness and execution in the introductory certifications and signature line would be updated.

To conform to one style, those terms that are not already underlined when defined would be underlined [sic].⁹ In addition to the definitions that would be added, the already existing definitions are in the introductory paragraph, the numbered certifications that

immediately follow it, Article IV(A) (Classes and Series of Stock), Article IV(C) (Transfer Restrictions on Stock), and Article V(A)(1).

The word “commission” in Article IV(C) would be capitalized.

Paragraphs after proposed Article V(A)(4) and proposed Article V(B)(5) would be renumbered.

The cross reference in Article V(A)(6) would be renumbered from “Section A of ARTICLE VI” to “Section A of ARTICLE V”.

In Article X (Amendments), the parenthetical “(or the boards of directors of their successors)” would be deleted as unnecessary, because “Exchange” includes all ICE Holdings-controlled national securities exchanges.¹⁰

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,¹¹ in general, and furthers the objectives of Section 6(b)(1)¹² in particular, in that it enables the Exchange to be so organized as to have the capacity to be able to carry out the purposes of the Act and to comply, and to enforce compliance by its exchange members and persons associated with its exchange members, with the provisions of the Act, the rules and regulations thereunder, and the rules of the Exchange.

Together, the Proposed Certificates and IST Rule 410¹³ are consistent with the Act and the rules promulgated under the Act.

The Exchange believes that the proposed rule change would contribute to the orderly operation of the Exchange and would enable the Exchange to continue to be so organized as to have the capacity to carry out the purposes of the Exchange Act and comply and enforce compliance with the provisions of the Exchange Act by its members and persons associated with its members because none of the proposed changes to the Proposed Certificates substantively would impact the Exchange. Rather the proposed changes are solely concerned with SBSEFs, updating the address of the registered office in Delaware of ICE and ICE Holdings and making conforming changes.

Additionally, IST has advised the Exchange that IST Rule 410 would,

¹⁰ See the definition of “Exchange” in ICE Holdings Current Certificate of Incorporation, Article V(A)(1). No change to the definition is proposed.

¹¹ 15 U.S.C. 78f(b).

¹² 15 U.S.C. 78f(b)(1).

¹³ See ICE Swap Trade, LLC Submission No. 25–02 (SBSF–ICES–2025–002).

⁸ See Del. Code tit 8, §§ 131 and 132.

⁹ For example, “(the ‘Corporation’)” would become underlined [sic]. For compliance with Federal Register publication requirements, the Commission added the term “underlined” here in place of a depiction of the term “Corporation” becoming underlined [sic].

independently of these changes to the Proposed Certificates, provide the means to ensure that IST is in compliance with Rule 834(b).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address any competitive issue but rather is concerned solely with ensuring that IST is in compliance with Regulation SE, updating the address of the registered office in Delaware of ICE and ICE Holdings, and making non-substantive and conforming changes to the Current Certificates. No change is proposed to the certificate of formation or bylaws of the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁴ and Rule 19b-4(f)(6) thereunder.¹⁵

A proposed rule change filed under Rule 19b-4(f)(6)¹⁶ normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),¹⁷ the Commission may designate a shorter time if such action is consistent with the

protection of investors and the public interest.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)¹⁸ of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NYSETEX-2025-17 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to file number SR-NYSETEX-2025-17. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also

will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NYSETEX-2025-17 and should be submitted on or before July 22, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁹

Sherry R. Haywood,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-103328; File No. SR-ICC-2025-008]

Self-Regulatory Organizations; ICE Clear Credit LLC; Order Approving Proposed Rule Change Relating to Clearance of Additional Credit Default Swap Contracts

June 26, 2025.

I. Introduction

On April 30, 2025, ICE Clear Credit LLC ("ICC") filed with the Securities and Exchange Commission (the "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act")¹ and Rule 19b-4 thereunder,² a proposed rule change to clear an additional credit default swap ("CDS") contract. The proposed rule change was published for comment in the **Federal Register** on May 14, 2025.³ The Commission did not receive comments regarding the proposed rule change. For the reasons discussed below, the Commission is approving the proposed rule change.

II. Description of the Proposed Rule Change

ICC is registered with the Commission as a clearing agency for the purpose of clearing CDS contracts. Chapter 26 of ICC's Rulebook covers the CDS contracts that ICC clears, with each subchapter of Chapter 26 defining the characteristics and additional Rules applicable to the

¹⁴ 15 U.S.C. 78s(b)(3)(A)(iii).

¹⁵ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

³ Securities Exchange Act Release No. 103003 (May 8, 2025), 90 FR 20536 (May 14, 2025) (File No. SR-ICC-2025-008) ("Notice").

various specific categories of CDS contracts that ICC clears. Among other CDS contracts, ICC currently clears Standard Emerging Market Sovereign Single Name CDS (“SES”) contracts. The purpose of the proposed rule change is to amend ICC’s rules to permit ICC to clear an additional SES contract, specifically, SES contracts on the Republic of Côte d’Ivoire.

To carry out this change, the proposed rule change would amend Subchapter 26D of Chapter 26. In Rule 26D–102 (“Definitions”), under the “Eligible SES Reference Entities” definition, the proposed rule change would add the Republic of Côte d’Ivoire to the list of specific Eligible SES Reference Entities to be cleared by ICC.

As discussed below, this additional SES contract has terms consistent with the other SES contracts that ICC is already clearing. Likewise, to clear this additional contract, ICC will be able to rely on its existing Risk Management Framework and other policies and procedures without making any changes.

III. Discussion and Commission Findings

Section 19(b)(2)(C) of the Act requires the Commission to approve a proposed rule change of a self-regulatory organization if it finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the organization.⁴ Under the Commission’s Rules of Practice, the “burden to demonstrate that a proposed rule change is consistent with the Exchange Act and the rules and regulations issued thereunder . . . is on the self-regulatory organization [‘SRO’] that proposed the rule change.”⁵

The description of a proposed rule change, its purpose and operation, its effect, and a legal analysis of its consistency with applicable requirements must all be sufficiently detailed and specific to support an affirmative Commission finding,⁶ and any failure of an SRO to provide this information may result in the Commission not having a sufficient basis to make an affirmative finding that a proposed rule change is consistent with the Exchange Act and the applicable rules and regulations.⁷ Moreover, “unquestioning reliance” on an SRO’s representations in a proposed rule change is not sufficient to justify

Commission approval of a proposed rule change.⁸

After carefully considering the proposed rule change, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to ICC. More specifically, for the reasons given below, the Commission finds that the proposed rule change is consistent with Section 17A(b)(3)(F) of the Act⁹ and Rule 17Ad–22(e)(1) thereunder.¹⁰

A. Consistency With Section 17A(b)(3)(F) of the Act

Section 17A(b)(3)(F) of the Act requires, among other things, that the rules of ICC be designed to promote the prompt and accurate clearance and settlement of securities transactions and, to the extent applicable, derivative agreements, contracts, and transactions.¹¹

The proposed rule change is consistent with Section 17A(b)(3)(F) of the Act.¹² The terms and conditions of the additional SES contract proposed for clearing are substantially similar to the terms and conditions of the other contracts listed in Subchapter 26D of ICC’s Rules, all of which ICC currently clears, with the key difference being the underlying reference obligations. The underlying reference obligations will be issuances by the Republic of Côte d’Ivoire.

A review of the Notice and ICC’s Rules, policies, and procedures shows that ICC would be able to clear the additional SES contract pursuant to its existing clearing arrangements and related financial safeguards, protections, and risk management procedures. Furthermore, a review of data on volume, open interest, and the number of ICC Clearing Participants (“CPs”) that currently trade in the SES contracts, as well as certain model parameters for the additional contracts, show that ICC’s rules, policies, and procedures are reasonably designed to price and measure the potential risk presented by the additional SES contract, collect financial resources in proportion to such risk, and liquidate the additional contracts in the event of a CP default. This should help ensure ICC’s ability to maintain the financial resources it needs to provide its critical services and function as a central counterparty, thereby promoting the prompt and

accurate settlement of the additional SES contracts and other credit default swap transactions.

Therefore, clearance of the additional SES contract would promote the prompt and accurate clearance and settlement of securities transactions, consistent with Section 17A(b)(3)(F) of the Act.¹³

B. Consistency With Rule 17Ad–22(e)(1)

Rule 17Ad–22(e)(1) requires ICC to establish, implement, maintain, and enforce written policies and procedures reasonably designed to provide for a well-founded, clear, transparent, and enforceable legal basis for each aspect of its activities in all relevant jurisdictions.¹⁴

The proposed rule change would help provide a well-founded, clear, transparent, and enforceable legal basis for ICC’s clearance of SES contracts on the Republic of Côte d’Ivoire. By amending Rule 26D–102 to add the Republic of Côte d’Ivoire to the list of specific Eligible SES Reference Entities to be cleared by ICC, the proposed rule change would help to ensure that ICC can clear SES contracts on that country pursuant to its existing rules in Subchapter 26D. The revised Subchapter 26D would provide a well-founded, clear, transparent, and enforceable legal basis for ICC to clear these contracts, consistent with the requirements of Rule 17Ad–22(e)(1).¹⁵

IV. Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule change is consistent with the requirements of the Act, and in particular, with the requirements of Section 17A(b)(3)(F) of the Act,¹⁶ and Rule 17Ad–22(e)(1)¹⁷ thereunder.

It is therefore ordered pursuant to Section 19(b)(2) of the Act¹⁸ that the proposed rule change (SR–ICC–2025–008) be, and hereby is, approved.¹⁹

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁰

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–103338; File No. SR–CBOE–2025–020]

Self-Regulatory Organizations; Cboe Exchange, Inc.; Order Instituting Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To Eliminate Position and Exercise Limits for Options on the S&P 500 Equal Weight Index and the S&P 500 Scored and Screened Index

June 26, 2025.

I. Introduction

On March 14, 2025, Cboe Exchange, Inc. (“Exchange” or “Cboe Options”) filed with the Securities and Exchange Commission (“Commission”), pursuant to Section 19(b)(1) ¹ of the Securities Exchange Act of 1934 (“Act”) ² and Rule 19b–4 thereunder, ³ a proposed rule change to eliminate position and exercise limits for options that overlie the S&P 500 Equal Weight Index (based on both the full value (“SPEQF options”) and one-tenth the value of the index (“SPEQX options”)) and options that overlie the S&P 500 Scored and Screened Index (formerly known as the S&P 500 ESG Index) (“SPESG options”). The proposed rule change was published for comment in the **Federal Register** on March 31, 2025. ⁴ On May 9, 2025, pursuant to Section 19(b)(2)(A)(ii)(I) of the Act, ⁵ the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change. ⁶ The Commission has not received any comments on the proposal. Pursuant to Section 19(b)(2)(B) of the Act, ⁷ the Commission is hereby instituting proceedings to determine whether to approve or disapprove the proposed rule change.

II. Description of the Proposed Rule Change

The Exchange is proposing to eliminate position and exercise limits for standardized and FLEX positions in SPEQF options, SPEQX options, and

SPESG options. The current position and exercise limit for standardized positions in each of these three options is 25,000 contracts. ⁸ The current position and exercise limit for FLEX positions in each of these three options is 200,000 contracts. ⁹ Under the proposal, these limits would be eliminated such that standardized and FLEX SPEQF, SPEQX and SPESG options have no position or exercise limits. ¹⁰

In support of its proposal, the Exchange states that currently there are no standardized or FLEX position or exercise limits for many other broad-based index options, including options that overlie the S&P 500 Index (SPX and XSP options) and options that overlie the S&P 500 Dividend Index. ¹¹ The Exchange also states that the same index components that underlie SPX and XSP options underlie SPEQF and SPEQX options, ¹² and that each constituent of the S&P 500 Scored and Screened Index is a constituent of the S&P 500 Index. ¹³ Furthermore, the Exchange states that FLEX SPEQF, SPEQX, and SPESG options will be subject to the same reporting requirements triggered for other FLEX options traded on the Exchange. ¹⁴

In addition, the Exchange states that SPEQF and SPEQX options provide market participants with alternative tools to manage their risk and diversify their exposure to the stocks comprising the S&P 500 Index by permitting them to gain broad exposure to these stocks using options that would be less impacted by a shift in concentration and market momentum. ¹⁵ Because capitalization-weighted indexes such as the S&P 500 Index are more impacted by larger capitalized stocks, options overlying an equal-weighted index (such as the S&P 500 Equal Weight Index) would benefit investors, according to the Exchange, by permitting them to hedge against potential swings in the largest stocks comprising the S&P 500 Index while maintaining the ability to hedge across

the entire span of S&P 500 constituent securities. ¹⁶ Similarly, the Exchange states, SPESG options provide investors with an alternative tool to manage their risk and diversify their exposure to stocks comprising the S&P 500 Index that meet specified sustainability criteria. ¹⁷ According to the Exchange, given the relationship among the S&P 500 Equal Weight Index, the S&P 500 Scored and Screened Index, and the S&P 500 Index, market participants’ investment and hedging strategies may consist of options overlying any or all of these options. ¹⁸ The Exchange believes imposing lower position and exercise position limits on SPEQF, SPEQX, and SPESG options may unnecessarily restrict investors’ abilities to use these options to achieve their investment goals. ¹⁹ In addition, the Exchange states that it is appropriate for these options to be subject to the same position and exercise limits to provide them with the ability to execute these strategies with sufficient flexibility and in a consistent manner. ²⁰

III. Proceedings To Determine Whether To Approve or Disapprove the Proposed Rule Change

The Commission hereby institutes proceedings pursuant to Section 19(b)(2)(B) of the Act ²¹ to determine whether the Exchange’s proposed rule change should be approved or disapproved. Institution of proceedings does not indicate that the Commission has reached any conclusions with respect to any of the issues involved. Rather, the Commission seeks and encourages interested persons to provide additional comment on the proposed rule change to inform the Commission’s analysis of whether to approve or disapprove the proposed rule change.

Pursuant to Section 19(b)(2)(B) of the Act, ²² the Commission is providing notice of the grounds for disapproval under consideration. The Commission is instituting proceedings to allow for additional analysis of, and input from commenters with respect to, the consistency of the proposed rule change with the Act and, in particular, Section 6(b)(5) of the Act, ²³ which requires that the rules of a national securities exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable

⁸ See Notice, *supra* note 4, at 14298.

⁹ *Id.*

¹⁰ *Id.*

¹¹ *Id.*

¹² *Id.* The Exchange also states that, as of January 8, 2025, the total market capitalization of the S&P 500 Index was \$49.788 trillion, and the average daily trading volume for its underlying components for the six months preceding January 8, 2025, was 2.7 billion shares. According to the Exchange, this demonstrates that there is substantial liquidity in the components of the S&P 500 Equal Weight Index since its components are the same as the S&P 500 Index. *Id.* at 14299 n. 8.

⁷ 15 U.S.C. 78s(b)(2)(B).

principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest, and not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

Under the Commission's Rules of Practice, the "burden to demonstrate that a proposed rule change is consistent with the [Act] and the rules and regulations issued thereunder . . . is on the self-regulatory organization that proposed the rule change."²⁴ The description of a proposed rule change, its purpose and operation, its effect, and a legal analysis of its consistency with applicable requirements must all be sufficiently detailed and specific to support an affirmative Commission finding,²⁵ and any failure of a self-regulatory organization to provide this information may result in the Commission not having a sufficient basis to make an affirmative finding that a proposed rule change is consistent with the Act and the applicable rules and regulations.²⁶

Position and exercise limits serve as a regulatory tool designed to address manipulative schemes and adverse market impact surrounding the use of options.²⁷ As discussed above, currently, the position and exercise limit for standardized positions in SPEQF, SPEQX, and SPESG options is 25,000 contracts and for FLEX positions in each of these products is 200,000 contracts.²⁸ The Exchange's proposed elimination of these limits would permit market participants to significantly increase the size of unidirectional, unhedged positions in these products, and raises the potential for adverse market impacts and manipulative schemes. Against this backdrop, the proposal does not provide an adequate basis at this time for the Commission to conclude that the proposed elimination of position and exercise limits for standardized or FLEX positions in these products would be consistent with the Act.

Broadly, the Exchange does not adequately address how the potential risks posed by trading in standardized and FLEX SPEQF, SPEQX or SPESG options without position or exercise limits would be mitigated. More specifically, the S&P 500 Index

underlying SPX and XSP options is capitalization-weighted whereas the S&P 500 Equal Weight Index underlying SPEQF and SPEQX is equal-weighted. While the Exchange states that the components underlying these two indexes are the same and substantially liquid, the Exchange does not address the potential risks of adverse market impact or manipulation that could be presented by the equal weighting of the underlying index components for SPEQF and SPEQX options if the Commission were to approve trading in such options without position or exercise limits. Likewise, while each constituent of the S&P 500 Scored and Screened Index is a constituent of the S&P 500 Index, the S&P 500 Index has additional components that are not components of the S&P 500 Scored and Screened Index. In other words, the S&P 500 Scored and Screened Index components are a subset of the S&P 500 Index components. The Exchange does not address the potential risks of adverse market impact or manipulation that could be presented by the smaller number of underlying index components for SPESG options if the Commission were to approve trading in such options without position or exercise limits. The Exchange also does not demonstrate that there is sufficient liquidity in the components of the S&P 500 Scored and Screened Index to support SPESG options trading without position or exercise limits, or that the current limits applicable to SPESG options inhibit market participants' ability to establish positions in these options consistent with their trading and hedging strategies.

Accordingly, the Commission is instituting proceedings to allow for additional consideration and comment on the issues raised herein, including as to whether the proposal is consistent with the Act.²⁹

IV. Commission's Solicitation of Comments

The Commission requests written views, data, and arguments with respect to the concerns identified above as well as any other relevant concerns. Such comments should be submitted by July 22, 2025. Rebuttal comments should be submitted by August 5, 2025. Although there do not appear to be any issues relevant to approval or disapproval that would be facilitated by an oral presentation of views, data, and arguments, the Commission will consider, pursuant to Rule 19b-4, any

request for an opportunity to make an oral presentation.³⁰

The Commission asks that commenters address the sufficiency and merit of the Exchange's statements in support of the proposal, in addition to any other comments they may wish to submit about the proposed rule change.

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CBOE-2025-020 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-CBOE-2025-020. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions;

²⁴ Rule 700(b)(3), Commission Rules of Practice, 17 CFR 201.700(b)(3).

²⁵ *Id.*

²⁶ *Id.*

²⁷ See, e.g., Securities Exchange Act Release No. 68086 (October 23, 2012), 77 FR 65600 (October 29, 2012) (SR-CBOE-2012-066).

²⁸ See Notice, *supra* note 4, at 14298.

²⁹ See 15 U.S.C. 78f(b)(5) and (8).

³⁰ 15 U.S.C. 78s(b)(2). Section 19(b)(2) of the Act grants the Commission flexibility to determine what type of proceeding—either oral or notice and opportunity for written comments—is appropriate for consideration of a particular proposal by an SRO. See Securities Acts Amendments of 1975, Report of the Senate Committee on Banking, Housing and Urban Affairs to Accompany S. 249, S. Rep. No. 75, 94th Cong., 1st Sess. 30 (1975).

you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CBOE–2025–020 and should be submitted on or before July 22, 2025. Rebuttal comments should be submitted by August 5, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.³¹

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #21061 and #21062; Kentucky Disaster Number KY–20019]

Presidential Declaration Amendment of a Major Disaster for the State of Kentucky

AGENCY: U.S. Small Business Administration.

ACTION: Amendment 3.

SUMMARY: This is an amendment of the Presidential declaration of a major disaster for the State of Kentucky (FEMA–4864–DR), dated April 24, 2025.

Incident: Severe Storms, Straight-line Winds, Tornadoes, Flooding, Landslides, and Mudslides.

DATES: Issued on June 25, 2025.

Incident Period: April 2, 2025 through May 16, 2025.

Physical Loan Application Deadline Date: July 25, 2025.

Economic Injury (EIDL) Loan Application Deadline Date: January 26, 2026.

ADDRESSES:

Visit the MySBA Loan Portal at <https://lending.sba.gov> to apply for a disaster assistance loan.

FOR FURTHER INFORMATION CONTACT: Sharon Henderson, Office of Disaster Recovery & Resilience, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: The notice of the President's major disaster declaration for the State of Kentucky, dated April 24, 2025, is hereby amended to update the incident period for this disaster as beginning 04/02/2025 and continuing through May 16, 2025.

All other information in the original declaration remains unchanged.

SMALL BUSINESS ADMINISTRATION

Reporting and Recordkeeping Requirements Under OMB Review

AGENCY: Small Business Administration.

ACTION: 30-Day notice.

SUMMARY: The U.S. Small Business Administration (SBA) is seeking approval from the Office of Management and Budget (OMB) for a new information collection described below. In accordance with the Paperwork Reduction Act and OMB procedures, SBA is publishing this notice to allow all interested members of the public an additional 30 days to provide comments on the proposed collection of information.

DATES: Submit comments on or before July 31, 2025.

ADDRESSES: Written comments and recommendations for this information collection request should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection request by selecting “Small Business Administration”; “Currently Under Review,” then select the “Only Show ICR for Public Comment” checkbox. This information collection can be identified by title and/or OMB Control Number.

FOR FURTHER INFORMATION CONTACT: You may obtain a copy of the information collection and supporting documents from the Agency Clearance Office at Alethea.TenEyck-Sanders@sba.gov; (202) 996–4329, or from www.reginfo.gov/public/do/PRAMain.

SUPPLEMENTARY INFORMATION:

This voluntary collection form enables the program office to assess both the quality of the Boots to Business courses and outcomes achieved by participants after attending Boots to Business. The data will be used for overall program management, continuous improvement initiatives, and reporting outcomes to better serve veteran entrepreneurs. Information used for reporting will be done in the aggregate and will not include Personally Identifiable Information (PII).

Solicitation of Public Comments

Comments may be submitted on (a) whether the collection of information is necessary for the agency to properly perform its functions; (b) whether the burden estimates are accurate; (c) whether there are ways to minimize the burden, including through the use of automated techniques or other forms of information technology; and (d) whether there are ways to enhance the quality, utility, and clarity of the information.

OMB Control Number: 3245–0390.

Title: Boots to Business Post Course Surveys.

Description of Respondents: Boots to Business Program Participants.

SBA Form Number: None.

Estimated Number of Respondents: 4,000.

Estimated Annual Responses: 4,000.

Estimated Annual Hour Burden: 667.

Alethea Ten Eyck-Sanders,

Agency Clearance Officer.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #21165 and #21166; OREGON Disaster Number OR–20011]

Administrative Declaration of a Disaster for the State of Oregon

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is a notice of an Administrative declaration of a disaster for the State of Oregon dated June 25, 2025.

Incident: Harney County Flooding.

DATES: Issued on June 25, 2025.

Incident Period: March 12, 2025

through April 15, 2025.

Physical Loan Application Deadline Date: August 25, 2025.

Economic Injury (EIDL) Loan Application Deadline Date: March 25, 2026.

ADDRESSES: Visit the MySBA Loan Portal at <https://lending.sba.gov> to apply for a disaster assistance loan.

FOR FURTHER INFORMATION CONTACT: Sharon Henderson, Office of Disaster Recovery & Resilience, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the Administrator's disaster declaration, applications for disaster loans may be submitted online using the MySBA Loan Portal <https://lending.sba.gov> or

³¹ 17 CFR 200.30–3(a)(57).

other locally announced locations. Please contact the SBA disaster assistance customer service center by email at disastercustomerservice@sba.gov or by phone at 1-800-659-2955 for further assistance.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: Harney.

Contiguous Counties:

Oregon: Crook, Deschutes, Grant, Lake, Malheur.

Nevada: Humboldt, Washoe.

The Interest Rates are:

	Percent
For Physical Damage:	
Homeowners with Credit Available Elsewhere	5.500
Homeowners without Credit Available Elsewhere	2.750
Businesses with Credit Available Elsewhere	8.000
Businesses without Credit Available Elsewhere	4.000
Non-Profit Organizations with Credit Available Elsewhere ...	3.625
Non-Profit Organizations without Credit Available Elsewhere	3.625
For Economic Injury:	
Business and Small Agricultural Cooperatives without Credit Available Elsewhere	4.000
Non-Profit Organizations without Credit Available Elsewhere	3.625

The number assigned to this disaster for physical damage is 211656 and for economic injury is 211660.

The States which received an EIDL Declaration are Nevada, Oregon.

SMALL BUSINESS ADMINISTRATION

Data Collection Available for Public Comments

ACTION: 60-day notice and request for comments

SUMMARY: The Small Business Administration (SBA) intends to request approval, from the Office of Management and Budget (OMB) for the collection of information described below. The Paperwork Reduction Act (PRA) requires federal agencies to publish a notice in the **Federal Register** concerning each proposed collection of information before submission to OMB, and to allow 60 days for public comment in response to the notice. This notice complies with that requirement.

DATES: Submit comments on or before September 2, 2025.

ADDRESSES: Send all comments to Tamara Edge, Acting Chief, Disaster Loan Division, Office of Financial Assistance, Small Business Administration at 409 3rd Street SW, Washington, DC 20416 or email tamara.edge@sba.gov.

FOR FURTHER INFORMATION CONTACT:

Tamara Edge, Acting Chief, Disaster Loan Division, (202) 205-6674, tamara.edge@sba.gov or Shauniece Carter, Agency Clearance Officer, (202) 205-6536, Shauniece.carter@sba.gov.

SUPPLEMENTARY INFORMATION: The SBA is required to survey affected disaster areas within a state upon request by the Governor of that state to determine if there is sufficient damage to warrant issuing a disaster declaration. Information is obtained from

individuals, businesses, and government officials reporting disaster related damages.

Solicitation of Public Comments

SBA is requesting comments on (a) Whether the collection of information is necessary for the agency to properly perform its functions; (b) whether the burden estimates are accurate; (c) whether there are ways to minimize the burden, including through the use of automated techniques or other forms of information technology; and (d) whether there are ways to enhance the quality, utility, and clarity of the information.

Summary of Information Collection

OMB Control Number: 3245–0136.

Title: Disaster Survey Worksheet.

Description of Respondents:

Individuals, businesses, and government officials reporting disaster related damages.

Form Number: SBA Form 987.

Total Estimated Annual Responses: 2,760.

Total Estimated Annual Hour Burden: 229.

Alethea Ten Eyck-Sanders,

Director, Records and Information Management Branch.

BILLING CODE 8026–09–P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36862]

Port Harbor Railroad, Inc.—Lease and Operation Exemption—America's Central Port District

Port Harbor Railroad, Inc. (Port Harbor), a Class III railroad, has filed a verified notice of exemption pursuant to 49 CFR 1150.41 to lease from America's Central Port District (ACPD) and operate approximately 2.97 miles of rail line from milepost 0.00 to milepost 2.97 within the cities of Granite City, and Madison, in Madison County, Ill. (the Line).

According to the verified notice, Port Harbor first entered into an agreement with Tri-City Regional Port District (now known as ACPD) to lease and operate the Line in 2010. *Port Harbor R.R.—Lease & Operation Exemption—Line of Tri-City Reg'l Port Dist.*, FD 35374 (STB served May 7, 2010). In 2016, Port Harbor and ACPD agreed to extend the term of the original lease but did not seek Board authority for the extension. Port Harbor and ACPD have now agreed to a new lease to continue operating on the Line and to make other commercial changes. Port Harbor certifies that the new lease does not include an interchange commitment. According to the verified notice, Port Harbor will begin operations under the new lease on or after the effective date of the exemption.

Port Harbor certifies that its projected annual revenues as a result of this transaction will not exceed those that

would qualify it as a Class III rail carrier and will not exceed \$5 million.

The transaction may be consummated on or after July 17, 2025, the effective date of the exemption (30 days after the verified notice was filed).

If the verified notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed no later than July 10, 2025 (at least seven days before the exemption becomes effective).

All pleadings, referring to Docket No. FD 36862, must be filed with the Surface Transportation Board either via e-filing on the Board's website or in writing addressed to 395 E Street SW, Washington, DC 20423–0001. In addition, a copy of each pleading must be served on Port Harbor's representative, Eric M. Hocky, Clark Hill PLC, Two Commerce Square, 2001 Market St., Suite 2620, Philadelphia, PA 19103.

According to Port Harbor, this action is categorically excluded from environmental review under 49 CFR 1105.6(c) and from historic reporting requirements under 49 CFR 1105.8(b).

Board decisions and notices are available at www.stb.gov.

Decided: June 27, 2025.

By the Board, Scott M. Zimmerman, Acting Director, Office of Proceedings.

Kenyatta Clay,

Clearance Clerk.

[FR Doc. 2025–12289 Filed 6–30–25; 8:45 am]

BILLING CODE 4915–01–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Notice of Final Federal Agency Actions on Proposed Transportation Project in Georgia

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of limitation on claims for judicial review.

SUMMARY: The FHWA, on behalf of the Georgia Department of Transportation (GDOT), is issuing this notice to announce actions taken by GDOT and other Federal agencies that are final agency actions. These actions relate to the proposed highway project, which extends on State Route (SR) 9 from its crossing of the Chattahoochee River northward to its intersection with SR 120 for a total length of 1.1 miles. The

project also includes improvements to a 0.4-mile east-west segment along Azalea Drive/Riverside Road from just west of SR 9 to Riviera Road. Those actions grant licenses, permits, and approvals for the project.

DATES: By this notice, the FHWA, on behalf of GDOT, is advising the public of final agency actions subject to 23 U.S.C. 139(l)(1). A claim seeking judicial review of the Federal Agency actions on the listed highway project will be barred unless the claim is filed on or before November 28, 2025. If the Federal law that authorizes judicial review of a claim provides a time period of less than 150 days for filing such claim, then that shorter time period still applies.

ADDRESSES: Finding of No Significant Impact (FONSI) and additional project documents can be viewed and downloaded from the project website at: [<https://south-atlanta-road-improvements-721010-gdot.hub.arcgis.com>] or by contacting GDOT Office of Environmental Services, One Georgia Building, 600 West Peachtree NW, Atlanta, GA 30308 during normal business hours of 8 a.m. to 5 p.m. (Eastern Standard Time), Monday through Friday, except State holidays.

FOR FURTHER INFORMATION CONTACT: For FHWA: Ms. Sabrina David, Division Administrator, Georgia Division, Federal Highway Administration, 75 Ted Turner Drive, Suite 1000, Atlanta, Georgia 30303; telephone 404-562-3630; email: Sabrina.David@dot.gov. FHWA's normal business hours are 8:00 a.m. to 5:00 p.m. (eastern time) Monday through Friday. For Georgia Department of Transportation (GDOT): Mr. Russell McMurtry, Commissioner, Georgia Department of Transportation, 600 West Peachtree Street, 22nd Floor, Atlanta, Georgia 30308; telephone (404) 631-1990; email: RMcMurray@dot.ga.gov. GDOT's normal business hours are 8:00 a.m. to 5:00 p.m. (eastern time) Monday through Friday.

SUPPLEMENTARY INFORMATION: Notice is hereby given that GDOT and other Federal agencies have taken final agency actions subject to 23 U.S.C. 139(l)(1) by issuing licenses, permits, or approvals for the proposed improvement highway project. The actions by GDOT and other Federal agencies on the project, and the laws under which such actions were taken are described in the FONSI approved on June 26, 2025, and in other project records for the listed project. The FONSI and other documents for the listed project are available by contacting GDOT at the address provided above.

The project subject to this notice is:

Project Location: The project limits include removal of the existing three-lane reversible lane system along SR 9 and construction of a four-lane divided highway between the SR 9 bridge over the Chattahoochee River and SR 120/Marietta Highway, including grade separation of SR 9 over Azalea Road and Riverside Drive, as well as two dual-lane roundabouts on SR 9 and a single-lane roundabout on Riverside Road/Azalea Drive. This four-lane section of SR 9 will connect to the existing four-lane sections south of Riverside Road/Azalea Drive and north of SR 120/Marietta Highway. The project also will provide new and enhance existing sidewalks and multi-use trails along the project corridor.

Project Actions: This notice applies to the FONSI and all other Federal agency licenses, permits, or approvals for the listed project as of the issuance date of this notice including but not limited to the Section 4(f) Resource Approval and all laws under which such actions were taken, including but not limited to:

1. *General:* National Environmental Policy Act (NEPA) [42 U.S.C. 4321 *et seq.*]; Federal-Aid Highway Act (FAHA) [23 U.S.C. 109 and 23 U.S.C. 128]; 23 CFR part 771.

2. *Air:* Clean Air Act (CAA) [42 U.S.C. 7401-7671(q)], with the exception of project level conformity determinations [42 U.S.C. 7506].

3. *Noise:* Noise Control Act of 1972 [42 U.S.C. 4901-4918]; 23 CFR part 772.

4. *Land:* Section 4(f) of the Department of Transportation Act of 1966 [23 U.S.C. 138 and 49 U.S.C. 303]; 23 CFR part 774; Land and Water Conservation Fund (LWCF) [54 U.S.C. 200302-200310].

5. *Wildlife:* Endangered Species Act (ESA) [16 U.S.C. 1531-1544 and 1536]; Fish and Wildlife Coordination Act [16 U.S.C. 661-667(d)]; Migratory Bird Treaty Act (MBTA) [16 U.S.C. 703-712].

6. *Historic and Cultural Resources:* Section 106 of the National Historic Preservation Act of 1966, as amended [54 U.S.C. 3006101 *et seq.*]; Archaeological Resources Protection Act of 1979 (ARPA) [16 U.S.C. 470(aa)-470(ii)]; Preservation of Historical and Archaeological Data [54 U.S.C. 312501-312508]; Native American Grave Protection and Repatriation Act (NAGPRA) [25 U.S.C. 3001-3013; 18 U.S.C. 1170].

BILLING CODE 4910-RY-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2025-0101]

Commercial Driver's License: Massachusetts Department of State Police; Application for Exemption

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of application for exemption; request for comments.

SUMMARY: FMCSA requests public comment on the Massachusetts Department of State Police's request for an exemption to conduct modified commercial driver's license (CDL) skills test exams on the island of Martha's Vineyard. According to the applicant, the island of Martha's Vineyard does not have the infrastructure for applicant drivers to demonstrate the two sets of lane changes required by the CDL skills test.

DATES: Comments must be received on or before July 31, 2025.

ADDRESSES: You may submit comments identified by Docket Number FMCSA-2025-0101 by any of the following methods:

- *Federal eRulemaking Portal:* www.regulations.gov. See the Public Participation and Request for Comments section below for further information.

- *Mail:* Dockets Operations, U.S. Department of Transportation, 1200

New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590–0001.

- **Hand Delivery or Courier:** 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

- **Fax:** (202) 493–2251.

Each submission must include the Agency name and the docket number (FMCSA–2025–0101) for this notice. Note that DOT posts all comments received without change to www.regulations.gov, including any personal information included in a comment. Please see the Privacy Act heading below.

Privacy Act: In accordance with 49 U.S.C. 31315(b), DOT solicits comments from the public to better inform its exemption process. DOT posts these comments, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice DOT/ALL–14 FDMS (Federal Docket Management System (FDMS)), which can be reviewed at <https://www.transportation.gov/individuals/privacy/privacy-act-system-records-notices>. The comments are posted without edit and are searchable by the name of the submitter.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Clemente, Driver and Carrier Operations Division; Office of Carrier, Driver and Vehicle Safety Standards, FMCSA; (202) 366–9220; or richard.clemente@dot.gov. If you have questions on viewing or submitting material to the docket, contact Dockets Operations at (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials.

A. Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2025–0101), indicate the specific section of this document to which the comment applies, and provide a reason for your suggestions or recommendations. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comment online, go to <https://www.regulations.gov/docket/FMCSA-2025-0101/document>, click on this notice, click “Comment,” and type your comment into the text box on the following screen.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing.

FMCSA will consider all comments and material received during the comment period. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable.

B. Confidential Business Information (CBI)

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to the notice contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to the notice, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission that constitutes CBI as “PROPIN” to indicate it contains proprietary information. FMCSA will treat such marked submissions as confidential under the Freedom of Information Act, and they will not be placed in the public docket of the notice. Submissions containing CBI should be sent to Brian Dahlin, Chief, Regulatory Evaluation Division, Office of Policy, FMCSA, 1200 New Jersey Avenue SE, Washington, DC 20590–0001 or via email at brian.g.dahlin@dot.gov. At this time, you need not send a duplicate hardcopy of your electronic CBI submissions to FMCSA headquarters. Any comments FMCSA receives not specifically designated as CBI will be placed in the public docket for this notice.

C. Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble as being available in the docket, go to <https://www.regulations.gov> insert FMCSA–2025–0101 in the keyword box, select the document tab and choose the document to review. To view comments, click this notice, then click “Browse Comments.” If you do not have access to the internet, you may view the docket by visiting Docket Operations on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE,

Washington, DC 20590–0001, between 9 a.m. and 5 p.m., ET Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315(b) to grant exemptions from the Federal Motor Carrier Safety Regulations. FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including the applicant’s safety analysis. The Agency must provide an opportunity for public comment on the request.

The Agency reviews the application, safety analyses, and public comments submitted and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved absent such exemption, pursuant to the standard set forth in 49 U.S.C. 31315(b)(1). The Agency must publish its decision in the **Federal Register** (49 CFR 381.315(b)). If granted, the notice will identify the regulatory provision from which the applicant will be exempt, the effective period, and all terms and conditions of the exemption (49 CFR 381.315(c)(1)). If the exemption is denied, the notice will explain the reason for the denial (49 CFR 381.315(c)(2)). The exemption may be renewed (49 CFR 381.300(b)).

III. Applicant’s Request

Current Regulatory Requirements
Under 49 CFR 383.113(c)(2) and (4), concerning requirements for driving maneuvers that must be included in the CDL skills test, applicants must demonstrate the ability to signal appropriately when changing direction in traffic and to choose a safe gap for changing lanes, passing other vehicles, and crossing or entering traffic.

Applicant’s Request

The Massachusetts Department of State Police administers CDL road tests in the State of Massachusetts. To service Registry of Motor Vehicles customers on the island of Martha’s Vineyard, the Massachusetts Department of State Police requests authorization to conduct CDL road test exams on the island, using a test route that does not include the two sets of lane changes. According to the applicant, travel to and from the island with commercial motor vehicles is often difficult and expensive. The applicant states that the region does not

have the infrastructure to support two sets of lane changes required by the CDL Examiner's Manual and that there are no reasonable substitutions for lane change maneuvers on the island. The exemption application includes the proposed route plan for the modified CDL exams and a satellite image of the area, as well as a support letter from the Massachusetts Department of Transportation's Registry of Motor Vehicles.

A copy of the Massachusetts Department of State Police's application for exemption is available for review in the docket for this notice.

IV. Request for Comments

In accordance with 49 U.S.C. 31315(b), FMCSA requests public comment from all interested persons on the Massachusetts Department of State Police's application for an exemption. All comments received before the close of business on the comment closing date will be considered and will be available for examination in the docket at the location listed under the **ADDRESSES** section of this notice. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable. In addition to late comments, FMCSA will also continue to file, in the public docket, relevant information that becomes available after the comment closing date. Interested persons should continue to examine the public docket for new material.

Larry W. Minor,

Associate Administrator of Policy.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2025-0103]

Hours of Service: Protein Transport of Indiana, L.L.C.; Application for Exemption

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of application for exemption; request for comments.

SUMMARY: FMCSA requests public comment on an exemption application submitted by Protein Transport of Indiana, L.L.C. (Protein Transport). Protein Transport's operation involves the transportation of chicken products. The company has requested an

exemption to allow it to operate under the agricultural operations provision in the hours-of-service (HOS) rules which provides regulatory relief from the requirements for drivers transporting certain agricultural commodities within a 150 air-mile radius from the source of the agricultural commodities.

DATES: Comments must be received on or before July 31, 2025.

ADDRESSES: You may submit comments identified by Federal Docket Number FMCSA 2025-0103 by any of the following methods:

- *Federal eRulemaking Portal:* www.regulations.gov. See the Public Participation and Request for Comments section below for further information.
- *Mail:* Dockets Operations, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590-0001.
- *Hand Delivery or Courier:* 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590-0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* (202) 493-2251.

Each submission must include the Agency name and the docket number (FMCSA-2025-0103) for this notice. Note that DOT posts all comments received without change to www.regulations.gov, including any personal information included in a comment. Please see the Privacy Act heading below.

Privacy Act: In accordance with 49 U.S.C. 31315(b), DOT solicits comments from the public to better inform its exemption process. DOT posts these comments, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice DOT/ALL-14 FDMS (Federal Docket Management System (FDMS)), which can be reviewed at <https://www.transportation.gov/individuals/privacy/privacy-act-system-records-notices>. The comments are posted without edit and are searchable by the name of the submitter.

FOR FURTHER INFORMATION CONTACT: Ms. Bernadette Walker, Driver and Carrier Operations Division; Office of Carrier, Driver and Vehicle Safety Standards, FMCSA; (202) 366-9220; or Bernadette.walker@dot.gov. If you have questions on viewing or submitting material to the docket, contact Dockets Operations at (202) 366-9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials.

A. Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA-2025-0103), indicate the specific section of this document to which the comment applies, and provide a reason for your suggestions or recommendations. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comment online, go to <https://www.regulations.gov/docket/FMCSA-2025-0103> document, click on this notice, click "Comment," and type your comment into the text box on the following screen.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing.

FMCSA will consider all comments and material received during the comment period. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable.

B. Confidential Business Information (CBI)

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to the notice contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to the notice, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission that constitutes CBI as "PROPIN" to indicate it contains proprietary information. FMCSA will treat such marked submissions as confidential under the Freedom of Information Act, and they will not be placed in the public docket of the notice. Submissions containing CBI should be sent to Brian Dahlin, Chief, Regulatory Evaluation Division, Office of Policy, FMCSA, 1200 New Jersey

Avenue SE, Washington, DC 20590–0001 or via email at brian.g.dahlin@dot.gov. At this time, you need not send a duplicate hardcopy of your electronic CBI submissions to FMCSA headquarters. Any comments FMCSA receives not specifically designated as CBI will be placed in the public docket for this notice.

C. Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble as being available in the docket, go to <https://www.regulations.gov> insert FMCSA–2025–0103 in the keyword box, select the document tab and choose the document to review. To view comments, click this notice, then click “Browse Comments.” If you do not have access to the internet, you may view the docket by visiting Docket Operations on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., ET Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315(b) to grant exemptions from the Federal Motor Carrier Safety Regulations. FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including the applicant’s safety analysis. The Agency must provide an opportunity for public comment on the request.

The Agency reviews the application, safety analyses, and public comments submitted and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved absent such exemption, pursuant to the standard set forth in 49 U.S.C. 31315(b)(1). The Agency must publish its decision in the **Federal Register** (49 CFR 381.315(b)). If granted, the notice will identify the regulatory provision from which the applicant will be exempt, the effective period, and all terms and conditions of the exemption (49 CFR 381.315(c)(1)). If the exemption is denied, the notice will explain the reason for the denial (49 CFR 381.315(c)(2)). The exemption may be renewed (49 CFR 381.300(b)).

III. Applicant’s Request

Applicant’s Request

Protein Transport is an interstate carrier of chicken products that travels to various agricultural facilities to process hens that have reached the end of their productive lives. Once the hens are processed onsite, the applicant transports that product to processing facilities to be used to make pet food and hog feed. Protein Transport is requesting that the chicken products it transports be considered an agricultural commodity so that it can operate under the agricultural commodity exemption.

The applicant states it has encountered difficulties in securing and keeping the required number of drivers to maintain its operations. According to the applicant, the ongoing avian influenza has drastically diminished the supply of chickens available for business, which in turn has increased the travel demands needed to meet its supply requirements. The applicant states that its operations are vital in creating the food supplies for pets and hog products necessary for the smooth operation of society and agricultural systems.

Applicant’s Equivalent Level of Safety

Protein Transport believes the exemption would not compromise safety because it will check and monitor its power units every 10,000 miles, and perform an oil change every 15,000 miles. The applicant states that by prioritizing operations within a 150-mile radius, the drivers will spend less time on the road covering fewer miles, thereby reducing the overall freight mileage by 20,000 to 30,000 miles each quarter of the year. The applicant further states it will continue to prioritize safety over transportation of the load because its drivers have been instructed to inform management when they need to take a break for any reason.

IV. Request for Comments

In accordance with 49 U.S.C. 31315(b), FMCSA requests public comment from all interested persons on Protein Transport’s request that the chicken products it transports be considered an agricultural commodity so that it can operate under the agricultural commodity exemption. All comments received before the close of business on the comment closing date will be considered and will be available for examination in the docket at the location listed under the **ADDRESSES** section of this notice. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent

practicable. In addition to late comments, FMCSA will also continue to file, in the public docket, relevant information that becomes available after the comment closing date. Interested persons should continue to examine the public docket for new material.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2025–0125]

Hours of Service: National Propane Gas Association; Application for Exemption

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of application for exemption; request for comments.

SUMMARY: FMCSA requests public comment on the application from the National Propane Gas Association (NPGA) for an exemption from various hours-of-service (HOS) requirements between December 15 and March 15 each year to enable the propane industry to better prepare and respond to emergencies threatening human health and safety during winter. The applicant requests the exemption to allow drivers to drive up to 12 hours per day and be on duty up to 15 hours per day, without weekly limits, and to replace the 34-hour restart with a 24-hour restart, with prior notice by NPGA to FMCSA.

DATES: Comments must be received on or before July 31, 2025.

ADDRESSES: You may submit comments identified by Docket Number FMCSA–2025–0125 by any of the following methods:

- **Federal eRulemaking Portal:** www.regulations.gov. See the Public Participation and Request for Comments section below for further information.

- **Mail:** Dockets Operations, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590–0001.

- **Hand Delivery or Courier:** 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

- **Fax:** (202) 493–2251.

Each submission must include the Agency name and the docket number (FMCSA–2025–0125) for this notice. Note that DOT posts all comments received without change to www.regulations.gov, including any personal information included in a comment. Please see the Privacy Act heading below.

Privacy Act: In accordance with 49 U.S.C. 31315(b), DOT solicits comments from the public to better inform its exemption process. DOT posts these comments, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice DOT/ALL–14 FDMS (Federal Docket Management System (FDMS)), which can be reviewed at <https://www.transportation.gov/individuals/privacy/privacy-act-system-records-notices>. The comments are posted without edit and are searchable by the name of the submitter.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Clemente, Driver and Carrier Operations Division; Office of Carrier, Driver and Vehicle Safety Standards, FMCSA; (202) 366–9220; or richard.clemente@dot.gov. If you have questions on viewing or submitting material to the docket, contact Dockets Operations at (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials.

A. Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2025–0125), indicate the specific section of this document to which the comment applies, and provide a reason for your suggestions or recommendations. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comment online, go to <https://www.regulations.gov/docket/FMCSA-2025-0125/document>, click on this notice, click “Comment,” and type your comment into the text box on the following screen.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing.

FMCSA will consider all comments and material received during the comment period. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable.

B. Confidential Business Information (CBI)

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to the notice contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to the notice, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission that constitutes CBI as “PROPIN” to indicate it contains proprietary information. FMCSA will treat such marked submissions as confidential under the Freedom of Information Act, and they will not be placed in the public docket of the notice. Submissions containing CBI should be sent to Brian Dahlin, Chief, Regulatory Evaluation Division, Office of Policy, FMCSA, 1200 New Jersey Avenue SE, Washington, DC 20590–0001 or via email at brian.g.dahlin@dot.gov. At this time, you need not send a duplicate hardcopy of your electronic CBI submissions to FMCSA headquarters. Any comments FMCSA receives not specifically designated as CBI will be placed in the public docket for this notice.

C. Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble as being available in the docket, go to <https://www.regulations.gov> insert FMCSA–2025–0125 in the keyword box, select the document tab and choose the document to review. To view comments, click this notice, then click “Browse Comments.” If you do not have access to the internet, you may view the docket by visiting Docket Operations on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., ET Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315(b) to grant exemptions from the Federal Motor

Carrier Safety Regulations. FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including the applicant’s safety analysis. The Agency must provide an opportunity for public comment on the request.

The Agency reviews the application, safety analyses, and public comments submitted and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved absent such exemption, pursuant to the standard set forth in 49 U.S.C. 31315(b)(1). The Agency must publish its decision in the **Federal Register** (49 CFR 381.315(b)). If granted, the notice will identify the regulatory provision from which the applicant will be exempt, the effective period, and all terms and conditions of the exemption (49 CFR 381.315(c)(1)). If the exemption is denied, the notice will explain the reason for the denial (49 CFR 381.315(c)(2)). The exemption may be renewed (49 CFR 381.300(b)).

III. Applicant’s Request

Current Regulatory Requirements

Under 49 CFR 395.3(a)(2) and (3), a property-carrying commercial motor vehicle (CMV) driver may drive only a total of 11 hours during a period of 14 consecutive hours after coming on duty following 10 consecutive hours off duty. Under 49 CFR 395.3(b)(1) and (2), no motor carrier shall permit or require a driver of a property-carrying CMV to drive, nor shall any driver drive a property-carrying CMV, regardless of the number of motor carriers using the driver’s services, for any period after having been on duty 60 hours in any period of 7 consecutive days, or having been on duty 70 hours in any period of 8 consecutive days. Additionally, under 49 CFR 395.3(c)(1) or (2), any period of 7 or 8 consecutive days may end with the beginning of an off-duty period of 34 or more consecutive hours.

Applicant’s Request

The NPGA requests a five-year exemption for its member company drivers to waive the requirements of 49 CFR 395.3 with prior notice to FMCSA, between the period of December 15th and March 15th, when the need for propane as heating fuel is most urgent. NPGA states that its request is based on the Agency’s prior approval of exemption applications for other industries that enable individual drivers to respond to specified conditions with

temporary waiver of certain provisions of the HOS regulations. NPGA is the national trade association of the propane industry which has a membership of nearly 2,400 companies, and 36 State and regional associations representing members in all 50 States. Their membership includes retail marketers of propane gas who deliver the fuel to the end user, propane producers, transporters and wholesalers, and manufacturers and distributors of equipment, containers, and appliances.

According to NPGA, the winter of 2024–2025 was the most disruptive in eleven years, as extreme cold snaps, polar vortexes, ice storms and other winter weather affected significant areas of the U.S. between January and late March 2025. The applicant therefore requests exemptions from several provisions.

First, NPGA requests that drivers covered by the exemption be allowed up to 15 hours of on-duty time daily, up to 12 hours of driving time daily, and be allowed to waive the limit on the number of consecutive days that a driver may utilize the exemption. With prior notice to FMCSA by NPGA, any period of six consecutive days during the exemption “window” may end with the beginning of an off-duty period of 24 or more consecutive hours, as opposed to the current option of 34 or more consecutive hours off duty to reset the “weekly” HOS limits.

The requested exemption would also remove the restriction on drivers who have been on duty for 60 hours over seven consecutive days, or 70 hours over eight consecutive days. NPGA believes these waivers would efficiently and effectively allow its members to respond to emergency crises, and indicate that drivers who utilize the special exemption, following prior notice by NPGA to FMCSA, must maintain appropriate documentation to demonstrate the threat to human health and safety within the scope of the special exemption.

NPGA states that the proposed exemption would allow for organizing driver schedules in advance, rather than reacting to an emergency, more efficient responses to critical concerns, and for propane marketers to improve planning before an emergency. Instead of waiting for a crisis to occur, marketers and transporters may secure and procure sufficient supplies in advance and organize their drivers to meet heating demands more efficiently and effectively. To clearly define the “scope” of the request, NPGA provides a brief outline of the Terms and Conditions in their application to apply to those individuals providing propane

services for periods of peak consumer demand. Included in this outline is that drivers and motor carriers utilizing the exemption must comply with all other provisions of the Federal Motor Carrier Safety Regulations, including adhering to all conditions in 49 CFR 390.3 not covered by the exemption, and that drivers must also complete the Fatigue and Wellness course provided by the Propane Education and Research Council.

A copy of NPGA’s application for exemption is available for review in the docket for this notice.

IV. Request for Comments

In accordance with 49 U.S.C. 31315(b), FMCSA requests public comment from all interested persons on NPGA’s application for an exemption from various HOS requirements in 49 CFR 395.3. All comments received before the close of business on the comment closing date will be considered and will be available for examination in the docket at the location listed under the **ADDRESSES** section of this notice. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable. In addition to late comments, FMCSA will also continue to file, in the public docket, relevant information that becomes available after the comment closing date. Interested persons should continue to examine the public docket for new material.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2025–0128]

Application for Employment: CloudTrucks, LLC., Application for Exemption

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of application for exemption; request for comments.

SUMMARY: FMCSA requests public comment on the application submitted by CloudTrucks, LLC (CloudTrucks) for an exemption from certain requirements of the application for employment regulations. Specifically, CloudTrucks seeks an exemption from the

requirement to collect the following information from prospective drivers: list of employers’ names, addresses, dates of employment, reason for leaving, nature of the position the driver held, and if the driver was subject to the alcohol and controlled substances testing requirements. Instead, CloudTrucks proposes using its own verification process that consists of cross-referencing national databases to include HireRight’s Drive-A-Check (DAC) report, FMCSA’s Drug and Alcohol Clearinghouse (DACH), Pre-employment Screening Program (PSP), Commercial Driver’s License Information System (CDLIS).

DATES: Comments must be received on or before July 31, 2025.

ADDRESSES: You may submit comments identified by Docket Number FMCSA–2025–0128 by any of the following methods:

- *Federal eRulemaking Portal:* www.regulations.gov. See the Public Participation and Request for Comments section below for further information.

- *Mail:* Dockets Operations, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590–0001.

- *Hand Delivery or Courier:* 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

- *Fax:* (202) 493–2251.

Each submission must include the Agency name and the docket number (FMCSA–2025–0128) for this notice. Note that DOT posts all comments received without change to www.regulations.gov, including any personal information included in a comment. Please see the Privacy Act heading below.

Privacy Act: In accordance with 49 U.S.C. 31315(b), DOT solicits comments from the public to better inform its exemption process. DOT posts these comments, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice DOT/ALL–14 FDMS (Federal Docket Management System (FDMS)), which can be reviewed at <https://www.transportation.gov/individuals/privacy/privacy-act-system-records-notices>. The comments are posted without edit and are searchable by the name of the submitter.

FOR FURTHER INFORMATION CONTACT: Ms. Bernadette Walker, Driver and Carrier Operations Division; Office of Carrier, Driver and Vehicle Safety Standards, FMCSA; (202) 366–9220; or

bernadette.walker@dot.gov. If you have questions on viewing or submitting material to the docket, contact Dockets Operations at (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials.

A. Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2025–0128), indicate the specific section of this document to which the comment applies, and provide a reason for your suggestions or recommendations. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comment online, go to <https://www.regulations.gov/docket/FMCSA-2025-0128/document>, click on this notice, click “Comment,” and type your comment into the text box on the following screen.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing.

FMCSA will consider all comments and material received during the comment period. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable.

B. Confidential Business Information (CBI)

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to the notice contain commercial or financial information that is customarily treated as private, and that you actually treat as private, and that is relevant or responsive to the notice, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission that constitutes CBI as “PROPIN” to indicate it contains proprietary information. FMCSA will treat such marked submissions as confidential under the Freedom of Information Act, and they will not be

placed in the public docket of the notice. Submissions containing CBI should be sent to Brian Dahlin Chief, Regulatory Evaluation Division, Office of Policy, FMCSA, 1200 New Jersey Avenue SE, Washington, DC 20590–0001 or via email at brian.g.dahlin@dot.gov. At this time, you need not send a duplicate hardcopy of your electronic CBI submissions to FMCSA headquarters. Any comments FMCSA receives not specifically designated as CBI will be placed in the public docket for this notice.

C. Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble as being available in the docket, go to <https://www.regulations.gov> insert FMCSA–2025–0128 in the keyword box, select the document tab and choose the document to review. To view comments, click this notice, then click “Browse Comments.” If you do not have access to the internet, you may view the docket by visiting Docket Operations on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE., Washington, DC 20590–0001, between 9 a.m. and 5 p.m., ET Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315(b) to grant exemptions from the Federal Motor Carrier Safety Regulations. FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including the applicant’s safety analysis. The Agency must provide an opportunity for public comment on the request.

The Agency reviews the application, safety analyses, and public comments submitted and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved absent such exemption, pursuant to the standard set forth in 49 U.S.C. 31315(b)(1). The Agency must publish its decision in the **Federal Register** (49 CFR 381.315(b)). If granted, the notice will identify the regulatory provision from which the applicant will be exempt, the effective period, and all terms and conditions of the exemption (49 CFR 381.315(c)(1)). If the exemption is denied, the notice will explain the reason for the denial (49 CFR

381.315(c)(2)). The exemption may be renewed (49 CFR 381.300(b)).

III. Applicant’s Request

Current Regulatory Requirement

Under 49 CFR 391.21(b)(10)(i)–(iv), prospective driver employees (meaning applicants) are required to provide prospective motor carrier employers with the following information: name and address of the driver’s employers during the 3 years preceding the date of the application, dates of employment, reason for leaving, and for any driver employed after October 29, 2004, confirmation whether the driver candidate held a position that was subject to the Federal Motor Carrier Safety Regulations or designated as safety sensitive by any DOT mode subject to controlled substance and alcohol testing. Under 391.21(b)(11), the information required in 49 CFR 391.21(b)(10) extends to 10 years if the applicant was an operator of a CMV proceeding the 3 years contained in paragraph 49 CFR 391.21(b)(1).

Applicant’s Request

CloudTrucks is a motor carrier based in Dallas, TX, that operates a national fleet consisting of over 700 owner-operator power units, transporting general freight, commodities, and retail products across the continental United States. CloudTrucks seeks a five-year exemption from the application for employment requirements in 49 CFR 391.21(b)(10)(i)–(iv) and 391.21(b)(11).

The applicant states that the requirements in 49 CFR 391.21(b)(10)(i)–(iv) and 391.21(b)(11) were created for paper applications and “single-fleet carriers.” The applicant asserts that these requirements are inefficient and yield low response rates, frequent errors, and long cycle times. According to the applicant, the exemption, if granted, would allow the recruiting of qualified drivers at a faster pace, decrease the administrative workload for prior employers, and, most crucially, enhance highway safety by relying on credible federal databases instead of unproductive paper processes.

Applicant’s Equivalent Level of Safety

CloudTrucks believes its streamlined approach ensures that an equivalent level of safety will be achieved. To streamline hiring without compromising safety, CloudTrucks currently validates each applicant’s background through national databases (PSP, CDLIS, and DACH). The applicant believes this process collectively provides a more accurate and timely safety profile than

what the regulations require. According to the applicant, the following actions will ensure that an equivalent or greater level of safety is achieved:

- Use of PSP crash/inspection reports, CDLIS carrier-code matching, and HireRight DAC (DAC) (which applicant asserts this captures every employer that triggered a roadside inspection or filed a DAC, will likely reveal safety problems and is an appropriate substitute for 49 CFR 391.21(b)(10));
- Real-time query of DACH (which applicant notes will ensure a definitive record);
- Obtaining DAC archives and motor vehicle records suspension dates (which applicant notes are fraud-resistant); and
- Bundling of all database reports on each driver into a single PDF document (which applicant asserts makes it easier for investigators to interpret drivers' records maintained by employers).

The applicant included the following additional safeguards it believes ensure it would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved absent such exemption:

- CloudTrucks Safety Score (0–100) is refreshed nightly, factoring in electronic logging device (ELD) compliance, speeding, harsh events, inspections, and crashes.
- A Three-Strikes Program that includes coaching, suspension, and termination for individuals who repeatedly engage in unsafe behavior.
- Continuous monitoring through in-cab telematics.
- A zero-tolerance Clearinghouse policy dictates that any prohibited status leads to immediate disqualification.

Lastly, CloudTrucks' application includes an explanation of a three-pillar safety program that consist of rigorous on-boarding, real-time safety scoring, and three strikes accountability. According to CloudTrucks, "these initiatives give CloudTrucks a proactive, data-rich safety net far exceeding the reactive, low-yield phone/fax processes envisioned in the 1970s-era 49 CFR 391.21."

A copy of the CloudTrucks LLC's application for exemption is available for review in the docket for this notice.

IV. Request for Comments

In accordance with 49 U.S.C. 31315(b), FMCSA requests public comment from all interested persons on CloudTrucks LLC's application for an exemption from the requirements in 49 CFR 391.21(b)(10) and 49 CFR 391.21(b)(11) to allow the applicant to use its "streamlined verification"

process that consists of cross-referencing six nation-wide databases. All comments received before the close of business on the comment closing date will be considered and will be available for examination in the docket at the location listed under the **ADDRESSES** section of this notice. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable. In addition to late comments, FMCSA will also continue to file, in the public docket, relevant information that becomes available after the comment closing date. Interested persons should continue to examine the public docket for new material.

Larry W. Minor,

Associate Administrator of Policy.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2020–0081]

Inspection, Repair and Maintenance; Inspector Qualifications; Intermodal Association of North America (IANA) Application for Renewal of Exemption

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of application for exemption renewal; request for comments.

SUMMARY: FMCSA requests public comment on an application from the Intermodal Association of North America (IANA) to renew its exemption from the Federal Motor Carrier Safety Regulations (FMCSRs) that allows individuals who complete a training program consistent with IANA's Intermodal Recommended Practices (IRPs) to be considered qualified inspectors for purposes of the periodic inspection rule, or qualified brake inspectors for purposes of the brake system inspection, repair and maintenance requirements. The exemption was initially granted on August 18, 2020, and expires on August 18, 2025.

DATES: Comments must be received on or before July 31, 2025.

ADDRESSES: You may submit comments identified by Docket Number FMCSA–2020–0081 by any of the following methods:

- *Federal eRulemaking Portal:* www.regulations.gov. See the Public

Participation and Request for Comments section below for further information.

- *Mail:* Dockets Operations, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590–0001.

- *Hand Delivery or Courier:* 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

- *Fax:* (202) 493–2251.

Each submission must include the Agency name and the docket number (FMCSA–2020–0081) for this notice. Note that DOT posts all comments received without change to www.regulations.gov, including any personal information included in a comment. Please see the Privacy Act heading below.

Privacy Act: In accordance with 49 U.S.C. 31315(b), DOT solicits comments from the public to better inform its exemption process. DOT posts these comments, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice DOT/ALL–14 FDMS (Federal Docket Management System (FDMS)), which can be reviewed at <https://www.transportation.gov/individuals/privacy/privacy-act-system-records-notices>. The comments are posted without edit and are searchable by the name of the submitter.

FOR FURTHER INFORMATION CONTACT: Mr. David Sutula, Chief, FMCSA Vehicle and Roadside Operations Division, Office of Carrier, Driver, and Vehicle Safety Standards; (202) 366–2551; MCPSV@dot.gov. If you have questions on viewing or submitting material to the docket, call Dockets Operations at (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials.

A. Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2020–0081), indicate the specific section of this document to which the comment applies, and provide a reason for suggestions or recommendations. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an

email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comment online, go to <https://www.regulations.gov/docket/FMCSA-2020-0081/document>, click on this notice, click “Comment,” and type your comment into the text box on the following screen.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing.

FMCSA will consider all comments and material received during the comment period. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable.

B. Confidential Business Information (CBI)

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to the notice contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to the notice, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission that constitutes CBI as “PROPIN” to indicate it contains proprietary information. FMCSA will treat such marked submissions as confidential under the Freedom of Information Act, and they will not be placed in the public docket of the notice. Submissions containing CBI should be sent to Brian Dahlin brian.g.dahlin@dot.gov, Chief, Regulatory Evaluation Division, Office of Policy, FMCSA, 1200 New Jersey Avenue SE, Washington, DC 20590–0001 or via email at brian.g.dahlin@dot.gov. At this time, you need not send a duplicate hardcopy of your electronic CBI submissions to FMCSA headquarters. Any comments FMCSA receives not specifically designated as CBI will be placed in the public docket for this notice.

C. Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble as being available in the docket, go to <https://www.regulations.gov>, insert FMCSA–2020–0081 in the keyword box, select the document tab and choose the document to review. To view

comments, click this notice, then click “Browse Comments.” If you do not have access to the internet, you may view the docket by visiting Docket Operations on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE., Washington, DC 20590–0001, between 9 a.m. and 5 p.m., ET Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315(b) to grant exemptions from the Federal Motor Carrier Safety Regulations. FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including the applicant’s safety analysis. The Agency must provide an opportunity for public comment on the request.

The Agency reviews the application, safety analyses, and public comments submitted and determines whether granting the exemption would likely maintain a level of safety equivalent to, or greater than, the level that would be achieved absent such exemption, pursuant to the standard in 49 U.S.C. 31315(b)(1). The Agency must publish its decision in the **Federal Register** (49 CFR 381.315(b)). If granted, the notice will identify the regulatory provision from which the applicant will be exempt, the effective period, and all terms and conditions of the exemption (49 CFR 381.315(c)(1)). If the exemption is denied, the notice will explain the reason for the denial (49 CFR 381.315(c)(2)). The exemption may be renewed (49 CFR 381.300(b)).

III. IANA Application for Exemption

The FMCSRs require individuals performing (1) annual inspections of commercial motor vehicles (CMVs) under 49 CFR 396.17, or (2) inspections, maintenance, repairs, or service to the brake systems on CMVs under § 396.25, to be properly qualified to perform such inspections. Under §§ 396.19(a)(3)(ii) and 396.25(d)(3)(ii), an individual who has a combination of training or experience totaling at least one year as outlined in those sections is considered to be qualified to conduct those inspections.

On August 18, 2020 (85 FR 50876), FMCSA published a notice of final disposition granting IANA a limited 5-year exemption to allow individuals who complete a training program

consistent with a set of Intermodal Recommended Practices (IRPs) and associated requirements that has been developed by IANA to be considered a qualified inspector or qualified brake inspector for intermodal equipment (IME) under the Federal Motor Carrier Safety Regulations (FMCSR), in lieu of having one year of training or experience, or a combination thereof, prior to becoming a certified inspector/brake inspector. The Agency determined that granting the exemption to allow individuals who complete a performance-based training program consistent with the IRPs and associated requirements developed by IANA, instead of the time-based training and experience requirements specified in the FMCSRs, would likely achieve a level of safety equivalent to or greater than the level of safety achieved by compliance with the regulation.

IANA has requested the renewal of its exemption to continue to allow individuals who have successfully completed a training program consistent with IANA’s IRPs to be qualified inspectors or qualified brake inspectors without having the required one year of training or experience. A copy of the application for renewal is included in the docket referenced at the beginning of this notice.

IV. Request for Comments

In accordance with 49 U.S.C. 31315(b), FMCSA requests public comment from all interested persons on IANA’s application for exemption from 49 CFR 396.19(a)(3)(ii) and 396.25(d)(3)(ii) of the FMCSRs. All comments received before the close of business on the comment closing date indicated at the beginning of this notice will be considered and will be available for examination in the docket at the location listed under the Addresses section of this notice. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable. In addition to late comments, FMCSA will also continue to file, in the public docket, relevant information that becomes available after the comment closing date. Interested persons should continue to examine the public docket for new material.

Larry W. Minor,

Associate Administrator of Policy.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION**Federal Motor Carrier Safety Administration**

[Docket No. FMCSA–2023–0190]

Proposed Revisions to DataQs Requirements for MCSAP Grant Funding

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice; response to public comments and request for comments on new proposal.

SUMMARY: FMCSA addresses comments received in response to the Agency's **Federal Register** notice titled, "Appeal Process: Requests for Data Review." In addition, FMCSA proposes revisions to the DataQs requirements for Motor Carrier Safety Assistance Program (MCSAP) Grant funding in response to the comments and announces a 60-day comment period.

DATES: Comments must be received on or before September 2, 2025.

ADDRESSES: You may submit comments identified by docket number FMCSA–2023–0190 using any of the following methods:

- **Federal eRulemaking Portal:** Go to: <https://www.regulations.gov/docket/FMCSA-2023-0190/document>. Follow the online instructions for submitting comments.
- **Mail:** Dockets Operations, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590–0001.
- **Hand Delivery or Courier:** Dockets Operations, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.
- **Fax:** (202) 493–2251.

To avoid duplication, please use only one of these four methods. See the "Public Participation and Request for Comments" portion of the **SUPPLEMENTARY INFORMATION** section for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: Scott Valentine, Data Quality Program Manager, Analysis Division, Office of Analysis, Research and Technology, FMCSA, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, (202) 366–4869, Scott.Valentine@dot.gov. If you have questions regarding viewing or

submitting material to the docket, contact Dockets Operations, (202) 366–9826.

SUPPLEMENTARY INFORMATION:**I. Public Participation and Request for Comments****A. Submitting Comments**

If you submit a comment, please include the docket number for this notice (FMCSA–2023–0190), indicate the specific section of this document to which your comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to <https://www.regulations.gov/docket/FMCSA-2023-0190/document>, click on this notice, click "Comment," and type your comment into the text box on the following screen.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing.

FMCSA will consider all comments and material received during the comment period.

Confidential Business Information (CBI)

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA), 5 United States Code (U.S.C.) 552, CBI is exempt from public disclosure. If your comments responsive to the notice contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to the notice, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission that constitutes CBI as "PROPIN" to indicate it contains proprietary information. FMCSA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of the notice. Submissions containing CBI should be sent to Brian Dahlin, Chief, Regulatory Evaluation Division, Office of Policy, FMCSA, 1200 New Jersey Avenue SE, Washington, DC 20590–0001 or via email at brian.g.dahlin@dot.gov. At this time, you need not send a duplicate hardcopy

of your electronic CBI submissions to FMCSA headquarters. Any comments FMCSA receives not specifically designated as CBI will be placed in the public docket for this notice.

B. Viewing Comments and Documents

To view any documents mentioned as being available in the docket, go to <https://www.regulations.gov/docket/FMCSA-2023-0190/document> and choose the document to review. To view comments, click this notice, then click "Browse Comments." If you do not have access to the internet, you may view the docket online by visiting Dockets Operations on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

C. Privacy

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its regulatory process. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov. As described in the System of Records Notices, DOT/ALL 14—Federal Docket Management System, which can be reviewed at <https://www.transportation.gov/individuals/privacy/privacy-act-system-records-notices>, the comments are searchable by the name of the submitter.

II. Background

DataQs is the online system for motor carriers, commercial motor vehicle (CMV) drivers and other interested parties to request and track a review of Federal and State crash and inspection data submitted to and stored by FMCSA that the requester believes is incomplete or incorrect. This system is critical to allowing users to ensure the data FMCSA maintains on them is accurate and complete. Users can review their own data and request corrections to erroneous or incomplete data records.

On September 14, 2023, FMCSA proposed the development and implementation of a federal appeals process for Requests for Data Review (RDRs) submitted to the Agency through its DataQs system (88 FR 63195, FR notice).¹ FMCSA also announced a 60-day comment period in the FR notice. The comment period closed on

¹ You may view the notice and the comments received at <https://www.regulations.gov/docket/FMCSA-2023-0190>.

November 13, 2023. The proposed appeals process was intended to benefit users by ensuring appeals are reviewed in an independent and thorough manner, as well as providing timelines for when the initial request and appeals process should be completed.

III. Summary of Public Comments and Response

FMCSA received 54 docket comments in response to the FR notice. Of these, 42 submissions contained comments specifically on the changes proposed in that FR notice. The commenters included motor carriers, drivers, owner-operators, industry associations, safety consultants, and members of the enforcement community. The following entities submitted comments on the proposed changes: American Bus Association (ABA), American Trucking Associations (ATA), Coca-Cola Beverages Florida, LLC, Compass Coach Inc., Commercial Vehicle Safety Alliance (CVSA), Dedicated Logistics, LLC, Gateway RB Transport LLC, Gemini Motor Transport LP, Greyhound Lines, Inc. (Greyhound), Halvor Lines, Inc., Hampel Oil Distributors, Henry Seaton on behalf of a group of organizations,² Jacam Catalyst LLC, Legacy Express LLC, Minnesota Trucking Association (MTA), National Association of Small Trucking Companies (NASTC), National Tank Truck Carriers (NTTC), Owner-Operator Independent Drivers Association (OOIDA), Railsback HazMat Safety Professionals (Railsback), LLC, Rio Valley Biofuel Transport, Royal Logistics, INC, Safety Compliance & Training LLC, Suarez Transportation Inc., Trucker Nation, Truckload Carriers Association, United Motorcoach Association (UMA), Veolia North America, Lewis Britton, Timothy DeWitt, Richard Goins, Jim Morgan, Dennis Tant, Patrick Weinbauer, and Dan Willis. Comments outside the scope of this proposal are not discussed in this notice.

The majority of the comments were balanced in tone and supportive of FMCSA's proposal to develop and implement a federal appeals process for RDRs. Many of the commenters provided suggestions on improving the

proposed appeals process and DataQs program more broadly. These recommendations covered three categories: calls to improve the impartiality of the RDR process, suggested approaches for the federal appeals process and the DataQs program, and requests to enhance the timeliness of RDRs.

The following sections provide a summary of the comments received and the Agency's responses.

A. Impartiality of the RDR Process

Thirty commenters asked that FMCSA improve the impartiality of the RDR process. Of those, thirteen commenters (NASTC, NTTC, OOIDA, Trucker Nation, UMA, Railsback, Hampel Oil Distributors Inc., Jacam Catalyst LLC, Jim Morgan, Hotshot Trucking Shows USA, Legacy Express LLC, Rio Valley Biofuel Transport, and one anonymous commenter) took issue with RDRs being reviewed by the officer, inspector, or agency that performed the inspection or issued the violation. NTTC stated that "there are many times that an inspector refuses to make a correction despite evidence that they made a mistake," while NASTC and Trucker Nation offered recommendations to improve impartiality during the Initial RDR. NASTC stated that FMCSA should require States to "establish adjudication by independent third parties and to disallow involvement in adjudication by any state or local body or other party with [an] actual or appearance of conflict of interest, such as review by the issuing officer or his or her supervisor." Trucker Nation added that the "issuing officer [should] serve ONLY as an information source for the analyst/adjudicator who is assigned to the RDR" to enhance the objectivity of the RDR process.

Regarding requests asking that the RDR be reviewed again after the initial decision on the RDR (RDR reconsideration), six commenters (ABA, ATA, Gemini Motor Transport LP, Greyhound, OOIDA, and Veolia North America) recommended that FMCSA's proposed State guidelines include a requirement that RDR reconsideration requests be addressed by a reviewer(s) different than the initial reviewer. OOIDA stated "We feel the proposed guidelines must include requirements to ensure and certify that each reconsideration request is addressed by a different reviewer than the person who performed the initial review of the RDR." Other commenters above echoed this sentiment. In addition, four commenters (Lewis Britton, Richard Goins, Jim Morgan, and NTTC) indicated that these RDR

Reconsideration requests be handled by neutral independent parties or panels.

Eight commenters (ABA, ATA, CVSA, Greyhound, NTTC, OOIDA, Trucker Nation, and Royal Logistics INC) voiced concerns about the differences in how States address RDRs and called for a standard nationwide process. CVSA "concur[s] with the motor carrier community that there are inconsistencies in how the states treat DataQs and that additional standardization is appropriate." Greyhound added that "FMCSA should require, not just suggest, that all states adopt it. For nationwide carriers like Greyhound, such uniformity is necessary in order to avoid confusion and unnecessary administrative burdens." Trucker Nation echoed these comments stating "[e]stablishing a standardized review process at the State agencies is crucial for ensuring consistency, fairness, and transparency in decision-making across all State agencies." Trucker Nation also recommended that adoption of this standardized review process be a requirement for MCSAP Grant funding. ABA added that this standard process should include "both initial requests and reconsideration requests [because] there must be a uniform system of independent reconsideration at the State level, if the bias is to be addressed."

Seven commenters (Compass Coach Inc., Gemini Motor Transport LP, Hampel Oil Distributors Inc., Trucker Nation, and others) claimed to have RDRs closed without explanation, which led to assumptions of bias in the review process. Trucker Nation noted "motor carriers are often not afforded the explanation of what actions were taken to reach a determination because a lack of information is received from officers." Trucker Nation also recommended that FMCSA develop procedures to ensure RDRs are completed using the same process and that the process clearly shows carriers the steps taken to reach the decision.

FMCSA Response

FMCSA acknowledges commenters requested more impartiality, uniformity, and transparency in the RDR process. After careful review and consideration of these comments, FMCSA has determined its initial proposal for a federal-level appeals process would not sufficiently address the due process issues that currently exist with State-reviewed RDRs. Instead, FMCSA is proposing an approach to improve the fundamental fairness of the RDR process by implementing sufficient process guardrails for States. Changes would benefit users by ensuring appeals are

² Organizations include Air and Expedited Motor Carriers Association (AEMCA), Airforwarders Association (AfA), Alliance for Safe, Efficient, and Competitive Truck Transportation (ASECTT), American Home Furnishings Alliance (AHFA), Apex Capitol Corp, Auto Haulers Association of America (AHAA), CDL Drivers Unlimited, Specialized Furniture Carriers, The Expedite Association of North America (TEANA), Transportation & Logistics Council (T&LC) and Transportation Loss Prevention and Security Association (TLP&SA).

reviewed in an independent, impartial, uniform, and transparent manner, as well as providing timelines for the initial request and appeals process.

FMCSA is also proposing revisions to the MCSAP Grant requirements in Section IV of this notice in response to commenters' feedback regarding improving the impartiality, uniformity, and transparency in the RDR process. These revised requirements would provide necessary guardrails for the RDR process, accountability for States, and empower States to take more complete ownership of their DataQs programs.

B. Suggestions for RDR Process

Ten commenters (ABA, Coca-Cola Beverages Florida, LLC, CVSA, Gemini Motor Transport LP, Greyhound, MTA, OOIDA, Trucker Nation, UMA, and Veolia North America) called for FMCSA to expand the scope of RDRs eligible for the federal appeals process. CVSA stated, "it is [not] practical to go through the effort that will be involved in establishing and maintaining this federal appeals process if it will not address the majority of the RDRs that would be submitted." OOIDA recommended that RDRs eligible for the federal appeals process should include those "related to Crash/Inspection/Investigation/Audit, Registration (MCS-150)/Licensing & Insurance/Operating Authority (OP-1, OP2), Household Goods (HHG) Complaints, and Drug and Alcohol Clearinghouse Violation Petitions . . . [and] any factual disputes between parties that have not been settled during the initial review processes." Trucker Nation went a step further, stating that "ALL violation types should be afforded the opportunity for appeal."

Unlike the commenters above, ATA supported the limited scope of the federal appeals process proposed in the FR notice. ATA noted that "members raised concerns that allowing all RDRs could create a myriad of submissions that lead to an ineffective independent review process." ATA also suggested that the Agency treat DataQs like the Crash Preventability Determination Program (CPDP) and propose enhancements/expansion based on industry comment and feedback.

Six commenters (Gemini Transport LP, Lewis Britton, NTTC, OOIDA, Trucker Nation, and UMCA) recommended using review panels in the federal appeals process and suggested criteria for those panels. NTTC stated that the appeal panel should include members with "some level of ground transportation experience [and a] basic understanding

of mechanics, trucking, and maintenance." Both OOIDA and Trucker Nation added that the panel should include industry representation. OOIDA specifically outlined a five-member review panel with "two representatives of a state commercial motor vehicle enforcement agency, one representative of a state department of transportation, one representative of a motor carrier, and one representative of a driver." Gemini Transport LP suggested the panel could be made up of safety and compliance specialists or professionals trained to operate with a non-biased perspective.

Four commenters (ATA, CVSA, OOIDA, and Trucker Nation) requested that FMCSA share federal appeals decisions publicly. ATA "encourages the Agency to publish, on the DataQ website or other publicly-available site, summaries of RDRs that are received at the federal level for independent review and the resulting determination." ATA also recommended that the Agency publish quarterly statistics on determinations, similar to CPDP. CVSA and OOIDA echoed ATA's suggestion for public dissemination of RDR decisions and statistics. CVSA specifically suggested that these decisions be posted on the DataQs and CSA websites.

Four commenters (ABA, MTA, OOIDA, and UMA) recommended that FMCSA remove all data related to an active RDR from public websites until an outcome is decided. OOIDA stated "no data related to an active DataQs challenge should be posted on MCMIS, SMS, or any other Agency system." ABA, MTA, and UMA concurred with this view.

FMCSA Response

FMCSA acknowledges that the federal appeals process proposed in the FR notice was narrow in scope by only reviewing requests pertaining to interpretation of regulations and policies, leaving many RDRs to be reviewed under processes that exist today. Regarding the scope of eligible RDRs, FMCSA's proposal in Section IV of this notice (Proposal: Revised DataQs Requirements for MCSAP Funding) includes defined processes at each stage of review that will apply to all RDRs submitted for State-collected data in DataQs.

FMCSA concurs with the comments calling for the use of a panel in the RDR process. FMCSA's proposal outlined in Section IV of this notice includes requirements for the use of a panel of subject matter experts in the decision-making process for RDR

Reconsideration and Final Review requests.

FMCSA is committed to increasing awareness and understanding of the DataQs process among users. As part of FMCSA's proposal outlined in Section IV, the Agency would require that each State submit a DataQs Implementation Plan detailing their RDR processes and procedures. Approved plans would be made available to the public on the DataQs website to promote transparency and reasonable expectations. In addition, FMCSA is proposing that the responses for closed (those in which a decision has been issued) RDRs include explanatory reasons for the decision so that users can better understand the decision-making process and interpret the State's conclusions. As this proposal is State-centered and does not include centralized federal review, decisions from RDRs would not be posted publicly on FMCSA website but would be available to the parties involved with the RDR.

Finally, FMCSA does not agree with the suggestion to remove all data related to pending RDRs from public view. Removing this data creates opportunities for requestors to "improve" their safety records in the short term by submitting frivolous RDRs, which would impact the efficacy of the DataQs program and other FMCSA safety programs. FMCSA will continue to display all motor carrier safety data (*i.e.*, crashes, inspections, and investigations) on its websites.

C. Timeliness of RDR Process

Ten commenters (ABA, ATA, Dedicated Logistics, Greyhound, Halvor Lines, MTA, OOIDA, Trucker Nation, UMA, and Veolia North America) voiced concerns around the timeliness of the current RDR process. ABA, Greyhound, and Halvor Lines, Inc. all agreed that establishing deadlines would improve the effectiveness of the RDR process. ABA noted, "If appropriate deadlines are not established, the process will be ineffectual, and both the MCMIS data will suffer as well as the regulated community." Greyhound added that "reasonable time limits should be imposed on the initial RDR decision and the decision on reconsideration." OOIDA and MTA suggested specific timelines. OOIDA recommended that all RDRs be decided within 60 days of the initial request, the initial review and RDR Reconsideration be completed within 30 days, and the federal appeal review (if approved) should be completed within 30 days. MTA suggested that States have one week to complete their review of the RDR.

ATA went a step further and recommended that FMCSA provide “an outline of the expected review-time once the RDR is received at the federal level, the steps the Agency is taking to address the backlog of current RDRs, and how the program implementation will be handled.”

FMCSA Response

FMCSA agrees that the timeliness of RDRs is important to the DataQs program and other safety programs. Timely, accurate, and complete data advances the Agency’s safety mission and leads to safer roads. FMCSA’s proposal outlined in Section IV of this notice includes timeline standards for each stage of RDR review. These standards aim to improve the timeliness of the RDR process by requiring States to open, review, and communicate a decision within 21 days of the requestor’s submission of an RDR and RDR Reconsideration requests, and within 30 days of the requestor’s submission for Final Review requests.

IV. Proposal: Revised DataQs Requirements for MCSAP Funding

In response to the stakeholder feedback provided, FMCSA is proposing revisions to the DataQs requirements for MCSAP grant funding to ensure proper due process for users of the DataQs system. These requirements aim to improve the impartiality, timeliness, transparency, and fundamental fairness of the RDR process, thereby strengthening FMCSA’s ability to make data-driven decisions that inform resource allocation, policy changes, and new initiatives to prevent large truck and motorcoach-involved crashes and enhance safety on the nation’s roads. The requirements would apply to requests submitted in DataQs on State-owned data; they would not apply to federally-owned data, *i.e.*, requests submitted to CPDP, petitions submitted to the Drug and Alcohol Clearinghouse Program, or other FMCSA offices.

FMCSA’s proposal would require States to incorporate a multi-level review process for RDRs, escalating the review from the DataQs analyst in the State MCSAP Lead Agency to a responsible decision-maker or panel of subject matter experts. Each RDR would be evaluated based on the documentation and evidence provided by the submitter of the RDR, along with any State documents or evidence. States would be encouraged to adopt a multi-level review process appropriate for their agency(s) structure to support independent evaluation of the request. This multi-level review process would benefit the ability for requestors to get

a fair and thorough response with assessment from multiple evaluators within a State. Each State would be required to submit a DataQs Implementation Plan to FMCSA detailing how their agency will meet FMCSA’s requirements for each stage of the RDR review process. The proposed requirements for the RDR review process are outlined below.

General Requirements

- States must establish points of contact for crash and inspection RDRs.
- States must accept and conduct a good faith review of all inspection-related RDRs that are submitted within 3 years from the date of inspection and, for all crash-related RDRs, for 5 years from the date of a crash.
- States must follow FMCSA’s policy related to Adjudicated Citations.³
- State MCSAP Lead Agencies must submit a DataQs Implementation Plan for how the agency will meet the objectives and requirements of the Initial Review, Reconsideration Review, and Final Review processes. In addition, the plan must outline how the agency will address any existing backlog of RDRs and what steps they will take to prevent a potential backlog moving forward.
- States must submit an Initial DataQs Implementation Plan that must be approved by FMCSA. Updates to the plan must be submitted as part of the annual Commercial Vehicle Safety Plan (CVSP) process. If changes do not meet FMCSA’s requirements, FMCSA will notify the State, and the previous version of the plan will remain in effect until the State obtains FMCSA approval of any changes. Approved plans would be made available to the public through DataQs.
- States must participate in FMCSA program reviews of their DataQs processes and procedures, as required for current existing MCSAP programs.

State Plan Requirements

Initial Review Process Requirements

- States must open an RDR within seven days of submission. The status of the RDR would then change from “New” to “Open—In Review.”
- States must respond to the RDR, either to request additional information or communicate a decision, within 21 days of submission.
- If the State requests additional information from the requestor, the

requestor has 14 days to provide the information. These 14 days do not impact the timeline for the State’s review. The clock will stop while the requestor gathers additional information and will restart if the requestor responds to the State. If the requestor does not respond, the system will close the request with the status “Closed—No Requestor Response.” A request that is reopened after being closed for no response will be reviewed at the level it was closed, and not escalated.

- The issuing officer or inspector cannot be the sole decision-maker when the outcome of the RDR is “Closed—No Data Correction Made.”

- Each RDR closed with the status “Closed—No Data Correction Made” must adequately explain the facts and analysis supporting the decision. Responses must contain the following information:

- Description of or link to the State’s approved DataQs Implementation Plan;
- Decision-maker (name and title);
- List of evidence reviewed;
- Decision;
- Specific reason(s) for decision; and
- Next steps/directions for more information (RDR Reconsideration process).

RDR Reconsideration Review Process

- The RDR Reconsideration process is applicable to requests that received a full review and a decision during the Initial Review phase, and the requestor is seeking an additional level of review. It would not include requests that are closed due to lack of information, or those reopened without a valid reason.

- States must open a RDR Reconsideration request within 7 days of the request.

- As in the Initial Review process, if the State requests additional information from the requestor during the RDR Reconsideration, the requestor has 14 days to provide the information. These 14 days do not impact the timeline for the State’s review. The clock will stop while the requestor gathers additional information and will restart if the requestor responds to the State. If the requestor does not respond, the system will close the request with the status “Closed—No Requestor Response.”

- States must reach a decision and communicate it to the submitter within 21 days.

- The RDR Reconsideration must be reviewed and decided by a person or panel with appropriate subject matter expertise within the MCSAP Lead Agency.

- The RDR Reconsideration must not be reviewed or decided by the issuing

³ Further information about the FMCSA policy is available at <https://www.federalregister.gov/documents/2014/06/05/2014-13022/motor-carrier-management-information-system-mcmis-changes-to-improve-uniformity-in-the-treatment-of>.

officer or inspector, nor a direct supervisor of the issuing officer or inspector.

- Legal review should be incorporated, where applicable.
- Each RDR Reconsideration closed with the status “Closed—No Data Correction Made” must adequately explain the facts and analysis supporting the decision. Responses must contain the following information:
 - Decision-maker (name and title);
 - Description of evidence reviewed;
 - Decision;
 - Specific reason(s) for decision; and
 - Next steps/directions for more information (Final Review process).

Final Review Process Requirements

- The Final Review process is applicable to requests that received a full review and a decision during the Initial Review phase, RDR Reconsideration phase, and the requestor is seeking a third and final level of review. States must open a Final Review request within seven days of the request.
- As in the Initial Review and RDR Reconsideration processes, if the State requests additional information from the requestor during the Final Review, the requestor has 14 days to provide the information. These 14 days do not impact the timeline for the State’s review. The clock will stop while the requestor gathers additional information and will restart if the requestor responds to the State. If the requestor does not respond, the system will close the request with the status “Closed—No Requestor Response.”
- States must reach a decision on the Final Review and communicate it to the submitter within 30 days.
- The Final Review must be escalated for review by a responsible decision-maker identified by the State (e.g., Senior Leader in the MCSAP Office) who is outside the chain of command for the issuing officer or inspector. Alternatively, the review may be delegated to a panel that provides a recommendation to the decision-maker. Panels could include representatives from the State’s existing DataQs Review Council, CVSA, or the trucking industry, etc. However, the person(s) or panel reviewing and/or deciding the Final Review must not be anyone involved in the review or decision of the Initial RDR decision or RDR Reconsideration decision.
- The State’s decision would be considered final by FMCSA after the Final Review is completed.
- FMCSA will be available to consult during the RDR Reconsideration or Final Review processes if a State

requests FMCSA’s assistance or interpretation of the Federal Motor Carrier Safety Regulations, Hazardous Materials Regulations, or related policy.

Burden of Proof Applicable to RDRs, RDR Reconsideration Requests, and Final Review Requests

- The burden of proof for all requests within DataQs (RDRs, RDR Reconsideration Requests, and Final Review Requests) remains with the requester. Requests to remove or modify information that negatively impacts the requester or others will not be successful without factual and/or legal justification of why the information is incorrect or incomplete, providing documentation supporting the request when necessary.
- Unsubstantiated requests may be returned to the requester for more information or closed with no action taken. Requests that are closed for no response from the requester will not be deemed a substantive decision by the State and may be reopened once a sufficient response is received.
- For RDR Reconsideration Requests and Final Review Requests, requesters must address the State’s factual and/or legal basis for the decision and explain why the requestor believes the decision to be incorrect, with submission of additional documentation supporting the request when necessary.

V. Comments Sought

FMCSA seeks comments on the proposal described above. In addition, the Agency is asking for input on the following questions related to the proposal:

1. FMCSA outlined proposed revisions to DataQs requirements for MCSAP Grant funding in Section IV above. What are the potential benefits associated with this proposal? What are the potential challenges?
2. What challenges, if any, will States face in adhering to the timelines for each stage of the RDR process outlined above? Are there any other factors FMCSA should consider related to timelines?
 - a. FMCSA proposes that the time an RDR spends with the requestor when the State asks for additional information will not impact the timeline for the State’s review. The clock will stop while the requestor gathers additional information and will restart if the requestor responds. Is this approach reasonable?
 - b. When the State requests additional information from other State/local enforcement entities, how should FMCSA account for the time when the RDR needs input from State or Federal

personnel outside the MCSAP Lead Agency?

- c. FMCSA acknowledges that meeting the timeline standard for every RDR may not be achievable. How should delays by either the State or the requestor in the RDR process be handled? What are some examples of extenuating circumstances that would delay the review of an RDR?

3. The proposal outlined in Section IV revises MCSAP Grant requirements and would impact funding distributed by FMCSA. How should States be held accountable for compliance?

4. If the State does not receive information from the requestor when additional information is requested, or the additional information the requestor provides is inadequate, how should the RDR be handled? Should the State reserve the right to proceed with the review and come to a decision? Should the previous round of review get another chance to reconsider their previous decision when new information is provided?

5. To what extent should FMCSA prescriptively define the criteria for a “valid reason” for the Reconsideration Review Process described in Section IV versus leaving this determination to the States? If FMCSA were to define the process, what specific information should a submitter be required to provide to meet that standard?

VI. Next Steps

FMCSA thanks industry stakeholders and enforcement personnel for engaging in the comment period to continually improve the RDR process and the DataQs program. These processes help ensure complete and accurate data is available to focus FMCSA resources where they will have the greatest impact on safety. A follow-up notice in the **Federal Register** will respond to any comments received and announce the revised MCSAP Grant requirements with ample time prior to implementation.

Sue Lawless,

Assistant Administrator.

BILLING CODE 4910–EX–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Actions

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of persons who have been removed from OFAC's List of Specially Designated Nationals and Blocked Persons (SDN List).

DATES: This action was issued on May 28, 2025. See **SUPPLEMENTARY INFORMATION** for relevant dates.

FOR FURTHER INFORMATION CONTACT: OFAC: Associate Director for Global Targeting, 202-622-2420; Assistant Director for Licensing, 202-622-2480; the Assistant Director for Sanctions Compliance, 202-622-2490; or <https://ofac.treasury.gov/contact-ofac>.

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions

programs are available on OFAC's website: <https://ofac.treasury.gov>.

Notice of OFAC Actions

On May 28, 2025, OFAC has determined that circumstances no longer warrant the inclusion of the following persons on the SDN List and their property and interests in property are no longer blocked pursuant to Executive Order 14024:

1. BORTSOV, Nikolay Ivanovich (Cyrillic: БОРЦОВ, Николай Иванович), Russia; DOB 08 May 1945; nationality Russia; Gender Male; Secondary sanctions risk: See Section 11 of Executive Order 14024.; Member of the State Duma of the Federal Assembly of the Russian Federation (individual) [RUSSIA-EO14024].

On May 28, 2025, OFAC removed from the SDN List the persons below, who were designated pursuant to the Foreign Narcotics Kingpin Designation Act, 21 U.S.C. 1901-1908:

Individual

1. PEREZ ALVEAR, Jesus (a.k.a. "Chucho Perez"), Guerrero, Mexico; DOB 12 Nov 1984; POB Distrito Federal, Mexico; nationality Mexico; Gender Male; R.F.C. PEAJ-841112-UD1 (Mexico); C.U.R.P. PEAJ841112HDFRLS06 (Mexico) (individual) [SDNTK] (Linked To: CARTEL DE JALISCO NUEVA GENERACION; Linked To: LOS CUINIS; Linked To: GALLISTICA DIAMANTE).

Entity

1. GALLISTICA DIAMANTE (a.k.a. GALLISTICA DIAMANTE S.A. DE C.V.; a.k.a. TICKET PREMIER), Aguascalientes, Aguascalientes, Mexico; Quinta Los Pirules Num. Ext. 182, Quinta Los Naranjos, Leon, Guanajuato 37210, Mexico; website www.ticketpremier.mx [SDNTK].

Lisa M. Palluconi,

Acting Director, Office of Foreign Assets Control.

BILLING CODE 4810-AL-P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Agency Information Collection Activities; Comment Request on Form 1099-LTC—Long-Term Care and Accelerated Death Benefits

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of information collection; request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the

IRS is inviting comments on the information collection request outlined in this notice.

DATES: Written comments should be received on or before September 2, 2025 to be assured of consideration.

ADDRESSES: Direct all written comments to Andres Garcia, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or by email to pra.comments@irs.gov. Include OMB Control No. 1545-1519 in the subject line of the message.

FOR FURTHER INFORMATION CONTACT:

View the latest drafts of the tax forms related to the information collection listed in this notice at <https://www.irs.gov/draft-tax-forms>. Requests for additional information or copies of this collection should be directed to Marcus W. McCrary, (470) 769-2001.

SUPPLEMENTARY INFORMATION: The IRS, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the IRS assess the impact and minimize the burden of its information collection requirements. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to

minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Title: Long-Term Care and Accelerated Death Benefits.

OMB Control Number: 1545-1519.

Form Number: 1099-LTC.

Abstract: IRC sections 7702B and 101(g) respectively define situations under which benefits paid under a long-term health care insurance contract and accelerated death benefits paid under a life insurance policy may qualify for special tax treatment. IRC section 6050Q requires the payer to report all such benefit amounts paid during any calendar year, specifying whether or not the benefits were paid in whole or in part on a per diem or other periodic basis without regard to expenses. Benefit payers use Form 1099-LTC to report any long-term care or accelerated death benefits paid to an individual. Payers include insurance companies, governmental units, and viatical settlement providers.

Current Actions: There is no change to the previously approved information collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations, and governments.

Estimated Number of Respondents: 3,000.

Estimated Number of Responses: 410,600.

Estimated Time per Response: 13 minutes.

Estimated Total Annual Burden Hours: 88,963.

Approved: June 27, 2025.
Marcus W. McCrary,
Tax Analyst.

DEPARTMENT OF THE TREASURY

Agency Information Collection
Activities; Submission for OMB
Review; Comment Request; Internal
Revenue Service (IRS) Information
Collection Request

AGENCY: Departmental Offices, U.S.
Department of the Treasury.
ACTION: Notice.

SUMMARY: The Department of the Treasury will submit the following information collection requests to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. The public is invited to submit comments on these requests.
DATES: Comments should be received on or before July 31, 2025 to be assured of consideration.
ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular

information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.
FOR FURTHER INFORMATION CONTACT: Copies of the submissions may be obtained from Melody Braswell by emailing PRA@treasury.gov, calling (202) 622–1035, or viewing the entire information collection request at www.reginfo.gov.
SUPPLEMENTARY INFORMATION:
Internal Revenue Service (IRS)
Title: Requirements and procedure for recovering reasonable administrative costs.

OMB Number: 1545–1356.
Regulation Project Number: TD 8725.
Abstract: Under Internal Revenue Code Section 7430, a prevailing party may recover the reasonable administrative or litigation costs incurred in an administrative or civil proceeding that relates to the determination, collection, or refund of any tax, interest, or penalty. Treasury Regulation Section 301.7430–2(c) provides that the IRS will not award administrative costs under section 7430 unless the taxpayer files a written request in accordance with the requirements of the regulation.
Current Actions: There is no change to this existing regulation.
Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households, and business or other for-profit organizations, not-for-profit institutions, farms, and the Federal government.
Estimated Number of Respondents: 38.
Estimated Time per Respondent: 2 hrs., 16 min.
Estimated Total Annual Burden Hours: 86.
Authority: 44 U.S.C. 3501 *et seq.*

DEPARTMENT OF VETERANS AFFAIRS
[OMB Control No. 2900–0911]
Agency Information Collection Activity: Suicide Prevention 2.0 Program—Community Opinion Survey
AGENCY: Veterans Health Administration, Department of Veterans Affairs.
ACTION: Notice.

SUMMARY: Veterans Health Administration (VHA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Comments must be received on or before September 2, 2025.

ADDRESSES: Comments must be submitted through www.regulations.gov.

FOR FURTHER INFORMATION CONTACT:

Program-Specific information:
Rebecca Mimmall, 202–695–9434,
vhacopra@va.gov.

VA PRA information: Dorothy Glasgow, 202–461–1084, VAPRA@va.gov.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VHA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VHA's functions, including whether the information will have practical utility; (2) the accuracy of VHA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or

the use of other forms of information technology.

Title: Suicide Prevention 2.0 Program—Community Opinion Survey.

OMB Control Number: 2900–0911.
https://www.reginfo.gov/public/do/PRAsearch (Once at this link, you can enter the OMB Control Number to find the historical versions of this Information Collection.)

Type of Review: Revision of a currently approved collection.

Abstract: Legal authority for this data collection is found in 38 U.S.C., Part I, Chapter 5, Section 527, which authorizes the collection of data that will allow measurement and evaluation of Department of Veterans Affairs (VA) Programs, the goal of which is improved health care for Veterans. The purpose of the Community Opinion Survey (COS) is to evaluate the impact of Community-Based Intervention (CBI) programs, including the Governor's Challenge (GC), on the population.

The information will be used to accomplish three aims: (1) collect baseline data on the knowledge and attitudes of adult U.S. citizens living in specified communities about Veterans, Veteran suicide, and resources available to Veterans to reduce suicide, prior to the implementation of suicide prevention programs; (2) collect follow-up data in the same communities to assess whether knowledge and attitudes have changed over time; and (3) determine whether the programs and policies implemented by a community resulted in positive change in knowledge and attitudes.

The data will be utilized by the Office of Suicide Prevention in VA Central Office to measure the return on investment of significant resources that have been invested to support communities in their efforts to reduce Veteran suicide. The CBI arm of VA's "Suicide Prevention 2.0" (SP2.0) program has launched two initiatives

whose goals are to increase the successful implementation of best practices to prevent Veteran suicide in local communities. The data collected will allow VA to measure a baseline level of expected outcomes, follow-up levels, and explore the role of new programs in any changes, as well as inform program planning and evaluation.

The GC is one of the initiatives supported by SP2.0 and is structured so that State teams are provided training and technical assistance by VA to expand their efforts to implement suicide prevention programs in their State. This data collection will assist the State teams in assessing the effects of their new programming or activities. To date, 55 states and territories have accepted the GC Initiative, and VA will administer the COS in every participating state and territory. The increase in the number of respondents and burden hours is due to the survey being administered for completion of Time 2 data in the first 22 states and for Time 1 and Time 2 data in the remaining 33 states and territories.

Affected Public: Individuals or Households.

Estimated Annual Burden: 11,000 hours.

Estimated Average Burden per Respondent: 15 minutes.

Frequency of Response: Once annually.

Estimated Number of Respondents: 44,000.

Authority: 44 U.S.C. 3501 *et seq.*

Shunda Willis,

*Acting, VA PRA Clearance Officer, (Alt.)
Office of Enterprise and Integration/Data
Governance Analytics, Department of
Veterans Affairs.*

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion

in today's **List of Public Laws**.

Last List June 24, 2025

Public Laws Electronic Notification Service (PENS)

PENS is a free email notification service of newly

enacted public laws. To subscribe, go to https://portalguard.gsa.gov/__layouts/PG/register.aspx.

Note: This service is strictly for email notification of new laws. The text of laws is not available through this service. **PENS** cannot respond to specific inquiries sent to this address.

TABLE OF EFFECTIVE DATES AND TIME PERIODS—JULY 2025

This table is used by the Office of the Federal Register to compute certain dates, such as effective dates and comment deadlines, which appear in agency documents. In computing these

dates, the day after publication is counted as the first day.

When a date falls on a weekend or holiday, the next Federal business day is used. (See 1 CFR 18.17)

A new table will be published in the first issue of each month.
