DEPARTMENT OF LABOR

Bureau of Labor Statistics

Information Collection Activities; Comment Request

AGENCY: Bureau of Labor Statistics, Department of Labor.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The Bureau of Labor Statistics (BLS) is soliciting comments concerning the proposed extension of the "Job Openings and Labor Turnover Survey." A copy of the proposed information collection request can be obtained by contacting the individual listed below in the **ADDRESSES** section of this notice.

DATES: Written comments must be submitted to the office listed in the **ADDRESSES** section of this notice on or before September 5, 2025.

ADDRESSES: Send comments to Erin Good, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, by email to BLS_PRA_Public@bls.gov.

FOR FURTHER INFORMATION CONTACT: Erin Good, BLS Clearance Officer, at 202-691-7628 (this is not a toll free number). (See **ADDRESSES** section.)

SUPPLEMENTARY INFORMATION:

I. Background

The Job Openings and Labor Turnover Survey (JOLTS) collects data on job vacancies, labor hires, and labor separations. As the monthly JOLTS time series grow longer, their value in assessing the business cycle, the difficulty that employers have in hiring workers, and the extent of the mismatch between the unused supply of available workers and the unmet demand for labor by employers will increase. The study of the complex relationship between job openings and unemployment is of particular interest to researchers. While these two

measures are expected to move in opposite directions over the course of the business cycle, their relative levels and movements depend on the efficiency of the labor market in matching workers and jobs.

Along with the job openings rate, trends in hires and separations may broadly identify which aggregate industries face the tightest labor markets. The quits rate, the number of persons who quit during an entire month as a percentage of total employment, may provide clues about workers' views of the labor market or their success in finding better jobs. In addition, businesses will be able to compare their own turnover rates to the national, regional, and major industry division rates.

The BLS uses the JOLTS form to gather employment, job openings, hires, and total separations from business establishments. The information is collected once a month at two BLS Data Collection Centers (DCCs), located in Atlanta, Georgia and Kansas City, Missouri. The information is collected using Computer Assisted Telephone Interviewing (CATI), web reporting, email, and FAX. An establishment is in the sample for 36 consecutive months.

II. Current Action

Office of Management and Budget clearance is being sought for the Job Openings and Labor Turnover Survey (JOLTS). The BLS is requesting an extension to the existing clearance for the JOLTS. There are no major changes being made to the forms, procedures, data collection methodology, or other aspects of the survey. Increasing public interest in the JOLTS Survey has led to the addition of state estimates and has broadened incorporation of JOLTS data in economic analyses conducted by Federal, State, and major economic research organizations.

III. Desired Focus of Comments

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

- Enhance the quality, utility, and clarity of the information to be collected.

• Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or

other forms of information technology, e.g., permitting electronic submissions of responses.

Title of Collection: Job Openings and Labor Turnover Survey.

OMB Number: 1220–0170.
