

Section 202(e) of the FPA provides that an entity which seeks to export electricity must obtain an order from DOE authorizing that export (16 U.S.C. 824a(e)). On April 10, 2023, the authority to issue such orders was delegated to the DOE's Grid Deployment Office (GDO) under Redelegation Order No. S3-DEL-GD1-2023.

On March 12, 2025, HQUS filed an application (Application or App) for renewal of export authorization to transmit electric energy from the United States to Canada for a term of five years. App. at 1.

According to the Application, HQUS is a power marketer with its principal place of business in Hartford, CT. *Id.* at 1. The Applicant states that it is "a wholly-owned subsidiary of H.Q. Energy Holdings, Inc. and an indirect wholly-owned subsidiary of Hydro-Quebec[.]" *Id.* at 2. HQUS represents that it is "an energy marketer engaged [sic] the business of buying and selling electricity for its own account and brokering electricity for others, transmission services and related activities" and that it "has been authorized by [the Federal Energy Regulatory Commission] to sell electricity in interstate commerce at market-based rates." *Id.* at 3.

The Applicant states that it "neither owns generation resources, nor has a franchised service area or native load obligation." App. at 5. HQUS represents that "[t]he electric energy that [it] will export to Canada from these markets, on either a firm or interruptible basis, will not impair the sufficiency of the electric energy supply within the United States." *Id.* at 7. The Applicant also states that it "does not have the ability to cause total exports on cross-border facilities to exceed the authorized instantaneous transmission rate[.]" *Id.* at 6. HQUS represents that it will schedule its export transactions "in compliance with applicable [North American Electric Reliability Corporation] reliability criteria, standards and guidelines in effect at the time of a proposed export along with those of relevant regional reliability organizations." *Id.* at 9.

The existing international transmission facilities to be utilized by the Applicant have been previously authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties. *See* App. at Exhibit C.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the Application at Electricity.Exports@hq.doe.gov. Protests should be filed in

accordance with Rule 211 of Federal Energy Regulatory Commission's (FERC's) Rules of Practice and Procedure (18 CFR 385.211). Any person desiring to become a party to this proceeding should file a motion to intervene at Electricity.Exports@hq.doe.gov in accordance with FERC Rule 214 (18 CFR 385.214).

Comments and other filings concerning HQUS' Application should be clearly marked with GDO Docket No. EA-182-F. A final decision will be made on the requested authorization after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after DOE evaluates whether the proposed action will have an adverse impact on the sufficiency of supply or reliability of the United States electric power supply system.

SUPPLEMENTARY INFORMATION: The United States Department of Energy (DOE) regulates electricity exports from the United States to foreign countries in accordance with section 202(e) of the Federal Power Act (FPA) (16 U.S.C. 824a(e)) and regulations thereunder (10 CFR 205.300 *et seq.*). Sections 301(b) and 402(f) of the DOE Organization Act (42 U.S.C. 7151(b) and 7172(f)) transferred this regulatory authority, previously exercised by the now-defunct Federal Power Commission, to DOE.

Section 202(e) of the FPA provides that an entity which seeks to export electricity must obtain an order from DOE authorizing that export (16 U.S.C. 824a(e)). On April 10, 2023, the authority to issue such orders was delegated to the DOE's Grid Deployment Office (GDO) under Redelegation Order No. S3-DEL-GD1-2023.

On March 31, 2025, Danske Commodities filed an application (Application or App.) for authorization to transmit electric energy from the United States to Canada for a term of ten years. App. at 1.

Danske Commodities represents that it will purchase “power to be exported from a variety of sources, including but not limited to, power marketers, independent power producers, or U.S. electric utilities and federal power marketing entities[.]” *Id.* at 4. The Applicant thus asserts that its proposed exports “will not impair the sufficiency of the electric power supply within the U.S.” *Id.*

Danske Commodities further asserts that its proposed exports will not impair or tend to impede the sufficiency of electric supplies in the U.S. or the regional coordination of electric utility planning or operations. App. at 5. The Applicant states that it “will make all necessary commercial arrangements and will obtain any and all other regulatory approvals required in order to schedule and deliver power exports.” *Id.* at 4.

The existing international transmission facilities to be utilized by the Applicant have been previously authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties. See App. at Exhibit C.
