RIN 1625-AA00

Safety Zone; Little Potato Slough, Stockton, CA

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone for navigable waters within a 100-yard radius of the vessels and machinery conducting operations at the site of the vessel CHALEUR in Little Potato Slough near Stockton, CA. II. Background Information and Regulatory History

The Coast Guard is issuing this temporary rule under the authority in 5 U.S.C. 553(b)(B). This statutory provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are "impracticable, unnecessary, or contrary to the public interest." The Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because the vessel CHALEUR is submerged within Little Potato Slough and the Coast Guard, which must oversee salvage operations, did not receive final details of the plan until July 8, 2025. It is impracticable to publish an NPRM because we must establish this safety zone by July 14, 2025.

Also, under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule is impracticable because prompt action is needed to respond to the potential safety hazards associated with the salvage operations to begin on July 14, 2025.
