

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****Noise Compatibility Program for Chicago/Rockford International Airport, Rockford, Illinois**

AGENCY: Federal Aviation Administration, DOT.

ACTION: Acceptance of Chicago/Rockford International Airport noise exposure map.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the noise exposure map submitted by the Greater Rockford Airport Authority for Chicago/Rockford International Airport is compliant with applicable statutory and regulatory requirements.

DATES: The effective date of the FAA's determination on the noise exposure map is July 31, 2025.

FOR FURTHER INFORMATION CONTACT: Craig Pullins, 2300 Devon Avenue, Suite 312, Des Plaines, Illinois 60018. 847-294-7354.

SUPPLEMENTARY INFORMATION: The FAA determined the noise exposure map submitted by the Greater Rockford Airport Authority for Chicago/Rockford International Airport, is in compliance with applicable statutory and regulatory requirements, effective July 31, 2025. Under title 49, United States Code (U.S.C.) section 47503, an airport operator may submit to the FAA, noise exposure maps depicting non-compatible uses as of the date such map is submitted, a description of estimated aircraft operations during a forecast period that is at least five years in the future and how those operations will affect the map. A noise exposure map must be prepared in accordance with title 14, Code of Federal Regulations (CFR) part 150, the regulations promulgated pursuant to 49 U.S.C. 47502 and developed in consultation with public agencies and planning authorities in the area surrounding the airport, state and Federal agencies, interested and affected parties in the local community, and aeronautical users of the airport. In addition, an airport operator that submitted a noise exposure map, which the FAA determined is compliant with statutory and regulatory requirements, may submit a noise compatibility program for FAA approval that sets forth measures the operator has taken or proposes to take to reduce existing non-compatible uses and prevent the introduction of additional non-compatible uses.

The FAA completed its review of the noise exposure map and supporting documentation submitted by the Greater Rockford Airport Authority and determined the noise exposure map and accompanying documentation are compliant with applicable requirements. The documentation that constitutes the noise exposure map includes the current and forecast NEM graphics, 2023 Existing Condition Noise Exposure Map and 2028 Future Condition Noise Exposure Map; plus, all other narrative, graphic or tabular representations of the data required by 14 CFR 150.101 and 49 U.S.C. sections 47503 and 47506. This determination is effective on July 31, 2025. FAA's determination on an airport's noise exposure map is limited to a finding that the noise exposure map was developed in accordance with the 49 U.S.C. sections 47503 and 47506 and procedures contained in 14 CFR part 150, Appendix A. FAA's acceptance of a noise exposure map does not constitute approval of the applicant's data, information or plans, or a commitment to approve a noise compatibility program or to fund the implementation of that program. If questions arise concerning the precise relationship of specific properties within noise exposure contours depicted on a noise exposure map, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of 49 U.S.C. 47506. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under 14 CFR part 150 or through FAA review and acceptance of a noise exposure map. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator that submitted a noise exposure map or with those public and planning agencies with which consultation is required under 49 U.S.C. section 47503. The FAA relied on the certification by the airport operator, under of 14 CFR 150.21 that the required consultations and opportunity for public review has been accomplished during the development of the noise exposure maps. Copies of the noise exposure map and supporting documentation and the FAA's

evaluation of the noise exposure maps are available for examination at the following locations:

Federal Aviation Administration, 2300 Devon Avenue, Suite 312, Des Plaines, Illinois 60018.

Chicago/Rockford International Airport, Greater Rockford Airport Authority, Administrative Offices, 60 Airport Drive, Rockford, IL 61109.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION**National Highway Traffic Safety Administration**

[Docket No. NHTSA-2025-0056]

Agency Information Collection Activities; Notice and Request for Comment; Driver Monitoring System (DMS) in SAE L2 Driver Support Systems

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice and request for comments on a new information collection.

SUMMARY: NHTSA invites public comments about the Agency's intention to request approval from the Office of Management and Budget (OMB) for a new information collection request. Before a Federal agency can collect certain information from the public, it must receive approval from OMB. Under procedures established by the Paperwork Reduction Act of 1995, before seeking OMB approval, Federal agencies must solicit public comment on proposed collections of information, including extensions and reinstatement of previously approved collections. This document describes a collection of information request titled "Driver Monitoring System (DMS) in SAE L2 Driver Support Systems," for which NHTSA intends to seek OMB approval to allow NHTSA to conduct a one-time study.

DATES: Comments must be submitted on or before October 6, 2025.
