B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC–2025–0148 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <https://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Additional Information

The NRC is issuing for public comment a DG in the NRC’s “Regulatory comment” series. This series was developed to describe methods that are acceptable to the NRC staff for implementing specific parts of the agency’s regulations, to explain techniques that the staff uses in evaluating specific issues or postulated events, and to describe information that the staff needs in its review of applications for permits and licenses.

The DG, entitled “Guidance for Technology-Inclusive Risk-Informed Change Evaluation,” is temporarily identified by its task number, DG–1439. The DG is a proposed new regulatory guide that endorses, subject to the clarifications in Section C of the DG, NEI 22–05 as one acceptable alternative to using the criteria in section 50.59 of title 10 of the *Code of Federal Regulations* (10 CFR), “Changes, tests, and experiments,” for evaluating changes under the special circumstances introduced when a plant is licensed using the guidance in NEI 18–04 and NEI 21–07. The licensee would be responsible for preparing any necessary requests for an exemption from specific requirements in 10 CFR 50.59 and related proposed license conditions to support this alternative.

The NRC is also issuing for public comment a regulatory analysis (ADAMS Accession No. ML24295A188). The NRC develops a regulatory analysis to assess the value of issuing or revising a RG as well as alternative courses of action.

III. Backfitting, Forward Fitting, and Issue Finality

Licensees generally are not required to comply with the guidance in this proposed RG. If the NRC proposes to use this RG in an action that would constitute backfitting, as that term is defined in 10 CFR 50.109, “Backfitting,” and as described in NRC Management Directive (MD) 8.4, “Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests”; affect the issue finality of an approval issued under 10 CFR part 52, “Licenses, Certifications, and Approvals for Nuclear Power Plants;” or constitute forward fitting, as that term is defined in MD 8.4, then the NRC staff will apply the applicable policy in MD 8.4 to justify the action. If a licensee believes that the NRC is using this DG in a manner inconsistent with the discussion in the Implementation section, then the licensee may inform the NRC staff in accordance with MD 8.4.

IV. Submitting Suggestions for Improvement of Regulatory Guides

A member of the public may, at any time, submit suggestions to the NRC for improvement of existing regulatory guides or for the development of new regulatory guides. Suggestions can be submitted on the NRC’s public website at <https://www.nrc.gov/reading-rm/doc-collections/reg-guides/contactus.html>. Suggestions will be considered in future updates and enhancements to the “Regulatory Guide” series.

V. Executive Order (E.O.) 12866

The Office of Information and Regulatory Affairs determined that this DG is not a significant regulatory action under E.O. 12866.

Dated: August 5, 2025.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations*, "Final environmental impact statement—notice of availability," the NRC is making available to the public NUREG-1437, Supplement 63 regarding the proposed renewal of the Constellation Energy Generation, LLC (CEG) Facility Operating License No. NPF-62 for an additional 20 years of operation for CPS. A notice of availability of the draft SEIS (NUREG-1437, Supplement 63, Draft Report for Comment) was published in the **Federal Register** on April 16, 2025 (90 FR 16011). The U.S. Environmental Protection Agency issued its notice of availability of the draft SEIS on April 18, 2025 (90 FR 16524). The public comment period on the draft SEIS ended on June 2, 2025, and the comments received on the draft SEIS are

addressed in the final SEIS (NUREG-1437, Supplement 63, Final Report).

II. Discussion

The draft SEIS (NUREG-1437, Supplement 63, Draft Report for Comment) was issued for public comment. The final SEIS (NUREG-1437, Supplement 63, Final Report) addresses the comments received on the draft SEIS. As discussed in Chapter 4 of the final SEIS, the NRC staff has determined that the adverse environmental impacts of license renewal for CPS (*i.e.*, the continued operation of CPS for a period of 20 years beyond the expiration date of the current operating license) are not so great that preserving the option of license renewal for energy-planning decision-makers would be unreasonable. This recommendation is based on: (1) information in the environmental report, as supplemented, and other documents submitted by CEG; (2) the NRC staff's consultation with Federal, State, Tribal, and local governmental agencies; (3) the NRC staff's independent environmental review; and (4) the NRC staff's consideration of public comments received during the scoping process and on the draft SEIS (NUREG-1437, Supplement 63, Draft Report for Comment).

Dated: August 6, 2025.

Acting Deputy Director, Division of Rulemaking, Environmental, and Financial Support, Office of Nuclear Material Safety and Safeguards.
