General Description of Collection: The Community Reinvestment Act regulation requires the FDIC to assess the record of banks and thrifts in helping meet the credit needs of their entire communities, including low- and moderate-income neighborhoods, consistent with safe and sound operations, and to take this record into account in evaluating applications for

mergers, branches, and certain other corporate activities. The total estimated annual burden is 215,207 hours which is a reduction of 16,375 hours from the 2022 submission. This reduction is due to the decrease in the number of FDIC-supervised banks and the changes in methodology for ICs 5, 8, and 11 that resulted in decreased respondent counts for each of ICs 5, 8, and 11.

2. *Title:* Qualifications for Failed Bank Acquisitions.

OMB Number: 3064–0169.

Form Number: None.

Affected Public: Insured State non-member banks and State savings associations.

Burden Estimate:

Source: FDIC.

General Description of Collection: The FDIC's policy statement on Qualifications for Failed Bank Acquisitions provides guidance to private capital investors interested in acquiring or investing in failed insured depository institutions regarding the terms and conditions for such investments or acquisitions. The information collected pursuant to the policy statement allows the FDIC to evaluate, among other things, whether such investors (and their related interests) could negatively impact the Deposit Insurance Fund, increase resolution costs, or operate in a manner that conflict with statutory safety and soundness principles and compliance requirements. There is no change in the method or substance of the collection. The estimated burden remains unchanged from the previous submission.

Request for Comment

Comments are invited on (a) whether the collections of information are necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collections, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collections of information on respondents, including through the use of automated collection techniques or other forms of information technology.
