*Abstract:* Each year, more than 7,000 visitors to the various units of the National Park System file reports of lost or found items. Reporting of lost or found personal property in national parks is governed by 36 CFR 2.22, “Disposition of Property,” which requires unattended property be impounded and deemed to be abandoned unless claimed by the owner or an authorized representative within 60 days. The 60-day period starts upon notification to the rightful owner of the property, if the owner can be identified; or from the time the property was placed in the superintendent’s custody, if the owner cannot be identified.

Unclaimed property must be stored for a minimum period of 60 days. If the item is not claimed by the owner or an authorized representative within the 60-day period, the property may be claimed by the finder, provided the finder is not an employee of the NPS. Found property not claimed by the owner, an authorized representative of the owner, or the finder, shall be deemed abandoned and disposed of in accordance with title 41 of the Code of Federal Regulations.

In order to comply with the requirements of 36 CFR 2.22, the Form 10–166, “Lost–Found Report,” is used by the park to identify personal property reported as lost or found and to return found items to the legitimate owner, or to the finder if the item is not claimed by the owner or their authorized representative. NPS Form 10–166 collects the following information from the visitor filing the report:

- Park name, receiving station (if appropriate), and date item was lost or found.
- Name, address, city, state, zip code, email address, and contact phone numbers (cell and home).
- Type of item, detailed description of item, and location where the item was last seen or found.
- Photograph of item (if available).

**SUPPLEMENTARY INFORMATION:**

*Background:* Section 1205(a) of the Omnibus Trade and Competitiveness Act of 1988 (the 1988 Act) (19 U.S.C. 3005) requires that the Commission keep the Harmonized Tariff Schedule of the United States (Harmonized Tariff Schedule or HTS) under continuous review and periodically recommend to the President such modifications in the HTS as the Commission considers necessary or appropriate to conform the HTS with amendments made to the International Convention on the Harmonized Commodity Description and Coding System (Convention), which contains the Harmonized System nomenclature in the Annex to the Convention. The World Customs Organization (WCO) administers and maintains the Harmonized System and has completed six systematic reviews of the Harmonized System nomenclature since 1988. The reviews are conducted to ensure that the Harmonized System is kept up to date in light of changes in technology or patterns of international trade.

The Harmonized System nomenclature provides uniform product architecture for the customs tariffs and statistical nomenclatures of all major trading countries of the world, including the United States. The

Harmonized System establishes the general arrangement or structure of product categories, set forth in chapters, 4-digit headings, and 6-digit subheadings. It also includes the general rules of interpretation, and section and chapter legal notes that define the scope of sections, chapters, 4-digit headings, and 6-digit subheadings. The HTS is based on the Harmonized System nomenclature. The HTS includes additional national subdivisions (8-digit subheadings and 10-digit statistical annotations), as well as additional U.S. chapter notes, and other national provisions that facilitate the administration of U.S. customs, tariff, and statistical programs.

In January 2026, the WCO is expected to publish recommended amendments to the Harmonized System nomenclature that the WCO proposes will enter into force on January 1, 2028. The amendments are the seventh in a series of such amendments and are part of the WCO's ongoing program of periodically reviewing and updating the Harmonized System nomenclature. The Commission will post a copy of the WCO recommended amendments on its website at [www.usitc.gov](http://www.usitc.gov), once they become available, likely in January 2026. A copy of the current HTS, which incorporates the Harmonized System nomenclature in its overall structure, is available on the Commission's website at <https://hts.usitc.gov>.

*Proposed recommendations; opportunity for submission of views by Federal agencies and the public:* In preparing its recommended modifications to the HTS to the President, the Commission will post the proposed recommendations on its website, likely in February 2026. The Commission will publish a notice in the **Federal Register** at that time providing notice of their availability and notice of procedures for filing written views, including the date by which such written views must be filed. To assist the public in understanding the proposed changes and in developing comments, the Commission will include, with the proposed recommendations, a non-authoritative cross-reference table linking the proposed headings, subheadings, and statistical annotations to the corresponding current headings, subheadings, and statistical annotations. Persons using the cross-reference table should be aware that the cross-references shown are subject to change during the course of the investigation.

*Recommendations to the President:* The Commission will submit its recommended modifications to the HTS to the President in the form of a report

that will include a summary of the information on which the recommendations were based, together with a statement of the probable economic effect of each recommended change on any industry in the United States. The report also will include a copy of all written views submitted by interested Federal agencies and a copy or summary, prepared by the Commission, of the views of all other interested parties. The Commission expects to submit that report in September 2026.

By order of the Commission.

Issued: August 12, 2025.
