Abstract of Information Available

No human remains are present. The 12 lots of associated funerary objects representing approximately 8,000+ associated funerary objects are one lot of ochre, one lot of unworked shell, one lot of ground stone, one lot of chipped stone, one lot of worked shell, one lot of non-human faunal remains, one lot of vegetal samples, one lot of charcoal samples, one lot of unworked stone, one lot of fire affected rock, one lot of ceramics, and one lot of post-contact items. The associated funerary objects were collected from site CA-SDI-5216 (SDM-W-1456; South Pointe Farms; Woodward Site) located in San Diego County, California between 1977 and 1978 by cultural resource management firm Scientific Resource Surveys, Inc. SDSU received the collection shortly thereafter and assigned the collection accession number SDSU-0015 (CMP-SDSU-0015). Previous repatriation of human remains from the collection (representing at minimum one individual) occurred in 2010 to the Tribes listed in the Determinations section below; the human remains were published in the **Federal Register** on July 18, 2003 (68 FR 42757). It is unknown whether any potentially hazardous substances were used to treat the associated funerary objects or the repatriated human remains.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the associated funerary objects described in this notice.

If competing requests for repatriation are received, SDSU must determine the most appropriate requestor prior to repatriation.
