

UPRR's Honda Trestle. Excavations were conducted pursuant to the provisions for emergency situations at 36 CFR 800.12(b)(2). In consultation with the federally recognized SYBCI, the entire artifact collection recovered during excavations will be repatriated due to the presence of human remains in all three units of the L-shaped block excavation. In addition to those items, the collection includes shell beads, lithic and ground stone tools, and faunal remains that, based on traditional knowledge, could reasonably be considered associated funerary items under NAGPRA.

Based on the information available, human remains representing at least one individual has been reasonably identified. A total of 5,098 associated funerary objects were identified in the three excavation units which had human remains, including flaked and ground stone tools, debitage, shell beads and ornaments, ground and polished stone, and faunal remains. No unassociated funerary objects, objects of cultural patrimony, or sacred objects are present.

Determinations

The DAF has determined that:

- The human remains described in this notice represent the physical remains of at least one individual of Native American ancestry.
- The 5,098 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- The Santa Ynez Band of Chumash Mission Indians of the Santa Ynez Reservation, California has priority for disposition of the human remains and associated funerary objects described in this notice.

If no claim for disposition is received by August 24, 2026, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects. Requests for joint disposition of the human remains and associated funerary objects are considered a single request and not competing requests. The DAF Vandenberg SFB is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Abstract of Information Available

The 10 associated funerary objects from site 14SD350 in Sheridan County, KS (UBS 1990–27) are jasper flakes, animal bone fragments, mollusks, and a mulling stone. The human remains from this site were previously repatriated to Pawnee Nation of Oklahoma in 2000 and should have included the associated funerary objects. This burial was excavated by KSHS in 1978 from a stream terrace along the South Fork Solomon River.

Human remains representing, at least, two individuals have been identified from an unknown location presumably in Nebraska (UBS 2005–14). No associated funerary objects are present. The Kansas UBS (Unmarked Burial Sites) board voted to consider these remains as subject to NAGPRA jurisdiction. No other provenience information is available.

To our knowledge, no hazardous substances were used to treat any of the human remains or associated funerary objects.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains and associated funerary objects described in this notice.

Determinations

The KSHS has determined that:

- The human remains described in this notice represent the physical remains of two individuals of Native American ancestry.
- The 10 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a connection between the human remains and associated funerary objects described in this notice and the Pawnee Nation of Oklahoma.

If competing requests for repatriation are received, the KSHS must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests.
