SUPPLEMENTARY INFORMATION: We, the Fish and Wildlife Service, announce receipt of an application from Polk County Board of County Commissioners (applicant) for an incidental take permit (ITP) under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The applicant requests the ITP to take the sand skink (*Neopseps (=Plestiodon) reynoldsi*) and blue-tailed mole skink (*Eumeces egregius lividus*) (skinks), incidental to the construction of a fire station in Polk County, Florida. We request public comment on the application, which includes the applicant's habitat conservation plan (HCP), and on the Service's preliminary determination that this proposed ITP may qualify for a categorical exclusion pursuant to the National Environmental Policy Act (NEPA.), the Department of the Interior's (DOI) NEPA regulations (43 CFR part 46), and the DOI's Departmental Manual (516 DM 8.5(C)(2)). To make this preliminary determination, we prepared a draft screening form and NEPA statement for HCPs, both of which are available for public review.

Proposed Project

The applicant requests a 5-year ITP to take skinks via the conversion of approximately 1.06 acres (ac) of occupied nesting, foraging, and sheltering skink habitat incidental to the

construction of a fire station on 5.82 ac on Polk County Parcel 273026–000000–043400 within Section 26 of Township 30 South in Range 27 East, Polk County, Florida. The applicant proposes to mitigate for take of skinks through the purchase of 2.12 ac of conservation credits (in accordance with the Service's 2:1 mitigation ratio guidelines) from a Service-authorized conservation bank prior to engaging in any phase of the project.

Our Preliminary Determination

The Service has made a preliminary determination that reasonably foreseeable effects of the applicant's proposed project, including the construction of a fire station and associated infrastructure (e.g., electric, water, and sewer lines), would have a minor effect on the skinks and the human environment, and no extraordinary circumstances in 43 CFR 46.215 apply. Reasonably foreseeable effects encompass effects of implementation of the action including effects of the action in addition to other past, present, and reasonably foreseeable future effects. Therefore, we have preliminarily determined that the proposed ESA section 10(a)(1)(B) permit would be a low-effect ITP that may qualify for application of a categorical exclusion (516 DM 8.5(C)(2)), pursuant to NEPA, the DOI's NEPA regulations, and the DOI Departmental Manual. A low-effect ITP is one that would result in (1) negligible or minor individual or cumulative effects on species covered in the HCP; (2) no significant effect on the human environment; and (3) reasonably foreseeable effects that would not result in significant effects to the human environment.

Next Steps

The Service will evaluate the application and the comments to determine whether to issue the requested ITP. We will also conduct an intra-Service consultation pursuant to section 7 of the ESA to evaluate the effects of the proposed take. After considering the preceding and other matters, we will determine whether the permit issuance criteria of section 10(a)(1)(B) of the ESA have been met. If met, the Service will issue ITP number PER13882569 to Polk County Board of County Commissioners.
