The total estimated annual burden is 57,700 total annual respondents, 12,355 hours, and 58,100 responses. The agency multiplies the annual total estimates to derive the estimated three-year total estimates required for generic request; thus, we are requesting 173,100 total respondents, 37,065 burden hours, and 174,300 total responses for the three-year approval period. Current estimates are based on both the historical number of respondents from past projects as well as estimates for projects to be conducted in the next three years.
