SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has published a final supplement to a final supplemental environmental impact statement (SEIS), issued as NUREG–1437, Supplement 10, Second Renewal, Supplement 1, “Generic Environmental Impact Statement for License Renewal of Nuclear Plants Regarding Subsequent License Renewal for Peach Bottom Atomic Power Station Units 2 and 3, Final Report.” This document concerns the NRC staff’s review of the environmental impacts of the proposed subsequent renewal of Renewed Facility Operating License Nos. DPR–44 and DPR–56 for Peach Bottom Atomic Power Station (Peach Bottom) Units 2 and 3, respectively, for an additional 20 years. Peach Bottom is located primarily in Peach Bottom Township, York County, Pennsylvania, near Delta, Pennsylvania. Possible alternatives to the proposed action of subsequent license renewal include the no-action alternative and reasonable replacement power alternatives.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations*, “Final environmental impact statement—notice of availability,” the NRC is making available to the public NUREG–1437, Supplement 10, Second Renewal, Supplement 1 regarding the subsequent renewal of Renewed Facility Operating License Nos. DPR–44 and DPR–56 for an additional 20 years for Peach Bottom. A notice of availability of the draft supplement, which updated the 2020 final SEIS, was published in the **Federal Register** on May 30, 2025 (90 FR 23075).

The U.S. Environmental Protection Agency issued its notice of availability of the draft supplement on May 30, 2025 (90 FR 23050). The public comment period on the draft supplement ended on July 14, 2025, and the comments received on the draft supplement are addressed in the final supplement.

II. Discussion

The draft supplement, which updated the 2020 final SEIS, was issued for public comment on May 30, 2025. The final supplement (NUREG–1437, Supplement 10, Second Renewal, Supplement 1) addresses the comments received on the draft supplement. As discussed in Chapter 4 of the final supplement, the NRC staff has determined that the adverse environmental impacts of subsequent license renewal for Peach Bottom (*i.e.*, the continued operation of Peach Bottom for a period of 20 years beyond the expiration dates of the current licenses) are not so great that preserving the option of license renewal for energy-planning decisionmakers would be unreasonable. This recommendation is based on: (1) information in the environmental report, as supplemented, and other documents submitted by Constellation Energy Generation, LLC; (2) the NRC staff’s consultation with Federal, State, Tribal, and local governmental agencies; (3) the NRC staff’s independent environmental review; and (4) the NRC staff’s consideration of public comments received during the scoping process and on the draft of the 2020 final SEIS and the draft supplement.

Dated: August 21, 2025.

For the Nuclear Regulatory Commission.

Kimyata Savoy,

Acting Deputy Director, Division of Rulemaking, Environmental, and Financial Support, Office of Nuclear Material Safety, and Safeguards.

The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on May 20, 2025 (90 FR 21514).

1. *The title of the information collection:* NRC Online Form, "Request for Alternative Under 10 CFR part 50.55a(z)(1) and (2)."
