RIN 0750-AK81

Defense Federal Acquisition Regulation Supplement: Assessing Contractor Implementation of Cybersecurity Requirements (DFARS Case 2019-D041)

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: DoD is issuing a final rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to incorporate contractual requirements related to the final Cybersecurity Maturity Model Certification program rule, titled Cybersecurity Maturity Model Certification Program. This final DFARS rule also partially implements a section of the National Defense Authorization Act for Fiscal Year 2020 that directed the Secretary of Defense to develop a consistent, comprehensive framework to enhance cybersecurity for the U.S. defense industrial base.

DATES: This rule is effective November 10, 2025.

FOR FURTHER INFORMATION CONTACT: Ms. Heather Kitchens, telephone 571-296-7152.

SUPPLEMENTARY INFORMATION:

I. Background

DoD published an interim rule in the **Federal Register** at 85 FR 61505 on September 29, 2020, to assess contractor implementation of cybersecurity requirements and enhance the protection of unclassified information within the DoD supply chain. DoD subsequently published a proposed rule in the **Federal Register** at 89 FR 66327 on August 15, 2024, to implement the contractual requirements related to the Cybersecurity Maturity Model Certification (CMMC) program. Ninety-seven respondents submitted public comments in response to the proposed rule.

Separately, a proposed rule to establish the CMMC program at 32 CFR part 170, Cybersecurity Maturity Model Certification Program, was published in the **Federal Register** at 88 FR 89058 on December 26, 2023. A final rule was published in the **Federal Register** at 89

FR 83092 on October 15, 2024, and became effective on December 16, 2024.

II. Discussion and Analysis

DoD reviewed the public comments in the development of the final rule. A discussion of the comments and the changes made to the rule as a result of those comments is provided, as follows:

A. Summary of Significant Changes From the Proposed Rule

The following significant changes from the proposed rule are made in the final rule:

1. Definitions

The final rule adds and modifies certain definitions at DFARS 204.7501, Definitions. The definition of “current” was changed to clarify that it is related to having no changes in compliance with the requirements at 32 CFR part 170. The definition of “current” was also updated to clarify what “current” means when referring to “Conditional CMMC Status”, “Final CMMC Status”, and “affirmation of continuous compliance.” The term “DoD unique identifier” was updated to “CMMC unique identifier” to match the naming convention in the Supplier Performance Risk System (SPRS). The definition of CMMC unique identifier (UID) clarifies that it means ten alpha-numeric characters assigned to each contractor CMMC assessment and reflected in SPRS for each contractor information system.

The final rule adds the definition of “Federal contract information” based on the definition from the clause at Federal Acquisition Regulation (FAR) 52.204-21, Basic Safeguarding of Covered Contractor Information Systems, to provide clarity as the term is used widely throughout the rule. The final rule adds a definition of “plan of action and milestones” (POA&M) based on the definition codified at 32 CFR part 170, given this term has been added to the rule. The final rule also adds the term “CMMC status” and a definition for the term to clarify for contracting officers what they will view in SPRS when performing reviews of an offeror or contractor’s CMMC status.

2. Policy

DFARS 204.7502, Policy, includes language to add more clarity by stating that for CMMC levels 2 and 3 only, a conditional CMMC status is permitted for a period not to exceed 180 days from the conditional CMMC date, in accordance with 32 CFR 170.21, and an award can occur with a CMMC conditional status. The language at DFARS 204.7502 has also been updated
