*Expiration Date of Approval:* December 31, 2025.

*Type of Request:* Revision and Extension of a currently approved information collection.

*Abstract:* The collection of information is needed for FSA to obtain information from the respondents who register on the internet to access participation in events, and when necessary, to make payment and reservations to attend any FSA-hosted conferences and events. They can register on FSA's Online Registration site on the internet. Respondents who do not have access to the internet can register by mail or fax. The information is collected by the FSA employees who host the conferences and events. FSA is collecting common elements from interested respondents such as name, organization, address, country, phone number, email address, State, city or town, payment options (credit card, check), special accommodations requests and how the respondent learned of the conference. The information collection element may also include veteran status and new farmer status. The respondents are mainly individuals who will attend the FSA-hosted conferences or events. The information is primarily used to assess attendance and assist FSA staff in preparations to serve individuals registering to attend online or in person events. If applicable, the information collection may be used to collect payment from the respondents and make hotel reservations and other special arrangements as necessary. Demographic information obtained through registration is voluntary and is used to monitor FSA's outreach and engagement of farmers and ranchers.

This information is not used to evaluate any FSA program application and choosing not to provide this information will not affect the application process for any individual applying to an FSA program.

The burden hours is 41,250 hours due to the revamped and improved registration format. FSA intends to use web based registrations for events, but will obtain manual registration at events for those without access to internet or a smart device. The number of respondents and responses remains at 550,000. For the following estimated total annual burden on respondents, the formula used to calculate the total burden hour is the estimated average time per responses hours multiplied by the estimated total annual of responses.

*Estimated Total Annual of Responses:* 550,000.

We are requesting comments on all aspects of this information collection to help us to:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of FSA, including whether the information will have practical utility;

(2) Evaluate the accuracy of FSA's estimate of burden including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected;

(4) Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.
