

**DEPARTMENT OF LABOR****Agency Information Collection Activities; Submission for OMB Review; Multiple Worksite Report and the Report of Federal Employment and Wages**

**ACTION:** Notice of availability; request for comments.

**SUMMARY:** The Department of Labor (DOL) is submitting this Bureau of Labor Statistics (BLS)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

**DATES:** The OMB will consider all written comments that the agency receives on or before October 16, 2025.

**ADDRESSES:** Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency’s estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

**FOR FURTHER INFORMATION CONTACT:** Nicole Bouchet by telephone at 202–693–0213, or by email at [DOL\\_PRA\\_PUBLIC@dol.gov](mailto:DOL_PRA_PUBLIC@dol.gov).

**SUPPLEMENTARY INFORMATION:** States use the Multiple Worksite Report to collect employment and wages data from non-Federal businesses engaged in multiple operations within a State and subject to State Unemployment Insurance laws. The Report of Federal Employment and Wages is designed for Federal establishments covered under the Unemployment Compensation for Federal Employees program. These data are used for sampling, benchmarking, and economic analysis. For additional substantive information about this ICR,

see the related notice published in the **Federal Register** on June 9, 2025 (90 FRN 24296).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

*Agency:* DOL–BLS.

*Title of Collection:* Multiple Worksite Report and the Report of Federal Employment and Wages.

*OMB Control Number:* 1220–0134.

*Affected Public:* Businesses or other for-profits; State, Local, or Tribal Governments; Federal Government.

*Total Estimated Number of Respondents:* 150,915.

*Total Estimated Number of Responses:* 603,660.

*Total Estimated Annual Time Burden:* 223,354 hours.

*Total Estimated Annual Other Costs Burden:* \$0.

(Authority: 44 U.S.C. 3507(a)(1)(D))

information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency’s estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

**FOR FURTHER INFORMATION CONTACT:** Nicole Bouchet by telephone at 202–693–0213, or by email at [DOL\\_PRA\\_PUBLIC@dol.gov](mailto:DOL_PRA_PUBLIC@dol.gov).

**SUPPLEMENTARY INFORMATION:** The Census of Fatal Occupational Injuries provides policymakers and the public with comprehensive, verifiable, and timely measures of fatal work injuries. Data are compiled from various sources including Federal, State, and local governments, the private sector and individuals and include information on how the incident occurred as well as various characteristics of the employers and the deceased worker. This information is used for surveillance of fatal work injuries and for developing prevention strategies. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on April 10, 2025 (90 FRN 15367).

## DEPARTMENT OF LABOR

### Mine Safety and Health Administration

#### Petition for Modification of Application of Existing Mandatory Safety Standards

**AGENCY:** Mine Safety and Health Administration, Labor.

**ACTION:** Notice.

**SUMMARY:** This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Peabody Powder River Mining LLC.

**DATES:** All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before October 16, 2025.

**ADDRESSES:** You may submit comments identified by Docket No. MSHA-2025-0257 by any of the following methods:

1. *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments for MSHA-2025-0257.

2. *Fax:* 202-693-9441.

3. *Email:* [petitioncomments@dol.gov](mailto:petitioncomments@dol.gov).

4. *Regular Mail or Hand Delivery:*

MSHA, Office of Standards, Regulations, and Variances, Room C3522, 200 Constitution Ave NW, Washington, DC 20210.

*Attention:* Jessica D. Senk, Acting Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202-693-9440 to make an appointment.

**FOR FURTHER INFORMATION CONTACT:** Jessica D. Senk, Acting Director, Office of Standards, Regulations, and Variances at 202-693-9440 (voice), [Petitionsformodification@dol.gov](mailto:Petitionsformodification@dol.gov) (email), or 202-693-9441 (fax). These are not toll-free numbers.

**SUPPLEMENTARY INFORMATION:** Section 101(c) of the Federal Mine Safety and

Health Act of 1977 and Title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

#### I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

#### II. Petition for Modification

*Docket Number:* M-2025-053-C.

*Petitioner:* Peabody Powder River Mining LLC, Caller Box 3035, Gillette, Wyoming 82716.

*Mine:* North Antelope Rochelle Mine, MSHA ID No. 48-01353, located in Campbell County, Wyoming.

*Regulation Affected:* 30 CFR 77.404(a), Machinery and equipment; operation and maintenance.

*Modification Request:* The petitioner is requesting a modification to 30 CFR 77.404(a) to permit alternative methods of compliance to permit the mine to maintain haul truck cab windows locked shut. Specifically, the petitioner seeks approval to securely lock or otherwise render inoperable the side windows of haul truck cabs, while maintaining all other manufacturer safety features, including functional air conditioning and dust-control systems and emergency egress options as originally designed.

The petitioner states that:

(a) Peabody seeks modification of 30 CFR 77.404(a) as it pertains to haul truck windows. That standard provides: Mobile and stationary machinery and equipment shall be maintained in safe operating condition and machinery or equipment in unsafe condition shall be removed from service immediately.

(b) The Mine Safety and Health Administration (MSHA) has communicated an interpretation of this provision to require that haul truck cab windows remain operable as manufactured. On July 18, 2025, the Gillette Field Office Supervisor

informed the mine that the haul truck cab windows should open, without identifying a safety hazard, because that is how it came from the manufacturer, ignoring the fact that MSHA inspectors will cite the mine if they see a haul truck window open.

(c) Peabody requests a modification of 30 CFR 77.404(a) as applied to all haul trucks operated at the mine. Specifically, the petitioner seeks approval to securely lock or otherwise render inoperable the side windows of haul truck cabs, while maintaining all other manufacturer safety features, including functional air conditioning and dust-control systems and emergency egress options as originally designed.

(d) Haul trucks used at the mine are equipped with fully enclosed, filtered cabs with manufacturer-installed air conditioning and dust control systems. Cab windows are locked shut to eliminate exposure to airborne respirable dust, silica, and noise. The windows on these haul trucks are not designed or designated as emergency exits. Alternative manufacturer-designed egress routes remain fully available.

(e) All haul trucks are maintained under a strict preventive maintenance program to ensure that air conditioning and filtration systems remain in proper working order. Any unit with inoperative systems is immediately removed from service.

(f) Peabody believes that allowing the windows to open increases the risk of respirable dust and silica exposure, directly undermining MSHA's health and dust control standards. Dust entering the cab also reduces visibility, increases fatigue, and creates an unsafe operating environment.

(g) There would be no diminution of safety because cab windows are not emergency exits. Securing the windows closed does not impair escape or rescue in an emergency. Also, the cabs are climate-controlled, so heat stress or ventilation needs are fully addressed by the air conditioning and dust-control systems. In fact, an open window directly impedes the efficacy of the cabs' dust-control system.

(h) There would be an increase in safety because locking windows reduces operator exposure to dust, noise, and distractions, thereby improving health and operational safety. Application of the standard results in a diminution of safety.

(i) This alternative will provide at least an equal measure of protection as the original standard by ensuring operators work in a clean, climate-controlled, dust-free cab environment.
