Coastal Migratory Pelagic Resources of the Gulf and Atlantic Region; Commercial Closure for Atlantic Spanish Mackerel in the Northern Zone

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS implements an accountability measure (AM) for the commercial harvest of Spanish mackerel in the northern zone of the Atlantic exclusive economic zone (EEZ). NMFS projects that landings will soon reach the revised commercial quota for Spanish mackerel in the northern zone of the Atlantic EEZ for the 2025–2026 fishing year. According to regulations for Spanish mackerel in the Atlantic, NMFS closes the northern zone for commercial harvest to protect this fishery resource.

DATES: This temporary rule is effective from September 20, 2025, through February 28, 2026.

FOR FURTHER INFORMATION CONTACT: Mary Vara, NMFS Southeast Regional

Office, telephone: 727–824–5305, or email: mary.vara@noaa.gov.

SUPPLEMENTARY INFORMATION: The fishery for coastal migratory pelagic fish in the Atlantic includes king mackerel, Spanish mackerel, and cobia on the east coast of Florida, and is managed under the Fishery Management Plan for Coastal Migratory Pelagic Resources of the Gulf and Atlantic Region (FMP). The FMP was prepared by the Gulf and South Atlantic Fishery Management Councils and NMFS, was approved by the Secretary of Commerce, and is implemented by NMFS through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). All weights described for Spanish mackerel in the Atlantic EEZ apply as either round or gutted weight.

Atlantic Spanish mackerel are divided into northern and southern zones for management purposes. The northern zone for Spanish mackerel extends in the Atlantic EEZ from New York through North Carolina. The northern boundary of the northern zone extends from an intersection point off New York, Connecticut, and Rhode Island at 41°18'16.249" N latitude and 71°54'28.477" W longitude, and proceeds southeast to 37°22'32.75" N latitude and the intersection point with the outward boundary of the EEZ. The southern boundary of the northern zone extends from the North Carolina and South Carolina state border along a line in a direction of 135°34'55" from true north beginning at 33°51'07.9" N latitude and 78°32'32.6" W longitude to the intersection point with the outward boundary of the EEZ (50 CFR 622.369(b)(2)). See figure 2 of appendix G to part 622—Spanish Mackerel for an illustration of the management zones.

The commercial annual catch limit (ACL; equal to the commercial quota) for the Atlantic migratory group of Spanish mackerel (Atlantic Spanish mackerel) is 3.33 million pounds (lb) or 1.51 million kilograms (kg) (50 CFR 622.384(c)(2)). The commercial quota for Atlantic Spanish mackerel in the northern zone is 662,670 lb (300,582 kg) and is 2,667,330 lb (1,209,881 kg) in the southern zone for the 2025–2026 fishing year, which is March 1, 2025, through February 28, 2026 (50 CFR 622.384(c)(2)(i) and (ii)).

Regulations at 50 CFR 622.384(c)(2)(iii) allow for quota transfers between the northern and southern zones with the approval from the Regional Administrator (RA) of the NMFS Southeast Region. North Carolina or Florida, in consultation with the

other states in the respective zones, may request approval from the RA to transfer part or all of a respective zone's annual commercial quota to the other zone. For the purposes of quota closures as described in 50 CFR 622.8, the receiving zone's quota will be the original quota plus any transferred amount, for that fishing year only. Landings associated with any transferred quota will be included in the total landings for Atlantic Spanish mackerel, which will be evaluated relative to the total ACL.

In a letter to NMFS dated July 22, 2025, the State of Florida requested the transfer of 250,000 lb (113,398 kg) of Atlantic Spanish mackerel commercial quota from the southern zone to the northern zone to allow the commercial quota for both zones in the current fishing year to be fully harvested. NMFS approved the transfer of commercial quota, and therefore, the revised northern zone commercial quota for Spanish mackerel is 912,670 lb (413,980 kg) and the revised southern zone commercial quota is 2,417,330 lb (1,096,482 kg) for the 2025–2026 fishing year.

Regulations at 50 CFR 622.388(d)(1)(i) require NMFS to close the commercial sector for Atlantic Spanish mackerel in the northern zone when landings reach or are projected to reach the commercial quota for that zone. NMFS projects that landings of Atlantic Spanish mackerel from the northern zone will reach the revised commercial quota of 912,670 lb (413,980 kg) on September 20, 2025. Accordingly, the commercial sector for Atlantic Spanish mackerel in the northern zone is closed effective on September 20, 2025, and continues through February 28, 2026, the end of the current fishing year.

During the commercial closure, a person on a vessel that has been issued a valid Federal commercial permit to harvest Atlantic Spanish mackerel may continue to retain this species in the northern zone under the recreational bag and possession limits specified in 50 CFR 622.382(a)(1)(iii) and (2)(i), if recreational harvest of Atlantic Spanish mackerel in the northern zone has not been closed (50 CFR 622.384(e)(1)).

Also during the commercial closure, Atlantic Spanish mackerel from the northern zone, including those fish harvested under the recreational bag and possession limits, may not be purchased or sold. This prohibition does not apply to Atlantic Spanish mackerel from the northern zone that were harvested, landed ashore, and sold prior to the closure and were held in cold storage by a dealer or processor (50 CFR 622.384(e)(2)).
