

procedures and checklists. While the Department intends to publish a subset of the deficiencies in the NSPIRE Standards that are applicable to HOME and HTF projects, participating jurisdictions and HTF grantees that implement the changes in the NSPIRE final rule before publication of the subset of deficiencies for HOME and HTF must implement the full set of deficiencies in the NSPIRE Standards in their rehabilitation and ongoing property standards and policies and procedures. Further, participating jurisdictions and HTF grantees may not implement the changes in the NSPIRE final rule until such rehabilitation and ongoing property standards and policies and procedures are updated consistent with NSPIRE.

In addition, participating jurisdictions and HTF grantees cannot impose new requirements resulting from updated regulations on project owners unless the written agreements with owners for the funds permit the participating jurisdiction or HTF grantee to do so. Consequently, participating jurisdictions or HTF grantees must determine whether the requirements applied in the written agreements that are fully executed before the effective date of the NSPIRE final rule are automatically updated when regulatory changes take effect or if such agreements must be amended to apply the new or updated requirements. This is an important consideration when participating jurisdictions or HTF grantees would like to apply the NSPIRE final rule rehabilitation and ongoing HOME or HTF property standard requirements to projects with commitments made prior to the effective date of the NSPIRE final rule and for HOME or HTF projects that are jointly funded by another HUD program with an earlier NSPIRE final rule effective date.

## V. Conclusion

Accordingly, the Department revises the October 1, 2025, compliance date for the changes made to 24 CFR parts 92, 93, 576, and 578 to October 1, 2026, at which time recipients subject to these parts must comply with the NSPIRE final rule. Until October 1, 2026, recipients and grantees subject to these parts may instead choose to comply with these parts as they existed prior to October 1, 2023.

### Bryan W. Horn,

Acting Principal Deputy Assistant Secretary for Community Planning and Development.

## DEPARTMENT OF THE INTERIOR

### Geological Survey

[Docket No. USGS-2025-0270;  
GX23AE38EMBOE00]

### Notice of Availability of the Record of Decision for the Final Environmental Impact Statement, Proposed Development of an Updated Facility for the National Wildlife Health Center, Madison, Wisconsin

**AGENCY:** U.S. Geological Survey, Interior.

**ACTION:** Notice of availability of record of decision.

**SUMMARY:** The U.S. Department of the Interior (DOI), U.S. Geological Survey (USGS), announces the availability of the record of decision (ROD) for the proposal to develop an updated facility for the National Wildlife Health Center (NWHC) in Madison, Wisconsin. This preferred alternative decision follows a comprehensive environmental review and considers input and feedback from Federal, State, and local agencies; Tribes; public officials; organizations; and the public.

**DATES:** The ROD was signed and became effective April 10, 2025.

**ADDRESSES:** *Obtaining Documents:* You may obtain copies of the ROD and additional project information on the USGS National Wildlife Health Center website—<https://www.usgs.gov/center/nwhc>. Copies of the Final Environmental Impact Statement are available by request to the USGS Information Contact below.

#### FOR FURTHER INFORMATION CONTACT:

Jordan Sizemore, National Environmental Policy Act (NEPA) Project Manager, by phone at 360-929-0783, or by email at [jsizemore@usgs.gov](mailto:jsizemore@usgs.gov). Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

#### SUPPLEMENTARY INFORMATION:

(1) The ROD, pursuant to the NEPA of 1969, 42 U.S.C. 4321 *et seq.*,<sup>1</sup> completes

<sup>1</sup> Executive Order 14154, *Unleashing American Energy* (Jan. 20, 2025), and a Presidential Memorandum, *Ending Illegal Discrimination and Restoring Merit-Based Opportunity* (Jan. 21, 2025), require the Department to strictly adhere to NEPA, 42 U.S.C. 4321 *et seq.* Further, such Order and Memorandum repeal Executive Orders 12898 (Feb. 11, 1994) and 14096 (Apr. 21, 2023). Because Executive Orders 12898 and 14096 have been

the NEPA process and documents the decision regarding the proposal by the USGS to develop an updated facility for the NWHC, located on a 24-acre tract of Federal property in Madison, Wisconsin (the Proposed Action).

(2) The decision is based on information and analysis contained in the draft environmental impact statement (EIS) issued June 14, 2024, and the final EIS issued November 22, 2024. These documents outline the USGS's considerations and evaluation of the environmental consequences in making a decision on the proposed action. The USGS considerations were informed by comments and input received from elected and appointed officials; Federal, State, county, and local agencies; federally recognized Tribes; organizations; and individuals.

## Background

The NWHC operates out of two primary buildings, the Main Building, constructed in the 1960s and renovated in 1982, and the Tight Isolation Building, constructed in 1985 and modified in 1989. Starting in 2008, multiple studies of the current facilities found over-crowded laboratories and administrative areas; inefficient infrastructure (e.g., heating, ventilation, and air conditioning systems) that does not meet current standards for energy efficiency; and extensive wear and tear due to the age of the buildings and associated equipment. Efforts to repair systems and facilities have provided only short-term relief.

The purpose of the proposed action is to update the aging NWHC facility to incorporate technological advances in biosafety engineering, building infrastructure, and mechanical systems and to add additional space for enhanced animal care and research. The NWHC needs modernized facilities with sufficient space and modern technologies to support its mission of providing essential national research. The existing facilities require ongoing maintenance and replacement of aging building mechanical systems to maintain current operations. Studies indicate that continuing to maintain and update the current facility to meet the mission and function of the NWHC is cost prohibitive and not effective.

The NWHC needs facilities that provide functional space for administration and operations and meet

repealed, complying with such Orders is a legal impossibility. The USGS verifies that it has complied with the requirements of NEPA, including the Department's regulations and procedures implementing NEPA at 43 CFR part 46 and Part 516 of the Departmental Manual, consistent with the President's January 2025 Order and Memorandum.

health and safety standards and regulatory requirements. Adequate space is needed to conduct research into wildlife disease detection, enhance animal-care conditions, and strengthen other programs that support the NWHC mission. In addition, modernized infrastructure and mechanical systems are needed to efficiently implement the latest operating and management approaches for facility operations. These modernizations would further enhance the NWHC's capability to safely conduct research and diagnostics.

On September 5, 2023, the USGS initiated the NEPA process for the proposed action with publication in the **Federal Register** of a notice of intent (NOI) to prepare an EIS. The NOI began a 45-day public scoping period.

The USGS hosted an in-person public scoping meeting in Madison, Wisconsin, on September 21, 2023, and a virtual scoping meeting on September 28, 2023. On June 14, 2024, the draft EIS notice of availability was published in the **Federal Register**, initiating the 45-day public comment period. During this time, the USGS hosted both a virtual and in-person public meeting on July 18, 2024. On November 22, 2024, the final EIS was issued.

Throughout the NEPA process, the USGS invited Federal, State, county, and local agencies; federally recognized Tribes; officials; organizations; and the public to participate in the public involvement process. The USGS also published information about how to participate during public comment periods in the Wisconsin State Journal and Capital Times, posted information on the project website, and emailed such information to all elected and appointed officials; Federal, State, county, and local agencies; federally recognized Tribes; organizations; and individuals on the project contact list. Additionally, USGS committed to an expansive public outreach process that included engagement with the local community to gain insight into community context.

Alternatives considered in the EIS were identified by the USGS during previous studies, internal evaluations, and the public scoping process. The preliminary alternatives were refined based on information gained through the public scoping process. The preferred alternative in the EIS is the development of a new NWHC on the existing property in Madison, Wisconsin. The EIS also considered the no action alternative, under which no updates would be completed to the existing facilities and no new facilities would be developed. Other alternatives identified during internal and public

scoping were considered as outlined in section 2.2 of the final EIS and eliminated because they did not substantially meet the purpose of, and need for, the proposed action.

#### Decision and Rationale for Decision

The USGS decided to implement the preferred alternative, development of a new NWHC on the existing NWHC property in Madison, Wisconsin, as identified in the EIS. This selection was based on the following detailed in the EIS:

- Consultations with Federal, State of Wisconsin, county, and local agencies; Tribes, public officials, organizations, and the public;
- Consideration of potential environmental consequences;
- Need for modernized facilities with sufficient space and modern technologies to support the NWHC's mission of providing essential national research;
- Public comments on received for the draft and final EISs; and
- Material and information contained in previous planning and technical studies.

Development of the new NWHC in Madison, Wisconsin, is contingent on the availability of funding sufficient to proceed.

**Authority:** We provide this notice in accordance with the requirements of NEPA, as amended and the Department's regulations and procedures implementing NEPA at 43 CFR part 46 and part 516 of the Departmental Manual.

#### Anne Barrett,

*Acting Deputy Director for Administration and Policy, U.S. Geological Survey.*

## DEPARTMENT OF THE INTERIOR

### Bureau of Indian Affairs

**[256A2100DD/AAKC001030/A0A501010.000000]**

#### Receipt of Documented Petition for Federal Acknowledgment as an American Indian Tribe

**AGENCY:** Bureau of Indian Affairs, Interior.

**ACTION:** Notice.

**SUMMARY:** The Department of the Interior (Department) gives notice that the group known as the Salyersville Indian Community has filed a documented petition for Federal acknowledgment as an American Indian Tribe with the Assistant Secretary—

Indian Affairs. The Department seeks comment and evidence from the public on the petition.

**DATES:** Comments and evidence must be postmarked by January 28, 2026.

**ADDRESSES:** Copies of the narrative portion of the documented petition, as submitted by the petitioner (with any redactions appropriate under 25 CFR 83.21(b)), and other information are available at the Office of Federal Acknowledgement's (OFA) website: [www.bia.gov/as-ia/ofa](http://www.bia.gov/as-ia/ofa). Submit any comments or evidence to: Department of the Interior, Office of the Assistant Secretary—Indian Affairs, Attention: Office of Federal Acknowledgment, Mail Stop 4071 MIB, 1849 C Street NW, Washington, DC 20240, or by email to: [Ofa\\_Info@bia.gov](mailto:Ofa_Info@bia.gov).

**FOR FURTHER INFORMATION CONTACT:** Ms. Nikki Bass, OFA Director, Office of the Assistant Secretary—Indian Affairs, Department of the Interior, by phone: (202) 513-7650; or by email: [Ofa\\_Info@bia.gov](mailto:Ofa_Info@bia.gov).

**SUPPLEMENTARY INFORMATION:** On July 31, 2015, the Department's revisions to 25 CFR part 83 became final and effective (80 FR 37861). A key goal of the revisions was to improve transparency through increased notice of petitions and providing improved public access to petitions. Today the Department informs the public that a complete documented petition has been submitted under the current regulations, that portions of that petition are publicly available on the website identified above for easy access, and that we are seeking public comment early in the process on this petition.

Under 25 CFR 83.22(b)(1), the OFA publishes notice that the following group has filed a documented petition for Federal acknowledgment as an American Indian Tribe to the Assistant Secretary—Indian Affairs: Salyersville Indian Community. The contact information for the petitioner is Ms. Joleena Pesenti, P.O. Box 1359, East Jordan, Michigan 49727.

Also, under 25 CFR 83.22(b)(1), OFA publishes on its website the following:

- i. The narrative portion of the documented petition, as submitted by the petitioner (with any redactions appropriate under 25 CFR 83.21(b));
- ii. The name, location, and mailing address of the petitioner and other information to identify the entity;
- iii. The date of receipt;
- iv. The opportunity for individuals and entities to submit comments and evidence supporting or opposing the petitioner's request for acknowledgment within 120 days of the date of the website posting; and
