This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of prohibited and exempt off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive a prohibited or exempt off-the-record communication relevant to the merits of a contested proceeding, to deliver to the Secretary of the Commission, a copy of the communication, if written, or a summary of the substance of any oral communication.

Prohibited communications are included in a public, non-decisional file associated with, but not a part of, the decisional record of the proceeding. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication and may request that

the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following new facilities: (1) a 320-foot-high, 2,330-foot-long concrete upper reservoir dam that would impound an 110-acre upper reservoir with a storage capacity of 11,000 acre-feet at a water surface elevation of 3,840 feet above mean sea level; (2) a 300-foot-wide, 5-foot-high, and 750-foot-long spillway on the upper dam; (3) ten 70-foot-high, 50-foot-wide, and 120-foot to 200-foot-long lower reservoirs that would be 5,000 feet underground with a total volume for each reservoir of 1,000 acre-feet; (4) fifty-six 18-foot-wide, 16-foot-high, and 10-foot-long concrete bulkheads within the lower reservoirs; (5) a 4,800-foot-long, 26-foot-diameter steel and concrete lined vertical headrace shaft connected to ten 10-foot-wide, 580 foot-long headrace penstock pipes; (6) ten 157-foot-long, 65-foot-wide, 92-foot-high underground turbine powerhouses with one Pelton turbine and generator each; (7) ten 157-foot-long, 65-foot-wide, 125-foot-high pump powerhouses with two radial storage pumps and motors; (8) ten 18-foot-wide, 16-foot-high, 170-foot-long tailraces; (9) fifteen 18-foot-wide, 16-foot-high access

tunnels; (10) one 18-inch-diameter, 6-mile-long steel water supply pipeline; (11) 5 miles of access roads; (12) a rock stockpile site; (13) two 3-mile-long, 230-kilovolt transmission lines; (14) one 3-mile-long 500-kilovolt transmission line; and (15) appurtenant facilities.
