Venture Global Plaquemines LNG, LLC; Notice of Request for Extension of Time

Take notice that on September 19, 2025, Venture Global Plaquemines LNG, LLC (Plaquemines LNG) requested that the Commission grant an extension of time, until December 31, 2027, to construct and place into service its Plaquemines Export Terminal (Project) located in Plaquemines Parish, Louisiana as authorized in the Order Granting Authorizations Under Sections 3 and 7 of the Natural Gas Act (Order).¹ The Order required Plaquemines LNG to complete construction of the Project and make it available for service within seven years of the date of the Order, or by September 30, 2026.

Plaquemines LNG states that mobilization and site preparation at the Project site began in the summer of 2020, and construction of the terminal facilities commenced on August 18, 2021. Plaquemines LNG states that on March 13, 2023, Venture Global LNG, Inc. (parent company of Plaquemines LNG) announced its final investment decision and the closing of financing for the second phase of the Project. Plaquemines LNG states that, after obtaining the required Commission approvals, it began liquified natural gas (LNG) production and exported its first commissioning cargo in December 2024. In total, Plaquemines LNG states that it has entered into Sale and Purchase Agreements for the full 20 million metric tons per annum nameplate capacity of the terminal, with most of these agreements covering a 20-year term.

Plaquemines LNG states that the COVID–19 pandemic had negative effects on both supply chains and global LNG demand. Plaquemines LNG also notes that severe weather delayed early construction progress on the Project. Additionally, Plaquemines LNG notes that the terminal's modular LNG train components, thousands of automated control systems, and other facilities require longer commissioning and completion timelines compared to more traditional types of LNG trains. Plaquemines LNG anticipates placing all of its Phase 1 facilities in service during the fourth quarter of 2026 and the remaining Phase 2 facilities in service
