SUPPLEMENTARY INFORMATION:

I. Discussion

Notice is hereby given that the NRC has issued Subsequent Renewed Facility Operating License Nos. DPR–24 and DPR–27 to NextEra for Point Beach. NextEra is the operator of the facility. Subsequent Renewed Facility Operating License Nos. DPR–24 and DPR–27 authorize operation of Point Beach by NextEra at reactor core power levels not in excess of 1,800 megawatts thermal (MWt) for each unit, in accordance with the provisions of the Point Beach subsequent renewed licenses and the technical specifications. Notice is also given that the ROD that supports the NRC's decision to issue Subsequent Renewed Facility Operating License Nos. DPR–24 and DPR–27 is available, and its location is listed in the “Availability of Documents” section of this document.

As discussed in the ROD and the final supplemental environmental impact statement (SEIS), published as NUREG–1437, Supplement 23, Second Renewal, “Generic Environmental Impact Statement for License Renewal of Nuclear Plants, Supplement 23, Second Renewal, Regarding Subsequent License Renewal for Point Beach Nuclear Plant Units 1 and 2, Final Report,” dated August 2025, the final SEIS documents the NRC staff's environmental review, including the recommendation that the adverse environmental impacts of subsequent license renewal (SLR) for Point Beach are not so great that preserving the option of SLR for energy-planning decisionmakers would be unreasonable. This recommendation is based on (1) the NRC's Generic Environmental Impact Statement for License Renewal of Nuclear Plants (LR GEIS); (2) information in the
