

opening remarks regarding the conduct of the meeting.

8:35 a.m.–10:30 a.m.: *Kemmerer Construction Permit Application Review (Open/Closed)*—The Committee will have discussions and deliberate regarding the subject topic. [NOTE: Pursuant to 5 U.S.C 552b(c)(4), a portion of this session may be closed in order to discuss and protect information designated as proprietary.]

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on July 22, 2025 (90 FR 34522). In accordance with those procedures, oral or written views may be presented by members of the public, including representatives of the nuclear industry. Persons desiring to make oral statements should notify Quynh Nguyen, Cognizant ACRS Staff and the DFO (Telephone: 301–415–5844, Email: Quynh.Nguyen@nrc.gov), 5 days before the meeting, if possible, so that appropriate arrangements can be made to allow necessary time during the meeting for such statements. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the cognizant ACRS staff if such rescheduling would result in major inconvenience.

An electronic copy of each presentation should be emailed to the cognizant ACRS staff at least three days before the meeting.

In accordance with Subsection 10(d) of Public Law 92–463 and 5 U.S.C. 552b(c), certain portions of this meeting may be closed, as specifically noted above. Use of still, motion picture, and television cameras during the meeting may be limited to selected portions of the meeting as determined by the Chairman. Electronic recordings will be permitted only during the open portions of the meeting.

ACRS meeting agendas, meeting transcripts, and letter reports are available through the NRC Public Document Room (PDR) at pdr.resource@nrc.gov, the ACRS public website, or by calling the PDR at 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern daylight time (EDT), Monday through Friday, except Federal holidays, or from the Publicly Available Records System component of NRC's Agencywide Documents Access and Management System, which is accessible from the NRC website at <https://www.nrc.gov/reading-rm/adams.html> or <https://www.nrc.gov/reading-rm/doc-collections/#ACRS/>.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–266 and 50–301; NRC–2020–0277]

NextEra Energy Point Beach, LLC; Point Beach Nuclear Plant, Units 1 and 2; Subsequent License Renewal and Record of Decision

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has issued Subsequent Renewed Facility Operating License Nos. DPR–24 and DPR–27 to NextEra Energy Point Beach, LLC (NextEra or the licensee) for Point Beach Nuclear Plant (Point Beach), Units 1 and 2, respectively. In addition, the NRC has prepared a record of decision (ROD) that supports the NRC's decision to issue Subsequent Renewed Facility Operating License Nos. DPR–24 and DPR–27.

DATES: Subsequent Renewed Facility Operating License Nos. DPR–24 and DPR–27 were issued on September 29, 2025.

SUPPLEMENTARY INFORMATION:

I. Discussion

Notice is hereby given that the NRC has issued Subsequent Renewed Facility Operating License Nos. DPR–24 and DPR–27 to NextEra for Point Beach. NextEra is the operator of the facility. Subsequent Renewed Facility Operating License Nos. DPR–24 and DPR–27 authorize operation of Point Beach by NextEra at reactor core power levels not in excess of 1,800 megawatts thermal (MWt) for each unit, in accordance with the provisions of the Point Beach subsequent renewed licenses and the technical specifications. Notice is also given that the ROD that supports the NRC's decision to issue Subsequent Renewed Facility Operating License Nos. DPR–24 and DPR–27 is available, and its location is listed in the “Availability of Documents” section of this document.

As discussed in the ROD and the final supplemental environmental impact statement (SEIS), published as NUREG–1437, Supplement 23, Second Renewal, “Generic Environmental Impact Statement for License Renewal of Nuclear Plants, Supplement 23, Second Renewal, Regarding Subsequent License Renewal for Point Beach Nuclear Plant Units 1 and 2, Final Report,” dated August 2025, the final SEIS documents the NRC staff's environmental review, including the recommendation that the adverse environmental impacts of subsequent license renewal (SLR) for Point Beach are not so great that preserving the option of SLR for energy-planning decisionmakers would be unreasonable. This recommendation is based on (1) the NRC's Generic Environmental Impact Statement for License Renewal of Nuclear Plants (LR GEIS); (2) information in the

environmental report submitted by NextEra, as supplemented; (3) the staff's consultation with Federal, State, local, and Tribal agencies; (4) the staff's independent environmental review; and (5) the staff's consideration of public comments received during the scoping process and on the 2021 draft SEIS and the 2025 second draft SEIS.

The Point Beach units are pressurized-water reactors located near Two Rivers, Wisconsin. NextEra submitted its application for the subsequent renewed licenses, "Point Beach Nuclear Plant Units 1 and 2, Application for Subsequent Renewed Facility Operating Licenses," on November 16, 2020, as supplemented by letters through April 1, 2025 (see "Availability of Documents" section of this document). The NRC staff has determined that NextEra's application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the NRC's regulations. As required by the Act and NRC regulations in title 10 of the *Code of Federal Regulations* (10 CFR), the NRC has made the appropriate

findings, which are set forth in the subsequent renewed licenses.

On February 1, 2021, the NRC published a notice in the **Federal Register** (86 FR 7747) informing the public of the NRC staff's intent to conduct an environmental scoping process regarding NextEra's application. In November 2021, the staff issued a draft SEIS. On August 6, 2024, the NRC published a final rule (89 FR 64166) updating its license renewal environmental review requirements at 10 CFR part 51, "Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions." As part of this update, the NRC issued Revision 2 of the LR GEIS. Thereafter, to complete the Point Beach SLR environmental review, the staff prepared a supplement (second draft SEIS) to the 2021 draft SEIS to consider the new and modified environmental issues in the final rule, as applicable, as well as any new and significant information since the 2021 draft SEIS. In April 2025, the staff issued the second draft SEIS for public comment (90 FR 16008). Based on the information gathered during the public comment

period and any other new information received, the staff developed a final SEIS by incorporating both the 2021 draft SEIS and the 2025 second draft SEIS, along with any necessary changes made in response to comments and other information. The final SEIS was issued on August 8, 2025. Separately, in February 2022, the staff issued its Safety Evaluation (SE) regarding its Point Beach SLR safety review, as corrected in May 2022. A supplement to this SE was issued in August 2025.

For further details with respect to this action, see (1) NextEra's SLR application for Point Beach, dated November 16, 2020, as supplemented by letters through April 1, 2025; (2) the NRC's SE, dated May 25, 2022, and its supplement dated August 27, 2025; (3) the NRC's final SEIS, dated August 2025; and (4) the NRC's ROD, dated September 29, 2025.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–237 and 50–249; NRC–2025–1105]

Constellation Energy Generation, LLC; Dresden Nuclear Power Station, Unit Nos. 2 and 3; Exemption

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an exemption from the regulation that would otherwise require the application for subsequent renewal of Facility Operating License Nos. DPR–19 and DPR–25 for Dresden Nuclear Power Station, Unit Nos. 2 and 3, respectively,

to be referred to the Advisory Committee on Reactor Safeguards (ACRS) for a review and report, with any report being made part of the record of the application and made available to the public, except to the extent that security classification prevents disclosure. The NRC finds that the required criteria are met due to the special circumstance presented by Executive Order (E.O.) 14300, “Ordering the Reform of the Nuclear Regulatory Commission,” section 4(b) (stating that “[r]eview by ACRS of permitting and licensing issues shall focus on issues that are truly novel or noteworthy”).

DATES: The exemption was issued on September 11, 2025.
