Abstract: EPA is seeking renewal of a generic information collection request (ICR) for the conduct of focus groups and protocol interviews (hereafter jointly referred to as focus groups) related to economics projects. Over the next three years, the Agency anticipates engaging in survey development efforts associated with a variety of economics projects including those related to drinking water quality, health risk reductions, coastal adaptation and restoration, to name a few. Focus groups are an important part of any survey development process, allowing researchers to directly gauge what specific issues are important to the public and providing a means for explicitly testing draft survey materials. Through these focus groups, the Agency will be able to gain a more in-depth understanding of the public's attitudes, beliefs, motivations and feelings regarding specific issues and will provide valuable information regarding the quality of draft survey instruments.

The information collected in the focus groups will be used primarily to develop and improve economics-related surveys. To the extent that these surveys are ultimately approved and successfully administered, they will serve to expand the Agency's understanding of benefits and costs of a variety of actions and could provide the means to quantitatively assess the effects of others. Participation in the focus groups will be voluntary, and the identity of the participants will be kept confidential.

Form Numbers: None.

Respondents/affected entities: Individuals.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 432 (total).

Frequency of response: Once.

Total estimated burden: 288 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$100,973 (per year), which includes \$80,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is decrease of 1,314 hours in the 3-year total estimated respondent burden compared with the ICR currently approved by OMB. A decrease in burden over the previous ICR conveys simply that EPA anticipates less need

for the conduct of focus groups under this ICR than in the past.

Abstract: This ICR is for provisions regarding biointermediates in the Renewable Fuel Standard (RFS) program. A “biointermediate” is produced from a renewable biomass feedstock at a biointermediate production facility and is not itself a renewable fuel; the biointermediate will be processed into a renewable fuel at a subsequent renewable fuel production facility. The biointermediate provisions were included in the EPA's finale rulemaking to establish RFS volume standards for 2020, 2021, and 2022 (87 FR 39600, July 1, 2022).

The recordkeeping and reporting requirements allow the EPA to monitor compliance from biointermediate producers, renewable identification number (RIN) generators who are renewable fuel producers who use biointermediates, biointermediate producers, and specific third parties (e.g., quality assurance plan, or QAP, providers). This ICR is related to the general collection related to RFS, which bears OMB Control No. 2060–0725 (expiring November 30, 2025).

Form Numbers: RFS0107 (5900–631), RFS0602 (5900–290), RFS0702 (5900–289), RFS0801 (5900–293), RFS0902 (5900–278), RFS2001 (5900–633), RFS2101 (5900–634), RFS2201 (5900–635), RFS2301 (5900–636), RFS2400 (5900–361), RFS4000 (5900–529).

Respondents/affected entities: Biointermediate producers, RIN generators (renewable fuel producers), biointermediate importers, third parties (including QAP providers).

Respondent's obligation to respond: mandatory under 40 CFR parts 80 and 1090.

Estimated number of respondents: 892 (total).

Frequency of response: Quarterly, annually, on occasion.

Total estimated burden: 27,871 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$2,062,900 (per year), which includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 139,514 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to fewer regulated parties utilizing biointermediates in the RFS than was originally anticipated. We shared our estimates with industry respondents who perform recordkeeping and reporting functions. Based upon their feedback we increased some estimates in our calculations related to third party auditor activities performed, but those did not change the overall decrease in burden due to fewer participants.
