**SUPPLEMENTARY INFORMATION:** PHMSA received a special permit request from SNG, a subsidiary of Kinder Morgan, Inc., on September 26, 2024, seeking an extension to a special permit segment to be incorporated into special permit PHMSA–2020–0007. The extended segment request is a part of the active permit’s Special Permit Inspection Area 4. Special permit PHMSA–2020–0007

allows SNG to deviate from the Federal pipeline safety regulations in 49 CFR 192.611(a) and 192.619(a), where a gas transmission pipeline segment has undergone a change from a Class 1 to a Class 3 location.

Special permit PHMSA–2020–0007 is active and was granted on July 27, 2022 and is effective until July 27, 2032. The special permit originally applied to four special permit segments, which included 3,278 feet (approximately 0.62 miles) of the SNG natural gas transmission pipeline system located in Effingham and Harris counties, Georgia, and Clarke County, Mississippi. In 2023, Special Permit Segment 2 underwent

pipe replacement and Special Permit Segment 4 was hydrotested; both segments are now compliant with 49 CFR 192.611 and are no longer waived by special permit PHMSA–2020–0007. The present request would extend Special Permit Segment 5 for 997 feet (approximately 0.19 miles). If granted, the special permit segments would total 3,720 feet (approximately 0.70 miles).

The special permit segments, including the requested extension, are detailed in updated Attachment A—Segment Integrity Information. Proposed modifications due to this request are as follows:

SPS No.	Status	County, state	Outside diameter (inches)	Line name	Length (feet)	Year installed	Maximum allowable operating pressure (pounds per square inch gauge)
5 .....	Active Segment.	Harris, Georgia	36	South Main 3rd Line Loop .....	1,220	2004	1,200
	Extension .....	Harris, Georgia	36	South Main 3rd Line Loop .....	997	2004	1,200

Upon receipt of this request, PHMSA reviewed the Final Environmental Assessment (FEA) and finds that the expansion of the proposed special permit would not result in significant impacts to the human environment. Furthermore, the existing FEA and finding of no significant impact remain adequate, pursuant to the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*). No further environmental assessment is required for this proposed extension.

SNG’s request for an extension to Special Permit Segment 5, active Special Permit with Conditions, and associated environmental document are available for review and public comment in Docket No. PHMSA–2020–0007. PHMSA invites interested persons to review and submit comments in the docket on this request for modification of the special permit. Please submit comments on any potential safety, environmental, and other relevant considerations implicated by the special permit request. Comments may include relevant data.

Before issuing a decision on the special permit request, PHMSA will evaluate all comments received on or before the comment closing date. PHMSA will consider each relevant comment it receives in making its decision to grant or deny this special permit request.

Issued in Washington, DC, on October 29, 2025, under authority delegated in 49 CFR 1.97.

*Acting Associate Administrator for Pipeline Safety.*
