Abstract: The EPA promulgated the Air Emissions Reporting Requirements (AERR) (40 CFR part 51, subpart A) to coordinate emissions inventory reporting requirements. Under this reporting, 54 State and territorial air quality agencies, including the District of Columbia, as well as an estimated 9 local air quality agencies, must submit emissions data every 3 years for all point sources and some non-point, on-road mobile, and non-road mobile sources of volatile organic compounds, oxides of nitrogen, carbon monoxide, sulfur dioxide, particulate matter less than or equal to 10 micrometers in diameter, particulate matter less than or equal to 2.5 micrometers in diameter, ammonia, and lead. In addition, the air quality agencies must submit annual emission data for point sources for a subset of point sources every year. An estimated 5 Tribal air agencies voluntarily submit point and nonpoint sources in triennial years.

The data collected from the emission reporting is necessary to compile and make publicly available a national inventory of air pollutant emissions. The information collected supports both EPA's implementation of the CAA, and State/Local/Tribal air agencies in fulfilling their requirements under CAA sections 110(a), 172, 182, 187, and 189

to implement primary and secondary national ambient air quality standards (NAAQS). A comprehensive inventory updated at regular intervals is essential to allow the EPA to fulfill its mandate to monitor and plan for the attainment and maintenance of the NAAQS established for criteria pollutants in the CAA.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this collection request are generally State, territorial, and local government air quality managements programs. Tribal governments are not affected unless they have sought and obtained "Treatment as a State" (TAS) status under the Tribal Authority Rule and, on that basis, are authorized to implement and enforce the AERR rule. For the most recent 2023 triennial inventory, no Tribes have TAS for emissions inventory reporting, and 2 Tribal agencies voluntarily reported to the NEI.

Additionally, State and local agencies collect data from owners/operators to be able to provide it to the EPA. The EPA seeks information from State and local air agencies to indicate the degree to which emissions data collection is due to the AERR rather than something that these agencies would impose even in the absence of the AERR.

Respondent's obligation to respond: This information is collected under 23 U.S.C. 101; 42 U.S.C. 7401-7671q, and the authority of the AERR. This information is mandatory and, as specified, cannot be treated as confidential by the EPA.

Estimated number of respondents: 68 (total including voluntarily reporting) State, local and Tribal agencies and 12,379 owners/operators reporting to State and local agencies.

Frequency of response: Annual.

Total estimated burden: 53,482 hours (per year) including 7,865 voluntary hours (per year) for State, local, and Tribal air agencies and 145,077 hours (per year) for owners/operators including 84 voluntary hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$19,854,038 (per year) for State, local, and Tribal air agencies, which includes \$712,432 for voluntary activities and \$15,130,399 annualized capital or operation and maintenance costs. \$16,578,243 (per year) for owners/operators.

Changes in the estimates: There is an increase of 4,780 hours in the total estimated respondent burden for State, local, and Tribal air agencies and an increase of 145,077 hours for owners/operators compared with the ICR currently approved by OMB. This increase for State, local, and Tribal air

agencies is due to improvements in the way the EPA estimates the burden. The increase for owners/operators is due to including the burden on owners/operators for the first time in the approach.

Courtney Kerwin,

Director, Information Engagement Division.

DEPARTMENT OF HOMELAND SECURITY

[Docket No. USCIS-2025-0337]

Privacy Act of 1974; System of Records

AGENCY: U.S. Department of Homeland Security, U.S. Citizenship and Immigration Services.

ACTION: Notice of a modified system of records.

SUMMARY: In accordance with the Privacy Act of 1974, the Department of Homeland Security (DHS) proposes to modify and reissue a DHS system of records notice (SORN) titled, "Department of Homeland Security/U.S. Citizenship and Immigration Services (USCIS)-004 Systematic Alien Verification for Entitlements Program (SAVE)." As described in this modified SORN, USCIS, an agency within DHS, collects and maintains records on applicants for public benefits, licenses, grants, governmental credentials, and other statutorily authorized purposes through the SAVE program. SAVE allows registered user agencies to verify the immigration status/category ("immigration status") and U.S. citizenship (including for U.S. citizens by birth, naturalized and certain acquired citizens) of individuals applying for or receiving a public benefit, license or other authorized purpose ("benefit"). "Acquired citizenship" refers to U.S. citizenship conveyed to children through the naturalization of parents or, under certain circumstances, at birth to foreign-born children of U.S. citizens, provided certain conditions are met. DHS/USCIS is updating this SORN to include updates and modifications to the (1) purpose(s) of the system, (2) categories of individuals covered by the system, (3) categories of records in the system, (4) records source categories, and (5) routine uses of records maintained in the system. Additionally, this notice includes non-substantive changes to simplify the formatting and text of the previously published notice.
