## II. Background

By letters dated April 28, 2025 (ADAMS Accession No. ML25118A209) and May 20, 2025, (ADAMS Package Accession No. ML25140A062), TVA submitted to the NRC pursuant to section 103 of the Atomic Energy Act of 1954, as amended, and part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), “Domestic Licensing of Production and Utilization Facilities,” an application for a CP that would allow the construction of CRN-1 in Roane County, Tennessee. The proposed facility would house one GE Hitachi BWRX-300 reactor. This submission initiated the proposed Federal action of determining whether to issue the requested CP. A notice of receipt and availability of the CP application was published in the **Federal Register** (FR) on June 10, 2025 (90 FR 24425). A notice of acceptance for docketing of the complete application and opportunity to request a hearing was published in the FR on July 15, 2025 (90 FR 31709). A notice of intent to prepare a SEIS was published on July 18, 2025 (90 FR 34015).

As set forth in 10 CFR 51.20(b), issuance of a CP to construct a nuclear power reactor is an action that requires an environmental impact statement. This notice is being published in accordance with the National Environmental Policy Act of 1969, as amended (NEPA), and the NRC’s regulations implementing NEPA at 10 CFR part 51, “Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions.” In addition, pursuant to 36 CFR 800.8(c), the NRC is using the process and documentation for the preparation of the draft SEIS to comply with section 106 of the National Historic Preservation Act of 1966, as amended, in lieu of the procedures set forth in 36 CFR 800.3 through 800.6.

## III. Discussion

The NRC is issuing the draft SEIS for public comment. The draft SEIS includes the evaluation of the environmental impacts of the proposed action of issuing a CP that would allow the construction of CRN-1. In the draft SEIS, after weighing the environmental, economic, technical, and other benefits against environmental and other costs, and considering reasonable alternatives, the preliminary recommendation is that, unless safety issues mandate otherwise, the NRC issue the requested CP to TVA. This preliminary recommendation is based on: (1) the CP application environmental report; (2) consultation with Federal, State, Tribal, and local

agencies; (3) the review team’s confirmatory review; and (4) the assessments summarized in the draft SEIS.

Dated: November 5, 2025.

For the Nuclear Regulatory Commission.
