DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2187–046]

Public Service Company of Colorado; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission or FERC) regulations, 18 CFR part 380, Commission staff reviewed Public Service Company of Colorado's (PSCo or licensee) application for amendment of license for the Georgetown Project (No. 2187) and have prepared an Environmental Assessment (EA).¹ The licensee is constructing a temporary stream bypass pipeline to divert up to 200 cubic feet per second (cfs) from South Clear Creek around the Forebay Reservoir and Dam, ultimately discharging just downstream of the dam. The bypass pipeline is intended to address dam safety and water quality concerns and support water management efforts. The action would alter how required minimum flows are transported and discharged. The project is located on South Clear Creek near Georgetown, Clear Creek County, Colorado. A portion of the project is located on federal lands administered by the U.S. Forest Service (Forest Service), within the Arapaho National Forest.

The EA contains Commission staff's analysis of the potential environmental

effects of relocating the minimum flow discharge area, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The EA may be viewed on the Commission's website at <http://www.ferc.gov> using the "elibrary" link. Enter the docket number (P–2187) in the docket number field to access the document.
