SUPPLEMENTARY INFORMATION:

OMB Approval No. 2139–0014

Title: Passenger Origin-Destination Survey Report.

Form No.: None.

Type Of Review: Extension of a currently approved collection.

Respondents: Certificated air carriers that operated scheduled passenger service report these data.

Number of Respondents: 100.

Total Number of Annual Responses: 1200.

Estimated Time per Response: 30 hours.

Total Annual Burden: 36,000 hours.

Needs and Uses: Survey data are used in monitoring the airline industry, negotiating international agreements, reviewing requests for the grant of anti-trust immunity for air carrier alliance agreements, selecting new international routes, selecting U.S. carriers to operate limited entry foreign routes, and modeling the spread of contagious diseases. The Passenger Origin-Destination Survey Report is the only aviation data collection by DOT where the air carriers report the true origins and destinations of passengers' flight itineraries. The Department does have

another aviation data collection (T-100) which (1) gives passenger totals for city-pairs served on a nonstop basis and (2) market totals for passengers traveling on a single flight number. If the passenger travels on multiple flight numbers, a new market is recorded for each change in flight number.

The Confidential Information Protection and Statistical Efficiency Act of 2002 (44 U.S.C. 3501 note), requires a statistical agency to clearly identify information it collects for non-statistical purposes. BTS hereby notifies the respondents and the public that BTS uses the information it collects under this OMB approval for non-statistical purposes including, but not limited to, publication of both Respondent's identity and its data, submission of the information to agencies outside BTS for review, analysis and possible use in regulatory and other administrative matters.

Issued in Washington, DC, on November 13, 2025.

Rolf Schmitt,

Acting Director, Office of Airline Information, Bureau of Transportation Statistics.
