

Setting Panels (TSPs). The estimated total value of the new items is \$1.1 billion. The estimated value of the new MDE items is \$0.2 billion, but this will not cause an increase in the net MDE value. The estimated value of the new non-MDE items is \$0.9 billion, and will cause an increase of the net non-MDE value to \$1.9 billion. The total estimated value will increase by \$0.9 billion to \$2.6 billion. MDE will remain as \$0.7 billion of that total.

(iv) *Significance*: This notification is being provided as the additional MDE items were not enumerated in the original notification. The inclusion of this MDE represents an increase in capability over what was previously notified. The proposed articles and services will support the Government of Canada's capability to meet current and future threats by enhancing their incorporation of the AEGIS Combat System into their operations.

(v) *Justification*: This proposed sale will support the foreign policy and national security objectives of the United States by helping to improve the military capability of Canada, a NATO Ally that is an important force for ensuring political stability and economic progress, and a contributor to military, peacekeeping, and humanitarian operations around the world.

(vi) *Sensitivity of Technology*:

AN/WSN-7 is the U.S. Navy's Inertial Navigation System (INS) and part of an overall Position-Navigation-Time (PNT) solution for the AEGIS Combat System. AN/WSN-12 is the U.S. Navy's next generation INS. AN/WSN-7/12 measures the movement of the ship, determines position and direction, and accepts GPS updates to compute precise movement, position, and direction rates.

The Tactical Tomahawk Weapon Control System (TTWCS) is the U.S. Navy's shipboard component for

command and control, mission planning, and distribution of Tomahawk tactical and strike data for the Tomahawk missile.

Multifunctional Information Distribution System Joint Tactical Radio System (MIDS JTRS) provides secure, high capacity, jam-resistant position determination, cooperative identification, and digital data and voice transfer capability.

MIDS On Ship Modernized (MOS Mod) integrates a MIDS JTRS terminal with Navy Ship Input Output (NSIO) to produce a high power (1 kW) Link-16 radio frequency output. It is designed to operate with the Command and Control Processor (C2P).

C2P is a shipboard system that provides real-time control and management of Tactical Digital Information Links (TADILs) through interfaces with the host combat system and tactical data link terminals. TADILs include Link-16, Satellite TADIL J, Joint Range Extension (JRE).

AN/SLQ-32(v)6 is an electronic warfare equipment suite installed on all surface combatants, aircraft carriers, amphibious ships, and auxiliaries in the U.S. Navy. The system provides early detection, analysis, threat warning, and protection from anti-ship missiles.

The Global Command and Control System—Maritime (GCCS-M) provides a single integrated and scalable command and control system. GCCS-M fuses, correlates, filters, maintains, and displays location and attribute information on friendly, hostile, and neutral land, sea, and air forces, and integrates this data with available intelligence and environmental information to support command decisions.

The MK 331 Torpedo Setting Panel (TSP) is the interface between the ship's underwater weapon control system and MK 54 Surface Vessel Torpedo Tubes

(SVTT). It provides digital presets, updates until time of fire, and provides remote and local preset and launch capability in the ship's magazine.

The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

SEP 24 2024

The Honorable Mike Johnson
Speaker of the House
U.S. House of Representatives
H-209, The Capitol
Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(5)(C) of the Arms Export Control Act (AECA), as amended, we are forwarding Transmittal No. 24-01. This notification relates to enhancements or upgrades from the level of sensitivity of technology or capability described in the Section 36(b)(1) AECA certification 17-41 of March 7, 2018.

Sincerely,

Michael F. Miller
Director

Enclosures:

1. Transmittal
2. Regional Balance (Classified document provided under separate cover)

BILLING CODE 6001-FR-C

Transmittal No. 24-01

**REPORT OF ENHANCEMENT OR
UPGRADE OF SENSITIVITY OF
TECHNOLOGY OR CAPABILITY (SEC.
36(b)(5)(C), AECA)**

(i) *Purchaser:* Government of Qatar
(ii) *Sec. 36(b)(1), AECA Transmittal No.:* 17-41
Date: March 07, 2018
Implementing Agency: Air Force
Funding Source: National Funds
(iii) *Description:* On March 07, 2018, Congress was notified by congressional certification transmittal number 17-41 of the possible sale, under Section 36(b)(1) of the Arms Export Control Act, of equipment and support to upgrade the Qatar Emiri Air Force's (QEAF) Air Operations Center (AOC), to include Link-16 network and classified networks integration, to enhance the performance of integrated air defense planning and provide US-Qatari systems interoperability. This sale was comprised of one (1) Multifunctional Information Distribution System (MIDS) Low Volume Terminal (LVT), Global

Positioning System (GPS) Selective Availability AntiSpoofing Module (SAASM) Chips, Simple Key Loaders (SKL), High Assurance Internet Protocol Encryptors (HAIPE), Ground Support System (GSS) components for Link-16, as well as the necessary infrastructure construction, integration, installation, and sustainment services, cybersecurity services, technical and support facilities, COMSEC support, secure communications equipment, encryption devices, software development, spare and repair parts, support and test equipment, publications and technical documentation, security certification and accreditation, personnel training and training equipment, U.S. Government and contractor engineering, technical and logistics support services; and other related elements of logistical and program support. The estimated total cost was \$197 million. Major Defense Equipment (MDE) constituted \$1 million of this total.

This transmittal notifies inclusion of the following additional non-MDE items: Air Operations Center upgrade;

spare and repair parts, consumables and accessories, and repair and return support; software delivery and support; minor modifications, maintenance, and maintenance support; facilities and construction support; publications and technical documentation; personnel training and training equipment; warranties; studies and surveys; transportation; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total value of the new non-MDE items is \$424 million. The estimated total case value will increase to \$621 million.

(iv) *Significance:* The proposed sale will significantly improve Qatar's defense capabilities to meet current and future threats and deter regional aggression. The inclusion of these items represents an increase in capability over what was originally notified.

(v) *Justification:* This proposed sale will support the foreign policy and national security objectives of the United States by helping to improve the security of a friendly country that

continues to be an important force for political stability and economic progress in the Middle East.

(vi) *Sensitivity of Technology*: The Sensitivity of Technology Statement contained in the original notification applies to items reported here.

(vii) *Date Report Delivered to Congress*: September 24, 2024
