

already having some familiarity with the regulations and certifying authorities having completed the more burdensome process of updating certification plans to comply with the updated 2017 requirements and shifting into the implementation phase of updating their certification programs. During this phase, certifying authorities may experience some paperwork burden if modifications to approved plans are needed, though these changes would only occur on an as-needed basis and are more limited in scale compared to the previous burden estimates. Additionally, EPA's estimates include updates to the number of total certified applicators, and associated noncertified applicators under their supervision, based on information reported by certifying authorities in their annual reports to the Agency. These changes are adjustments.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Authority: 44 U.S.C. 3501 *et seq.*

Dated: October 18, 2025.

Nancy B. Beck,

*Principal Deputy Assistant Administrator,
Office of Chemical Safety and Pollution
Prevention.*

Issuance of Part 71 Federal Operating Air Permit for Turning Stone Resort and Casino, Oneida Indian Nation; Notice of Final Action

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final action.

SUMMARY: This notice announces that the Environmental Protection Agency (EPA) issued a final Title V Federal Operating air permit pursuant to Title V

of the Clean Air Act for Turning Stone Resort and Casino, owned by the Oneida Indian Nation, located within the boundaries of the Oneida Indian Nation, Oneida Indian Reservation, in Oneida County, Verona, New York.

DATES: The EPA issued Part 71 Federal Operating Air Permit No. ONEIDA004 to Turning Stone Resort and Casino on September 11, 2025 under Title V of the Clean Air Act and 40 CFR part 71. The permit became effective on September 11, 2025.

FOR FURTHER INFORMATION CONTACT: Viorica Petriman, Environmental Engineer, Air and Radiation Division, EPA, Region 2, at (212) 637–4021 or at petriman.viorica@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document whenever “we”, “us”, or “our” is used, we mean EPA. This **SUPPLEMENTARY INFORMATION** section is arranged as follows:

Table of Contents

- I. How can I get copies of this document and other related information?
- II. Background
- III. Effect of This Action

I. How can I get copies of this document and other related information?

The EPA has established a docket for this action under Docket ID Number EPA–R02–OAR–2025–2402. Publicly available docket materials, including the final permit along with the application and all other related documents are available in the docket at <https://www.regulations.gov>.

II. Background

On July 11, 2025, the EPA Region 2 proposed a draft Part 71 permit renewal for Turning Stone Resort and Casino and requested public comment on the draft permit.

The Part 71 permit is a permit renewal that allows the facility to continue to operate its existing emission sources in accordance with the permit, but it does not authorize the addition of any new emission source or any increase in emissions.

During the public comment period, which ended on August 18, 2025, we did not receive any comments. The EPA issued the final permit without making any changes from the draft to the final permit decision, and, thus, as provided by 40 CFR 71.11(i)(2)(iii), the final permit became effective immediately upon issuance. We provided the facility with information regarding the opportunity to appeal the final Part 71 permit administratively, consistent with 40 CFR 71.11(l) and section 307(b) of the Clean Air Act.

40 CFR 124.19(l)(3)(iii) requires that the EPA provide notice in the **Federal Register** of any final agency action regarding Federal Title V operating permits issued under 40 CFR part 71.

Section 307(b)(1) of the CAA provides for judicial review of the final agency action within sixty (60) days from the date on which notice of the action appears in the **Federal Register**. A petition to the EPA's Environmental Appeals Board for administrative review is a prerequisite to seeking judicial review. 40 CFR 124.19(l). Since no such petitions for administrative review were submitted for the Turning Stone Resort and Casino final Part 71 Federal Operating air permit, no judicial review for this final Part 71 air permit may be sought. Under section 307(b)(2) of the CAA, this determination to issue a final Part 71 Federal Operating air permit shall not be subject to later judicial review in civil or criminal proceedings for enforcement.

III. Effect of This Action

Since no changes were made from draft to the final permit, the final Part 71 Federal Operating air permit became effective on September 11, 2025, as consistent with 40 CFR 71.11(l). This final permit will expire on September 11, 2030.

Authority: 42 U.S.C. 7401 *et seq.*

Michael Martucci,

Regional Administrator, Region 2.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; NESHAP for Nine Metal Fabrication and Area Finishing Source (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Nine Metal Fabrication and Area Finishing Source (EPA ICR Number 2298.07, OMB Control Number 2060–0622) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is

currently approved through November 30, 2025. Public comments were previously requested via the **Federal Register** on August 6, 2024 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before December 18, 2025.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OAR-2021-0122, to EPA online using www.regulations.gov (our preferred method), by email to a-and-r-docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT: Muntasir Ali, Sector Policies and Program Division (D243-05), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina, 27711; telephone number: (919) 541-0833; email address: ali.muntasir@epa.gov.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through November 30, 2025. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on August 6, 2024 during a 60-day comment period (89 FR 63933). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center,

WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP), for Nine Metal Fabrication and Finishing Area Sources (40 CFR part 63, subpart XXXXXX) were proposed on April 3, 2008, and promulgated on July 23, 2008. These regulations apply to owners or operators of any existing or new metal fabrication and finishing facility that is an area source of hazardous air pollutant (HAP) emissions and uses or has the potential to emit metal fabrication or finishing metal HAP (MFHAP), defined to be the compounds of cadmium, chromium, lead, manganese, and nickel, or any of these metals in the elemental form with the exception of lead. The affected sources consist of several types of metal fabrication and finishing processes, including any abrasive blasting, metalworking (which includes machining, and dry grinding and dry polishing with machines), spray painting, and welding operations. New facilities include those that commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart XXXXXX.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities: Owners or operators of metal fabrication and finishing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart XXXXXX).

Estimated number of respondents: 5,800 (total).

Frequency of response: Monthly, annually.

Total estimated burden: 39,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$5,340,000 (per year), includes no annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the most recently

approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Second, the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs. There is a slight increase in costs, which is wholly due to the use of updated labor rates. This ICR uses labor rates from the most recent Bureau of Labor Statistics report (December 2023) to calculate respondent burden costs.

Courtney Kerwin,

Director, Information Engagement Division.
