**Abstract:** The National Emission Standards for Hazardous Air Pollutants (NESHAP), for Nine Metal Fabrication and Finishing Area Sources (40 CFR part 63, subpart XXXXXX) were proposed on April 3, 2008, and promulgated on July 23, 2008. These regulations apply to owners or operators of any existing or new metal fabrication and finishing facility that is an area source of hazardous air pollutant (HAP) emissions and uses or has the potential to emit metal fabrication or finishing metal HAP (MFHAP), defined to be the compounds of cadmium, chromium, lead, manganese, and nickel, or any of these metals in the elemental form with the exception of lead. The affected sources consist of several types of metal fabrication and finishing processes, including any abrasive blasting, metalworking (which includes machining, and dry grinding and dry polishing with machines), spray painting, and welding operations. New facilities include those that commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart XXXXXX.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

**Form Numbers:** None.

**Respondents/affected entities:** Owners or operators of metal fabrication and finishing facilities.

**Respondent's obligation to respond:** Mandatory (40 CFR part 63, subpart XXXXXX).

**Estimated number of respondents:** 5,800 (total).

**Frequency of response:** Monthly, annually.

**Total estimated burden:** 39,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

**Total estimated cost:** \$5,340,000 (per year), includes no annualized capital or operation & maintenance costs.

**Changes in the Estimates:** There is no change in burden from the most recently

approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Second, the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs. There is a slight increase in costs, which is wholly due to the use of updated labor rates. This ICR uses labor rates from the most recent Bureau of Labor Statistics report (December 2023) to calculate respondent burden costs.

**Abstract:** The New Source Performance Standards (NSPS) for the regulations published at 40 CFR part 60, subpart OOOO were proposed on August 23, 2011, promulgated on August 16, 2012, and most recently amended on March 8, 2024. These regulations apply to oil and natural gas facilities that commence construction, modification or reconstruction after August 23, 2011, and on or before September 19, 2015, that are involved in the extraction and production of oil and natural gas, as well as the processing, transmission, and distribution of natural gas. Facilities that commenced construction, modification, or reconstruction after September 18, 2015 and on or before December 6, 2022 are subject to 40 CFR 60, Subpart OOOOa. Facilities that commence construction, modification, or reconstruction after December 6, 2022 are subject to 40 CFR 60, Subpart OOOOb. This information is being collected to assure compliance with 40 CFR part 60, subpart OOOO.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

*Form Numbers:* None.

*Respondents/affected entities:* Oil and natural gas facilities.

*Respondent's obligation to respond:* Mandatory (40 CFR part 60, subpart OOOO).

*Estimated number of respondents:* 417 (total).

*Frequency of response:* Semiannually, annually.

*Total estimated burden:* 54,300 hours (per year). Burden is defined at 5 CFR 1320.03(b).

*Total estimated cost:* \$11,000,000 (per year), which includes \$3,590,000 annualized capital or operation & maintenance costs.

*Changes in the Estimates:* The change in burden from the most recently approved ICR is due to adjustments. The adjustment decrease in burden from the most recently approved ICR is due to a decrease in the number of existing

sources and a growth rate of zero new sources. The decrease in the number of respondents also resulted in a decrease in labor costs, which was offset slightly by the use of updated labor rates. This ICR uses labor rates from the most recent Bureau of Labor Statistics report (December 2023) to calculate respondent burden costs. There is an increase in Capital O&M costs, which is due to the use of updated labor rates and an update from 2012\$ to 2023\$ using the Chemical Engineering Plant Cost Index (CEPCI).
