

Queuing (AFF-LQ)—MMW initiated with SAL override capability, and Active Fire & Forget (AFF)-MMW only. Hosting platforms include select rotary-wing and fixed-wing aircraft, wheeled or tracked vehicles, ground-based pedestal launchers, and patrol boats. Targets include tactical armor, boats, bunkers, buildings, caves, personnel in the open, rotary-wing and slow fixed-wing aircraft, UAS, and fast-moving non-tactical vehicles. The MMW is capable of hitting low radar cross section targets.

f. The AAR-57 Common Missile Warning System (CMWS) detects energy emitted by threat missiles in-flight, evaluates potential false alarm emitters in the environment, declares validity of threats, and selects appropriate countermeasures for defeat. The CMWS consists of an Electronic Control Unit (ECU), Electro-Optic Missile Sensors (EOMSs), and Sequencer and Improved Countermeasures Dispenser (ICMD).

g. The AN/APR-39 Radar Warning Receiver Signal Detecting Set is a system that provides warning of a radar-directed air defense threat and allows for the employment of appropriate countermeasures. This is the 1553 data bus compatible configuration.

h. The Hellfire M36E8 Captive Air Training Missile (CATM) is a flight-training missile that consists of a functional guidance section coupled to an inert missile bus. It functions like a tactical missile during captive carry on the aircraft, absent launch capability, making it suitable for training the

aircrew in simulated Hellfire Missile target acquisition and lock.

i. The AH-64E uses two EAGLE+MMR Embedded Global Positioning System (GPS)/Inertial Navigation Systems (INS) (EGI) with Multi-Mode Receiver. The EAGLE+MMR is a self-contained, all-attitude navigation system with an embedded GPS receiver controlled via MIL-STD-1553B controller, and provides output navigation and GPS timing data to support ADS-B out and other platform systems. The EAGLE EGI unit houses a 24 channel GPS receiver capable of operating in either Standard Positioning Service (SPS) C/A-code (non-encrypted) or Precise Positioning Service (PPS) Y-code (encrypted).

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the Republic of Korea can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Republic of Korea.

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

a. The 120mm M1147 High Explosive Multi-Purpose with Tracer (HEMP–T)

cartridge is a line-of-sight, full-bore, multi-purpose munition for the Abrams tank. It uses the Abrams Ammunition Data Link (ADL) hardware modification fielded on the M1A2SEPV2 platform to program the multi-mode fuze that provides three modes of operation: point detonate (PD), point detonate delay (DLY), and airburst. On PD/DLY mode, the high explosive payload is used to defeat bunkers, light armor, and breach obstacles and double reinforced concrete walls. On airburst mode, the M1147 provides the capability to defeat Anti-Tank Guided Missile (ATGM) teams.

b. The 120mm M830A1 High Explosive Multi-Purpose Anti-Tank (MPAT) with Tracer cartridge is a line-of-sight, full-bore, multi-purpose munition for the Abrams tank. It requires the gunner to manually select the fuze mode to either point detonate against buildings, bunkers, and light armor vehicles or similar target sets, or proximity for anti-helicopter self-defense capabilities.

c. The highest level of classification of defense articles, components, and services included in this potential sale is Controlled Unclassified Information.

d. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

e. A determination has been made that Israel will provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S.

foreign policy and national security objectives outlined in the Policy Justification.

f. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Israel.
