Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; NESHAP for Steel Pickling, HCl Process Facilities and Hydrochloric Acid Regeneration Plants (Renewal)

AGENCY: Environmental Protection
Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Steel Pickling, HCl Process Facilities and Hydrochloric Acid Regeneration Plants (EPA ICR Number 1821.12, OMB Control Number 2060–0419) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through November 30, 2025. Public comments were previously requested via the **Federal Register** on August 6, 2024 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before December 18, 2025.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2021–0092, to (1) EPA online using <https://www.regulations.gov/> (our preferred method), by email to a-and-r-docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the

proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Muntasir Ali, Sector Policies and Program Division (D243–05), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–0833; email address: ali.muntasir@epa.gov.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through November 30, 2025. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on August 6, 2024 during a 60-day comment period (89 FR 63933). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Steel Pickling, HCl Process Facilities and Hydrochloric Acid Regeneration Plants (40 CFR part 63, subpart CCC) were proposed on September 18, 1997; promulgated on June 22, 1999; and amended on both September 19, 2012 and November 19, 2020. This rule applies to all facilities that pickle steel using hydrochloric acid (HCl) or regenerate hydrochloric acid and are either major sources or part of a facility that is a major source. This information is being collected to assure compliance with 40 CFR part 63, subpart CCC.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an

affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities: Owners or operators of steel pickling, HCl process facilities and HCl regeneration plants.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart CCC).

Estimated number of respondents: 100 (total).

Frequency of response: Annually.

Total estimated burden: 35,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$4,800,000 (per year), includes \$14,700 annualized capital or O&M costs.

Changes in the Estimates: There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: (1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. There is a slight increase in the operation and maintenance (O&M) costs due to O&M costs being updated from \$2008 to \$2023 using the CEPCI Index. There is a slight increase in respondent burden costs, which is wholly due to the use of updated labor rates. This ICR uses labor rates from the most-recent Bureau of Labor Statistics report (December 2023) to calculate respondent burden costs.

Courtney Kerwin,

Director, Information Engagement Division.

Agency Information Collection Activities; Proposed Renewal Collection and Request for Comment; Certification of Pesticide Applicators

AGENCY: Environmental Protection
Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA), this document announces the availability of

and solicits public comment on the following Information Collection Request (ICR) that EPA is planning to submit to the Office of Management and Budget (OMB): Certification of Applicators (EPA ICR No. 0155.17 and OMB Control No. 2070-0029). This ICR represents a renewal of an existing ICR that is currently approved through August 31, 2026. Before submitting the ICR to OMB for review and approval under the PRA, EPA is soliciting comments on specific aspects of the information collection that is summarized in this document. The ICR and accompanying material are available in the docket for public review and comment.

DATES: Comments must be received on or before January 20, 2026.

ADDRESSES: Submit your comments, identified by docket identification (ID) number Docket ID No. EPA-HQ-OPP-2021-0288, online at <https://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <https://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT: Carolyn Siu, Office of Program Support (Mail Code 7602M), Office of Chemical Safety and Pollution Prevention, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001; telephone number: 202-566-1205; email address: siu.carolyn@epa.gov.

SUPPLEMENTARY INFORMATION:

I. What information is EPA particularly interested in?

Pursuant to PRA section 3506(c)(2)(A) (44 U.S.C. 3506(c)(2)(A)), EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.
2. Evaluate the accuracy of the Agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.
3. Enhance the quality, utility, and clarity of the information to be collected.
4. Minimize the burden of the collection of information on those who

are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

II. What information collection activity or ICR does this action apply to?

Title: Certification of Pesticide Applicators

EPA ICR No.: 0155.17

OMB Control No.: 2070-0029

ICR Status: This ICR is currently approved through August 31, 2026. Under the PRA, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA administers certification programs for pesticide applicators under section 11 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). FIFRA allows EPA to classify a pesticide as "restricted use" if the pesticide meets certain toxicity or risk criteria. The regulations in 40 CFR part 171 include procedures for certification programs for States, Federal agencies, Indian tribes, or U.S. territories who wish to develop and implement their own certification plans and programs, after obtaining EPA approval. This ICR addresses the paperwork activities performed by respondents to comply with training and certification requirements associated with applicators of restricted use pesticides (RUPs). Due to the potential of improperly applied RUPs to harm human health or the environment, pesticides under this classification may be purchased and applied only by "certified applicators" or by persons under the direct supervision of certified applicators. Currently all 50 states, the District of Columbia, 6 territories, 4 tribes and 5 federal agencies are authorized to run their own certification

programs within their jurisdictions, but each agency's certification plan must be approved by EPA before it can be implemented. Agencies authorized by EPA to administer a certification program are collectively referred to as "authorized agencies." In areas where no authorized agency has jurisdiction, EPA may administer a certification program directly, (e.g., Federal program). Federal programs require RUP dealers to maintain records of RUP sales and to report and update their names and addresses with the pesticide regulatory agency for enforcement purposes. This ICR also addresses how registrants of certain pesticide products are expected to perform specific, special paperwork activities, to comply with the terms and conditions of the pesticide registration (e.g., registrants of anthrax-related pesticide products).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Form number(s): EPA Form 8500-017 and EPA Form EPA-PFN-3400-5.

Respondents/affected entities: Entities potentially affected by this ICR include agricultural establishments, pest control officials, pesticide registrants, pesticide dealers, and administrators of environmental protection programs, governmental pest control programs, pesticide applicator certification programs (e.g., authorized agencies), and RUP dealers (only for EPA administered programs). North American Industrial Classification System (NAICS) codes identified in question 12 of the ICR.

Respondent's obligation to respond: Mandatory. FIFRA sections 3 and 11, and 40 CFR part 171

Estimated number of potential respondents: 2,722,244.

Frequency of response: On occasion.

Total estimated average number of responses for each respondent: 249.

Total estimated burden: 3,350,304 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated costs: \$165,574,065 (per year), includes \$0 annualized capital investment or maintenance and operational costs.

III. Are there changes in the estimates from the last approval?

There is a decrease of 315,095 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease primarily reflects EPA's updating of burden estimates for this collection based upon respondents

already having some familiarity with the regulations and certifying authorities having completed the more burdensome process of updating certification plans to comply with the updated 2017 requirements and shifting into the implementation phase of updating their certification programs. During this phase, certifying authorities may experience some paperwork burden if modifications to approved plans are needed, though these changes would only occur on an as-needed basis and are more limited in scale compared to the previous burden estimates. Additionally, EPA's estimates include updates to the number of total certified applicators, and associated noncertified applicators under their supervision, based on information reported by certifying authorities in their annual reports to the Agency. These changes are adjustments.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Authority: 44 U.S.C. 3501 *et seq.*

Issuance of Part 71 Federal Operating Air Permit for Turning Stone Resort and Casino, Oneida Indian Nation; Notice of Final Action

AGENCY: Environmental Protection
Agency (EPA).

ACTION: Notice of final action.

SUMMARY: This notice announces that the Environmental Protection Agency (EPA) issued a final Title V Federal Operating air permit pursuant to Title V

of the Clean Air Act for Turning Stone Resort and Casino, owned by the Oneida Indian Nation, located within the boundaries of the Oneida Indian Nation, Oneida Indian Reservation, in Oneida County, Verona, New York.

DATES: The EPA issued Part 71 Federal Operating Air Permit No. ONEIDA004 to Turning Stone Resort and Casino on September 11, 2025 under Title V of the Clean Air Act and 40 CFR part 71. The permit became effective on September 11, 2025.

FOR FURTHER INFORMATION CONTACT: Viorica Petriman, Environmental Engineer, Air and Radiation Division, EPA, Region 2, at (212) 637–4021 or at petriman.viorica@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document whenever “we”, “us”, or “our” is used, we mean EPA. This **SUPPLEMENTARY INFORMATION** section is arranged as follows:

Table of Contents

- I. How can I get copies of this document and other related information?
- II. Background
- III. Effect of This Action

I. How can I get copies of this document and other related information?

The EPA has established a docket for this action under Docket ID Number EPA–R02–OAR–2025–2402. Publicly available docket materials, including the final permit along with the application and all other related documents are available in the docket at <https://www.regulations.gov>.

II. Background

On July 11, 2025, the EPA Region 2 proposed a draft Part 71 permit renewal for Turning Stone Resort and Casino and requested public comment on the draft permit.

The Part 71 permit is a permit renewal that allows the facility to continue to operate its existing emission sources in accordance with the permit, but it does not authorize the addition of any new emission source or any increase in emissions.

During the public comment period, which ended on August 18, 2025, we did not receive any comments. The EPA issued the final permit without making any changes from the draft to the final permit decision, and, thus, as provided by 40 CFR 71.11(i)(2)(iii), the final permit became effective immediately upon issuance. We provided the facility with information regarding the opportunity to appeal the final Part 71 permit administratively, consistent with 40 CFR 71.11(l) and section 307(b) of the Clean Air Act.

40 CFR 124.19(l)(3)(iii) requires that the EPA provide notice in the **Federal Register** of any final agency action regarding Federal Title V operating permits issued under 40 CFR part 71.

Section 307(b)(1) of the CAA provides for judicial review of the final agency action within sixty (60) days from the date on which notice of the action appears in the **Federal Register**. A petition to the EPA's Environmental Appeals Board for administrative review is a prerequisite to seeking judicial review. 40 CFR 124.19(l). Since no such petitions for administrative review were submitted for the Turning Stone Resort and Casino final Part 71 Federal Operating air permit, no judicial review for this final Part 71 air permit may be sought. Under section 307(b)(2) of the CAA, this determination to issue a final Part 71 Federal Operating air permit shall not be subject to later judicial review in civil or criminal proceedings for enforcement.

III. Effect of This Action

Since no changes were made from draft to the final permit, the final Part 71 Federal Operating air permit became effective on September 11, 2025, as consistent with 40 CFR 71.11(l). This final permit will expire on September 11, 2030.

Authority: 42 U.S.C. 7401 *et seq.*

Michael Martucci,

Regional Administrator, Region 2.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; NESHAP for Nine Metal Fabrication and Area Finishing Source (Renewal)

AGENCY: Environmental Protection
Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Nine Metal Fabrication and Area Finishing Source (EPA ICR Number 2298.07, OMB Control Number 2060–0622) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is
