POLICY JUSTIFICATION

The Netherlands—PATRIOT M903 Launching Stations New Buy and Upgrades

The Government of the Netherlands has requested to buy two (2) new production PATRIOT M903 launching stations (LS) and equipment and services to upgrade existing M901 LS to the M903 LS configuration. The following non-MDE is also included: LS modification kits; PATRIOT Advanced Capability-3 (PAC-3) Missile Segment Enhancement (MSE) launcher conversion kits; LS heater controllers; shorting plug kits; PATRIOT automated logistics system kits; concurrent spare parts; U.S. Government and contractor engineering, technical, logistics, and fielding support services; and other related elements of logistics and program support. The estimated total cost is \$224 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a NATO Ally that is a force for political stability and economic progress in Europe.

The proposed sale will improve the Netherlands' missile defense capability to meet current and future enemy threats. The Netherlands will use the enhanced capability to strengthen its homeland defense, deter regional threats, and provide direct support to coalition and security cooperation efforts. The Netherlands will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors are Lockheed-Martin Missiles and Fire Control, located in Grand Prairie, TX, and RTX Corporation, located in Arlington, VA. The purchaser typically requests offsets. Any offset agreement will be defined in negotiations between the purchaser and the contractor(s).

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to the Netherlands.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 24–55

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. PATRIOT missiles are both transported on and launched from launching stations (LS). All new LSs are M903 configuration, which is capable of launching the entire family of PATRIOT missiles.

2. The highest level of classification of defense articles, components, and services included in this potential sale is CONFIDENTIAL.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the Government of the Netherlands can provide substantially the same

degree of protection for the technology being released as the U.S. Government. This potential sale is necessary in furtherance of the U.S. foreign policy and national security objectives as outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of the Netherlands.

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION*Taipei Economic and Cultural Representative Office in the United States—ALTIUS 600M–V Unmanned Aerial Vehicles*

The Taipei Economic and Cultural Representative Office in the United States (TECRO) has requested to buy the following non-MDE: ALTIUS 600M–V systems, comprised of an Unmanned Aerial Vehicle (UAV) loitering munition with extensible warhead and electro-optical/infrared (E.O./IR) camera; ALTIUS 600 inert training UAVs; Pneumatic Integrated Launch Systems (PILS); PILS transport trailers; ground control systems; associated support, including spares; battery chargers; operator and maintenance training; operator, maintenance, and training manuals; technical manuals; logistics and fielding support; testing; technical assistance CONUS and OCONUS, including for engineering services; program management; site surveys; facility, logistics and maintenance evaluations; quality assurance and de-processing team support; field service representative support; transportation; and other related elements of logistics and program support. The estimated total cost is \$300 million.

This proposed sale is consistent with U.S. law and policy as expressed in Public Law 96–8.

This proposed sale serves U.S. national, economic, and security interests by supporting the recipient's continuing efforts to modernize its armed forces and to maintain a credible defensive capability. The proposed sale will help improve the security of the recipient and assist in maintaining political stability, military balance, and economic progress in the region.

The proposed sale will improve the recipient's ability to meet current and future threats. The recipient will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Anduril, located in Atlanta, GA. There

are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require assignment of 5 U.S. Government and 12 contractor representatives for a duration of up to two years to support equipment fielding/training and program management.

There will be no adverse impact on U.S. defense readiness because of this proposed sale.

Transmittal No. 24–56

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

vii. *Sensitivity of Technology:*

1. The ALTIUS 600M–V system is composed of an Unmanned Aerial Vehicle (UAV), Pneumatic Integrated Launch System (PILS), payload, and associated support. Each UAV is integrated with a command-and-control radio and assured positioning, navigation, and timing modules. The ALTIUS 600M–V system is designed for expeditionary deployment by air, mobile, ground, or maritime forces. It leverages autonomy to allow a single operator to control multiple UAVs simultaneously. The PILS is a reusable launcher holding up to one UAV at a time per canister. The UAV's payload is an electro-optical/infrared (E.O./IR) camera and extensible warhead, which provides a loitering munition capability. The ALTIUS 600M–V can operate up to 18,000 feet above ground level with an endurance of approximately 90 minutes, a range of up to 160km, and a dash speed of 185km/hour, dependent on payload.

2. The highest level of classification of defense articles, components, and services included in this potential sale is UNCLASSIFIED.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might

reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the recipient can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the recipient.
