Background

The data for the Transportation of Hazardous Materials; Highway Routing ICR is collected under authority of 49 U.S.C. 5112 and 5125. Specifically, 49 U.S.C. 5112(c) requires that the Secretary of Transportation, in coordination with the States, “shall update and publish periodically a list of currently effective hazardous material highway route designations.” This authority is delegated to FMCSA in 49 CFR 1.87(d)(2).

In § 397.73, FMCSA requires that each State and Indian Tribe, through its routing agency, provide information identifying new, or changes to existing, hazardous materials routing designations within its jurisdiction within 60 days of their establishment (or 60 days of the change). That information is collected and consolidated by FMCSA and published annually, in whole or as updates, in the **Federal Register** and on the Agency’s website at <https://www.fmcsa.dot.gov/regulations/hazardous-materials/national-hazardous-materials-route-registry>.

SUPPLEMENTARY INFORMATION:

Background

The NTD was established by Congress to be the Nation's primary source for information and statistics on the transit systems of the United States. Recipients and beneficiaries of FTA grants under either the Urbanized Area Formula Program (49 U.S.C. 5307) or Rural Area Formula Program (49 U.S.C. 5311) are required by law to report data to the NTD. Recipients generally report data on an annual or monthly basis.

During the COVID-19 pandemic, FTA found it did not have sufficient and timely data on transit ridership or transit service levels to inform decision-makers at the Federal, State, and local levels during the rapidly changing crisis situation. To better understand changes in the transit industry on a timely basis during the tumultuous time, FTA went through the notice and comment process (Docket number FTA-2022-0018) pursuant to 49 U.S.C. 5334(k) to, among other things, enable FTA to collect additional data from a sample set of modal reports from across the universe of full, reduced, tribal, and rural reporters on a weekly reference WE-20 Form. FTA finalized the WE-20 reporting requirements in March 2023 (88 FR 13497).

The goal of the sample data collection (received from approximately 400 FTA recipients) was to obtain a representative nationwide snapshot of transit ridership and transit service levels. The sampling methodology uses a stratified random sampling based on region, mode, and other factors. FTA then made sampling adjustments as needed based on unavailable modes, recipients without weekly data access, or other factors.

Although the WE-20 reporting requirement provided important data as the country recovered from the pandemic, it is not required by statute, and after two years of experience with this data collection, FTA has now determined the WE-20 reporting requirement no longer offers sufficient value relative to the administrative burden on transit agencies and is inconsistent with this Administration's deregulatory priorities.

Proposed Recission of the WE-20 Reporting Requirement

In consideration of the foregoing, and consistent with the Administration's focus on reducing regulatory burdens, FTA proposes to rescind the WE-20 reporting requirement. The requirement is not mandated by statute and no longer offers sufficient value relative to the administrative burden on transit agencies. FTA welcomes public comments on the proposed recission.

Marcus J. Molinaro,
Administrator.
