This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. **Abstract:** The New Source Performance Standards (NSPS) Ammonium Sulfate Manufacturing Plants (40 CFR part 60, subpart PP) apply to ammonium sulfate dryers located at both existing and new ammonium sulfate manufacturing plants in the caprolactam by-product, synthetic, and coke oven by-products sectors of the ammonium sulfate manufacturing industry. New facilities include those that commenced construction, modification or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 60, subpart PP. In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

**Form Numbers:** None.

**Respondents/affected entities:** Ammonium sulfate manufacturing facilities.

**Respondent's obligation to respond:** Mandatory (40 CFR part 60, subpart PP).

**Estimated number of respondents:** Two (total).

**Frequency of response:** Semiannually.

**Total estimated burden:** 286 hours (per year). Burden is defined at 5 CFR 1320.3(b).

**Total estimated cost:** \$39,100 (per year). There are no annualized capital or operation & maintenance costs.

**Changes in the Estimates:** There is no change in burden from the most recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Second, the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs.
