OMB Control: 2125–0645.

Background: 23 CFR 772.13(f) requires State DOTs to maintain an inventory of constructed noise abatement measures, the information to be requested, and for FHWA to collect it via OMB collection requirements. The parameters in the information to be collected include location, design information, costs, project information and what land uses the abatement measure is protecting from noise. The information is used to create a national inventory that allows us to see trends over time, share the information with the public, and use it for research projects.

Respondents: 52 respondents of the 50 State DOTs, District of Columbia, and Commonwealth of Puerto Rico.

Frequency: Three-year approved clearance.

Estimated Average Burden per Response: On the average, the estimate is 8 hours per response. The average of 8 hours includes the time for reviewing instructions, searching existing data sources, gathering the data, reviewing it, and maintaining it. Note: Some respondents may have far less time than 8 hours, since they have done this before and their information is easily accessible.

Estimated Total Annual Burden Hours: The estimated annual burden hours are 416, which is based on an average of 8 hours per respondent and 52 respondents, which are the 50 State DOTs, the District of Columbia, and the Commonwealth of Puerto Rico.

The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.
