

of closed movie captioning and audio description in their communications.

7. *Estimated Time per Respondent:* 8.7 hours per year.

The Department acknowledges that the amount of time it will take a respondent to comply with this requirement may vary depending on the number of digital movies that the respondent is showing at any given time. Based on information gathered during the initial rulemaking process, the Department estimates that respondents will take an average of up to 10 minutes each week to update existing notices of digital movie showings and times with closed captioning and audio description information. Therefore, the Department estimates that each firm owning one or more theaters offering digital movies with closed captioning or audio description will spend approximately  $((10 \text{ minutes/week} \times 52 \text{ weeks/year}) \div 60 \text{ minutes/hour})$  8.7 hours each year to comply with this requirement.

The Department anticipates that firms owning one or more movie theaters will likely update their existing listings of digital movie showings and times to include information concerning the availability of closed movie captioning and audio description on a regular basis. The Department's research suggests that this information would only need to be updated whenever a new digital movie with these features is added to the schedule. This will vary as some digital movies stay on the schedule for longer periods of time than others, but the Department estimates that respondent firms will update their listings to include this information weekly. In the future, if all movies are distributed with these accessibility features, specific notice on a movie-by-movie basis may no longer be necessary and firms owning movie theaters may only need to advise the public that they provide closed captioning and audio description for all of their digital movies.

#### 8. *Frequency:*

9. *Total Estimated Annual Time Burden:* The estimated public burden associated with this collection is 15712.67 hours. The Department estimates that respondents will take an average of 10 minutes each week to update their existing listings of digital movie showings and times with the required information about closed captions and audio description. If each respondent spends 10 minutes each week to update its notices of digital moving showings and times to include this information, the average movie theater firm will spend 8.7 hours annually  $((10 \text{ minutes/week} \times 52 \text{ weeks/year}) \div 60 \text{ minutes/hour})$  complying with this requirement. The Department expects that the annual public burden hours for disclosing this information will total  $(1,813 \text{ respondents} \times 8.7 \text{ hours/year})$  15,713 hours.

10. *Total Estimated Annual Other Costs Burden:* Yearly costs to industry are estimated to be \$0, as updates to communications and advertisements listing digital movie showings and times are normal tasks performed by movie theater personnel and any additional work related to this public disclosure requirement is minimal (e.g., adding symbols to indicate the availability of closed movie captioning and audio description next to a digital movie title).
