

additional charge of \$7.50.⁴ Special packaging is also required for these shipments. The average cost of frozen infectious shipments is estimated to be \$170 per package of four for specimen shipments requiring refrigeration or dry ice. Therefore, the USPTO estimates that the total average postage cost is \$371 per shipment. The USPTO estimates that respondents to this information collection will ship 1,500 biological deposits, for a total of \$556,500. The USPTO estimate that it will receive 1 depository request for recognition. The USPTO estimates that the postage cost for this type of mailed submission, using a Priority Mail legal flat-rate envelope, will be \$11.20. Combining these rates, the USPTO therefore estimates that the total mailing costs for this information collection is \$556,511 per year.

IV. Request for Comments

The USPTO is soliciting public comments to:

(a) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected; and

(d) Minimize the burden of the collection of information for those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

All comments submitted in response to this notice are a matter of public record. The USPTO will include or summarize each comment in the request to OMB to approve this information collection. Before including an address, phone number, email address, or other personally identifiable information (PII) in a comment, be advised that the entire comment—including PII—may be made publicly available at any time. While you may request to withhold PII from

public view, the USPTO cannot guarantee that it will be able to do so.

SUPPLEMENTARY INFORMATION:

I. Abstract

In the interest of national security, patent laws and regulations place certain limitations on the disclosure of information contained in patents and patent applications and on the filing of applications for patents in foreign countries.

This information collection includes the information needed by the USPTO to review the various types of petitions regarding secrecy orders and foreign filing licenses. This collection of information is required by 35 U.S.C. 181–186 and is administered by the USPTO through 37 CFR 5.1–5.5, 5.11–5.15, 5.18–5.20, and 5.25.

Secrecy Orders

Whenever the publication or disclosure of an invention by the publication of an application or by the granting of a patent is, in the opinion of the head of an interested Government agency, determined to be detrimental to national security, the USPTO Commissioner for Patents must issue a secrecy order and withhold the publication of a patent application and the grant of a patent for such period as the national security interest requires. A patent will not be issued on the application, nor will the application be published, as long as the secrecy order is in force. If a secrecy order is applied to an international application, the application will not be forwarded to the International Bureau as long as the secrecy order is in effect.

The Commissioner for Patents can issue three types of secrecy orders, each of a different scope. The first type, Secrecy Order and Permit for Foreign Filing in Certain Countries, is intended to permit the widest utilization of the technical data in the patent application while still controlling any publication or disclosure that would result in an unlawful exportation. The second type, the Secrecy Order and Permit for Disclosing Classified Information, is to treat classified technical data presented in a patent application in the same manner as any other classified material. The third type of secrecy order, the General Secrecy Order, is used where the other types of orders are not applicable, including orders issued by agencies other than the Department of Defense.

Under the provision of 35 U.S.C. 181, a secrecy order remains in effect for a period of one year from its date of

⁴ FedEx, U.S. Parcel Pickup Options (<https://www.fedex.com/content/dam/fedex-com/hdn/FedEx-US-Pickup-Options-with-rates-2025.pdf>).

issuance. A secrecy order may be renewed for additional periods of not more than one year upon notice by a Government agency that the national interest continues to require it. The applicant is notified of the renewal.

When the USPTO places a secrecy order on a patent application, the regulations authorize the applicant to petition the USPTO for permits to allow disclosure, modification, or rescission of the secrecy order, or to obtain a general or group permit. In each of these circumstances, the petition is forwarded to the appropriate defense agency for decision. Also, the Commissioner for Patents may rescind any order upon notification from the heads of the departments and the chief officers of the agencies who issued the order that the disclosure of the invention is no longer deemed detrimental to national security.

Unless expressly ordered otherwise, action on the application and prosecution by the applicant will proceed during the time the application is under a secrecy order to a specific point as indicated under 37 CFR 5.3. See the Manual of Patent Examining Procedure (MPEP) Section 130 (9th ed., rev. 01.2024, November 2024). For example, prosecution of a national application under a secrecy order may proceed only to the point where it is found to be in condition for allowance. See 37 CFR 5.3(c). Prosecution of international applications under a

secrecy order, on the other hand, will proceed only to the point before record and search copies would be transmitted to the international authorities or the applicant. See 37 CFR 5.3(d). National applications under a secrecy order that come to a final rejection must be appealed or otherwise prosecuted to avoid abandonment. Appeals in such cases must be completed by the applicant, but unless specifically indicated by the Commissioner of Patents, will not be scheduled for hearing until the secrecy order is removed.

Foreign Filing License

This information collection also covers information gathered with respect to foreign filing licenses. The filing of a patent application is considered a request for a foreign filing license. However, in some instances an applicant may need a license for filing patent applications in foreign countries prior to a filing in the USPTO or sooner than the anticipated licensing of a pending patent application.

For such circumstances, this information collection covers petitions for a foreign filing license either with or without a corresponding United States application. In addition, this information collection covers petitions to change the scope of a license and petitions for a retroactive license for instances when a patent application is

erroneously filed in a foreign country without the appropriate filing license.

II. Method of Collection

Items in this information collection may be submitted as electronic submissions. Applicants may also submit the information in paper form by mail, fax, or hand delivery.

III. Data

OMB Control Number: 0651-0034.

Forms: None.

Type of Review: Extension and revision of a currently approved information collection.

Affected Public: Private Sector.

Respondent's Obligation: Required to obtain or retain benefits.

Frequency: On occasion.

Estimated Number of Annual

Respondents: 7,318 respondents.

Estimated Number of Annual Responses: 7,318 responses.

Estimated Time per Response: The USPTO estimates that the responses in this information collection will take the public approximately 30 minutes (0.50 hours) to 4 hours to complete. This includes the time to gather the necessary information, create the document, and submit the completed item to the USPTO.

Estimated Total Annual Respondent Burden Hours: 4,207 hours.

Estimated Total Annual Respondent Hourly Cost Burden: \$1,880,529.

¹ 2023 Report of the Economic Survey, published by the Committee on Economics of Legal Practice of the American Intellectual Property Law Association, pg. F-41. The USPTO uses the average billing rate for intellectual property work in all firms, which is \$447 per hour (www.aipla.org/home/news-publications/economic-survey).

Estimated Total Annual Respondent Non-hourly Cost Burden: \$1,622,976. There are no capital startup costs, maintenance costs, or recordkeeping

costs associated with this information collection. However, the USPTO estimates that the total annual non-hour cost burden for this information

collection, in the form of filing fees and postage costs, is \$1,622,976.

Filing Fees

There are four filing fees associated with this information collection. The fees are listed in Table 2 below.

Postage Costs

Although the USPTO prefers that the items in this information collection be submitted electronically, responses may be submitted by mail through the United States Postal Service. The USPTO estimates that 1% of the 7,318 items will be submitted in the mail, resulting in 73 mailed items. The USPTO estimates that the average postage cost for a mailed submission, using a Priority Mail legal flat-rate envelope, will be \$11.20. Therefore, the USPTO estimates the total mailing costs for this information collection is \$818.

IV. Request for Comments

The USPTO is soliciting public comments to:

(a) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected; and

(d) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology,

e.g., permitting electronic submission of responses.

All comments submitted in response to this notice are a matter of public record. The USPTO will include or summarize each comment in the request to OMB to approve this information collection. Before including an address, phone number, email address, or other personally identifiable information (PII) in a comment, be advised that the entire comment—including PII—may be made publicly available at any time. While you may request to withhold PII from public view, the USPTO cannot guarantee that it will be able to do so.
