

released, an ex parte notice must be submitted by the next business day, and any reply would be due by the following business day. If a permissible ex parte presentation is made during the Sunshine period (under an exception to the Sunshine period prohibition), the ex parte notice is due by the end of the same day on which the presentation was made, and any reply would need to be filed by the next business day. Any reply must be in writing and limited to the issues raised in the ex parte notice to which the reply is directed; (7) Commissioners and agency staff may continue to request ex parte presentations during the Sunshine period, but these presentations should be limited to the specific information required by the Commission; (8) Ex parte notices must be submitted electronically in machine-readable format. PDF images created by scanning a paper document may not be submitted, except in cases in which a word-processing version of the document is not available. Confidential information may continue to be submitted by paper filing, but a redacted version must be filed electronically at the same time the paper filing is submitted. An exception to the electronic filing requirement will be made in cases in which the filing party claims hardship. The basis for the hardship claim must be substantiated in the ex parte filing; (9) To facilitate stricter enforcement of the ex parte rules, the Enforcement Bureau is authorized to levy forfeitures for ex parte rule violations; (10) Copies of electronically filed ex parte notices must also be sent electronically to all staff and Commissioners present at the ex parte meeting so as to enable them to review the notices for accuracy and completeness. Filers may be asked to submit corrections or further information as necessary for compliance with the rules; and (11) Parties making permissible ex parte presentations in restricted proceedings must conform and clarify rule changes when filing an ex parte notice with the Commission.

The information is used by parties to permit-but-disclose proceedings, including interested members of the public, to respond to the arguments made and data offered in the ex parte presentations. The responses may then

be used by the Commission in its decision-making.

The availability of the ex parte materials ensures that the Commission's decisional processes are fair, impartial, and comport with the concept of due process in that all interested parties can know of and respond to the arguments made to the decision-making officials.

OMB Control Number: 3060–1226.

Title: Receiving Written Consent for Communication with Base Stations in Canada; Issuing Written Consent to Licensees from Canada for Communication with Base Stations in the U.S.; Description of Interoperable Communications with Licensees from Canada.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: State, Local, or Tribal government agencies.

Number of Respondents and Responses: 3,013 respondents; 3,013 responses.

Estimated Time per Response: 0.5 hours–1 hour.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Written consent from the licensee of a base station repeater is required before first responders from the other country can begin communicating with that base stations repeater. Applicants are advised to include a description of how they intend to interoperate with licensees from Canada when filing applications to operate under any of the scenarios described in Public Notice DA 16–739 in order to ensure that the application is not inadvertently rejected by Canada. Statutory authority for these collections are contained in 47 U.S.C. 151, 154, 301, 303, 307, 308, 309, 310, 316, 319, 325(b), 332, 336(f), 338, 339, 340, 399b, 403, 534, 535, 1404, 1452, and 1454 of the Communications Act of 1934.

Total Annual Burden: 5,272 hours.

Total Annual Cost: None.

Needs and Uses: This collection will be submitted as an extension of an existing collection after this 60-day comment period to the Office of Management and Budget (OMB) in order to obtain the full three-year clearance. The purpose of requiring an agency to issue written consent before allowing

first responders from the other country to communicate with its base station repeater ensures to that the licensee of that base stations repeater (host licensee) maintains control and is responsible for its operation at all times. The host licensee can use the written consent to ensure that first responders from the other country understand the proper procedures and protocols before they begin communicating with its base station repeater. Furthermore, when reviewing applications filed by border area licensees, Commission staff will use any description of how an applicant intends to interoperate with licensees from Canada, including copies of any written agreements, in order to coordinate the application with Innovation, Science and Economic Development Canada (ISED) and reduce the risk of an inadvertent rejection by ISED.
