

transportation; U.S. Government and contractor engineering support; and other related elements of logistics and program support. The estimated total cost is \$405 million.

This proposed sale will support the foreign policy and national security objectives of the U.S. Australia is one of our most important allies in the Western Pacific. The strategic location of this political and economic power contributes significantly to ensuring peace and economic stability in the Western Pacific. It is vital to the U.S. national interest to assist our ally in developing and maintaining a strong and ready self-defense capability.

The proposed sale will improve the Government of Australia's capability to meet current and future threats by providing the capability to suppress and destroy land or sea-based radar emitters associated with enemy air defenses, thereby improving survivability of tactical aircraft. Australia will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Northrop Grumman Systems, located in Falls Church, VA. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require approximately four U.S. Government and one contractor representative to travel to Australia on a temporary basis in conjunction with program technical oversight and support requirements, including program and technical reviews.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 24–106

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. (vii)

(vii) Sensitivity of Technology:

1. The AGM–88G Advanced Anti-Radiation Guided Missile-Extended Range (AARGM–ER) weapon system is an air-to-ground missile intended for suppression of enemy air defenses (SEAD) and destruction of enemy air defenses (DEAD) missions. AARGM–ER provides suppression or destruction of enemy radar and denies the enemy the use of air defense systems, thereby improving the survivability of tactical aircraft. AGM–88G AARGM–ER Captive Air Training Missiles (CATM) are used by pilots when training for SEAD/DEAD missions.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the Government of Australia can provide substantially the same degree of protection for the technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Australia.

The Honorable Mike Johnson
Speaker of the House
U.S. House of Representatives
H-209, The Capitol
Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 24-86, concerning the Air Force's proposed Letter(s) of Offer and Acceptance to the Government of Norway for defense articles and services estimated to cost \$405 million. We will issue a news release to notify the public of this proposed sale upon delivery of this letter to your office.

Sincerely,

Michael F. Miller
Acting Director

BILLING CODE 6001-FR-C

Transmittal No. 24-86

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Government of Norway

(ii) *Total Estimated Value:*

Major Defense Equipment * ..	\$374 million
Other	\$ 31 million

TOTAL \$405 million

(iii) *Major Defense Equipment (MDE):*

One hundred (100) Advanced
Medium Range Air-to-Air Missiles-
Extended Range (AMRAAM-ER)
Four (4) AMRAAM AIM-120C-8
guidance sections

Non-Major Defense Equipment:

The following non-MDE items will also be included: AMRAAM containers and support equipment; spare parts, consumables, accessories, and repair and return support; weapons software and support equipment, and classified

software delivery and support; transportation support; classified publications and technical documentation; training equipment and support; studies and surveys; United States (U.S.) Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support.

(iv) *Military Department:* Air Force (NO-D-YAJ)

(v) *Prior Related Cases, if any:* None

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None known at this time

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex

(viii) *Date Report Delivered to Congress:* August 22, 2024

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Norway—Advanced Medium Range Air-to-Air Missiles—Extended Range

The Government of Norway has requested to buy one hundred (100) Advanced Medium Range Air-to-Air Missiles-Extended Range (AMRAAM-ER) and four (4) AMRAAM AIM-120C-8 guidance sections. The following non-MDE items will also be included: AMRAAM containers and support equipment; spare parts, consumables, accessories, and repair and return support; weapons software and support equipment, and classified software delivery and support; transportation support; classified publications and technical documentation; training equipment and support; studies and surveys; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$405 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a NATO Ally that is a force for political stability and economic progress in Europe.

The proposed sale will improve Norway's capability to meet current and future threats by supplementing and replacing Air Intercept Missile 120B (AIM-120B) AMRAAMs with the more capable AMRAAM-ER. The newly acquired missiles will be used for ground-based air defense in the Norwegian Advanced Surface to Air Missile System (NASAMS). Norway already has AMRAAMs in its inventory and will have no difficulty absorbing these articles into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be RTX Corporation, located in Tucson, AZ. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Norway.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 24-86

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AIM-120C-8 Advanced Medium Range Air-to-Air Missile (AMRAAM) is a supersonic, air-or-surface-launched aerial intercept guided missile featuring digital technology and micro-miniature solid-state electronics. AMRAAM capabilities include look-down/shoot-down, multiple launches

against multiple targets, resistance to electronic countermeasures, and interception of high and low-flying and maneuvering targets.

a. The Advanced Medium Range Air-to-Air Missile-Extended Range (AMRAAM-ER) utilizes an AIM-120C-7 or C-8 seeker and warhead joined with a new control section and rocket motor, applicable only for surface-launch mode applications. This provides extended range and altitude as well as higher speed and maneuverability.

2. The KGV-135A is a high-speed, general purpose encryptor/decryptor module used for wide-band data encryption.

3. The Common Munitions Built-In-Test (BIT)/Reprogramming Equipment (CMBRE) is support equipment used to interface with weapon systems to initiate and report BIT results, and upload/download flight software. CMBRE supports multiple munitions platforms with a range of applications that perform preflight checks, periodic maintenance checks, loading of Operational Flight Program (OFP) data, loading of munitions mission planning data, loading of Global Positioning System (GPS) cryptographic keys, and declassification of munitions memory.

4. The ADU-891 Adapter Group Test Set provides the physical and electrical interface between the CMBRE and the missile.

5. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

6. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

7. A determination has been made that Norway can provide substantially

the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

8. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Norway.
