

end of the eighth calendar year to offer service to the additional locations. Such a RDOF carrier may seek to have its new location count adjusted to exclude additional locations, beyond the number identified by the CAM, that are ineligible, unreasonable to deploy to, or are part of a development that is newly built after the sixth year of support for which the cost and/or time to deploy before the end of the support term would be unreasonable. *Connect America Fund et al.*, WC Docket No. 19–126 et al., Report and Order, 35 FCC Rcd 686, 709–712, paras. 45–55 (2020).

In the *High-Cost Fabric Order*, WCB adopted procedures to implement this process. Specifically, once WCB has announced revised location totals for RDOF carriers in 2027, carriers will have six months to submit any requests to remove locations from their revised locations lists. WCB will set up a data collection system in which carriers should submit a request identifying the locations they claim are unreasonable to serve (*i.e.*, Fabric Location ID), the specific reasons why each location is unreasonable to serve, and evidence to support their claims. The Bureau may then request additional information from the carrier and other stakeholders to verify and assess the carrier's claims. WCB may request additional information to assess a carrier's claim that a location is unreasonable to serve, and a failure to submit this additional information would result in the Bureau finding that the carrier has not demonstrated that it would be unreasonable to serve the location. We therefore propose to revise this information collection.
