Abstract: The Drug Enforcement Administration (DEA) is a federal law enforcement agency charged with enforcing the controlled substances laws

and regulations of the United States. Its principal responsibilities include investigation and prosecution of major violators of controlled substances laws.

Because of the nature of DEA's mission, and its status as a law enforcement agency, past use of illegal drugs by potential employees presents special concerns, and therefore the agency evaluates a job applicant's illegal drug use and abuse during the application process. Executive Order 12564 is supported in the DEA Pre-Employment Drug Policy that a history of illegal drug use or abuse may be a disqualification for employment with DEA.

This amended form notifies job applicants of the DEA Pre-Employment Drug Policy and asks them to acknowledge their understanding of those requirements to move forward in the employment process.

SUPPLEMENTARY INFORMATION:

Title of Collection: National Science Foundation (NSF) Small Business Innovation Research (SBIR)/Small Business Technology Transfer (STTR) Pre-Award Information Collection.

OMB Control No.: 3145-0270.

Abstract: The NSF SBIR/STTR programs focus on transforming scientific discovery into products and services with commercial potential and/or societal benefit. Unlike fundamental or basic research activities that focus on scientific and engineering discoveries, the NSF SBIR/STTR programs support the creation of opportunities to move fundamental science and engineering out of the lab and into the market at scale, through startups and small businesses representing deep technology ventures.

The NSF SBIR/STTR programs have two phases: Phase I and Phase II. Phase I is a 6–12 month experimental or theoretical investigation that allows the awardees to determine the scientific and technical feasibility, as well as the commercial merit of the idea or concept. Phase II further develops the proposed concept, with a goal of working toward the commercial launch of the new product, process, or service being developed.

The NSF SBIR/STTR programs request the Office of Management and Budget (OMB) approval of this clearance that will allow the programs to collect information from a selected group of applicants—those that have been reviewed by independent experts and that NSF Program Directors are considering recommending for funding—for the purpose of making a funding decision. This information includes, but is not exclusive to, a list of company officers and the corresponding ownership status of each company officer within the startup,
