The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of Request*: The licensee requests a non-capacity license amendment regarding its minimum flow requirements under Article 52. The licensee states that this amendment is necessary to appropriately manage the water storage of Lake Pillsbury and remain in compliance with the requirements of Article 52, given current interim risk reduction measures due to seismic concerns, storage limitations, and the various water demands on the system.

First, the proposed changes to East Branch Russian River minimum flows, as measured by compliance gage E-16 in cubic feet per second (cfs), are as follows:

Period		Water year classification		
From	Through	Normal	Dry	Critical
October 1	April 14	35 cfs	35 cfs	5 cfs.
Scott Dam in Spill Condition				
April 15	May 14	35 cfs	25 cfs	5 cfs.
-or- Scott Dam not in Spill Condition				
April 15	May 14	5 cfs	5 cfs	5 cfs.
Scott Dam in Spill Condition				
May 15	June 30	75 cfs	25 cfs	5 cfs.
-or- Scott Dam not in Spill Condition				
May 15	June 30	5 cfs	5 cfs	5 cfs.
July 1	September 30	5 cfs	5 cfs	5 cfs.

Second, the minimum flow requirement below Scott Dam, as measured by compliance gage E-2, would be modified to 20 cfs at all times, regardless of calendar date or water year classification. In addition, the definition of compliance with minimum flows would be established as the mean daily flow, defined as the 'calculated 24-hour average of the flow'. Further, the block water allocation of 2,500 acre-feet reserved for the release at the discretion of resource agencies would be changed from each 'water' year to each 'calendar' year. The licensee is proposing this modified mode of operation until the Commission acts on the pending surrender application, filed with the Commission on July 25, 2025, or other Commission proceeding.

Magnum Gas Storage, LLC; Notice of Revised Schedule for Environmental Review of the 2025 Amendment Project

This notice identifies the Federal Energy Regulatory Commission staff's revised schedule for the completion of the environmental assessment (EA) for Magnum Gas Storage, LLC's (Magnum) 2025 Amendment Project.¹ The first notice of schedule, issued on June 26, 2025, identified November 13, 2025, as the EA issuance date. However, following a series of staff data requests, Magnum indicated that it will not file a response regarding the project's construction emissions until November 25, 2025. As this information is needed to determine the level of construction-related air quality effects and for the Commission to understand whether a General Conformity Determination is required for the project, staff has revised the schedule for issuance of the EA. The issuance date is also contingent on the quality of information provided by
