

within 90 days of the date of issuance of the Commission staff's environmental document for the Project.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) for the Project and the planned schedule for the completion of the environmental review.¹

Schedule for Environmental Review

Issuance of EA—March 20, 2026
90-day Federal Authorization Decision
Deadline²—June 18, 2026

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Project Description

Texas Eastern proposes to abandon and remove three natural gas-fired turbine compressor units and ten reciprocating compressor units at the existing Danville Compressor Station and replace them with three new gas-fired turbine compressor units. According to Texas Eastern, the new units would replace units installed in the 1950s and 1960s, ensuring continued safe, efficient, and reliable operation of the compressor station while meeting air emissions requirements.

Background

On September 12, 2025, the Commission issued a *Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Danville Compressor Station Replacement Project* (Notice of Scoping). The Notice of Scoping was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. In response to the Notice of Scoping, the Commission received no comments.
