SUPPLEMENTARY INFORMATION:**I. Background**

Article 24.26 of the USMCA establishes an Environment Committee composed of senior government representatives to oversee the implementation of Chapter 24 (Environment), and provide a forum to discuss and review chapter implementation. The USMCA requires the Committee to meet within one year of the date of entry into force of the USMCA and every two years thereafter unless the Committee agrees otherwise. The Committee last held a biannual meeting on September 26, 2023. The Committee also met in special sessions twice in 2025 (February and June) for the purpose of conducting the requisite five-year review of Chapter 24 (Article 24.26.7). All decisions and reports of the Committee will be made publicly available, unless the Committee decides otherwise. The Committee will provide for public input on matters relevant to the Committee's work, as appropriate, and hold a public session at each meeting.

II. Committee Meeting

On December 11, 2025, the Committee will meet in a government-to-government session to (1) review the implementation and operation of Chapter 24, in accordance with Article 24.26(7)(a) of the USMCA and (2) receive a presentation from the Commission on Environmental Cooperation (CEC) Secretariat on cooperation and public Submissions for Enforcement Matters (SEMs). Accordingly, participation in the public session is not limited to those questions submitted through comments in advance of the session. Agency Information Collection Activities: Requests for Comments; Clearance of Renewed Approval of Information Collection: Suspected Unapproved Parts Report

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The information collected on the FAA Form 8120–11 is reported voluntarily by manufacturers, repair stations, aircraft owner/operators, air carriers, and the general public who wish to report the discovery of, and potential use or possession of aircraft suspected unapproved parts to the FAA for review. The report information is collected and evaluated by the FAA, Aviation Safety Hotline Program Office, and used to determine if an unapproved part investigation is warranted.

DATES: Written comments should be submitted by December 26, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. SUPPLEMENTARY INFORMATION:

Title: Suspected Unapproved Parts Report.

Form Numbers: FAA Form 8120–11.

Type of Review: Renewal of an information collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on May 22, 2025 (90 FR 21983). The information collected on the FAA Form 8120–11 is reported voluntarily by manufacturers, repair stations, aircraft owner/operators, air carriers, and the general public who wish to report suspected unapproved parts to the FAA for review. The report information is collected and correlated by the FAA, Aviation Safety Hotline Program Office, and used to determine if an unapproved part investigation is warranted. When unapproved parts are confirmed that are likely to exist on other products or aircraft of the same or similar design or are being used in other facilities, the information is used as a basis for an aviation industry alert or notification. Alerts are used to inform industry of situations essential to the prevention of accidents. If the information had not been collected, the consequence to the aviation community would be the inability to determine whether or not unapproved parts are being offered for sale or use for installation on type-certificated products.

Procedures and processes relating to the SUP program and associated reports are found in FAA Order 8120.16A,
