The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your

### II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized as follows.

1. *The title of the information collection*: Collection of Research Code Non-Disclosure Agreement Information.
2. *OMB approval number*: 3150–0240.
3. *Type of submission*: Extension.
4. *The form number, if applicable*: Not applicable.
5. *How often the collection is required or requested*: The collection is required every time an NRC developed code is requested by users.
6. *Who will be required or asked to respond*: Users of the code from domestic and foreign licensees, universities, corporations, and members of the public, as well as foreign technical support organizations.
7. *The estimated number of annual responses*: 962.
8. *The estimated number of annual respondents*: 962.
9. *The estimated number of hours needed annually to comply with the information collection requirement or request*: 962.

10. *Abstract*: This information collection request is a non-disclosure agreement (NDA) used for domestic and foreign entities to obtain and use the NRC's nuclear safety analytical computer codes. NRC develops and uses computer codes to independently model and evaluate safety issues associated with the licensed use of radioactive materials. As a global leader in nuclear regulatory research and safety assessment, NRC is frequently approached by domestic and international organizations requesting copies of NRC computer codes. In general, to obtain an NRC code an

individual or organization first agrees to not redistribute the code (*i.e.*, non-disclosure) through an NDA. The NDA also imposes terms and conditions for code use, and requires notification to NRC of code errors, code modifications, and updated user information. An officially signed and executed NDA of users agreeing to the terms and conditions is current NRC practice for access to NRC-developed computer codes. Once the NDA has been signed, received, reviewed, and accepted, the requesting individual or organization is given access to the requested code. The information collection enables the NRC to ensure that proper procedures and agreements are in place to guide the distribution and use of these codes according to NRC and U.S. Government policies and international agreements such as import-export restrictions and intellectual property rights. Further information collection on code errors and modifications by code users permits NRC to maintain control and quality of its codes in a timely and efficient manner.

### III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility? Please explain your answer.

2. Is the estimate of the burden of the information collection accurate? Please explain your answer.

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?
