

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Written comments and recommendations for this information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function and entering either the title of the information collection or the OMB Control Number [1121–0381]. This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view Department of Justice, information collections currently under review by OMB.

DOJ seeks PRA authorization for this information collection for two (2) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOJ notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Overview of This Information Collection

1. *Type of Information Collection:* Revision to currently approved collection.

2. *Title of the Form/Collection:* Juvenile Facility Census Program (JFCP).

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* The form numbers are CJ–14 (Youth Characteristics Module) and CJ–15 (Facility Operations Module). The applicable components within the Department of Justice are the National Institute of Justice and the Office of Juvenile Justice and Delinquency Prevention, in the Office of Justice Programs.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* State, local and tribal governments, individuals or households, and Private Sector-for or not for profit institutions.

Abstract: This request for clearance of the Juvenile Facility Census Program (JFCP) will combine two previously, separately cleared data collections: the Census of Juveniles in Residential Placement (CJRP, OMB # 1121–0218)

and the Juvenile Residential Facility Census (JRFC, OMB # 1121–0219). The JFCP collects information from all secure and nonsecure residential placement facilities that house persons younger than age 21 who are being held as a result of some contact with the juvenile justice system for a law violation. This encompasses both status offenses and delinquency offenses and includes youth who are either temporarily detained by the court or committed after adjudication for an offense. The JFCP consolidates the content of the CJRP and JRFC into a single, unified program. It collects general information on facility characteristics and the number of youth housed, and includes two rotating content modules that are administered separately during a two-year collection cycle: the Youth Population module and the Facility Operations module. The Youth Population module collects detailed information on individual youth housed in facilities, including demographic details, placement characteristics, and length of stay. The Facility Operations module collects information on resident services, facility features, and operations. The information gathered in these national collections will be used in published reports and statistics. The reports will be made available to the U.S. Congress, Executive Office of the President, practitioners, researchers, students, the media, others interested in juvenile residential facilities, and the general public via the OJP agency websites. The two data collections are being consolidated to attain cost savings and reduce respondent burden.

5. *Obligation to Respond:* Voluntary.

6. *Total Estimated Number of Respondents:* The total estimated respondents is 1,636 for each module for each year.

7. *Estimated Time per Respondent:* It takes an average of 6 hours to complete the JFCP. The total burden is 9,816, including the two rotating content modules that are administered separately during a two-year collection cycle. The Youth Characteristics module takes an average of 4 hours to complete. The total burden for the Youth Characteristics module is 6,544 hours. The Facility Operations module takes an average of 2 hours to complete. The total burden for the Facility Operations module is 3,272 hours.

8. *Frequency:* The JFCP is a biennial data collection with two content modules administered separately during a two-year collection cycle.

9. *Total Estimated Annual Time Burden:* The average annual burden is

4,908 or 9,816 total hours for the two-year collection cycle.

10. *Total Estimated Annual Other Costs Burden:* The estimated annual cost for JFCP is \$1,142,115. The estimated cost for one collection cycle is \$2,284,230.

BILLING CODE 4410–18–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 99902080; NRC–2025–1171]

Atomic Alchemy Operators LLC; VIPR Idaho LLC; Construction Permit Application

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; receipt.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is providing public notice of receipt and availability for the first part of a construction permit application for a four-unit reactor facility from Atomic Alchemy Inc. on behalf of Atomic Alchemy Operators LLC and VIPR Idaho LLC. The first part of the construction permit application was received on September 12, 2025.

DATES: November 28, 2025.

ADDRESSES: Please refer to Docket ID NRC–2025–1171 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking website:* Go to <https://www.regulations.gov> and search for Docket ID NRC–2025–1171. Address questions about Docket IDs in *Regulations.gov* to Bridget Curran; telephone: 301–415–1003; email: Bridget.Curran@nrc.gov. For technical questions, contact the individual listed in the “For Further Information Contact” section of this document.

- *NRC’s Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at

<https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "Begin ADAMS Public Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, at 301-415-4737, or by email to PDR.Resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.

- **NRC's PDR:** The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1-800-397-4209 or 301-415-4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Linh Tran, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-4103; email: Linh.Tran@nrc.gov.

I. Discussion

On September 12, 2025, Atomic Alchemy Inc., on behalf of Atomic Alchemy Operators LLC and VIPR Idaho LLC, transmitted to the NRC the first part of an application, pursuant to section 103 of the Atomic Energy Act of 1954, as amended, and part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), "Domestic Licensing of Production and Utilization Facilities," for a construction permit for a four-unit, non-power, light-water-cooled, pool-type Versatile Isotope Production Reactor (VIPR) facility to be located at the Idaho National Laboratory desert site, in Bingham County, Idaho. Each VIPR unit utilizes low-enriched fuel and contains irradiation positions for radiating targets. The VIPR units and related processing hot cells and target fabrication are referred to as the Meitner-1 facility.

As part of the construction permit application, Atomic Alchemy Inc., on behalf of Atomic Alchemy Operators LLC and VIPR Idaho LLC, requested an exemption from certain requirements of 10 CFR 2.101(a)(5) that would allow the submission of the second part of the application, the environmental report, within six months of the first part.

The first part of the construction permit application and the exemption request are available in ADAMS under Accession Nos. ML25255A199 (package) and ML25255A203, respectively.

The NRC staff is currently reviewing the exemption request and undertaking its acceptance review of the first part of

the construction permit application. If the exemption request is granted and the application is accepted for docketing, a subsequent **Federal Register** notice will be issued that addresses the acceptability of the first part of the application for docketing and provisions for participation of the public in the permitting process.

A **Federal Register** notice of receipt and availability for the second part of the construction permit application will be issued after the NRC receives the second part of the application. If the second part of the application is accepted for docketing, a subsequent **Federal Register** notice will be issued that addresses the acceptability of the second part of the application for docketing and provisions for participation of the public in the permitting process.

Dated: November 24, 2025.

For the Nuclear Regulatory Commission.

Jeffrey Rady,

Chief, Non-Power Production and Utilization Facilities Licensing Branch, Division of Advanced Reactors and Non-Power Production and Utilization Facilities, Office of Nuclear Reactor Regulation.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-608; NRC-2021-0140]

SHINE Technologies, LLC; SHINE Medical Isotope Production Facility; Environmental Assessment and Finding of No Significant Impact

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an environmental assessment (EA) and finding of no significant impact (FONSI) regarding the SHINE Technologies, LLC (SHINE, the licensee) request to amend Construction Permit No. CPMIF-001 for the SHINE Medical Isotope Production Facility (SHINE facility) in Rock County, Wisconsin. The amendment request seeks NRC approval to extend the latest date for completion of the construction of the SHINE facility from December 31, 2025, to December 31, 2029.

DATES: The EA and FONSI referenced in this document are available on November 28, 2025.

ADDRESSES: Please refer to Docket ID NRC-2021-0140 when contacting the NRC about the availability of

information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- **Federal Rulemaking Website:** Go to <https://www.regulations.gov> and search for Docket ID NRC-2021-0140. SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering issuance of an amendment to Construction Permit No. CPMIF-001, issued to SHINE for the construction of the SHINE facility in Rock County, Wisconsin. SHINE requested the amendment by letter dated August 14, 2025, in accordance with section 50.90 of title 10 of the *Code of Federal Regulations* (10 CFR), "Application for amendment of license, construction permit, or early site permit," and 10 CFR 50.55(b). The amendment would extend the latest date for completion of the construction of the SHINE facility from December 31, 2025, to December 31, 2029.

In accordance with 10 CFR 51.21, "Criteria for and identification of
