

Title: Safety Standard for Clothing Storage Units.

OMB Number: 3041–0191.

Type of Review: Renewal of collection.

Frequency of Response: On occasion.

Affected Public: Manufacturers and importers of clothing storage units.

General Description of Collection: Pursuant to 15 U.S.C. 2056f, CPSC promulgated a consumer product safety standard to protect against tip-over of clothing storage units (CSUs). 16 CFR part 1261. That standard incorporates by reference ASTM F2057–23, *Standard Safety Specification for Clothing Storage Units*. Id. 1261.2. A CSU is defined as a “furniture item with drawers and/or hinged doors intended for the storage of clothing typical with bedroom furniture.” Section 3.1.3, ASTM F2057–23. The standard’s requirements include warning labels that contain certain statements and pictograms. These requirements fall within the definition of “collection of information,” as defined in 44 U.S.C. 3502(3).

Identification and labeling requirements provide information to consumers and regulators needed to locate and recall noncomplying products. Identification and labeling requirements include content such as the name and address of the manufacturer. In addition, CSUs must contain warning labels. Warning labels or markings provide information to consumers on hazards and risks associated with product use. The CSU warning label must state: “Children have died from furniture tipover.” Section 10.2.3.1, ASTM F2057–23.

Estimated Number of Respondents: CPSC estimates that approximately 2,122 respondents will design and update the CSU label annually.¹ CPSC estimates that there are approximately 20,103,360 CSU units that will need to be labeled annually.

Estimated Time per Response: The burden associated with the standard includes time spent updating/designing the labeling or marking for a CSU model and time spent attaching the label to a CSU. CPSC estimates that it could take an hour to update/design the labeling or marking for a CSU model. CPSC estimates it could take 0.06 minutes (3.6

seconds or 1,000 labels per hour) to attach the label to the CSU.

Total Estimated Annual Burden: CPSC estimates that it could take an hour to update/design the labeling or marking for a CSU model, therefore, the annual burden is 2,122 hours (based on 2,122 respondents). CPSC estimates that attaching the label to CSUs would amount to an annual burden of 20,103 hours [(0.06 min × 20,103,360 CSUs)/60 mins per hour]. The total estimated annual burden is 22,225 hours.

Total Estimated Annual Cost to Respondents: The total compensation cost per hour worked for private industry workers in goods-producing industries was \$47.00 (March 2025, Table 4, https://www.bls.gov/news.release/archives/ecec_06132025.pdf). Based on this analysis, CPSC estimates that the labor cost of respondent burden is approximately \$1 million annually [(2,122 hours + 20,103 hours) × \$47.00 per hour = \$1,044,575].

In addition to the labor burden costs addressed above, the labeling requirement imposes additional annualized costs. These costs include capital costs for adhesive paper used for each label to be placed on the CSUs. CPSC estimates the cost of the printed label will be about \$0.01. Therefore, the total cost of materials to industry would be about \$200,000 per year (\$0.01 × 20,103,360 units = \$201,033.60).

Request for Comments: The Commission solicits written comments from all interested persons about the proposed collection of information. The Commission specifically solicits information relevant to the following topics:

- whether the collection of information described above is necessary for the proper performance of the Commission’s functions, including whether the information would have practical utility;
- whether the estimated burden of the proposed collection of information is accurate;
- whether the quality, utility, and clarity of the information to be collected could be enhanced; and
- whether the burden imposed by the collection of information could be minimized by use of automated, electronic or other technological collection techniques, or other forms of information technology.

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355–01–P

U.S. INTERNATIONAL DEVELOPMENT FINANCE CORPORATION

Notice of Public Hearing

AGENCY: U.S. International Development Finance Corporation.

ACTION: Announcement of public hearing.

SUMMARY: The Board of Directors of U.S. International Development Finance Corporation (DFC), in accordance with the Better Utilization of Investments Leading to Development (BUILD) Act of 2018, will hold a public hearing to provide an opportunity for stakeholders to present their views. Those wishing to attend, present at, or submit a written statement to the Board prior to the public hearing must provide advance notice to the agency as detailed below.

DATES: 1:00 p.m. EST, Friday, December 12, 2025.

ADDRESSES: The public hearing will take place virtually. Access information will be provided at the time of attendee registration.

Registration: To attend, present at, or submit a written statement to the Board prior to the public hearing, individuals must notify DFC Corporate Secretary Heather Carroll at corporate.secretary@dfc.gov by 5:00 p.m. EST, Friday, December 5, 2025.

Notices of intent to attend or present at the public hearing must include the individual’s name, title, organization, address, email address, phone number, and a concise summary of the subject matter to be presented. Oral presentations may not exceed five minutes and may be reduced proportionately, if necessary, to afford all participants an opportunity to be heard.

Written statements submitted to the Board prior to the public hearing must include the individual’s name, title, organization, address, email address, and phone number. Statements must be typewritten, double-spaced, and less than ten pages in length.

Lisa Wischkaemper,

Administrative Counsel, Office of the General Counsel.
