SUPPLEMENTARY INFORMATION:

Proposed Project

The CAHPS Home and Community-Based Services Survey (HCBS-CAHPS Survey) is the first cross-disability survey of home and community-based service beneficiaries' experience receiving long-term services and supports. It is designed to facilitate comparisons across state Medicaid HCBS programs throughout the country that target adults with disabilities, e.g., including older adults, individuals with physical disabilities, persons with developmental or intellectual disabilities, those with acquired brain injury and persons with severe mental illness.

The HCBS-CAHPS Database serves as a primary source of data available to states, agency programs and researchers to help answer important questions related to beneficiary experiences. AHRQ, through its contractor, collects and make available de-identified survey data, enabling HCBS programs to identify areas where quality can be improved.

The HCBS-CAHPS Database supports AHRQ's goals of promoting improvements in the quality and patient-centeredness of health care in home or community-based care settings.

The HCBS-CAHPS Survey was developed by the Centers for Medicare & Medicaid Services (CMS) for voluntary use by state Medicaid programs, including both fee-for-service HCBS programs as well as managed long-term services and supports (MLTSS) programs. States with adequate sample sizes may consider using survey metrics in value-based purchasing initiatives.

This research seeks to answer the following questions:

1. What are the key drivers of patient experience in HCBS programs?
2. How do beneficiary experiences with HCBS vary across states and program types?
